The Art Annual for 1884 (Virtue and Co.) consists of a monogram, by Mrs. A. Lang, on "The Life and Work of Sir F. Leighton," with admirable illustrations of the best examples of the President's phases of artistic development, which are well worthy of the engraver's art. To our fancy, as a study of muscular young manhood, "The Slinger," exhibited in 1875, has never been excelled by the master whose tendency to run into 7-ft. high womankind seems to have gathered strength as he grows older. "Electra" must be at least 8 ft. high; but in the beautiful "Procession of the Madonna" there is not a trace of exaggeration in the figures. On the whole, the *Annual* is exceedingly interesting and valuable, and the price at which it is published places it within the reach of owners of moderately-filled purses.

Messrs. Gale and Polden, of Chichester, have published a very handsome engraving, from drawings by Cockburn, of the various uniforms of the officers and men of the 6th Foot from 1732 to 1884. The figures are rather eccentric in attitude, but the drawing is correct and spirited, albeit the gallant 6th seem to have been favoured with an unusual number of gentlemen whose "legs were what the regiment called bandy oh!" The uniforms are coloured, and, as a regimental record, the plate is very interesting. On the whole, we prefer the uniform (undress) of 1857.

THE AFGHAN FRONTIER COMMISSION.

Telegraphing from Kushan on the 22nd inst., *viâ* Meshed, the special correspondent of the *Daily News* with the Afghan Frontier Commission says:—"The principal part of the camp moves from this place on the 24th to Chahar Shamba, on the direct road from Herat to Maimunneh, 34 miles west of the latter place. Winter quarters will be established there. Kibitkas are to be constructed for the men and horses. Sir Peter Lumsden meanwhile proceeds with a small escort to visit the Governor of Pendjes, in order to calm the excitement in that region produced by the Russian advances. Although the Ameer saw no objection to the Commission wintering at Herat or elsewhere, it was thought more desirable to choose a spot nearer the frontier, where it would be easier to collect information. The troops and officers are all in good health and condition."

John Pearce, gunner's mate, of the Vernon; G. H. Goodall, bandsman, and Charles Priddis, private R.M.L.I., of the Duke of Wellington; James Jackson, engine-room artificer, of the Hecla; Edward Cole, stoker, of the Excellent; John Hickish, yeoman of signals, of H.M.'s yacht Victoria and Albert; George Avant, boatswain's mate, of the Audacious; Charles Wood, captain's coxswain, of the Vigilant; James Johns, leading stoker, of the Northumberland; Thomas Cork, chief boatman, of the Penelope; W. A. W. Lamb, ship's corporal, 1st class, of the Brilliant; Arthur Swayne, coxswain, 2nd class, of the Inflexible; Edwin Henry Leigh, private 17th Compy. R.M.L.I.; and Henry Wildbone, quartermaster-serjeant 44th Compy. R.M.L.I.; George W. Hearn, stoker, of the Asia; and William J. Woodward, boatman, of the Coastguard, have been awarded the good-conduct and long-service medals.

The whole of the waggons, carts, trucks, and other vehicles required for use in Chatham Dockyard, are to be supplied under contract, and not made in the establishment.

The Ruby, which has been under repair since March, is ordered to be ready for foreign service by Dec. 30. She is also to have her armament increased by an equipment of machine-guns.

A party from the Cambridge has been selected to form a class of instructors on board the Defiance, fitting out at Devonport for a torpedo school of instruction in St. German's lake.

The *Morning Post* says:—"The German military authorities have resolved to introduce an important change in the equipment of all the cavalry. Henceforth, carbines are to be carried slung across the back, instead of in a leather case over the right thigh; and, furthermore, all sabres are to be suspended from the saddle instead of being buckled to the waistband. The high-peaked Hungarian saddle is to be discarded in favour of a lighter and more convenient one, somewhat resembling the English hunting pattern; while the burden of both horse and man is to be very considerably lightened. For example, two spare horse-shoes, a fore and hind one, will henceforth be taken into the field, instead of four, and the kit of the troopers is to be much reduced. The idea at the bottom of the reform is that all the cavalry must in future be trained more than ever to act as infantry, as may be inferred from the fact that the carbine, and not the sabre, is the weapon that will remain inseparable from its owner."

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. Laurance, F.S.S., Oculist Optician, 1a Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

Summary of Events.

November 23.—Lord Strathnairn visited his regiment, the Blues, at Windsor, and attended church parade.

November 25.—Sir H. Stewart and Staff, accompanied by the Mounted Infantry, left Dongola for Handak, after the latter had been inspected by Lord Wolseley.

November 26.—Lecture by Sir E. J. Reed at Royal United Service Institution, on the Navy, and the steps to be adopted for its increase and improvement. The Guards' Camel Corps arrived at Dongola, and, after resting the night, went on to meet the mounted force at Handouk.

November 27.—Discussion of Sir E. J. Reed's lecture at Royal United Service Institution.—H.M.S. Malabar left Portsmouth for India with Infantry drafts.

Obituary.

Admiral James Burney, of Teddington, who died lately at the age of 91, was a son of the late Dr. Burney, of Gosport, Hants, and entered the Navy in 1807 as an ordinary on board the Puissant. He was afterwards, as midshipman, transferred to the Warspite, in which vessel he was employed on the North Sea and Channel stations. From 1809 till 1814 he served on board the Arethusa, contributing to the destruction, in 1810, of all the batteries, with the exception of Castro, from St. Sebastian to St. Anders. He was afterwards engaged in the Crocodile off the coast of Portugal; later on he had charge of a signal-station at Fort St. Julian, and while so employed received his first commission, dated July, 1814. The gallant officer was subsequently employed in the East and West Indies; and in 1816, whilst serving in the Comus, was wrecked on a reef of rocks off St. Shott's, Newfoundland. In 1821 he was appointed to the Coastguard, and a few years later was employed successively on the North America and West Indies stations. His subsequent promotions were as follows:—Captain in 1835, retired rear-admiral 1857, vice-admiral 1863, and retired admiral 1867. Admiral Burney married, in 1822, Mary, only daughter of Mr. P. L. Burnett.

Sir James Saumarez Jephson, formerly a commander, R.N., died at Southsea on the 17th inst. He was the second son of the late Sir Richard Mounteney Jephson (formerly one of the Judges of the Admiralty, and sometime Judge-Advocate at Gibraltar, who died in 1824), by marriage with Catherine, daughter of Mr. Joliffe, of Wolverton, in the Isle of Wight. He was born in 1802, was educated at Eton, and became a lieutenant in the Royal Navy in 1824. He was promoted to the rank of commander in 1830, and retired in 1864. Sir James, who succeeded his brother as third baronet in 1870, was for some time secretary to the Carlton Club. He was twice married—first, in 1870, to Miss Elizabeth Huxley; and secondly, in 1871, to Jane Bottrall, widow of Dr. Perston, of the 13th Light Dragoons, of whom he was bereaved in 1879. In default of surviving issue, the baronetcy devolves upon the deceased's half-brother, Major-Gen. Stanhope William Jephson, C.B., who was born in 1810, and married in 1849 Sophia, daughter of Mr. Edward Hawes, of Woodford, Essex.

The Imperial Government has ordered two 24-pounder guns to be placed on Sambro Island in order to furnish the means of warning vessels from the coast.

It is reported that a Clyde shipbuilding firm have received the designs for two more men-of-war, but the type is not mentioned.

It was officially announced the other day that the plans are in hand at Woolwich for a 104-ton breech-loading gun, with which one of the ships of the "Admiral" class is to be armed—probably somewhere about the year 1890. Herr Krupp has just cast at Essen a 130-ton gun for the Italian Navy. If, when the Italians first mounted a 100-ton gun we had immediately brought out one of 200 tons, the probability is that the challenge would have not been repeated. In a game of mere brag the player with the longest purse and the most resolution may make a certainty of winning if he plays properly; but the way the Admiralty go on only prolongs the struggle indefinitely.—*Truth.*

Count Bylandt-Rheyet, the Austrian War Minister, celebrated on Sunday the completion of the fiftieth year of his military service. The Emperor sent him an autograph letter of congratulation on the occasion. The Emperor and the Archdukes also called, and personally congratulated the War Minister.

The Calcutta correspondent of the *Times* telegraphs on the 24th inst.:—"This afternoon the Lieutenant-Governor formally opened the Soldiers' Industrial Exhibition, in the presence of a large number of spectators. The proceedings commenced with the singing of an opening chorus, after which Gen. Wilkinson, commanding the Presidency district, addressed the audience. He gave a short history of the military industrial exhibitions, stating that the movement had been initiated by Sir Hugh Rose, and that the first exhibition had been held at Mean Meer in 1864. The present is a larger affair than any former one. It contains 1,150 exhibits, contributed by 52 corps and departments. The first regimental prize was awarded to the 2nd Batn. Lincolnshire Regt., the second to the 2nd Batn. Devonshire Regt., and the third to the 44th N.I. Mr. Rivers Thompson then delivered a short speech. He stated that he had great pleasure in presiding on the occasion, and dwelt on the importance of encouraging soldiers in the practice of useful arts, both as a means of employing their spare time, and as rendering them resourceful and able to earn a livelihood after discharge. He then declared the exhibition open."

Active Service cannot wear out the teeth that are brushed night and morning with Rowland's Odonto, the purest and most fragrant dentifrice ever made. All dentists allow that neither washes nor pastes are as efficacious for polishing the teeth and keeping them sound and white as a pure and non-gritty tooth-powder; such Rowland's Odonto has always proved itself. Ask any dealer in perfumery for Rowland's Odonto, and avoid spurious imitations, theirs being the only original and genuine Odonto.

The Army.

Royal Horse Guards (Blue). Field-Marshal Lord Strathnairn, the colonel of the regt., attended the Church parade at Windsor on Sunday morning, and marched at the head of the regiment to Holy Trinity Church. On returning to the barrack-square he decorated Trooper Macandy with the long-service medal, and afterwards addressed the officers and men. Lord Strathnairn, who is 81 years of age, afterwards lunched with the officers and then returned to London.

5th Dragoon Guards. Major Hemming has passed the higher-standard examination in Hindostanee.

7th Dragoon Guards. Major Creagh is to be seconded from Aug. 26 on appointment to the Staff in India.

4th Hussars. Lieut.-Col. Hutchins, who retired about two and a half years ago as senior capt., has been selected for service with Col. Methuen's Mounted Infantry in Bechuanaland, and has left England for the Cape.

5th Lancers. Mr. C. C. B. White (late troop-serjeant-major) has been presented with a testimonial by the non-commissioned officers and men of the Dalhousie Depôt, on his leaving India for England. The testimonial consisted of a purse of silver and an illuminated address on satin. Col. Craster, commanding, presiding, said how zealous Mr. White had been in his labours amongst the troops. He could not speak too highly of Mr. White and his work.

9th Lancers. Capt. M'Innis has been granted leave to England for 12 months, on private affairs. The Lahore paper says:—"Anglo-Indian society is greatly pleased to find that Lord William Beresford, as Military Secretary to Lord Dufferin, will continue to be one of its chief ornaments. Any other arrangement would have been looked on as a social calamity; and our coming Viceroy may be congratulated on the prescience which led him to secure the services of a secretary who has ever been so deservedly popular. The telegram Lord William received from Lord Dufferin is said to have run as follows:—'Can I induce you to take the post of Military Secretary?'"

13th Hussars. The *Times of India* of Nov. 7 has the following:—"A telegram was received from the home authorities on Wednesday, directing the Serapis to proceed *viâ* the Cape and to call at Natal, in order that the 13th Hussars may be landed, should their services be required in connection with the measures determined upon to enforce the provisions of the Transvaal Convention. It has been decided, in the event of the regiment being utilised, to convert them for the time being into mounted infantry. The commandant of the 13th Hussars is Col. Sir Baker Russell, whose South African experience will doubtless prove very useful should there be any fighting. Sir Baker Russell, it will be remembered, accompanied Lord (then Sir Garnet) Wolseley to the Cape in 1879, and commanded the forces in the operations against Sekukuni, resulting in the storming of the stronghold and subjugation of the tribe. Sir Baker Russell obtained his K.C.M.G. for his distinguished services in South Africa. The Serapis, according to present arrangements, leaves Bombay on the 11th."

15th Hussars. The following is an extract from the *Bombay Gazette*:—"The following appointment is made, with effect from the 24th idem:—Col. G. Luck, C.B., half-pay, late 15th Hussars, to the Brigade Staff of the Army, with the rank of brigadier-general, in succession to Brigdr.-Gen. G. T. Brice, whose tenure of command expired on Aug. 28, 1884." Lieut. and Adjt. Gordon left England on Wednesday for the Cape as adjt. of Methuen's Horse.

ROYAL ARTILLERY.

Capt. E. S. May has been appointed adjutant to the Royal Artillery, Gwalior District, during the absence of Capt. F. W. Radcliffe on leave in England.

Capt. C. J. Price, 3-1 Scottish Division, has intimated his intention of retiring from the service.

It was stated the other day that Capt. Willoughby, R.A., Commissary of Ordnance at Rawul Pindee, was about to retire from the service. This statement is quite groundless. Capt. Willoughby is resigning his appointment, and returns to England shortly, to join the School of Gunnery at Shoeburyness.

The *Pioneer* states that, acting upon urgent medical advice, Col. Chapman, C.B., Military Secretary to the Commander-in-Chief in India, will proceed to England in February next, and, resigning his appointment, join the home establishment.

Capts. E. C. F. Holland and G. W. Fulton, and Lieuts. S. B. Von Donop and S. C. W. Smith, are on passage home from India in H.M.S. Crocodile.

Capts. D. E. Dewar and H. N. Jervois, and Lieuts. L. H. Ducrat, M. B. Bicknell, R. M. Bond, and G. C. Dowell embarked in the Crocodile at Aden.

The *Times of India* has the following:—"Col. Le Mesurier, commanding the Royal Artillery in the Rawul Pindee division, has assumed command of the Rawul Pindee brigade during the absence on leave of Brigdr.-Gen. T. Gordon. The Lahore paper says that there is something unusual about this, as the officer in question is on the staff of the divisional general, and has nothing whatever to do with the brigade. The question was, however, referred to Army head-quarters, and it was settled that he should take command. At home, officers commanding in the Royal Artillery are colonels on the staff, and would no more take command of the brigade than the assistant-adjutant-general or assistant-quartermaster-general would."

Capt. G. R. Moore, 4th Brig., is said to be a candidate for the Pay Department.

ROYAL ENGINEERS.

Major W. Cumming officiates as Secretary to the Agent Governor-General, Rajputana, in the Public Works Department.

Lieut.-Col. W. Wallace officiates as consulting engineer for guaranteed railways at Lahore.

Major E. Trevor, on return to India from furlough, is re-appointed examiner of accounts and military works.

Major-Gen. Cunningham, C.S.I., is about to retire from the head of the Archæological Survey of India.

Coldstream Guards. Lieuts. Pleydell-Bouverie and the Hon. A. G. C. Fortescue left England on Wednesday for the Cape for service with Methuen's Horse.

Scots Guards. Lieut. Drummond left England on Thursday for the Cape for service with Methuen's Horse.

Queen's, Royal West Surrey Regiment (2nd). The 2nd Batn. left Subathu on Oct. 20, *en route* to Cawnpore, where it is due on the 5th prox.

King's Own, Royal Lancaster Regiment (4th). Capt. Gawne, 1st Batn., left England on Wednesday for the Cape for service with Methuen's Horse.

Northumberland Fusiliers (5th). The 2nd Batn. is expected to reach Meean Meer from Chakrata on the 3rd prox.

Royal Warwickshire Regiment (6th). Lieut. Wingate is a candidate for the Indian S.C., and has been appointed to the 44th Bengal N.I., on probation.

Royal Fusiliers (7th). Capt. Dease, Lieuts. Rhodes and Shipley, and 100 men, 2nd Batn., left in the Malabar on Thursday for India. Major Meare's term of service as adjt. of the 2nd Tower Hamlets R.V. expires on the 3rd prox.

King's, Liverpool Regiment (8th). Lieut. Cuppage is a candidate for the Indian S.C., and has been appointed to the 5th Bengal N.I., on probation.

Norfolk Regiment (9th). Lieuts. Baker and Boileau and 197 men, 2nd Batn., left for India on Thursday in the Malabar.

West Yorkshire Regiment (14th). Capt. Penn, 1st Batn., has been selected for the adjutancy of the 18th Lancashire R.V.C. Lieut. Yule, 2nd Batn., has been granted leave from India to England for 12 months, on private affairs.

Leicestershire Regiment (17th). Lieut. Crocker and 176 men, 2nd Batn., left for India on Thursday in the Malabar. Lieut. Vint, 2nd Batn., is a candidate for the Indian S.C.

Royal Irish Regiment (18th). Brevet Major Daubeny, 2nd Batn., has been appointed adjt. of the 2nd Tower Hamlets R.V.

Yorkshire Regiment (19th). The 1st Batn. in Egypt is expected to be ordered up the Nile.

Lancashire Fusiliers (20th). Mr. G. Banks, late qrmr.-serjt. of the 2nd Batn.—from its formation in 1858 until his discharge in 1862—died at Pimlico on the 23rd inst. He was subsequently employed for several years at the Army Clothing Department, Pimlico, under Sir Charles Daubeney. Mr. Banks was much respected by his comrades, and much esteemed by numerous friends.

Royal Scots Fusiliers (21st). Lieut.-Col. Hamilton, Lieuts. Lindsell and De Lisle, and 176 men, 2nd Batn., left England for India on Thursday in the Malabar. The *Bombay Gazette* says:—"The decision has been given with regard to the recent fracas at Wellington between the men of the 104th Regiment, Royal Munster Fusiliers, and the men of the 21st Scots Fusiliers. Wellington being a convalescent depot, men belonging to various regiments are, therefore, congregated together. It would appear that all the other regiments had their April clothing sent up to them, except the 104th Munster Fusiliers, who were obliged to wear khakee clothing on all occasions. The Scots Fusiliers chaffed the Irish Fusiliers about their dirty clothing, and on the night of the 1st ult., things took a serious turn, and the men of the two regiments quarrelled over the matter, the result being a fracas. Sticks and clubs were freely employed, and were flung about the barrack-room. A few of the ringleaders were arrested. A court-martial assembled, and it was thought that the men of the 104th Munster Fusiliers began the affray. Consequently, some of them were sentenced to two years' hard labour, others to 112 days, and others to shorter terms."

Cheshire Regiment (22nd). Lieut. Trevor, a probationer, officiating wing-officer 15th Bengal N.I., is about to be admitted to the Bengal S.C., from July 6, 1883.

South Wales Borderers (24th). Military Staff Clerk H. Kayler, A.P.D., late paymaster-serjeant of the 2nd Batn., has embarked on board the Pembroke Castle on the 25th inst., for service in South Africa.

Cameronians, Scottish Rifles (26th). Lieut. Douglas has vacated his appointment as A.D.C. to Major-Gen. Davis in Egypt, in order to proceed to the front with the Nile Expedition.

Worcestershire Regiment (29th). The Indian Marine troopship Clive sailed from Bombay on the 28th ult. for Kurrachee, with 14 officers, two warrant officers, 307 men, 30 women, 60 children, and 120 followers, *en route* to Quetta. The officers consisted of Lieut.-Col. Ruxton, Major Simpson, Capt. Rainsford, Lieuts. Conyngham, Hardisty, Dawson, Smith, Jacob, Knight, Hardy, Mennie, and Pym, Capt. and Pymr. Fleury, and Surg. Moore.

East Lancashire Regiment (30th). Capt. Watson, Lieuts. Pell and Swinburne, and 104 men left England on Thursday in the Malabar for India.

Dorsetshire Regiment (39th). Capt. and Adjt. Poett left England on Wednesday for the Cape for service with Methuen's Horse.

South Lancashire Regiment (40th). Lieut.-Col. S. W. L. Stretton, formerly of the regiment, died at Southampton on the 22nd inst., aged 92. In early life the deceased officer saw much active service, and was one of the very few remaining veterans who took part in the Peninsular campaign. Descended from an old Nottinghamshire family, he first joined the Nottingham Militia in 1810 as ensign, and two years later was appointed to the 68th L.I., with which he served in the second Peninsular campaign of 1812-13. He was wounded at the battle of Vittoria by two gunshots. In 1825 he was promoted to an unattached company and appointed to the 64th Regt., became major in 1831, lieut.-col. in 1842, and in 1848 exchanged into the 40th Foot. He retired in 1852, but was three years afterwards appointed to the command of the Hampshire Artillery Militia, which he held until 1868, when he retired at the age of 75 years. The following officers have proceeded with head-quarters to Aden, viz.:—Lieut.-Col. Brook; Majors Whitehead and Moberly; Capts. Burroughs and Cavaye; Lieuts. Jacob (adjt.), Lamb, Foote, Shekleton, Smythies, Arbuthnot, Roome, Barrow, Commeline, Hartigan, and Prendergast; Major and Pymr. Fenton, and Qrmr. Burne. The regiment gave about 130 volunteers to various regiments in India before its departure for Aden. Besides these, there were over 90 men who accepted the 120 rs. bounty to prolong their service in India, and 138 time-expired men, and a few invalids who remained behind at Peshawur, so that altogether it lost some 358 men.

Welsh Regiment (41st). Lieut.-Col. Tulloch, C.B., embarks for the Cape at an early date to assume command.

Essex Regiment (44th). The following officers are *en route* from Aden to England in H.M.S. Crocodile, viz.:—Lieut.-Col. Rennie; Majors Bald, Hill, and Morrell; Capts. Wood, Massy, and Watson; Lieuts. Nason, Spencer, Guilding (adjt.), Brabazon, Hockin, Hopkins, Copeman, and Power; Capt. and Qrmr. Tempest. The court-martial at Aden, over which Col. McCausland presided, has concluded its trial of Lieut. Power on the grave charge of assaulting his superior officer, Col. Rennie, under circumstances already detailed. Mr. A. F. Turner, of Bombay, who was retained by the prisoner as his "friend," has returned from Aden to Bombay. A copy of the proceedings, which were conducted in strict privacy, and the documents, with the finding of the court, have been forwarded to Poonah for confirmation.

Loyal North Lancashire Regiment (47th). Lieut. Murray is ordered home from India for depôt duty. Lieut. Faulknor has been granted leave from India to England for six months, on medical certificate.

ROYAL MARINES.

Major T. E. Hungerford, R.M.L.I., has been appointed paymaster to the Royal Marine Battalion at Suakim, vice Gritton, invalided to England.

Major E. H. Moore, R.M.A., has been directed to hold himself in readiness to embark in the Minotaur to relieve Major F. H. Poore, R.M.A., required to attend on H.R.H. the Duke of Edinburgh as equerry.

King's Light Infantry, South Yorkshire Regiment (51st). Major Morrison, Lieuts. Leicester and Warren, and 168 men left for India on Thursday in the Malabar.

Dorsetshire Regiment (54th). Referring to the resignation of Col. Chapman, C.B., Military Secretary to the Commander-in-Chief in India, the *Pioneer* says:—"Public expectation would naturally point to Lieut.-Col. Gosset as his successor, but it seems more than probable that before February next Col. Gosset will have succeeded to the command of the Dorsetshire Regt., by Col. Hughes, now on sick-leave, being unable to return." At a mess meeting held at Cherat on the 14th ult. by Lieut.-Col. Newbolt and the officers, the following resolutions were unanimously agreed to:—1. That a territorial agency be established at Dorchester for the employment in civil life of Reserve and discharged soldiers. 2. That the officer commanding the Regimental District be asked to undertake the formation of the agency. 3. That the officers commanding the Dorset Yeomanry, Militia, and Volunteers be invited to form the county committee together with the senior officer of each Line battalion serving at the depôt, one of whom should be on the working committee under the presidentship of the officer commanding the Regimental District, with power to add to their number any county residents. 4. That the officers commanding the service battalions be *ex-officio* members of the committee. 5. That the Lord-Lieutenant and gentlemen of influence and employers of labour in the county be asked to become patrons. 6. As it may be necessary that a fund for necessary expenses (printing, &c.) should be formed, that officers should contribute a sum not exceeding one day's English pay yearly. 7. That only men of good character be allowed to register their names at the agency. 8. That corrected lists of men registered in the agency, giving full particulars as to their trade or calling, be sent monthly to the local newspapers, to employers of labour, and the parochial clergy, with a request that the last-named will place the list on the church-doors, or other conspicuous place. A notification to the effect that only men with good characters as soldiers are registered, to accompany the lists circulated. 9. That the registration of men belonging to the county should not be restricted to men serving in the Territorial Regiment, but be open to all Dorset men of good character discharged from the Army generally, and who are desirous of settling in Dorsetshire. 10. That other similar regimental agencies should be asked to give the privilege to men of the Dorset Regiment of registering their names should they wish to settle in counties other than Dorsetshire. 11. That lists of men for discharge or transfer to the Reserve for the ensuing year be prepared by the adjutants of the service battalions at the end of each year and forwarded to the depôt for registration. 12. That a copy of those proceedings be sent to the British depôt and to the 1st Battalion, and that the officer commanding the depôt be requested to form the committee and distribute the circulars.

Border Regiment (55th). Capt. Hughes has been selected for the adjutancy of the 1st Westmoreland R.V., in succession to Major Cargill, whose term of service expired on the 27th inst.

King's Royal Rifle Corps (60th). Lieut. Beach, 4th Batn., has been granted leave from India to England for 15 months, and Lieut. St. Leger for three months, on private affairs. Lieut. Browning sailed for India on Thursday, to join the 4th Batn. at Ferozepore.

Durham Light Infantry (68th). Col. Tucker is on passage home from India in H.M.S. Crocodile, on vacating the command. Lieut. Gardiner has resigned his probationary appointment for the Indian S.C., and rejoins his regiment. Lieut. Wells died at Allahabad on the 21st inst. The deceased entered the Army from the Militia in 1880, and became lieut. in 1881.

Seaforth Highlanders (78th). Lieut. Macpherson has been permitted to resign his probationary appointment for the Indian S.C., and has been granted leave to England for 15 months, on urgent private affairs.

Cameron Highlanders (79th). Lieut. Davidson has been appointed aide-de-camp to Major-Gen. J. Davis, commanding a brigade in Egypt.

South Lancashire Regiment (82nd). The *Liverpool Courier* says:—"A rumour of a sensational character is going the round of Volunteer circles in Liverpool to the effect that Capt. Flood, adjutant of the 18th L.R.V. (Liverpool Irish), to which he was gazetted in 1881, has been called upon by the Government to resign his commission. The facts alleged are that Capt. Flood invited the regimental band on a practice night to play 'God save Ireland,' and that this was sung with drum accompaniment. So annoyed were the War-Office authorities with this breach of military etiquette that Capt. Flood received his dismissal. We have authority for saying that this allegation does not happen to be strictly true. It is true that Capt. Flood has resigned his appointment to the regiment; it is also a fact that in doing so he has received from the Government a sum of £1,400. But it is not the fact that he called upon the regimental band to play 'God save Ireland,' an air which is described as expressly intended in certain quarters to supersede the National Anthem. Capt. Flood's resignation has been brought about by matters connected with military discipline, of which the particular allegation which is made the subject of unpleasant rumour is not one."

Royal Irish Fusiliers (87th). Col. Stevenson and Lieut. the Hon. E. B. Stopford have been granted leave from India to England for 12 months, on medical certificate. Lieut. Conran is a candidate for the Indian S.C., and has been appointed to the 5th Bombay N.I., on probation.

Connaught Rangers (88th). Capt. Mann is about to retire.

Sherwood Foresters, Derbyshire Regiment (95th). Major Sparkes has been appointed adjt. of the 7th Surrey R.V.C

Manchester Regiment (96th). Major Barlow, who has lately taken over the duties of Deputy-Assist.-Adjt.-Gen. for Musketry in India, has been posted to Meean Meer. Capt. Nuthall gets the Rawul Pindee Circle. Major O. Loury, formerly of the regiment, and lately adjt. of the Galway Militia, died at Eagle Lodge, Galway, on the 18th inst. Lieuts. Lang and Moore and 82 men left for India on Thursday in the Malabar.

Royal Sussex Regiment (107th). If the 1st Batn., 19th, goes up the Nile, this regiment will proceed from Malta to Egypt.

The Auxiliary Forces.

MILITIA.

3rd Brigade, Cinque Ports Division, Royal Artillery. The annual regimental dinner was held on the 26th inst., at the St. James's Restaurant. The following attended:—Col. Lewis, in the chair; Lieut.-Col. Scobell; Capts. Margary, Rhodes, Vallance, and Pratt; Messrs. A. C. Jeddere-Fisher, H. Jeddere-Fisher, Howard, Peel, St. Clair, and Broadwood.

THE VOLUNTEERS.

The *Globe* says:—"The returns of the Volunteer Force in Scotland for 1884 show very satisfactory results, the total enrolled strength, 47,556 of all arms, being an increase of over 1,500 as compared with the previous year. It has not been denied that the volunteer movement has taken a stronger hold in North Britain than in either England or Wales, and this is proved by a table wherein it is shown that while over Great Britain the percentage of volunteers to the population was as low as ·700, the percentage in Scotland was 1·310. The enrolled strength of the various arms is thus set down:—Volunteer Light Horse Cavalry, 233; Mounted Rifles, 47; Artillery, 9,934; Engineers, 992; and Rifles, 36,350. The maximum establishment is 55,073; efficients, 46,474; non-efficients, 1,082; enrolled, 47,556; proficient officers, 1,524; proficient serjeants, 2,797; officer passed in tactics, 131. The corps having upwards of 1,000 enrolled are the 1st Forfar Artillery, 1,059; 1st Lanark Artillery, 1,255; 1st Dumbarton Rifles, 1,149; Queen's Edinburgh Rifle Brigade, 1,900; 1st Elgin Rifles, 1,069; 2nd Forfar Rifles, 1,029; 1st Inverness, 1,008; 1st Lanark Rifles, 1,497; 3rd ditto, 1,006; 6th ditto, 1,006; 8th ditto, 1,149; 10th ditto, 1,116; and 1st Sutherland, 1,127."

BOOKS, Etc., RECEIVED FOR REVIEW.

Lectures on Agricultural Science, South Kensington (Chapman and Hall, Limited)—Joseph Mazzini (Alexander and Shepheard)—Evolution in History, Language, and Science (Simpkin, Marshall, and Co.)—Holly Leaves, Christmas number of the *Illustrated Sporting and Dramatic News* (Office, *Illustrated Sporting News*)—Calvert's Mechanic's Almanack, 1885 (John Heywood)—The Truth about the Navy and its Coaling Stations (*Pall Mall Gazette*)—Marcus Ward and Co.'s Christmas and New Year Cards (Marcus Ward and Co., Limited)—Ward and Lock's Technical Journal, Part I. The ARMY AND NAVY GAZETTE this week contains four pages extra.

Army & Navy Gazette.
LONDON, SATURDAY, NOVEMBER 29, 1884.

IN referring to the Courts-martial that have just taken place at Devonport upon the Paymaster, ship's steward, and steward's assistant of the *Ganges*, we do not in any way intend to question the fairness of the sentences passed, but from the evidence, we think something may justly be said in favour of an alteration in the existing arrangements on board these training-ships. Not only does it seem that there are additional sets of accounts to be kept in these vessels, but, to a certain extent, it appears from the letter we published last week on the subject, that it is almost impossible, under the present circumstances, for the Paymaster not to trust somewhat to the loyalty of his subordinates—who, of course, it is not in his power to select—or to allow the interests of the boys to suffer in such matters as the quality of the food supplied by the contractors, and the judicious expenditure of their special fund. It would appear also that some four years since the private cash-ledger was transferred—on its becoming complicated—to the Paymaster from an executive officer, while, at the same time, the office staff was reduced. However—although, therefore, the work in these ships has greatly increased of late, and apparently the appointment carries no extra pay—we can quite understand that they are still looked upon by the married men as snug home billets, to be worked by the knowing, as regards hours on board, to their comfort and convenience; and perhaps, as the service is constituted, it would be Quixotic to blame them, or expect otherwise. Yet the fact remains that the Navy must be, not singularly, kept in health by its—in every line—unknown worthies, whose devotion and self-denial would be useless without strength of mind to support them. Nevertheless, is it not somewhat risky trusting in the existence of these generally non-paying and rarely appreciated qualities? It has been suggested that in these ships one accountant, or possibly an executive officer, should be borne exclusively for the boys, and this would, at all events, secure that the interests of the latter were not allowed to be overlooked for other and comparatively less necessary requirements; or the steward might be made more responsible for his special work, with brevet rank as a warrant officer, as in the case of the head schoolmaster; and it seems quite probable that the accounts can be simplified, or even some addition made to the staff of writers that would give more time for that constant supervision of the subordinates which is evidently imperative. We can quite understand also, as our correspondent points out, that if the watching of the steward is carried to a "cat-and-mouse" degree, it is not unlikely that the petty officer is liable to lose his self-respect, and probably the interest he should take in his work, with consequent evil result to the service and himself. It would seem, therefore, that if such can be brought about, some steps should be taken to relieve the Paymaster from certain of the responsibilities, without allowing that delegation of duties which has in this instance been attended with such deplorable results.

* * *

We understand that Lord Wolseley has sent an urgent demand for the immediate despatch to him of nearly 30 subalterns. The authorities are somewhat in the position of Little Bo-peep in reference to her sheep's tails, and don't know where to find them.

The new territorial titles appear to be causing no little confusion in India. According to one of the local papers, the 4th King's Own, stationed at Poona, have been taking part in the Zhob Valley Expedition; and the 1st Battalion, 18th, in Egypt, have been entertaining the Duke and Duchess of Connaught at a hill station in Bengal. These are only examples of the mistakes which are of daily occurrence, and which are causing the Indian newspaper-reading public to regret the day that took Mr. Childers to the War Office to upset the traditions of the British Army.

Deputy-Surgeon-General J. Hendley, C.B., has been appointed Principal Medical Officer at Aldershot.

Lieutenant-Colonel M. S. Bell, V.C., R E., who has been Assistant-Quartermaster-General of the Indian Intelligence Department since May, 1880, succeeds Lieutenant-Colonel W. S. A. Lockhart as Deputy-Quartermaster-General in charge of the Department; Captain P. J. Maitland, Bombay S.C., taking Colonel Bell's place; and Captain E. G. Barrow, Bengal S.C., succeeding Captain Maitland as Deputy-Assistant-Quartermaster-General.

We are in a position to say no officer has yet been selected to succeed General Sir B. Walker as Director of Military Education, though many names have been mentioned.

Lord Hartington in 1867 put his signature, as Chairman, to the Report of the Commissioners on Recruiting in 1867, in which there occurs the following passage:—"The evidence which has been given before us, and the returns in the appendix to our report, all tend to show that during the last two years the number of recruits raised for the Army has not been sufficient to supply the demand. *The deficiency, however, is not such as to create uneasiness, as we think it may be traced to causes which, for the most part, admit of remedies being applied to them.*" (The italics are ours.) Now, if any one desires to understand the breadth and depth of the ocean of change and instability which flows over the War Office mind in regard to the Army, he cannot do better than read the Report of 1867, and compare the recommendations with the measures of 1870 and the recent Warrants and Circulars. There is not a shadow of a pretence for saying that any of the recommendations of the Commissioners of 1867, among whom were Lord Dalhousie, Lord W. Paulet, Sir D. Cameron, Colonel Radcliffe, &c., were carried into effect. They recommended that there should be two periods of service,—one of twelve years for the first period, another of nine years for the second period; they prepared elaborate tables, examined numerous witnesses of the best types, and made weighty and well-considered proposals. In 1870, on the ground that recruiting had utterly broken down, the new system was introduced, without a word of apology or excuse for the neglect of the advice of the Royal Commission.

Colonel Stewart, who left London on Tuesday to join the Afghan Frontier Commission, of which he is a member, has had the opportunity of fitting himself for the duties of his post by a rare exercise of self-denial, devotion to useful knowledge as a traveller, and by special observations of the *modus operandi* of the Russians in Central Asia, conducted, under great difficulties, on the spot, during the operations of Skobeleff against the Turcomans. He proceeds by way of Batoum, Tiflis, Poti, across the Caspian, to the terminus of the new railway to Asterabad, and then travels as best he can to join Sir P. Lumsden, who cannot well begin his field work till February. There is an artist for a pictorial paper, a geologist, and several engineers attached to the little expedition, so that we may expect some interesting and useful information respecting a veritable *terra incognita*, as the territory about the latitude of 36° may be called, for Colonel Stewart and a Russian engineer are the only persons who have traversed it, of recent days, at all events.

Major H. L. Dundas, 15th East Yorkshire Regiment, has been selected to succeed Lieutenant-Colonel C. A. Cuningham, Bombay S.C., as Assistant-Adjutant-General of a division of the Bombay Army.

The principles on which the authorities act in the selection of officers are mysterious in their origin, bases, and application. Sir Beauchamp Walker, an experimented Dragoon, and a soldier of the field rather than of the closet, after a long turn of military diplomacy at Berlin and two campaigns with the Army, to which he was accredited as Attaché (1866 and 1870), was selected as Director-General of Military Education, and it is only justice to say that he did his work remarkably well, as far as executive and initiative could be carried by one in his position, of submissive obedience to the decrees of the Civil Service Commissioners. When he retired there could be no doubt, one would have supposed, respecting his successor, for in Sir Edward Hamley there seemed to be combined every qualification for the office. A practical soldier, too; and gifted in many ways for the post which a certain autocratic disposition and temperament did not at all invalidate; distinguished in the field service from the time he served as an Artillery officer in the Crimea, till he led his division into the heart of the Egyptian Camp at Tel-el-Kebir; an accomplished scholar and writer; the author of the standard work on the operations of war; the former chief of the Staff College; and versed in modern literature. Well, there is Sir E. Hamley, and, if he wished to take the situation, there is certainly no man in the Army who appears so well fitted for it. What are his disqualifications?

Major W. Creagh, 7th Dragoon Guards, who was lately appointed an officiating Deputy-Assistant-Adjutant-General of the Bombay Army, has been confirmed in the appointment, which he will retain for five years.

It would seem as though we were likely to have some more work shortly in Zululand, for an official at Pietermaritzburg, writing to us by last mail, says:—"The state of things in Zululand is becoming deplorable, and nothing but a strong British expedition will put matters straight. The dilly-dallying policy of the Home Government, following upon a settlement which was no settlement at all, has resulted in a total collapse of everything in the shape of government. Those at home who simply obtain their knowledge from the London papers can scarcely conceive how completely the so-called settlement has failed, and how critical the position is at the present moment. You may look forward to some rather startling disclosures in Blue-books shortly."

By the departure of nearly 500 men from three Infantry battalions at Aldershot on Wednesday last for India. The staff at the Camp, equal to the requirements of a force of at least 15,000 men, are now having easy times of it, indeed.

It has been decided, with a view of benefitting the Auxiliary Forces generally, that officers of Militia, Yeomanry, and Volunteers shall in future to all intents and purposes be considered interchangeable,—*i.e.*, that an officer of Volunteers can be transferred or promoted in the Militia without the farce being gone through of his having to resign his commission in one service before entering the other. By this arrangement he will lose his seniority, nothing more. Seeing that this decision will tend to promote the interests of all the different branches of the Auxiliary Forces,—will, in fact, do all good and no harm, it is to be commended.

The question put to the Secretary for War by Mr. Kennard the other evening, with reference to the pay of the Irregular Force for South Africa, was based upon information from the officers engaged in raising the force, that much consternation has been caused among the recruits by Lord Hartington's statement, in reply to Sir George Campbell, that the pay of a "private" was to be only two shillings a day and one shilling deferred pay. It now appears that all the recruits obtained in this country are enlisted as "troopers," and are entitled, therefore, to four shillings a day and one shilling deferred pay. The error in Lord Hartington's answer to Sir G. Campbell's question was inexcusable. If Ministers cannot answer such simple questions properly, how are their replies to others of greater and more pressing importance to be relied upon.

We understand that Colonel Sir C. Ashburnham will retain his Staff appointment as Assistant-Adjutant and Quartermaster-General at Dover, to complete five years' service; hence he retires from the command of the 3rd Battalion, 60th Rifles. Sir Herbert Stewart will be given other employment on his return from Egypt.

The Alexandria correspondent of the *Times* having announced that Zebehr Pasha and his family had been ordered to retire to Alexandria, states that "the order will meet with general approval"—(Zebehr Pasha included?)—"the only wonder being that the authorities did not take the step before;" but as he does not tell us why the step was taken, we are left to conjecture and also to doubt. For what can Zebehr do at Cairo which he cannot do at Alexandria? Be it remembered that it is this Zebehr whom Gordon demanded at Khartoum not once, or twice, or thrice, and it is this man whom he wished to see subsidised and installed in his place as Governor of the Soudan, in the certainty that Zebehr is the only man capable of making head against the Mahdi.

It has been notified that for the period from October 1, 1884, to March 31, 1885, the income-duty of officers will be assessed at the rate of 7d. in the £.

We much regret to say, for the sake of the public service, that Brigadier-General Reilly has found it expedient to tender the resignation of his post at the War Office, in consequence of the state of his health. The phrase, however, in this case, does not mean that General Reilly is in any way suffering from serious illness; but he requires rest and treatment to overcome a troublesome attack, which renders the discharge of the severe and constant duties of his office difficult. The decision has been heard in the War Office with feelings, which will, we are certain, be shared by the regiment and by the service generally.

There is every probability now of the appointment of Chaplain-General of the Forces being filled, as the idea of abolishing the office has met with marked disapproval, not only in the service, but in other influential quarters.

Whilst most Metropolitan Volunteer corps are experiencing the greatest difficulty in obtaining adequate range accommodation, the officers and members of the St. George's Rifles have come forward in a most liberal and praiseworthy manner and subscribed funds sufficient (£600) to secure a range of their own, we believe at Harrow. The necessary money was raised by means of a limited liability company, all the shares being subscribed for by the members of the corps themselves. The St. George's Rifles are to the fore in most things, and in the present instance they certainly have set an example of liberality which is alike creditable to them as a regiment and to the service of which they are a unit.

Major-General Hardinge is recovering from the effects of his accident in the hunting-field; but he had been obliged to go to Pertabghur for change of air. His horse kicked him, and broke two of his ribs.

It is said that the regulations on the subject of old clothing will shortly be considerably modified, it having at length, after much representation, been brought home to the authorities that the present system of disposing of time-expired clothing is not the best in the world, that it is the cause of incessant and voluminous correspondence, and much trouble and annoyance. So much extra labour is caused by these harassing regulations, that it is extremely doubtful if any real saving is in the end effected. Under the system about to be initiated, the soldier will not be called upon to surrender to the State the whole of his time-expired clothing, but will be permitted to retain certain articles for working and fatigue dress, which will become his own property.

As the mounted officers detached from this country to join the Field Force for Bechuanaland have not been permitted to take their horses with them, it has been decided by the War Office that any horses left behind for which these officers have drawn forage, or the allowance in lieu, may continue to be foraged at the public expense, provided that the horses are left with the corps, or, in the case of staff or departmental officers, at the station to which the officer belonged; and that, except as regards the Royal Horse Artillery and Cavalry, the horses are placed at the disposal of the officer commanding for use in the public service. It is to be understood, that in thus allowing the horses left behind to be foraged, the public undertakes no responsibility for their care or safety.

The Navy.

WHITEHALL, Nov. 24, 1884.

[The following notification is substituted for that which appeared in Tuesday's *Gazette*.]

The Queen has been pleased to direct Letters Patent to be passed under the Great Seal of the United Kingdom of Great Britain and Ireland, constituting and appointing the Right Hon. Thomas George, Earl of Northbrook, G.C.S.I.; Admiral the Right Hon. Sir Astley Cooper Key, G.C.B.; Admiral Frederick Beauchamp Paget, Baron Alcester, G.C.B.; Vice-Admiral Thomas Brandreth; Rear-Admiral Sir Frederick William Richards, K.C.B.; William Sproston Caine, Esq.; and George Wightwick Rendel, Esq., to be her Majesty's Commissioners for executing the office of Lord High Admiral of the said United Kingdom of Great Britain and Ireland, and the Dominions, Islands, and Territories thereunto belonging.

ADMIRALTY, Nov. 21, 1884.

Royal Marine Light Infantry.—The second Christian name of Capt. and Brevet Major J. H. Sandwith is "Hartley," and not "Hurtley," as stated in the *Gazette* of Nov. 21.

ADMIRALTY, Nov. 25, 1884.

Royal Marine Light Infantry.—Lieut. G. T. Onslow to be Capt., vice Montgomery, promoted (Sept. 22).

APPOINTMENTS.

Admiral—Augustus Phillimore, to be Commander-in-Chief at Devonport.

Commanders—George L. Atkinson, to the Reindeer; Charles J. Norcock, to the Royal Adelaide, additional, for the Defence.

Staff Commander—James Cole, to the Victoria and Albert.

Lieutenant—John D. Deane, to the Alecto, in command.

Surgeon—William H. Norman, to the Reindeer.

Paymasters—John H. Cleverton, to the Ganges; George Love, to be Secretary to Admiral Phillimore, at Devonport, temporarily.

Engineers—Thomas J. Haddy, to the Vernon; Josiah P. Thomas, to the Triumph; Thomas Welby, to the Firefly.

Assistant-Engineer—George W. Henderson, to the Malabar.

Carpenter—John S. Bowden, to the Alexandra.

COASTGUARD.

Surgeons and Agents—Mr. Augustus W. Dalby, at Torquay and Babbicombe; Mr. Julius Cæsar, at Scrapsgate, East End Lane, Leysdown, and Shellness.

Chief Boatman—Herbert Legg, Sandgate, to be chief boatman-in-charge, Lydd, vice Hughes, pensioned.

Commissioned Boatmen—Jeremiah Dempsey, Lamlash, to be chief boatman, Gourock, vice Pierpoint, promoted; John McLoone, Ballycastle, to be chief boatman, Strangford, vice John Hinke, pensioned; John Mitson, Mill Cove, to be chief boatman, Union Hall, vice George White, promoted; John Love, Carrickfergus, to be chief boatman, Carnsore.

Agamemnon, Capt. Long, arrived at Gibraltar on Wednesday, *en route* for the China station.

Alecto, Lieut.-Com. Harston, arrived at Accra from the Niger on Oct. 22, and would await there the arrival of the senior officer in the Opal.

Alexandra, Capt. Rawson, was at Malta on Nov. 17.

Britomart, Lieut.-Com. Isaac, is at Keyham undergoing repairs.

Bullfrog, Lieut.-Com. Papillon, was at Port Royal on Nov. 9.

Carysfort, Capt. Stewart, arrived at Alexandria on Wednesday from Suakim.

Cruiser, Com. Hughes Hallett, was at Malta on Nov. 17.

Dragon, Com. Anson, was at Bushire on Oct. 26, and probably left for the river Euphrates and Busreh on Oct. 29.

Dreadnought, Capt. Fremantle, has arrived at Gibraltar, *en route* to Malta.

Express, Lieut.-Com. Knox, sailed on Nov. 8 for Haiti and St. Domingo.

Flirt, Com. Craigie, has been ordered to St. Helena to recruit the health of her crew, which has suffered somewhat severely from her recent visits to the unhealthy rivers on the West Coast.

Forward, Lieut.-Com. Furlonger, returned to Cape Coast Castle from Accra on the 27th inst., and would, after coaling at Elmina, proceed to visit the various ports on the Southern Division, after which she would visit St. Helena and Ascension to give leave to her crew.

Frolic, Com. Parr, arrived at Cape Coast Castle on Oct. 24 from Ascension, and proceeded on the 26th to Elmina to coal, returning to Cape Coast Castle the following day. This vessel is to be stationed in the Bights of Benin for the present, and was, when the mail left, expected shortly to proceed on a cruise to the various ports within that subdivision.

Griffon, Com. Davies, which recently returned from the North America and West Indies station, has been officially inspected by Capt. Carter, of the Royal Adelaide, preparatory to being paid off, which will probably take place on the 13th prox.

Heroine, Capt. Blackburne, was at Callao on Oct. 23, and was to have left on Nov. 3 for Coquimbo.

Himalaya, Capt. Palliser, left Cork last Saturday for Singapore, *viâ* Suez, calling *en route* at Gibraltar and Malta. Letters will reach the ship posted in England addressed to the under-mentioned places at the dates given:—To Suez, Dec. 1; Colombo, Dec. 21; Gibraltar, Feb. 10; Hong Kong, Dec. 7; Suez, Feb. 6 to 10; Singapore, Dec. 14; Malta, Feb. 8.

Inflexible, Capt. Seymour, arrived at Malta on Nov. 23.

Invincible, Capt. Buckle, was at Malta on Nov. 17.

Iris, Capt. Rice, was at Malta on Nov. 17.

Malabar, Capt. Harris, was docked on Monday at Portsmouth, and left on Thursday for Bombay.

Mutine, Com. Edwards, has been ordered to join the Admiral on the Pacific station when relieved by the Satellite, Capt. Theobald.

Opal, Capt. Brooke, awaits at Cape Coast Castle the arrival of the Rapid, when she would proceed to Sydney, calling at Ascension, Tristan d'Acunha, and the Cape of Good Hope *en route*.

Pelican, Com. Hope, was at Callao on Oct. 23.

Sappho, Com. Castle, was at Coquimbo on Oct. 23.

Starling, Lieut.-Com. Saunders, arrived at Gibraltar last week, and left for Malta immediately.

Stork, Lieut.-Com. Blennerhasset, has left Cape Coast Castle for Monte Video, calling at Accra and Ascension *en route*. On her arrival at Monte Video, the Wrangler would proceed to Devonport to pay off.

Swiftsure, Capt. Brand, was at San Francisco on Nov. 24, and expected to leave for Panama on Nov. 27.

Tenedos, Capt. Drummond, has been detailed for protective services on the Newfoundland coast during the winter. She will be placed at Harbour Grace, where the riots of last November took place. The presence of a man-of-war will, it is expected, prevent any further disturbances.

Tourmaline, Capt. Boyle, was paid off on Tuesday at Chatham.

Watchful, Lieut.-Com. Goodrich, left Cape Coast Castle on Oct. 25 to visit Grand Bassa, Grand Lestres, and Cape Palmas, in Liberia. She will return to Cape Coast Castle about Nov. 5, and be stationed in the Bights of Benin for the present.

Wye, Staff Com. Miller, arrived at Bermuda on Nov. 11, and left on the 22nd for Madeira and England.

BIRTH.

Griffin.—On Sunday, November 23, at 30 Trafalgar Place, Stoke, Devon, the wife of Lieutenant John Griffin, R.N., H.M.S. Royal Adelaide, of a daughter.

MARRIAGE.

Archer—Frodsham.—October 8, at the Bishop's Private Chapel, by the Right Rev. W. G. Coure, Bishop of Auckland, New Zealand, Herbert Goodwyn Archer, Lieutenant (Retired List), Royal Navy, second son of T. G. Archer, King's Lynn, to Agnes Maude Frodsham, of Remnera, near Auckland, New Zealand.

JOHN HOLMAN RIDGE (Army Agent), Deceased.—Whereas, by an order of the High Court of Justice, Chancery Division, made in the suit of "Drummond *v.* Ridge" and dated the 1st November, 1884, the following ENQUIRIES were directed to be made, namely—(1) What creditor or creditors, or representative or representatives of any creditor or creditors there is or are having claims on the Estate of the above named John Holman Ridge? (2) Who is or are the person or persons now entitled to the £2,028 7s 6d Consolidated £3 per cent. Annuities, and £3,154 11s 7d cash in Court to the credit of the suit? The CREDITORS of the said JOHN HOLMAN RIDGE, late of Charing Cross, in the City of Westminster, army agent, who died on the 16th August, 1816, and any person or persons claiming to be entitled to the said funds in Court, or any part thereof, are, by their solicitors, on or before 12th March, 1885, to come in and prove their claims at the Chambers of Mr. Justice Pearson, Royal Courts of Justice, London, or, in default thereof, they will be peremptorily excluded from the benefit of the said order. Tuesday, the 24th March, 1885, at One o'clock in the afternoon, at the said Chambers, is appointed for hearing and adjudicating upon the claims.—Dated this 21st November, 1884.
ALFRED RAWLINSON, Chief Clerk.

BENNETT, DAWSON, and BENNETT, 2 New Square, Lincoln's Inn, London, W.C., Solicitors for the Plaintiff.

J. AND W. TOLLEY'S EXPRESS RIFLES,

BIG GAME RIFLES.

GIVING THE HIGHEST VELOCITY, THE FLATTEST TRAJECTORY, AND THE GREATEST ACCURACY YET OBTAINED.

·360, ·400, ·450, ·500, & ·577, Double Express, £25.

From A. H. MACARTNEY, Esq., Newera Elliya, Ceylon, April 25, 1882:—"The 12-bore 'Forsyth' Rifle you sent me was an excellent weapon, none could be better; it did such execution as has never before been equalled. The first time I went out I saw three rogue elephants of enormous size, one shot sufficed for each of them. Then I went out with Lieut. Hannay, R.E., now in England; we saw twenty-one elephants, and killed them all between us, fourteen falling to your rifle. Once it saved our lives; a charging rogue falling dead to it within six feet of where we stood."

From H. T. SHUBRICK, Esq., 13th L.I., 39 Onslow Gardens, London, S.W., October 8, 1884.—"After nearly five years' experience of the ·577 Express Rifle, No. 5,514, you built for me, I have much pleasure in stating that it has from first to last given me entire satisfaction. In my last jungle trip I killed four bison and a bear, each with a single shot. The penetration and killing power is something enormous, as the following particulars will show. Bison, No. 1: Shot in the throat end-on; the piece penetrated the muscles of the neck, broke one of the breast ribs, pierced the heart and lungs, and finally there were six holes in the diaphragm; further we did not trace. Bison, No. 2: Shot through the right shoulder while lying down, showing the right shoulder broken; left appeared to be so also, but had not time to skin sufficiently to make certain. Bison, No. 3: Shot behind the shoulder; bullet broke up into five pieces, two of which went clean through. The above I think is enough to show what the penetration is like. I have recommended several gentlemen from you, and in each case they were as well served as I was."

THE ECONOMIC LIFE ASSURANCE SOCIETY (Established 1823),

6 NEW BRIDGE STREET, BLACKFRIARS, LONDON, E.C.,

affords Mutual Assurance with Perfect Security without Individual Liability.

THE FUNDS now amount to £3,619,661, and Annual Income to £377,000.

The Directors having carefully revised their rates for non-participating assurances, Policies may now be effected at proportionately low rates of premium, Without Profits.

The attention of those who desire to effect Policies, at the lowest present cost, is invited to the Society's New Prospectus.

BONUS POLICIES.

RATES OF PREMIUM.—From 9 to 26 per cent. less than those charged by other Life Offices.

RESULTS OF ECONOMICAL MANAGEMENT.—Large Bonuses have been declared. Instances are on record of Policies having been trebled by Bonuses.

DIVISION OF PROFITS.—By the mode of dividing the profits, Policies are not only valuable as a provision in case of early death, but become increasingly valuable as an investment in old age.

SPECIMENS of POLICIES in FORCE at VALUATION, 1883:—

Policy effect'd in the Year	Age at Entry	Sum originally Assured.	Bonus to 1883, inclusive.	Total Sum Assured.	Per-centage of Bonus on Premiums Paid.			Surrender Value of Policy and Bonus.			Equivalent Free Policy, inc. Bonus to Dec. 31, 1883.

For Bilious Attacks and Headaches. Acts directly on the Liver, regulates the Bowels, and stimulates the Kidneys.

A Cure for Indigestion, Constipation, and all Stomach Derangements.

"Acts as an intestinal tonic, and its habitual use does not lower the system." If taken every morning will keep the Body in perfect health.

Supersedes all others. Recommended by the leading Medical men without exception.

Every Bottle direct from the Celebrated Spring in Hungary.

Sold Everywhere at 1s 6d and 2s per Bottle.

ÆSCULAP BITTER WATER COMPANY (Limited), 38 Snow Hill, London, E.C.

DR. J. COLLIS BROWNE'S CHLORODYNE

ORIGINAL AND ONLY GENUINE.

COUGHS,
COLDS,
ASTHMA,
BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE.
Dr. J. C. BROWNE (late Army Medical Staff) discovered a remedy to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false*.

Vice - Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the *Times*, July 13th, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE is the true Palliative in

NEURALGIA, GOUT, CANCER, TOOTHACHE, RHEUMATISM.

IS THE GREAT SPECIFIC for CHOLERA, DIARRHŒA, DYSENTERY.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

From SYMES and CO., Simla:

Dear Sir,—We congratulate you upon the wide-spread reputation this justly esteemed medicine has earned for itself all over the East. As a remedy of general utility, we much question whether a better is imported, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike.—We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, his Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.

IMPORTANT CAUTION.

The immense sale of this remedy has given rise to many unscrupulous imitations. Of all Chemists, 1s 1½d, 2s 9d, and 4s 6d.

SHAVING a PLEASURE.

EDWARD SMITH'S 1s HOLLOW-GROUND RAZOR is pronounced by all the most wonderful razor ever introduced. It has during the past two years stood every test, and thousands have been sold retail only, at No. 3 Cheapside. It never requires grinding or setting, and is complete in case for 1s 1d; post free, 1s 3d. Complete list of razors, &c., on application. N.B.—A liberal allowance to Serjeants and others taking a quantity.—EDWARD SMITH ("The City Toy Shop"), 3 Cheapside, London.

HOLLOWAY'S OINTMENT and PILLS.—AUTUMNAL REMEDIES.—Towards the fall of the year countless causes are at work to lower the tone of the nervous system, which will be followed by ill-health unless proper means be employed to avert that evil. Holloway's far-famed preparations supply a faultless remedy for both external and internal complaints connected with changes of season. All affections of the skin, roughness, blotches, pimples, superficial and deeper-seated inflammations, erysipelas, rheumatic pains, and gouty pangs alike succumb to the exalted virtues of Holloway's Ointment and Pills, which will effect a happy revolution in the patient's condition, though the symptoms of his disorder are legion, and have obstinately withstood the best efforts of science to subdue them.

63rd.	Lieut. Saunders, 3rd Batn. Suffolk Regt.	1539

The above make 25 Officers who have gained direct Commissions from Wargrave.—Address,

Rev. A. PRITCHARD,
WARGRAVE, HENLEY, OXON.

MILITIA COMPETITIVE EXAMINATION.

The undersigned PREPARES a LIMITED NUMBER of PUPILS (Five) for the above. Successes in March, 1883,—two, one taking the second place (first try); in September, 1883—two, Fowle, 25 (first try); Moir, 27. At the March Examination, 1884, one pupil competed, A. H. Robinson, passing 1st for Cavalry, with 2,018 marks. after four months' work.

Officers prepared for the Promotion Examination. Terms moderate.—Apply, Captain H. C. KING, 13 Blomfield Street, Westbourne Terrace, W.

MEMORY and SUCCESS.—What contributes to success? A good memory.—What causes failure in life? A poor memory.—What can all obtain from Prof. Loisette's Discoveries? A good memory—the PHYSIOLOGICAL ART of NEVER FORGETTING—using none of the "Links," "Pegs," "Localities," or "Associations" of Mnemonics. Lost memories restored—the worst made good, and the best better. *Any book learned in one reading.* Prospectus post-free, giving opinions of Mr. RICHARD A. PROCTOR, Dr. ANDREW WILSON, and others who have studied the System. A Day Class in Never Forgetting and for Cure of Mind-Wandering commences every Monday at 3 p.m. An Evening Class every Tuesday at 8 p.m. Lectures in Families of the Nobility; also taught thoroughly by POST.—Prof. LOISETTE, 37 New Oxford Street (opposite Mudie's), W.C.

ALL BUT NEW OFFICERS' UNIFORMS, for the Army, Navy, Militia, and Yeomanry, may be obtained of LEWIS MOSES, 65 New Oxford Street, W.C., at one-fourth their original cost or on hire. Swords, cloaks, belts, sashes, saddles, &c., for nearly every regiment in her Majesty's Service. Uniforms and apparel purchased.

CIVIL SERVICE and ARMY EXAMINATIONS.

Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and Major E. J. LYNCH, late Garrison-Instructor, London, 19 Lexham Gardens, Cromwell Road, W., PREPARE Gentlemen for all CIVIL SERVICE Examinations, and for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA; special Classes for the STAFF COLLEGE and Promotion Examinations. EIGHTY-THREE successes in 1882. ONE HUNDRED and FIFTY-ONE in 1883. ONE HUNDRED and FIFTY-FOUR in 1884, viz.:—

MILITIA COMPETITIVE, March.—THIRTY-SIX, viz.:—3rd, 5th, 6th, 9th, 10th, 15th, 16th, 18th, 19th, 22nd, 27th, 28th, 34th, 35th, 36th, 39th, 41st, 42nd, 43rd, 45th, 47th, 48th, 52nd, 55th, 57th, 58th, 59th, 60th, 61st, 65th, 66th, 69th, 71st; and Cavalry, 2nd, 4th, and 9th.

September.—THIRTY-ONE, viz.:—First, 7th, 9th, 13th, 14th, 15th, 16th, 19th (two), 23rd, 24th, 25th, 26th, 28th, 29th, 35th, 37th, 38th, 44th, 46th, 48th, 51st, 53rd, 59th, 62nd, 64th; and Cavalry, 3rd, 6th, 7th, 8th, 9th.

One other failed by only 4 marks, and three more were within 39 marks of success.

95 out of 117 Candidates have passed at the last Three Examinations.

At the Eight Examinations held under the present regulations, the FIRST PLACE has been taken FIVE TIMES.

MILITIA LITERARY, April:—FIRST, 3rd, 4th, 22nd, 29th, 32nd. October:—FIRST, 3rd, 6th, 7th. Being all sent up on both occasions. There has been no failure in the last SEVEN Examinations.

SANDHURST, TEN, viz.:—5th, 13th, 15th, 32nd, 43rd, 53rd, 79th, 83rd, one Hon. Cadet, one R.M.L.I.

WOOLWICH, Two:—20th, 53rd.

STAFF COLLEGE, TWELVE, viz.:—2nd, 4th, 9th, 16th, 19th, 21st, 22nd, 23rd, 24th, 25th, 33rd, 35th, and four others qualified.

PROMOTION.—Twenty-five Officers have passed this year.

PRELIMINARY.—Twenty-eight have passed this year.

INDIAN CIVIL SERVICE.—A Special Class, limited to eight.

FOREIGN OFFICE and DIPLOMATIC.—A Special Class, limited to six.

Courses for all Examinations now proceeding.

NEXT TERM COMMENCES JANUARY 13.

THE MANOR HOUSE, LEE, S.E.

The SPECIAL CLASSES for the MILITIA COMPETITIVE, the STAFF COLLEGE, and PROMOTION EXAMINATIONS commenced October 15, under the direction of Lieutenant-Colonel J. L. NEEDHAM, P.S.C., late Professor of Fortification, Tactics, &c., at the Royal Naval College, Greenwich, and formerly Garrison Instructor. Each Class limited to eight.

At the MILITIA COMPETITIVE EXAMINATION, held in September last, out of FIVE Lieutenants of Militia sent up by Mr. WOLFFRAM, the following were successful:—

Place.	Name.	Marks.
3.	... Lieut. B. Upperton	1906
4.	... Lieut. W. J. Mangles	1875
54.	... Lieut. J. R. O'Connell	1575

Out of twenty-seven MILITIA OFFICERS sent up from the Manor House for the MILITARY COMPETITIVE EXAMINATION since 1881, the following twenty-two have been successful:—

Lieut. H. de S. Barrow.
Lieut. Sir Henry Bellew, Bart.
Lieut. C. C. Daniel.
Lieut. H. J. Elphinstone.
Lieut. C. S. Evans-Lombe.
Lieut. M. A. Foster.
Lieut. Henry Graham.
Lieut. H. F. Holland.
Lieut. W. R. Inglis.
Lieut. William Keates.
Lieut. Percy Lees.
Lieut. W. J. Mangles.
Lieut. Graham Marsh.
Lieut. A. P. Murray.
Lieut. J. R. O'Connell.
Lieut. L. W. Pease.
Lieut. H. K. Stewart.
Lieut. Harrington Swann.
Lieut. R. W. Trim.
Lieut. Bryan Upperton.
Lieut. F. O. F. Vane.
Lieut. G. F. Whitehead.

ARMY EXAMINATIONS. — LIEUTENANTS of MILITIA PREPARING for the MILITARY COMPETITIVE EXAMINATION can be RECEIVED by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath, whose pupils for some years past have continuously maintained a steady average of success, second to none. This year fifteen have been sent up, seven of whom have passed; four in March (one taking first place on the list), and three at the recent Examination. Very few pupils are taken, and there are two resident Military Instructors of high qualifications constantly at work, with a third in reserve in case of pressure. Thus very great individual attention is guaranteed, and the system of lecturing classes entirely avoided. Batcombe is a country village, near no town, but affording opportunity for shooting and other healthy amusements in moderation. References are permitted to the Earl of Harewood, Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of successful pupils.

JERSEY HIGH SCHOOL for GIRLS
(Limited).
PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.

His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

CONNAUGHT MILITARY COLLEGE,
WOOLWICH COMMON.
Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the seven MILITIA COMPETITIONS which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils SIXTY COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates.

MARCH, 1884.

ELEVEN SUCCESSFUL of out SIXTEEN SENT UP.

* Passed FIRST TRIAL.

At the recent WOOLWICH and SANDHURST Examinations NINE PUPILS competed, and EIGHT CADETSHIPS were obtained (one Woolwich, seven Sandhurst); Mr. H. D. Radcliffe taking SIXTH PLACE on the Infantry list for Sandhurst, with 7,308 marks, and making the highest score of any candidate in German—1,835 marks out of 2,000.

For the Staff College, Captains G. F. C. Mackenzie and C. E. de la P. Beresford have been successful; no other candidates sent up.

The general score now amounts to ONE HUNDRED AND SIXTEEN SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

CAVENDISH COLLEGE, CAMBRIDGE.

This College has been founded by the County College Association, Limited, under the Presidency of His Grace the Duke of Devonshire, K.G., in order to enable students at the earliest practicable age and at a moderate cost to take the University Degree, whether in Arts, Law, or Medicine.

Students are admitted at 16, and a Degree may be taken at 19.

The College charges for Lodging and Board (with an extra term in the Long Vacation), including all necessary expenses of tuition for the degree of B.A., are £84 per annum.

For further information apply to the WARDEN, Cavendish College, Cambridge.

SANDHURST and WOOLWICH.—(Candidates for the Final Examinations preferred.)—A FRENCH and ENGLISH UNIVERSITY MAN, late Modern Language Master in Haileybury, Wellington, and Winchester Colleges, prepares Twelve Pupils for the above. Hunting with the Hambledon and Hursley Hounds. Local reference to Colonel H. P. Montgomery, late commanding Rifle Depôt; or to Lieutenant-Colonel C. T. Bunbury, late Rifle Brigade. Names of successful Pupils and other particulars on application to the PRINCIPAL, Wellington House, Winchester.

SANDHURST, WOOLWICH, and MILITIA EXAMINATIONS.—Preparation by JOHN GIBSON, M.A., and large Resident Staff, at Bromley, Kent, and Coblenz-on-Rhine.

N.B.—GIBSON'S SANDHURST "FURTHER" GUIDE (No. 3), containing Papers set in November and December, 1884, and Solutions, will be published on Wednesday after the Examination.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Under the patronage of her most Gracious Majesty the QUEEN.

CHAIRMAN—Major-General J. T. BOILEAU, R.E., F.R.S.

Applications from Candidates for admission to this School, either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

The Daughters of all Officers on the Active and Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible; but the Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

Office, 20 Charing Cross, corner of Craig's Court, London.
By Order,
G. W. FORSTER, Secretary.

ARMY.—LINE and MILITIA.
IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, 16 Nevern Square, Earl's Court, S.W.

MILITARY EXAMINATIONS.

Lieutenant-Colonel G. M. CARDEW (passed second from Staff College) PREPARES SIX PUPILS for MILITARY COMPETITIVE EXAMINATION. Also Officers for Promotion, &c.—14 Observatory Avenue, Kensington. In July, five passed out of six; in September, three passed out of four.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.—A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c.—Address, HEAD MASTER.

MILITIA CANDIDATES for the LINE.—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above. Careful individual attention. A Class now at work for the March Examination. References permitted to Colonel Aylmer, S. Cameron V.C., Assist.-Qrmr.-Gen. (Intelligence Branch), War Office; and Colonel C. W. Robinson, Rifle Brigade, Assist.-Qrmr.-Gen., Aldershot.

For prospectus, containing terms, testimonials, and references, address, East Bergholt, Colchester.

MILITIA COMPETITIVE EXAMINATIONS.—MILITIA OFFICERS are prepared in all the subjects for the above Examinations by Lieut.-Colonel N. STEEVENS (late 20th and 88th Regiments and Staff), and Colonel F. J. HUTCHISON (late 64th Regiment, seven years Garrison Instructor at Devonport, and for several months Acting Professor of Fortification at the Staff College).—For further particulars, apply to Lieut.-Colonel STEEVENS, 1 Wolseley Terrace, Cheltenham.

ARMY (PRELIMINARY, FURTHER, and COMPETITIVE) LITERARY EXAMINATIONS.—The Rev. WALTER BAKER, M.A. (Cantab.), late Scholar of his College, &c., offers an unusual combination of advantages. A few Pupils only received. All work is done by individual teaching. No lectures to Classes, but a resident Tutor to every three Pupils, and each Tutor first-rate in his own subjects. For fourteen years, up to and including the last Sandhurst Competition, a steady average of successes, second to none, has been maintained. No town is near, but there are plenty of country amusements, and a liberal establishment is kept. The highest references can be given to noblemen, officers high in the service, and other parents of successful Pupils.—Address, Batcombe Rectory, Evercreech, Bath.

ROYAL INDIAN ENGINEERING COLLEGE, COOPER'S HILL, STAINES.—The Course of Study is arranged to fit an Engineer for employment in Europe, India, or the Colonies. Sixty Students will be admitted in September, 1885. For competition the Secretary of State will offer Fifteen Appointments in the Indian Public Works Department, and Two in the Indian Telegraph Department.—For particulars, apply to the SECRETARY, at the College.

ARMY and UNIVERSITY EXAMINATIONS.—J. WEST, Edinburgh University (two First Classes), F.R.Hist.S., F.A.S., and F. G. BRABANT, M.A. Oxford (three First Classes), RECEIVE a LIMITED NUMBER of RESIDENT PUPILS, to whom they offer special individual attention and a pleasant country home. Long and varied experience, especially in Sandhurst Preliminary and Sandhurst and Woolwich Competitive. Highest references. List and terms on application.—Address, Heathview, Storrington, Sussex.

MILITIA MILITARY COMPETITIVE.—MAJOR de THOREN'S very remarkable success with Classes of Militia Officers, strictly limited in number, and to whom he gives his individual and sole attention, continues as usual. The fees at this establishment are extremely low.—For particulars, address Bellefield, St. Helier's.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Officers prepared for Examinations. Correct Idiom guaranteed.—PUNDIT, 7 Beechholme Road, Clapton.

HINDUSTANEE TAUGHT by a RETIRED OFFICER, Bengal Staff Corps. Has passed High Proficiency Examinations in both Hindi and Urdu at Calcutta.—Address, Captain HAYES, Junior Army and Navy Club, St. James's Street, S.W.

NEWTON COLLEGE, S. DEVON.

PRESIDENT OF COUNCIL.—Earl of DEVON.
HEAD MASTER.—Rev. G. TOWNSEND WARNER, M.A., Trin. Coll. Camb. (appointed, 1875.)
TWELVE RESIDENT MASTERS.—First-Class Honour Men are at the Head of each Department.

The New Buildings lately built accommodate 200 boys, to which number from its present limit of 150 it is proposed to increase the School. The advantages offered are—

1. A large staff of Masters, of undoubted calibre and experience, so that the teaching is careful and thorough.
2. Small Classes so that all can be taught properly.
3. Supervision in study to prevent idleness as far as possible.
4. Complete subdivision into Classical and Modern Sides, Non-Latin Divisions, Junior and Preparatory Schools; so that boys can take up any branch of education, scientific or otherwise, and be thoroughly taught in it.
5. Large airy class-rooms where teaching is carried on at the least pressure to master and boy.
6. Excellent situation and playing fields, large swimming-bath, gymnasium, carpenter's shop, &c., with all kinds of appliances for keeping boys employed and so out of mischief.
7. A system of Scholarships, entrance and others, open to all.
8. A regular succession of annual public Examinations, so that parents can judge for themselves how their sons stand in comparison with those from other schools.
9. Comfortable and well-arranged accommodation, &c., in the houses, &c.
10. Opportunity for that friendly intercourse between Masters and Boys in out-of-door games, which is so conducive to the good tone of a school.
11. The Head Master has had great experience in dealing with delicate boys, and makes special arrangement for those who desire school life and yet require careful watching.
12. Army Candidates trained without the aid of a Crammer, if entered in fair time.
13. The Preparatory School is specially provided for in a separate House, with Fives' Courts of its own, &c.

The School offers SPECIAL TERMS to the Sons of Clergy, Officers, Professional Men, &c., and the fact that Six Entrance Scholarships have been won since 1882 at Winchester and Marlborough bears testimony to its excellence in the Preparatory School, while the List of other Honours is no less satisfactory.

OUR BOY, what to do with him?—Answer: Business in place of Army for income. Genuine opportunity offered for highly and increasingly remunerative and safe investment; secretarial or open air work; liability limited.—References to a Colonel and a Clergyman interested with advertiser, a JUSTICE of the PEACE, May's, 159 Piccadilly.

GENTLEMEN'S GOLD LEVERS, engine-turned cases, 80s.

A. J. Windebank, Esq., Chanda House, Fratton Street, Portsmouth, December 22, 1883:—"Watch, chain, and ring to hand. I am very much pleased with their appearance, the watch especially looking a very strong, handsome one, and equal to many I have seen at double the money."

Mr. H. A. Illingworth, 82 Queen Street, Batley, March 7, 1884:—"After four years' trial of one of your 25s. watches, I now desire to express my thanks for the same. During all the time I have had it I have not paid one halfpenny for repairs. It is as good to-day as ever. When I have shown it to my friends, they have valued it at double and frequently at treble the money. To those who wish to possess a cheap, good, everyday watch, I especially recommend the above."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

MILITARY HANDBOOKS, EDITED BY COLONEL C. B. BRACKENBURY, R.A.

Small crown 8vo, cloth, 6s.

CAVALRY in MODERN WAR. By Colonel CHENEVIX TRENCH, Military Attaché at St. Petersburgh. [*This day.*

Small crown 8vo, cloth.

FIELD WORKS; their Technical Construction and Tactical Application. By Col. C. B. BRACKENBURY, R.A. [*In the press.*

ELEMENTS of MILITARY ADMINISTRATION.—First Part: Permanent System of Administration. By Major J. W. BUXTON. Small crown 8vo, cloth, 7s 6d.

"It is difficult to over-rate the industry and ability which Major Buxton has brought to bear on the subject. He has really presented the Army, for the first time, with as clear, continuous, and systematic an account of British military administration as the nature of the topic permits."—*United Service Gazette.*

SECOND EDITION.

MILITARY LAW: its Procedure and Practice. By Major SISSON C. PRATT, R.A., Professor of Military History at the Royal Military Academy. Small crown 8vo, cloth, 4s 6d.

"The object of the manual under notice is to afford officers and non-commissioned officers some assistance in overcoming the many difficulties which attend the study of the legal part of their profession. It is well calculated to perform that office in all respects, particularly so from the method of arrangement which has been adopted."—*Army and Navy Gazette.*

SECOND EDITION.

FIELD ARTILLERY: its Equipment, Organisation, and Tactics. By Major SISSON C. PRATT, R.A., Professor of Military History at the Royal Military Academy. With 12 Plates, small crown 8vo, cloth, 6s.

"Some excellent illustrations and plans serve to elucidate the writer's remarks, and a most successful effort has been made to produce a really useful and fairly exhaustive manual on a subject which, though of the greatest importance, seldom meets with the attention it deserves.'—*Times*

Recommended in General Order 30 of 1884.
FIFTH EDITION.

The ELEMENTS of MODERN TACTICS PRACTICALLY APPLIED to ENGLISH FORMATIONS. By Lieutenant-Colonel WILKINSON SHAW. With 25 Plates and Maps, small crown 8vo, cloth, 9s.

"The exercises are thoroughly practical and not mere theoretical diagrams. The book is thoroughly adapted to the use of Volunteers, Militia, and Yeomanry, as well as regular troops, and needs nothing beyond an ordinary knowledge of drill for the full comprehension of its lessons. We are glad to congratulate him on having produced a work which cannot but add to his professional reputation as well as to the general information of the service."—*Times.*

FOURTH EDITION.

MILITARY SKETCHING and RECONNAISSANCE. By Colonel F. J. HUTCHISON and Major H. G. MACGREGOR. With 15 Plates, small crown 8vo, cloth, 4s.

"That officer must be dull indeed who cannot learn by its aid to read details of ground on a military map, and to produce a readable and fairly accurate sketch of ground, accompanied by a 'reconnaissance report.'"—*United Service Gazette.*

Third Edition, revised and corrected, crown 8vo, cloth, 3s 6d.

The DEFENCE and ATTACK of POSITIONS and LOCALITIES. By Colonel H. SCHAW, R.E., late Professor of Fortification and Artillery, Staff College.

Small crown 8vo, cloth limp, 2s.

A SYSTEM of FIELD TRAINING. By Major C. K. BROOKE, the East Yorkshire Regiment.

"A very carefully thought-out treatise on a subject of great importance. No soldier can read it without profit, for the author is evidently an officer of much practical experience. Most of his suggestions are very valuable."—*United Service Gazette.*

RECOMMENDED IN GENERAL ORDER 30 OF 1884.

Sixth and Cheaper Edition, revised.

MINOR TACTICS. By Lieutenant-Colonel C. CLERY, Assistant-Adjutant-General, late Professor of Tactics, Royal Military College, Sandhurst. With 26 Maps and Plans, crown 8vo, cloth, price 9s.

Crown 8vo, cloth, 1s 6d.

SUGGESTIONS for the MILITARY TRAINING of a COMPANY of INFANTRY. By Captain HARRY J. CRAUFURD, Regimental Adjutant, Grenadier Guards.

"There are few company officers who will not find it useful in one way or another."—*St. James's Gazette.*

SIR E. J. REED'S PAPER.

The admirable paper compiled and read by Sir Edward Reed, at the request of the Council of the Royal United Service Institution, on the most urgent measures that should be taken for increasing her Majesty's Navy, and of which we give a *résumé* below, will be received with the utmost attention at this moment, when we are on the eve of hearing from the responsible parties their intentions on the subject. Sir E. Reed, while pointing out that the comparison adopted lately by Sir Thomas Brassey and other speakers is in a great measure incorrect, because they estimate the armoured tonnage of vessels in our Navy, which are only in reality armoured amidships and partly unprotected, as equal to that of French vessels protected with the same thickness of armour from stem to stern, argues that the conspicuous difference between the French Fleet and our own exists in the fact that, while they exceed us in number of vessels armoured with 15 inches and upwards, we greatly exceed them in vessels armoured with 12 inches and less. He is, however, of opinion that the additions to our Fleet urgently necessary are five additional armoured ships of the first-class, five extremely fast armoured cruisers, eight extremely fast unarmoured cruisers, 15 extremely fast auxiliaries to armoured ships, and 50 torpedo-boats of the sea-going class. But he fully admitted that the adoption of this programme should be succeeded by further earnest effort. In the discussion which followed, and in which all the most prominent authorities outside of official men spoke, the general opinion seemed to be that Sir Edward had not gone far enough; and, while all expressed the hope that the matter would be kept outside party and political lines, it was strongly felt that until the business men—our manufacturers, merchants, and shipowners—thoroughly realised the risk they are running in allowing our supremacy at sea to remain a matter of doubt, no Government was strong enough to undertake the task of informing the nation what large expenditure must be entered into if we are to adequately insure our immense Imperial interests against certain and lamentable disaster.

At the Royal United Service Institution on Wednesday, Sir E. J. Reed read a paper on "What are the Most Urgent Measures that Should be Taken for Increasing her Majesty's Navy?" Admiral Sir Edward J. Fanshawe presided, and there was a very large attendance of Naval and Military authorities. Amongst those present were Mr. W. H. Smith, Lord Henry Lennox, Admiral Sir John Hay, Admiral Sir George Elliot, Admiral Sir Spencer Robinson, Admiral Boys, Admiral Sir T. Nicholson, Admiral Sir Gore Jones, Admiral Hamilton, Admiral Simpson, Admiral Sir Leopold M'Clintock, the Earl of Dalhousie, Sir Donald Currie, Sir Beauchamp Walker, Sir Lumley Grahame, Col. A. Moncrieff, Capt. Johnson, Capt. Alexander, Capt. Fitzgerald, Capt. Colomb, &c., and several foreign Naval Attachés.

Sir Edward Reed, who was very cordially received, commenced his paper by urging the rapid completion of all the new ships at present in hand, and pointed out the waste of public money which was involved in spreading over six or more years the building of a vessel which ought to be completed in three years. As an example of this he instanced the Conqueror. He laid it down that three years was abundant time for the construction of the largest ironclad ship that was ever built. According to the Navy Estimates of the current year, we should have unfinished in our several dockyards on March 31 next the following ironclad ships which would then have been over three years under construction, and we should at that date (next March) have expended upon them, apart from armament, the following amounts:—Rodney, £385,700; Warspite, £411,300; Impérieuse, £446,500; Colossus, £590,000; Collingwood, £446,800; Edinburgh, £456,300; Howe, £317,800; making a total of £3,074,400. Here there was over £3,000,000 invested in seven ironclad ships under construction, every one of which ought to be complete and ready for sea on March 31 next; but in the official proposals of the Admiralty for the current year it was only suggested that two of the seven should be finished by that date, and as a matter of fact, not even one of the seven would be then completed at the recent rate of progress. The interest upon this investment alone at 5 per cent. would be at the rate of £150,000 per annum, and although he had put the rate of interest at 5 per cent., if there were time he could show that the actual loss per annum would be greater than that sum. Losses similar in character, but less in amount, were also largely incurred at present in the case of unarmoured ships, and had been for many years past. The next urgent measure which he referred to was that of increasing the number of our armoured line-of-battle ships. He was not an admirer of our recent ironclad ships, in nearly all of which the armour belt was limited to about one-third of the ship's length. When, however, the Inflexible question arose, there were so many naval officers who expressed confidence in such ships, including nearly all the naval officers holding official and highly responsible positions at the Admiralty, that he had not since felt it necessary or desirable to further press his views or apprehensions. He wished to point out that it was surely impossible to regard such ships as the equals of those French ships which had equally thick armour, but with belts extending from stem to stern. Sir Edward Reed, amid expressions of support, opposed the view as "contrary to common sense" and "dangerous to the Navy," that a vessel which (like the Collingwood) had only 18-in. armour over 100 ft. of length, had the same armoured tonnage as another which had the very same thickness of armour amidships, and yet had a complete belt. This was a most serious matter, which some might regard as vitiating and overthrowing the whole of Sir Thomas Brassey's recent comparisons between the English and French armoured fleets, and many other comparisons which had been made. The armour having been stripped, so to speak, off two-thirds of the English ship's length at the water-line, in order to secure a thickness equal to that of the French ships, Sir Thomas Brassey then made the thickness alone the standard of comparison, a comparison against which he (Sir E. J. Reed) protested. He directed particular attention to two diagrams which represented the Collingwood's partial armour of 100 ft. in length, and the complete belting of the French ship, the Amiral Duperré. The first diagram was, according to Sir Edward Reed's precise statement, "a side view of an English ship, say the Collingwood." The other diagram was "a side view of a French ship, say the Amiral Duperré, or Amiral Baudin." Sir E. Reed found that, as a rule, the displacement tonnage which is protected from above by the belt and the thick deck at the top of it in the English ships, is less than one-half of the displacement tonnage of the ship; whereas, in the French fully-belted vessels the whole displacement is, of course, protected. "Yet," remarked Sir E. J. Reed, "Sir Thomas Brassey, in his comparisons with the French Navy, treats the whole tonnage of the Collingwood, and of all such ships, as armour-plated tonnage, and compares it with the total tonnage of the French ships, which are really armour-plated throughout." It was, said Sir E. Reed, "impossible to account for so extraordinary a proceeding, which, if not promptly corrected, may be fatal to the naval security of the country." Comparing the English and French Navies Sir Edward Reed said he found that the French had 14 ships, with maximum armour of at least 15 in., built and building, with a total displacement of 126,288 tons, whilst England had only 11 such ships, with an approximate displacement of 51,570 tons. The total tonnage of our ships (for in this approximate displacement he had allowed for the fact that our ships in several cases carried armour only amidships) still left us 21,000 tons behind the French. If, however, we descended to 12-in. armour, we were still at a disadvantage over France to the extent of over 9,000 tons; and it was only when we went down to 9-in. armour that we compared at all favourably. It would be seen, therefore, that the conspicuous difference between the two armoured fleets of England and France was that we greatly exceeded the French in armoured tonnage of ships with armour 12 in. thick and less than that, while France greatly exceeded us in its armoured tonnage of ships with 15-in. armour and upwards. It was in early and in weak ships that we abounded, and in tonnage protected by thick armour that the French greatly surpassed us. The additions to the Navy which Sir Edward regarded as urgently necessary were:—Five additional armoured ships of the first-class; five extremely fast armoured cruisers; eight extremely fast unarmoured cruisers; 15 extremely fast auxiliaries to armoured ships; 50 torpedo-boats of the first-class. The cost of these additions he should propose to spread over three years as follows:—For 1885-86, hastening armoured ships now building in royal dockyards, and pushing forward therein four new armoured ships of the first-class, labour, material, and machinery (by contract) included, £750,000; for 1886-87, £275,000. For 1885-86, building by contract one additional armoured line-of-battle ship (about £700,000), and five armoured cruisers of 19 or 20 knots' speed (at, say, £500,000 each), £1,000,000; for 1886-87, £1,100,000; after 1886-87, £1,100,000. For 1885-86, building by contract six fast armoured cruisers of over 18 knots' speed (in addition to the two to be built in royal dockyards), in two years, at £175,000 each, £525,000; in 1886-87, £525,000. For 1885-86, building by contract 15 extremely fast vessels to accompany ironclads as auxiliaries, at, say, £32,000 each, £480,000. For 1885-86, building by contract 50 first-class torpedo-boats, at, say, £12,000 each, £600,000. Total extra expenditure in next three years, £6,355,000. He fully admitted, however, that the adoption of this programme would have to be succeeded by further earnest effort. Every portion of it would tell upon the strength of the Navy and the safety for the country for some time to come. The extra expenditure which it necessitated was but little more than one-half the ordinary Navy expenditure for a single year, and whereas all save a million or so of the annual 11 millions totally disappeared in wages, clothing, provisions, pay, pensions, &c., at the end of the year the results of this extra outlay would remain with us, and would greatly tend to restore to the country that sense of security, and to foreign nations that proper regard for us which there was reason to fear was at present greatly wanting.

The Chairman, after thanking Sir E. J. Reed for his very able paper, read a communication from Admiral Sir Thomas Symonds (who was absent through illness), in which that officer urged that our Navy ought at least to be double that of the French, setting up their models for our guidance in all classes of war-vessels; for if the present state of things was allowed to go on, a Naval Sedan was certain for England should she be engaged in a war with France alone.

Sir George Elliot advocated a greatly increased number of gunboats and flotillas for coast defence, expressed a belief that if only we could get rid of political rivalries over the Navy Estimates, our ships would be built more quickly; and declared his conviction that some means would yet be found of rendering war-vessels secure from the attacks of torpedoes.

Sir John Hay, M.P., agreed with the lecturer so far as he went, but thought his proposals too moderate. The first and most urgent measure to be taken was to get some money, and he rejoiced that public attention had now been awakened to a sense of the national danger. He wished some of the money spent on coast fortifications had been devoted to the Navy, and pointed out that if we were at war with France, some smart French officers might burn Liverpool or bombard Brighton to-morrow morning. We had no reason to be jealous of France, who had been compelled to increase her Fleet in consequence of the activity in building ships of Germany and Russia.

Lord Henry Lennox said he rejoiced to find that the question of our Naval decadence, which he had been pressing on the Government of this country for the last 12 or 14 years, had at last aroused the whole country. If the proposals of the Government next week were anything like adequate they would receive his support, but if not they would have his most consistent opposition—an opposition which would be continued in and out of Parliament until justice was done, and the nation had a Navy worthy of carrying its flag all over the world. The discussion of the paper was adjourned till Thursday afternoon, when it was resumed in the presence of a large and influential assemblage, the theatre being well filled by "men of light and leading" in the services.

Mr. White (Naval Constructor) opened the proceedings by generally endorsing Sir E. J. Reed's suggestions, yet dissenting from many of his arguments. He agreed that five battle-ships should be laid down at once, and that five armoured cruisers should be built to meet immediate requirements, and he acknowledged the need of torpedo-boats. That number, he thought, might be greatly increased with advantage to the country. We had spent too little since 1872. The French had been liberal, and now we were nearly on an equality. As to torpedo-boats, he concurred with Sir E. Reed. But there were points in which justice had not been done to the British Fleet. If his method of estimating armour tonnage was right, the big Italian ships had no armour tonnage at all, the armour tonnage and fighting efficiency were not convertible terms. The Italian constructors preferred putting armour in the form of a protecting deck. But they were not to be put out of the list of fighting-ships. (Sir E. Reed said he had never intended to suggest anything of the kind.) When the Collingwood was designed, the disposition of the armour was, after the most careful consideration, decided to be the best, and arrangements were made by which, if desired, the ends could be filled with water in action, to give protection and provide trim. Foreigners had a better opinion of the fighting qualities of our ships of war than Sir E. Reed. Armour which kept out shot did immense damage behind, and the evil behind weak armour was overlooked. After referring at some length to the Esmeralda, he said that he thought the protected cruisers should be more powerful and capable of taking their place as auxiliaries to line-of-battle ships.

Mr. W. H. Smith said that he should not attempt to follow the last speaker (Mr. White) on the technical points which he had raised with so much ability. After paying a graceful tribute to Mr. White's general knowledge of naval affairs, and his ability to express his opinions, Mr. Smith continued by saying that he did not suppose there were many persons who had taken the trouble to investigate the questions that had arisen regarding the Navy who did not hold the view that an absolute increase of the Navy had become absolutely necessary. He made these remarks not as a party man, but as one who for some time was charged with great responsibility in the affairs of the Navy, who had acquired in that position information to which he had added information since, and he wished to declare that the addition necessary to be made to the Navy must be a material and sensible addition, and that such an addition was necessary to the peace of the world. Doubtless persons were to be found who would speak of inconsistency in his pressing this matter of the urgent need of the Navy, four or five years after he had been responsible for the condition of the service; but he felt that it was better he should be charged with inconsistency than that he should not express his deliberately-formed opinion of the steps necessary to be taken in consequence of the circumstances in which this country was now found to be placed. Sir Edward Reed had drawn attention to the great delay there was in the building of ships, and had insisted upon the great cost to the country which such a system involved. Still, the matter of cost was by no means the most important branch of the question. The statement of our naval defences which Sir E. Reed had prepared was, like the statements which were put forward by the Admiralty, simply a list of ships which were being built or had been built, but which were not efficient in the sense that the country could rely upon them in a time of emergency. There was a time in the future when these ships would be valuable to us, but the fact was that only one of the eight ships to which Sir E. Reed had referred would be likely to be finished and ready for the service of the Navy in the course of next year. The impression on the public mind was that the whole of these ships were a present and immediate contribution to the strength of the country, but really they were at this moment of no more value to us than "the iron in the bowels of the earth." In his view the Navy ought to be ready for any work that could reasonably be expected to fall upon it at any moment. They all knew that wars came upon us now-a-days at very short notice. The Franco-German War broke out at three weeks' notice, and what was there to prevent a war breaking out at three weeks' notice in which England would be vitally concerned? In that event where were our ships, our men, and our guns, and what arrangements were made for protecting the interests of England at so short a notice? For himself, he thought that no ship, no gun, no man should be taken into account as valuable for the service of the country unless they were absolutely available in the event of war arising in the manner he had suggested. It was almost childish to suppose that foreign nations would give us warning or time and opportunity to prepare to resist the blows which would fall upon us. He hoped this matter of the Navy would not be made a party question of in any way, and so far as he was concerned, he would carefully avoid anything of the kind, for it did appear to him that these vast questions concerning the vital interests of the country should be treated by the Government as if they were the trustees of the people, and altogether irrespective of the petty personal interests of gentlemen on one side of the House of Commons or on the other. There could be no doubt that, looking to the abnormal development of foreign fleets during the last five or six years, a large addition to our armoured vessels was imperative, and he should like to know whether, in the event of a sudden outbreak of war, the First Sea Lord of the Admiralty had any scheme for the protection of the country, whether we could meet any possible combination of ships that could be brought against us, and whether there were reserves sufficient to meet the inevitable and tremendous losses which must be inflicted in any Naval combat conducted on modern principles. Then, again, he should like to know whether, in the opinion of the First Sea Lord, we had fast cruisers enough to defend our commerce from the attacks of enemies, and whether this matter had been considered irrespective of the so-called rights of neutrals under the Treaty of Paris or any other convention. For himself he could place no reliance upon these paper engagements, for he believed that when the supposed or real necessity arose the weaker Power in point of ships, and guns, and men would avail itself of any means that might be at hand to inflict loss and injury upon the enemy. It was from a profound sense of the responsibility which even now attached to him that he urged the importance of these questions being treated in a national and not in a party or individual spirit; and he echoed the advice Sir Spencer Robinson had given that Naval men should not divert public attention from this great matter by disputes as to the class of ships, but that all parties should combine in an endeavour to inform their fellow-countrymen of the present condition of her Majesty's Navy, and for the real necessity which existed for its augmentation.

Admiral Boys said it was observed in the *Times* some four years ago that a "scare on the Navy" was one of the easiest things possible to be got up in this country. The agitation as regards the Navy might be called a "scare;" but considering that there was no change of Government imminent, there could be no imputation regarding a subject that had been very timely brought forward. The Navy was in a bad condition, and had been so for many years. Adverting to former days of England's Naval glory and admitted supremacy, he referred to a letter written in 1799, stating incidentally that in Torbay there had assembled 72 "sail-of-the-line." What was our comparative strength now to be reckoned in the interests of commercial interests which represented one hundred thousand millions on the seas? Was the Navy in a condition now to protect those interests? The speaker then adverted to the impossibility of classifying armoured ships, and expressed his belief that the only comparison was in the number of ships. This country ought, undoubtedly, to have a greater number of war-ships than France. There should be an addition of gunboats for coast defence. Sir Edward Reed's recommendations, he thought, fell short of what was required for the £100,000,000 worth of property which was now on the high seas under the British Flag.

Mr. Norwood then spoke, at the particular request of the meeting. As a member of the Admiralty Committee of Construction, he acknowledged the dissatisfaction which had arisen on all sides from the great delay which took place in the completion of vessels in the Royal Dockyards. He referred to the decisions of the Parliamentary Committee which recently inquired into the subject as confirming all that Sir Edward Reed had stated with regard to the waste and danger involved in keeping ironclads so long on the slips, and to the desirability of giving contracts to private firms, so that the dockyards might be able to undertake all the repairs which were necessary. In his opinion the responsibility for the armament of the Navy should be vested entirely with the Admiralty,—not that the connection between that department and the War Office should be entirely done away with, but that the former should be at liberty to go to private firms for its guns if it was considered necessary. The idea that we could rely upon our mercantile marine as fighting-vessels in time of war was absurd. He thought the mercantile marine could very well supply all the transport vessels that were required, both in times of peace and of war. He believed that our Navy had fallen below its proper strength, and that the Navy was not sufficient for the great duties it might be called upon to perform. About a fortnight since he was asked what he thought was required in money for the Navy, and he said that five millions at least would be required in two years. A careful consideration of the question with competent friends, had led him to form an estimate of what should be expected, which came out within £100,000 of the amount Sir E. Reed thought was urgently necessary.

Capt. Orde Brown referred to the resistance of armour to artillery, and other technical points of importance.

Capt. Colomb, R.N., believed that all who knew the wants of the Navy would attest that Sir Edward Reed's proposals were very moderate. The Navy had long been brought to "starvation point," and to bring it from that some money would have to be spent. Less waste would occur if the money were spent on an approved type of ships, and he echoed the sentiments of Sir Spencer Robinson, that naval men, whose misfortune, and not their fault, it was, that they held diverse views of what was wanted, should give up trifling objections, and should join together in obtaining the repair of the condition of the Navy. He spoke of the favour with which the Dreadnought type was regarded by naval men, and said that many of the naval officers were anxious to know why that type (designed by the lecturer) was departed from. He held that the strength of a ship could not be reckoned by her armour alone, for the guns were a source of strength. What all were agreed upon was, that line-of-battle ships should be built at once, from any approved type. As to the smaller vessels, the type of these should be one which had great power of locomotion. This country should have, he held, a settled plan as to the foes which it might have to meet, and should cast the Naval Estimates upon the facts demonstrated.

Capt. Colomb, R.M.A., quite agreed that the British Navy ought to possess, as written, "some excess" over the French Navy in ships armoured with 15 in. of armour, and upwards. "Such excess," he strongly urged, should apply to every class of French sea-going war ships. He saw that the pith of the whole matter lies in the phrase "some excess." How much, or how little excess, he asked, was necessary for British safety? The answer to the question ruled the numerical strength required in the British Navy, and settled the question of cost. After discussing other matters, interesting to the question before the meeting, the speaker continued by saying that:—"The conclusion at which he had arrived was that to be reasonably safe at sea, we require a line-of-battle force double that of France 'to lock up' her fleet. If we are thus prepared to lock up, we require beyond European waters a preponderance by at least one-third in classes of war-ships suited to attack and defence in distant water lines. With these and locally defended ports and organised arrangements relating to merchant steamers, he thought we should be safe."

Admiral Sir Leopold M'Clintock entirely concurred in the inadequacy of the existing Navy, which would have enough to do to protect itself in case of war instead of blockading our enemy in his ports and protecting our commerce. Torpedoes had so revolutionised warfare that we urgently needed 15 auxiliary torpedo-boat catchers to guard 15 of our most powerful and valuable ships. Of our small craft four-fifths were obsolete, and dared not venture out of port if war was declared. France would shortly have 200 first-class torpedo-boats, part of them armed with machine-guns, so that within twelve hours of a declaration of war our coasting trade might be stopped without our being in a position to prevent it. We had done little in the shape of adding torpedo-boats to the fleet, and nothing with regard to torpedo-boat catchers, he therefore considered that one million required to be added to Sir E. Reed's estimate for the provision of small vessels, and even that would be under the mark. He was of opinion that small fast vessels would act in the future a larger part than they had done in the past.

Capt. Fitzgerald, R.N., recommended torpedo boat-catchers as a kind of vessel to supersede our present obsolete small vessels, which were simply old ten-gun brigs lengthened, with boilers put in them. These "Bugtraps" were a source of shame and humiliation to Naval officers when lying alongside foreign ships of the same class. Referring to unarmoured cruisers, he said that the English officers felt mortified when they lay alongside the foreign vessels, and saw the difference between the British cruisers and the foreign, and the advantages of the latter. The British officers were told to complain, but it was not likely that officers would complain of the ships they commanded. If they did, they would have no commands in future. This debate was to be regarded as not carping at the strength of the French Navy. France had a right to have a strong Navy; but England should have an increase sufficient for the manifold duties the Navy had to discharge in protecting her commerce and dependencies.

Admiral Wilson said that hitherto the British Navy had existed on the glorious Naval traditions of the country—in fact, it had "lived on Trafalgar;" while the French Fleet had been organising perfectly so that it might retrieve the reputation it had lost at the beginning of the century. Just in the same way the French Army had rested on its laurels and allowed the Germans to become the great army of the world. Naval officers held their tongues because they did not want to be held croakers and alarmists, but they were quite aware of the evils they could only deplore. Half the crews of our ships were non-combatants, and we had no barracks in which our seamen could be trained. Naval officers gained nothing by adding to the Navy; all that they desired was the provision of such vessels as would enable them to maintain the honour of the country, and of the flag under which they sailed. France had perfected its Navy, and the House of Commons had now to look the fact in the face that the neglect of years must be repaired at once, for the British men and officers could not protect the country without the means.

Mr. Arnold Forster, referring to Sir Edward Reed's figures, said that "they were to be regretted," because, although those figures shown might be qualified before those present, and it had been explained they were minimum figures, they did not include an estimate for guns, and were, therefore, only an instalment. Outside, the figurative statement would be taken as Sir E. J. Reed's deliberate judgment, and hence the truth would not be realised. The real, essential, and primary condition for increasing the Navy had been omitted, and there should be an endeavour to make the people of this country realise how a terrible and devastating thing war really was. War in the future would be a very serious business, and the names of the French ships displayed demonstrated that fact,—it would be "Terrible," and it would be "Devastation." Naval officers would do well to show the public what would happen in Liverpool, Leith, and Brighton in the event of war. He had studied the condition of our foreign stations, and he wished that the public could be shown—not what, beyond all argument, we could do, but what we really could not do. These matters were not questions of opinion, but of fact. It was beyond question that the country could not now, or within six months, put an adequate squadron upon any station. The main thing, in his opinion, was to get "people outside" to believe that they were surrounded by dangers against which they must speedily guard. He had a great respect for the French, but if they did make war they would not fight with kid gloves, and a naval war successfully engaged in by a foreign Power against England would mean starvation and death to two out of every three men engaged in our great mercantile industries. Let them place before the country the broad facts of the case, and not dispute about details.

The discussion was continued with animation and *verve*, and the speakers whose remarks we cannot report included Admiral Gore Jones, Com. May, and others.

The Chairman then said he entirely agreed with the scheme set forth by Sir E. Reed. What was wanted was a definite statement of the complete requirements of the Navy, so that the country might see what was necessary to protect our honour and our commerce. He trusted that the country would get an entire scheme. As regarded the ironclads of our Navy, he declared that some of them were in a very bad condition. In future Naval battles the nation must send her Fleets into action superior in strength to the Fleets we had to meet, for the circumstances differed from those of bygone times. Sir E. Reed had shown that England was weak in the strong vessels and strong in the weak vessels, as compared with France, and the Minister who would leave us in that position would be a rash and imprudent man. We had at this moment a number of obsolete ironclads—in fact, the Channel Squadron was composed almost wholly of them—which were as unfit to stand against modern vessels as if they were made of brown paper. Seeing that our average armour displacement was inferior to that of the French ships, we required a greatly increased number of vessels, and as in time of war we should be subject to descents on our coast, the cheapest and best form of defence would be by a number of torpedo-boats, which, as some training was required before officers and men could use them, should be built at once. There was no surer guarantee for the peace of the world and the highest interest of civilisatien than a powerful British Navy.

Sir E. J. Reed replied to the chief arguments adduced, and dealt with every point requiring consideration with consummate skill and judgment. He explained the precise line he had taken to bring forward certain matters, and answered in detail statements which had been made in regard to the citadel ships. Referring to the Collingwood class, he gave expression to what he was informed was the general dissatisfaction of naval officers with this class when he dwelt upon the imperfections of a ship so built. As to his having said nothing about coast defences, he had not dared to do so in face of the needs of the Navy, which had to keep the seas. The occasion on which they had met had been the means of bringing before the country facts at a time when it endangered a public man's position to speak the truth about these things, and when it was thought better that the nation should be blindfolded than be placed face to face with the facts.

A very cordial vote of thanks was given to Sir E. J. Reed, and the proceedings terminated.

HOGE'S HOREHOUND HONEY.—What is known as the "Bee Belt" of Southern California is one continuous bed of honey-bloom, one sweet bee-garden throughout its entire length; but there is one part of it which the plough has not yet invaded, that is the region where the Horehound plant flourishes in one glorious blaze of purple and gold. The tropical luxuriance of these plants is so profuse that they brush against the feet at every step, and close over them as if you were wading in liquid gold. The air is sweet with its fragrance, and tuneful with the humming wings of the bees gathering this precious panacea: this honey-full horehound is a great favourite with the bees, and is one perpetual feast for them. They revel in its bloom long after the flowers of other countries have withered and gone to seed. A single plant will at times be visited by a whole hive of bees at once; the grand hum of such a multitude of wings impresses the listener with the fact that the winning of more than ordinary honey is going on. The product of a dozen or two of these plants is sufficient for the wants of a whole hive. In this perfect paradise for bees the petals of the continuous sheet of blooms drink in the vital sunbeams, and the bees hug this favourite flower with profound cordiality, and push their blunt polleny faces against them, like babies on their mother's bosom; and fondly, too, with eternal love, does Mother Nature clasp her small bee babies and suckle them, multitudes at once, on her warm Californian breast. The Horehound Honey so gathered by these little almoners of Nature is put up in bottles, and retailed by all Chemists, &c., at 1s 1½d each. W. L. Bright, Esq., son of the Right Hon. John Bright, M.P., says:—"Hoge's Horehound Honey cured his father of a bad cough."

THE KHARTOUM EXPEDITION.

Lord Wolseley inspected the mounted infantry at Dongola on Tuesday, previous to their departure for Handek, and expressed much satisfaction at their appearance. The sight (a correspondent of the *Standard* says) was singular and striking. Three hundred and ninety-four riflemen, mounted on camels under perfect control, and moving in excellent order, filed past Lord Wolseley, the men with their rifles at the carry, while the band played "The Campbells are Coming," the old Campbell march having been adopted as most suitable to the new corps. The population were quite excited; and the boys, ever on the look-out for backsheesh, considered that so good an opportunity should not be allowed to pass, and their shrill cries for backsheesh somewhat marred the solemnity of the occasion. For in spite of the laughing crowd, and the strange and uncouth animals ridden by the troops, there was yet something solemn about the procession as it moved away in regular order into the desert and disappeared in clouds of dust, rolling up dun and gloomy in the light of the setting sun, the advanced guard of the British Army, on an expedition which will assuredly be arduous and exhausting, and which may be perilous in the extreme.

News has reached Dongola by native traders, to the effect that General Gordon, being greatly straitened and in want of food, in compliance with the request of the old men and women, who preferred taking their chance among the kindred tribes in the villages, to the certainty of starving in Khartoum, allowed them to leave the town.—"A similar rumour," says the correspondent of the *Daily News*, "reached me from another source some days ago, but then it was couched in terms which made it seem that he sent these people out against their will, which was utterly incredible. My informant has received news that the Mahdi's followers menace all the caravan routes that debouch on the river near Debbeh, so that neither camels nor cattle can be brought through for the English. This news is in want of confirmation. The Mahdi is said to be now at Marguiat, near the direct Ambukol and Khartoum route, holding the narrow passes strongly. The rebels have made strenuous efforts to capture the Omderman earthworks, but after suffering heavy losses, have been repeatedly repulsed by General Gordon."

A Reuter's telegram from Dongola says spies report that the Mahdi's forces are around Khartoum, and occupy Omderman to the number of 15,000 to 20,000 men. Cattle and native produce are still procurable in large quantities for a long distance to the south of Dongola.

The military authorities are said to have leased the Egyptian telegraph lines, south of Cairo, for £3,600 monthly.

Stringent measures are said to have been taken by Osman Digna to stop all entrance to and exit from Suakim.

The tribes are still joining him, and some 50 persons have left Suakim to follow him.

The stream of troops through Wady Halfa is now unremitting. Two or three steamers arrive daily, while dahabiehs and other native craft appear at all hours of the day and night. All these vessels return down stream as soon as the troops and cargoes have been landed. Thus the work of disembarkation is unceasing. Every train leaving for Sarras is crowded with stores and troops of every arm. Detachments of "Camelry," Hussars, Black Watch (Royal Highlanders), the Duke of Cornwall's L.I., the Essex, and Royal Sussex Regts. are thus now *en route* for Dongola.

News from Dal says that the Staffordshire Regt. passed Tanjar without great difficulty, though there are now barely three feet of water in the gates.

The first detachment of the Guards Camel Corps arrived at Dongola on Wednesday, and proceeded yesterday to Handek to join the mounted force, which has already marched thither.

Large quantities of stores and provisions are being collected at Suakim, with what object is not known.

The British forces at and south of Assouan exceed 10,000 men. The garrison of Port Said is to be withdrawn. Two strong Line battalions will garrison Cairo and one Alexandria.

THE BECHUANALAND EXPEDITION.

The Pembroke Castle left on Wednesday for the Cape with the Royal Engineers and "Methuen's Horse."

The volunteers will be mounted and drilled at the Cape, and thence sent by railway to Hopetown, 550 miles, after which they will march 82 miles to Kimberley, in the Diamond Fields, which is but 40 miles from the nearest part of Bechuanaland, and will be really the starting-point of the Expedition. Col. the Hon. R. Stapleton Cotton, half-pay, late Scots Guards, who has previously served in Zululand with the battalion sent to replace the 24th Regt. when it was cut up at Isandlwana, is appointed second-in-command of the Irregular Cavalry. The other officers are:—Lieut.-Col. Hutchins, late 4th Hussars; Capts. Gawne, 4th, and Poett, 39th; Lieuts. Gordon, 15th Hussars, Bouverie and the Hon. A. Fortescue, Coldstream Guards, and Drummond, Scots Guards. The number of young men in a superior class of life who have offered themselves has been very large—the sons of Irish gentlemen being especially numerous—but the bulk of the corps will consist of farmers' sons, old cavalry men, and others used to hard work. It is to be distinctly understood that the men are not enlisted in this country, but go out as emigrants to serve the Colony at the Colonial expense. The mountain guns to be used in Bechuanaland weighs 200 lb. each, and will be conveyed on the back of mules across the Orange River Free State.

HEADACHES AND DISORDERED STOMACH.—"After suffering for nearly two-and-a-half years from severe headache and disordered stomach, and after trying almost everything, and spending much money without finding any benefit, I was recommended to try your Fruit Salt. Before I had finished one bottle, I found it doing me a great deal of good, and now I am restored to my usual health. Others I know that have tried it have not enjoyed such good health for years.—Yours truly, ROBERT HUMPHREYS, Post Office, Barrasford." CAUTION.—Legal rights are protected in every civilised country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed upon by worthless imitations. Sold by all Chemists. Directions in Sixteen Languages,—How to Prevent Disease. Prepared only at ENO'S FRUIT SALT WORKS, Hatcham, London, S.E., by J. C. ENO'S Patent.

Service Questions in Parliament.

◆

Marines at Suakim.

On Saturday, in reply to Mr. J. Lowther, Sir T. Brassey stated that the officers of Marines ashore at Suakim had received field-allowance at the Naval rates, which were in excess of those granted to the Army. By order of the officer commanding, climate-pay at the rate of 3s. per day had also been paid to the Marines; but, when the circumstances came to the knowledge of the Admiralty, directions were given that the double allowance should cease, and that the climate-pay should be recovered from the officers in instalments of from £4 to £5 per month. The object of the Admiralty instruction was to prevent the Marines from receiving allowances in excess of those granted to the Army. This decision had been appealed against, and the Admiralty were now in communication with the War Office on the subject.

On the question that the report of Ways and Means be received, Mr. J. Lowther reverted to the subject, remarking that he understood that the authorities at home had not only ordered the discontinuance of "climate allowances," but had required that payments already made should be refunded. That was a decision which he thought the Secretary to the Admiralty would find it difficult seriously to defend, and if the Government persisted in it, he should take steps for obtaining the judgment of Parliament in the matter. Sir J. Hay could scarcely believe that the Government would behave so unhandsomely as to call upon officers to refund money which they had a right to consider as their own, and which many of them, no doubt, had spent or invested. Mr. Macliver appealed to the Admiralty not to carry out its decision.

Sir T. Brassey replied that the sole object of the Admiralty was to place the Marines on an equality with their comrades of the Army with regard to pay and allowances. He would take care, however, that the opinions expressed that day in reference to repayment were conveyed to the Admiralty. He was himself aware of the strong and general objection that existed as to calling for repayment of salary.

Ships for the Navy.

Mr. Norwood expressed his regret that the Government did not propose to take a small vote for extraordinary Navy expenses.

Sir J. Hay expressed his concurrence with the remarks of the hon. Member for Hull. He hoped to hear that the Government intended to take a sum of money for the increase of the Navy. Orders for ironclad ships, to be built on the Clyde, the Humber, the Thames, and at Belfast, could now be executed at a very low price, and would give employment to thousands of starving mechanics Mr. Gourley and Mr. Macliver also hoped the Government would give some assurance that the remarks of the hon. Member for Hull would receive attention, but the Chancellor of the Exchequer reminded the House that it would be premature to state anything now, as the Government was under a pledge to state fully its intentions next Monday.

Defences of Mercantile Ports.

Mr. W. H. Smith asked the Secretary for War on Monday whether any, and if any, what steps had been taken to give effect to the recommendations of the Committee on the Defences of the Mercantile Ports.

The Marquis of Hartington said the subject would be dealt with in the statement as to naval affairs to be made next Monday.

Naval Insurance.

In answer to Sir H. D. Wolff, Member for a seaport borough, Sir T. Brassey stated that the Board of Admiralty took a deep interest in the subject of life insurance for petty officers and seamen of the Navy. There were, however, considerable difficulties connected with the matter, and he was not at present prepared to make any statement in reference to it.

The Agamemnon.

Sir T. Brassey, answering Mr. Gourley, said: The Agamemnon made a trial passage from Portsmouth to Plymouth with satisfactory results as to her steering qualities. She is now on the passage to Malta, from which port we shall receive reports.

Army Promotion.

Mr. Biggar asked the Secretary for War whether it was the fact that the senior major of the 19th Hussars had been lately passed over in promotion to the rank of lieutenant-colonel by a junior officer of the same regiment; whether the major thus superseded was considered unfit for promotion; and whether he was now on probation for or attached to the Army Pay Department.

The Marquis of Hartington: A man may make a good paymaster who could not command a cavalry regiment; and it is a fact that an officer considered ineligible for the command of his regiment is now a paymaster on probation. His confirmation in the Army Pay Department will depend on the manner in which he passes through his probation, and on the examination held at its conclusion.

First-class Torpedo Boats.

Sir J. Hay, in the absence of Lord H. Lennox, asked the Secretary to the Admiralty how many first-class torpedo boats were built, and were ready for the defence of the coasts of the United Kingdom; and what was the date when those boats were built.

Sir T. Brassey: I must ask the noble lord to allow me to defer the answer to his question until the general statement is made on behalf of the Government on Monday next.

The Sailors' Grog.

Mr. Warton asked the Secretary to the Admiralty whether the appointment of Mr. Caine as Civil Lord was to be taken as an indication of a desire on the part of the Admiralty to deprive the sailors of their grog. No answer was returned.

A fine brass lectern has been presented by the officers and men of the Tourmaline, late senior ship at Madagascar, to the Dockyard Chapel at Sheerness, in memory of the members of the crew who have died during her commission.

THE CHANNEL SQUADRON.

[FROM A CORRESPONDENT.]

The ships of the Channel Squadron, under the command of Vice-Admiral the Duke of Edinburgh, left Gibraltar on Tuesday for Portland. On their arrival at Portland his Royal Highness will haul down his flag on the Minotaur on relinquishing the command of the Squadron, and Vice-Admiral De Horsey, who succeeds him, will hoist his flag on board the Hercules until the Black Prince, which is being fitted out as a flagship at Devonport, is ready. Before leaving Gibraltar the Duke of Edinburgh invited the officers of the Squadron to a "smoking concert" on board the Minotaur. Every officer whose duties admitted of his leaving his ship was present, the occasion being regarded as a sort of farewell meeting, at which the Vice-Admiral took leave of his officers. During the time he has been in command of the Squadron his Royal Highness has won the esteem and affection alike of officers and men, and his approaching resignation has occasioned a very general regret.

THE CONFEDERATION OF THE NAVY.

Captain Colomb, writing on this subject to the *Pall Mall Gazette*, points out that the Imperial defence problem really resolves itself into a question of finance, and that it being quite consistent with precedent, the "plant" required to put the Empire in a reasonable state of security should be provided for by loans. He calls attention to the fact that the Colonies have already raised in that way, at higher rate of interest than the mother country would have to pay, considerable sums for building docks, defensive works, or improving harbour accommodation—all additions to the naval and commercial strength of the Empire. He shows the absurdity and unfairness of treating matters in this way by the following illustration:—"We propose to fortify the position of Simon's Bay; that is perfectly useless unless Table Bay be also secured. But we say Simon's Bay is an Imperial position, Table Bay is not, so the cost of the defence of Simon's Bay is to be an Imperial charge, while Table Bay is to be left to the Cape Colony to defend. Now, if Cape Colony does provide for the defence of Table Bay, it will be probably by loan raised in the market, say at 4 per cent. at the very least; if Simon's Bay defences are provided for by us by loan we shall get the money at 3 per cent." He declares that the opportunity is now offered the Prime Minister to lay the foundations of a consolidated empire by financing the loan on an Imperial rather than a United Kingdom basis, and by calling into council the statesmen of our Colonies on this very point. He concludes, "When Mr. Gladstone sits down after his statement on Monday week we shall know the probable fate of our empire. We shall then know whether the great master of finance looks beyond 'the silver streak' for a field worthy of his genius and wide enough for the foundations of an Imperial structure, or whether we are to go on fiddling till Rome falls."

TORPEDOES IN CHINA.

Capt. Harvey, the inventor of the towing torpedo, and at present attached as torpedo instructor and marine surveyor to the Chinese Naval School at Nankin, writes to a contemporary some particulars of a series of experiments that have been recently carried out by him at the request of the Mandarins, who were very anxious to see the manipulation of these weapons, one of which it was supposed had been used to effect the destruction of a Chinese man-of-war at Foochow. He says:—"The experiments were carried out on the river at Nankin, off the powder works, in 12 ft. of water, and in the vicinity of the city wall, which is about 50 ft. high at this point. Owing to the close proximity of the city only gunpowder was used, each charge in the torpedoes being fired by a small detonated charge of dynamite. The experiments consisted of trials of the various kinds of torpedoes, one large ground mine containing 400 lb. of powder, one small ground mine containing 150 lb. of powder, one of Capt. McEvoy's circuit closer buoyant contact mines containing 100 lb. of powder, and one improvised spar torpedo containing 33 lb. of powder. The ground mines were arranged to fire only at will through about half a mile of cable. The circuit closer mine was arranged to fire either by contact or at will. Both the small ground mine and circuit closer mine were exploded at will from the shore, with the result that large columns of water were thrown up from 80 ft. to 100 ft. high into the air. The large ground mine, however, was not exploded, as it was feared that fragments of the mine might be projected into the city and cause injury to the inhabitants. The boat from which the spar torpedo was exploded is known as a san-pan, and was manned by Capt. Harvey, a Chinese assistant engineer, Mr. Mar, and two coolies. The torpedo was fixed to a spar 40 ft. long, which projected from the bows of the san-pan. The boat was put beam on to the wind and the torpedo fired. The effect was very fine, the water being thrown up to a great height. The result to the san-pan was only a slight injury to her bow. These experiments were made in the presence of the Chinese authorities, to whom they afforded great satisfaction. The city wall was lined with many hundreds of the inhabitants of Nankin, who took a lively interest in the—to them—novel proceedings."

Capt. Bosanquet and the officers of the Cambridge gave their annual ball at the Royal Hotel, Devonport, last Tuesday. Lieut. Kingsford undertook the decoration and general arrangements. A large number of guests were present, including all the naval and military notabilities, and a most enjoyable evening resulted.

The report of the committee on the subject of the rank, pay, and position of Naval accountants and engineers has now been sent in, and it is expected that as the result of its recommendations considerable changes will be made in the case of both these classes of officers.

The German brig Rover arrived in Plymouth Sound on Sunday afternoon from Kiel, on her passage to Madeira.

On Tuesday the Princess Victoria Melita, daughter of H.R.H. the Duke of Edinburgh, who was born in Malta, attained her eighth birthday.

The Gazettes.

TUESDAY EVENING.

ARMY.

DOWNING STREET, Nov. 22, 1884.

The Queen has been pleased to appoint Major-Gen. P. H. Stratchley, R.E., C.M.G., to be her Special Commissioner for the Protected Territory in New Guinea.

WAR OFFICE, Pall Mall, Nov. 25, 1884.

4th Hussars.—Regtl. Serjt.-Major John Rhodes to be Qrmr., vice W. Leetch, retired.

Royal Engineers.—Major and Brevet Col. W. M. Campbell (late Bombay) retires upon retired pay and extra annuity, with the hon. rank of Major-Gen. (Nov. 28); Major R. H. Vetch to be Lieut.-Col., vice Col. M. J. Wheatley, placed upon the Half-pay List (Oct. 12).

Line Battalions.

The Royal Fusiliers (City of London Regiment).—Capt. H. A. Anderson, about to be appointed to the Militia, retires on half-pay.

The Suffolk Regiment.—Lieut. A. W. Hunt, from the Lincolnshire Regt., to be Lieut., vice C. A. C. Deane, promoted.

The East Yorkshire Regiment.—Lieut. C. Herbert, from the Prince of Wales's Volunteers (South Lancashire Regt.), to be Lieut., vice F. S. Inglefield, promoted.

The Leicestershire Regiment.—Lieut.-Col. and Col. C. McPherson has been appointed to command a battalion; Major S. Bradburne to be Lieut.-Col., vice Col. C. G. Grant, retired; Capt H. I. Nares to be Major, vice S. Bradburne (all three dated Nov. 15); Lieut. H. C. Howard, from the Prince of Wales's Volunteers (South Lancashire Regt.), to be Lieut., vice G. F. Shaw, promoted.

The Lancashire Fusiliers.—Capt. W. Randolph to be Major, vice L. Marshall, seconded for service on the Staff (Sept. 24).

The Royal Welsh Fusiliers.—Lieut. J. H. Gwynne, from the Oxfordshire L.I., to be Lieut., vice G. F. Pinney, transferred to the Rifle Brigade (the Prince Consort's Own).

The East Surrey Regiment.—Capt. C. G. H. Newington has been seconded for service with the Army Pay Dept. (Nov. 20).

The Royal Sussex Regiment.—Capt. C. Russell has been seconded for service as a Deputy-Assist.-Comy.-Gen. (Aug. 6).

The Welsh Regiment.—The promotions to the rank of Capt. of Lieuts. P. W. Hunt and J. Sillem, as notified in *Gazettes* of Aug. 5 and Aug. 19 respectively, are cancelled. Lieuts. P. W. Hunt to be Capt., vice W. H. Tapp, seconded (June 6); J. Sillem to be Capt., vice W. F. T. Parreidt, retired (June 11).

The Oxfordshire Light Infantry.—Major W. H. Wilson retires on retired pay, with the hon. rank of Lieut.-Col.

The Essex Regiment.—Capt. G. R. Ellis has been seconded for service with the Army Pay Department (Nov. 12).

The King's Royal Rifle Corps.—Lieut.-Col. and Col. Sir C. Ashburnham, K.C.B., A.D.C. to the Queen, has been placed on half-pay, on appointment to the Staff (Nov. 1); Lieuts. R. G. Buchanan-Riddell to be Capt., vice Brevet Major J. N. Blackwood-Price, retired; R. S. Oxley, from the York and Lancaster Regt., to be Lieut., vice R. G. Buchanan-Riddell, promoted.

The Durham Light Infantry.—Major F. G. A. Wiehe has been seconded for service on the Staff (Oct. 29).

The Rifle Brigade (the Prince Consort's Own).—Lieuts. C. R. Orde to be Capt., vice L. H. Bathurst, promoted (Sept. 10); the Hon. H. C. Hardinge to be Capt., vice R. J. Heber-Percy, promoted (Sept. 20); C. H. Hastings resigns his commission; W. J. Lascelles resigns his commission; H. H. Wilson, from the Royal Irish Regt., to be Lieut., vice C. R. Orde, promoted.

Royal Malta Fencible Artillery.—Lieut., with local and temporary rank, A. Mattei to be Capt., with local and temporary rank, vice R. Casolani, seconded for service in a civil capacity in Malta Nov. 15).

Staff.

Major A. Warry, R.A., to be a Deputy-Assist.-Adjt.-Gen., R.A., at Head-quarters, vice Lieut.-Col. J. A. Tillard, R.A., who has vacated that appointment (Sept. 1).

Capt. H. C. Somerset, the Buffs (East Kent Regt.), to be A.D.C. to Major-Gen. J. N. Sargent, C.B., commanding the troops in China, Hong Kong, &c. (Aug. 1).

Medical Staff.—Brig.-Surg. R. W. Carter is granted retired pay, with the hon. rank of Deputy-Surg.-Gen.; Surg.-Major D. Renton, M.D., is granted retired pay, with the hon. rank of Brig.-Surg.

Army Pay Department.—Staff Pymr. and Hon. Major J. M. McNair has retired on retired pay, with the hon. rank of Lieut.-Col.; Capt. P. Montagu, 12th Lancers, to be Pymr. (both dated June 11).

Veterinary Department.—Vet.-Surg. on probation F. Joslen, to be Vet.-Surg. (May 9).

Memoranda.

Gen. J. A. Ewart, C.B., Col. 2nd Batn. the Gordon Highlanders, to be placed on retired pay (Dec. 1); Lieut.-Col. E. T. Thackeray, V.C., Royal (late Bengal) Engineers, to be Col. (Nov. 25).

The under-mentioned officers to have the hon. rank of Lieut.-Col.:—Capts. and Brevet Majors J. F. Sweeney, half-pay, Staff Officer of Pensioners; R. E. Roe, half-pay, Staff Officer of Pensioners (both dated July 1, 1881); R. F. H. Macgregor, half-pay, Staff Officer of Pensioners (Oct. 7, 1881); W. J. L. Milligan, half-pay, Staff Officer of Pensioners (Dec. 5, 1881); W. H. Clements, half-pay, Staff Officer of Pensioners (April 14, 1882); J. A. Morrah, half-pay, Staff Officer of Pensioners (Oct. 1).

The under-mentioned officer to have the hon. rank of Major:—Capt. B. H. Burke, half-pay, Staff Officer of Pensioners (July 1).

The following officers to have the hon. rank of Colonel:—Capts. and Hon. Lieut.-Cols. R. E. Roe, retired pay, late Staff Officer of Pensioners (July 7, 1883), and J. F. Sweeney, retired pay, late Staff Officer of Pensioners (June 26).

Capt. H. A. Anderson, half-pay, is placed on retired pay.

INDIA OFFICE, Nov. 25, 1884.

The Queen has approved of the following promotions among the officers of the Staff Corps and Indian Military Services made by the Governments in India:—

Bengal Staff Corps.

To be Lieutenant-Colonels:—Majors T. Dawes (Sept. 2), A. B. Hepburn (Sept. 4), and A. Vallings (Sept. 20).

To be Majors:—Capts. W. G. C. Halkett and H. Boileau (both dated Sept. 9).

To be Captains:—Lieuts. G. A. Money and W. W. Lean (both dated Sept. 11).

Bengal Cavalry.

To be Lieutenant-Colonel:—Major and Brevet Lieut.-Col. A. W. Capel (Sept. 4).

Bengal Infantry.

To be Colonel:—Lieut.-Col. and Brevet Col. G. T. Jones (Sept. 11).

Bengal Medical Establishment.

To be Deputy-Surgeon-General:—Brig.-Surg. A. M. Dallas (Sept. 9).

Madras Staff Corps.

To be Lieutenant-Colonels:—Majors J. O. Goldie (Sept. 4), and S. E. Atkinson (Sept. 20).

To be Major:—Capt. E. A. Fraser (Sept. 13).

Madras Infantry.

To be Colonel:—Lieut.-Col. and Brevet Col. C. A. Benson (Sept. 29).

Madras Medical Establishment.

To be Deputy-Surgeon-General:—Brig.-Surg. G. S. W. Ogg (Aug. 5).

To be Brigade-Surgeon:—Surg.-Major C. Robertson, M.D. (Aug. 5).

Bombay Staff Corps.

To be Majors:—Capts. L. F. Heath (Sept. 9), and D. W. K. Barr (Sept. 20).

To be Captain:—Lieut. R. E. D. Reilly (Aug. 31).

Erratum.—The second name of Surg.-Major G. R. Daphtary, M.D., Bengal Medical Establishment, is "Ratanlál," and not as stated in the *London Gazette* of June 6.

MILITIA.

WAR OFFICE, Pall Mall, Nov. 25, 1884.

Royal Artillery.

3rd Brigade, Cinque Ports Division.—Lieut. W. M. Cobbett resigns his commission.

2nd Brigade, Southern Division.—Lieut. R. R. F. Cavendish, from the 1st Sussex A.V.C., to be Lieut.

5th Brigade, North Irish Division.—The under-mentioned Lieuts. to be Capts.:—F. R. Lambert, T. K. Bunbury, and E. C. Lawless.

Infantry.

3rd Battalion, the Royal Scots (Lothian Regiment).—Lieut. C. R. G. Smythe to be Capt.

3rd Battalion, the Queen's (Royal West Surrey Regiment).—Laurence Rowe Fisher Rowe, gent., to be Lieut.

4th Battalion, the Prince of Wales's Own (West Yorkshire Regiment).—Lieut. M. B. Williams resigns his commission.

4th Battalion, the Royal Inniskilling Fusiliers.—Godfrey Richard Conyngham Stuart, gent., to be Lieut.

3rd and 4th Battalions, the Duke of Wellington's (West Riding Regiment).—Lieut. G. E. Hammond, from the 3rd London R.V.C., to be Capt.

6th Battalion, the King's Royal Rifle Corps.—The services of Lieut. F. Burrow are dispensed with.

3rd Battalion, the Royal Irish Rifles.—Lieut. J. Cleland resigns his commission.

6th Battalion, the Royal Irish Rifles.—Col. Sir J. S. Robinson, Bart., C.B. (retired), is appointed Hon. Col. of the battalion.

5th Battalion, Princess Victoria's (Royal Irish Fusiliers).—Col. Sir T. O. Forster, Bart., C.B. (retired), is appointed Hon. Col. of the battalion.

6th Battalion, the Connaught Rangers.—Capt. and Hon. Major M. C. J. Blake to be Major.

9th Battalion, the Rifle Brigade (the Prince Consort's Own).—George Francis Reginald Forbes, gent., to be Lieut.

4th Battalion, the Prince of Wales's Leinster Regiment (Royal Canadians).—Col. H. D. Carden (retired) is appointed Hon. Col. of the battalion. The resignation of the commission held by Lieut. C. FitzG. T. Cochrane, announced in the *London Gazette* of July 18, is cancelled.

Memorandum.

The following to be substituted for the notification which appeared in the *London Gazette* of the 21st inst.:—

2nd Battalion, the Queen's Own Cameron Highlanders.—The Hon. J. D. Elphinstone, Master of Elphinstone, to be Lieut. (Nov. 22).

YEOMANRY CAVALRY.

WAR OFFICE, Pall Mall, Nov. 25, 1884.

Derbyshire.—Lieut. G. Meynell resigns his commission.

Warwickshire.—Robert Jervoise Attye, gent., to be Lieut.

VOLUNTEERS.

WAR OFFICE, Pall Mall, Nov. 25, 1884.

Artillery.

1st Cumberland.—Lieut C. Armstrong resigns his commission.

1st Glamorganshire.—Charles St. David Spencer, gent., to be Lieut.

Cadet Corps (Bristol), attached to 1st Gloucestershire.—Hon. Capt. J. G. S. Muschamp, M.A., resigns his commission.

1st Hampshire.—Lieut. G. H. Hodding resigns his commission.

3rd Middlesex.—Capt. C. Slack resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st East Riding of Yorkshire.—The services of Surg. H. Dodd are dispensed with.

2nd East Riding of Yorkshire.—Charles Ernest Gresham, gent., to be Lieut.

Engineer.

1st Lancashire.—Major F. S. Chantrell resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

Rifle.

1st Volunteer Battalion, the Gordon Highlanders.—Capt. A. Morrice resigns his commission; also is permitted to retain his rank, and to continne to wear the uniform of the batn. on his retirement. Lieut. W. Mackinnon to be Capt.

1st Berwickshire.—Lieut. C. McLean resigns his commission.

2nd Bucks (Eton College).—Major the Rev. E. Warre, M.A., resigns his commission, and is appointed Hon. Col. of the corps; Lieut. R. B. Loder resigns his commission.

1st Cambridgeshire.—The under-mentioned officers resign their commissions:—Lieut. W. Groom, jun., and Hon. Assist.-Surg. W. Groom.

5th Cheshire.—Arthur Boyer Wise, gent., to be Lieut.

1st Cornwall (Duke of Cornwall's).—Richard Charles Mason Pooley, gent., M.D., to be Surg.; Edward Scudamore Angove, gent., to be Acting Surg.

2nd Devonshire (Prince of Wales's).—Lieut.-Col. W. H., Earl of Mount Edgcumbe, is granted the hon. rank of Col. (Nov. 15).

1st Dumfries.—Capt. J. M. Gun resigns his commission; James Maclachlan, gent., M.B., to be Acting Surg.

1st Fifeshire.—Capt. and Hon. Major T. Brown resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st Forfar (Dundee).—Capt. J. Fleming resigns his commission; Lieut. D. A. Watson to be Capt.

1st Volunteer Battalion, the Queen's Own (Royal West Kent Regiment).—Lieut. R. H. Bartram resigns his commission.

9th Lanarkshire.—Lieut. J. Scott resigns his commission.

4th Lancashire.—The under-mentioned gentlemen to be Lieuts.:—Samuel Stott and James Stott.

6th Lancashire (1st Manchester).—Capt. J. Pilcher to be Major; the Rev. William Thomas Jones, M.A., to be Acting Chaplain.

15th Lancashire.—Henry Buxton Browne, gent., to be Lieut.

21st Lancashire.—William Lees McClure, jun., gent., to be Lieut.

2nd (South) Middlesex.—The under-mentioned Lieuts. resign their commissions:—G. W. Garrod and W. R. Carter.

3rd Middlesex.—The services of Lieut. W. E. Gower are dispensed with.

6th Middlesex (St. George's).—Lieut. A. J. Barber resigns his commission.

7th Middlesex (London Scottish).—The under-mentioned Capts. and Hon. Majors resign their commissions; also are permitted to retain their rank, and to wear the uniform of the corps on their retirement:—W. S. Sutherland and S. Puckle. The under-mentioned Lieuts. to be Capts.:—M. C. T. Stevenson and W. H. G. Smith.

8th (S.W.) Middlesex.—Capt. W. Ruston to be Major.

19th Middlesex (St. Giles's and St. George's, Bloomsbury).—Lieut. W. E. Gould, from 21st Middlesex (the Finsbury) R.V.C., to be Lieut.

21st Middlesex (the Finsbury).—Lieut. J. Slater resigns his commission.

2nd Volunteer Battalion, the Royal Fusiliers (City of London Regiment).—Capt. W. J. Bearne resigns his commission. Capt. F. Slater resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the battalion on his retirement.

3rd Volunteer Battalion, the Northumberland Fusiliers.—Qrmr. J. E. Rei resigns his commission.

1st Renfrewshire.—Hon. Major and Adjt. J. J. Grier resigns his commission, and is placed on a retired allowance; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement (Dec. 1).

2nd Renfrewshire.—Lieut. W. Loudon resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

2nd Shropshire.—Walter Young, gent., to be Lieut.

3rd Volunteer Battalion, the Queen's (Royal West Surrey Regiment).—Lieut. R. K. Bevington to be Capt.

7th Surrey.—Major J. G. Sparkes, 2nd Batn. the Sherwood Foresters (Derbyshire Regt.), to be Adjt., in succession to Capt. T. Barns, the King's Own Borderers, whose period of service as Adjt. has expired (Dec. 1).

2nd Tower Hamlets.—Capt. and Brevet Major H. J. Daubeny, 2nd Batn. the Royal Irish Regt., to be Adjt., in succession to Major G. B. Meares, the Royal Fusiliers (City of London Regt.), whose period of service as Adjt. expires (Dec. 3).

1st Westmoreland.—Lieut. F. O. Harrison resigns his commission.

1st Volunteer Battalion, the King's Own Light Infantry (South Yorkshire Regiment).—Lieut. J. B. Shaw resigns his commission; Everatt Hind, gent., to be Lieut.

[Where not otherwise stated, the foregoing commissions and announcements bear date Nov. 26, and the current year must be understood.]

FRIDAY EVENING.

ARMY.

INDIA OFFICE, Nov. 28, 1884.

The Queen has approved of the following admissions to the Staff Corps made by the Governments in India:—

Bengal Staff Corps.

To be Lieutenants:—Lieuts. P. B. Vaughan, from the Bedfordshire Regt. (dated July 4, 1883, but to rank from July 1, 1881); E Grey, from the Suffolk Regt. (dated June 21, 1883, but to rank from July 1, 1881); and H. Comins, from the Norfolk Regt. (dated July 21, 1883, but to rank from July 1, 1881).

Madras Staff Corps.

To be Lieutenant:—Lieut. E. C. Thwaytes, from the South Wales Borderers (dated Jan. 17, 1883, but to rank from July 1, 1881).

Bombay Staff Corps.

To be Lieutenant:—Lieut. R. Errington, from the 1st West India Regt. (dated Feb. 5, 1883, but to rank from May 4, 1881).

The Queen has also approved of the transfer of the under-mentioned officer to the Half-pay List:—

Bengal Medical Establishment.

Surg. F. J. Tuohy, M.D. (Nov. 21).

London Amusements.

At the Criterion, a farcical comedy called "The Candidate" has served for the reappearance of Mr. Charles Wyndham, after a prolonged absence from his own theatre. The piece is an ingenious adaptation of "Le Député de Bombignac," by Alexandre Bisson, produced at the Comédie Française at the close of last May. The plot recalls reminiscences of "Le Mari à la Campagne," known to English playgoers in the form of Morris Barnett's "Serious Family" and Burnand's more recent comedy of "The Colonel;" but the version is here made to convey shafts of political satire. However, they carry with them no venom, and serve only as barbed points of pleasantry, which adherents of all parties may enjoy seeing in flight and falling harmlessly around. The experiment of alluding on the stage to Members of Parliament by names only thinly veiled was not made without some risk, and is certainly not to be commended for imitation; but the "skits" were well received, and it is not likely in this instance that strong expressions of opinion will ever be evoked from any audience. Mr. Wyndham represents Viscount Oldacre, the candidate and erratic husband, in his most vivacious manner. Mr. George Giddens cleverly acts the part of Alaric Baffin, the Radical secretary to a Conservative nobleman, and Mr. Blakeley, Mr. Maltby, Miss Kate Rorke, Miss Rose Saker, and Miss Fanny Coleman are well placed in their respective positions. The adapter, who has executed a difficult task with equal daring and dexterity, is as yet unrevealed, but Mr. Wyndham promised that his name should be made known in course of time; and in the interval the curiosity of the public may be appeased by knowing that two merry hours are at their command whenever they go to see "The Candidate."

The programme of French plays at the Royalty has this week included the mirthful farcical piece called "Tricoche et Cacolet," familiar to London playgoers through the adaptation entitled, "Bibb and Tucker." There is so much practical humour in the incidents of the brisk plot, that the story becomes clearly intelligible to spectators who may not comprehend a word of the dialogue. Madame Andral proved an agreeable heroine, Madame Rose Lion played Fanny Bombance with vivacity, and M. Colombey as Cacolet, and the younger M. Schey as Tricoche, were extravagantly funny, to the delight of the audience.

"Called Back," at the Prince's, is now preceded by a tragic farce, by Mr. Comyns Carr, entitled, "A Fireside Hamlet." A journeyman baker, named Dick, is so impressed by a visit to the Princess's Theatre, where he has seen "Hamlet" for the first time, that he identifies himself with the Prince of Denmark and regards his sweetheart Mary and her father, Ruggles, a cab-driver, as another Ophelia and Polonius. The dramatic power of Mr. Beerbohm Tree gives strength to this literary trifle, and Miss Tilbury and Mr. Caffray afford all the support required.

"Old Knockles," written by Mr. Arthur Law, and supplied with some pretty songs and concerted pieces by Mr. Alfred Caldicott, is a lively addition to Mr. and Mrs. German Reed's repertory at St. George's Hall. Old Knockles is a venerable Yarmouth boatman, cleverly impersonated by Mr. Alfred Reed, and his blundering misconceptions of the character and objects of the visitors to his humble residence afford the groundwork of some humorous situations. Miss Fanny Holland, Miss Wardroper, Mr. North Home, and Mr. Charles Allan effectively assist the dramatic action. Mr. Eric Lewis, filling the place of Mr. Corney Grain, compelled to visit southern climes through an affection of the throat, gives a supplementary musical sketch called "A Water Picnic."

Scottish music in celebration of St. Andrew's Day will find a prominent place in a special concert given this (Saturday) evening at Covent Garden Theatre, at a Ballad Concert at St. James's Hall, and at the Agricultural Hall by the Mohawk Minstrels. On Monday evening, at the Royal Albert Hall and Prince's Hall, Piccadilly, Scotch music, vocal and instrumental, will also be rendered by eminent executants.

It is announced that, on Monday next, "The Swans," a new and original ballet divertissement, invented and arranged by Mons. J. Hansen, will be produced at the Alhambra Theatre for the first time. The music has been specially composed by Mons. G. Jacobi, and Mr. Charles Brew has painted the scenery. The scene will represent a beautiful, shady forest, with a lake on which swans are to float. Mdlle. Palladino is the première danseuse. On the same night, the Orsani Troupe (musical eccentrics) will make their first appearance in England.

"Polly," the comic opera by Messrs. Solomon and Mortimer, is drawing good houses at the Empire, to which house it was lately transferred from the Novelty. The plot of the piece is essentially military, and to soldiers it should prove specially attractive, seeing that it is mounted and dressed with great care, and contains scenes and incidents illustrative of life in a British cavalry regiment. Of course, allowances have to be made for the licence of the stage. Setting aside little inconsistencies which the librettist has been obliged to introduce for the purposes of effect, the piece runs merrily along, and is one that a soldier would enjoy.

Printed and Published for the Proprietors, at the Office, No. 6 Wellington Street, Strand, London.—Saturday, Nov. 29, 1884. Letters on Business and Remittances should be sent to Mr. Richard James Wood.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* not *to the* Editor *of the* Army and Navy Gazette.

The subscription to the paper is 7s. per quarter, or 28s. per annum, payable in advance, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer, 248 Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

THE simultaneous statements made by Lord Northbrook and Sir Thomas Brassey on Tuesday evening can only be considered satisfactory on the assumption that the expressed proposals are only a forestalment of further and fuller measures to "maintain the Naval supremacy of the country." And we are justified in believing such to be the case, from the admission made in both Houses that it was quite possible the proposals then enunciated might require to be materially increased. No more convincing proof than is contained in the official utterances could well be afforded to the general truth of our contention that the Navy is neither strong enough in ships, in guns, or in officers, for the task allotted to it, nor our harbour defences adequate or efficient. It will therefore be surprising if, under the circumstances, the public are contented without some reform also in the system of administration which admits of such a lamentable state of affairs arising. We are not desirous now of inquiring into the causes which have prevented the Government from apparently realising our true condition until it has been forced upon them by a section of the public Press, but will content ourselves with examining the various contemplated additions contained in their proposals. The question of our numerical superiority to the French is answered by Ministers in the affirmative; but as we have already shown, it depends so entirely upon the classification used for comparison, as to be in reality little or no test of actual value. They draw the line, as far as serviceable ships of the best class are concerned, at those which are veritable iron ships, as opposed to those that are iron-plated on wooden frames, and they find a balance in favour of England of 11 ships; while of the quasi-obsolete vessels, there are 16 English against 12 French, or, taking the whole armour-clad Navy absolutely built, 46 English and 31 French. A very small advantage, judging by the enormous difference in the work required of the two Fleets, and sinking altogether out of sight, when it is considered that, built and building, the French possess 14 vessels of 15-in. armour, to our 11 with 12-in. No one, however, will question the value of their conclusions, when it is understood that, whatever deductions they may have drawn, it has led them to determine upon asking for an increase to our armoured ships of the first-class by four, or one more in addition to those already contemplated, all of which are to be laid down next year. The one specially mentioned by Lord Northbrook to be built by private contract will be of the *Conqueror* class, of between 10,000 and 11,000 tons, with 18-in. armour, and will carry two 110-ton guns in a turret, one 18-ton gun in the stern, and twelve 4-ton guns on the broadside; her estimated speed is to be 15½ knots. This is a decided advance in every direction on existing vessels. The length of time which it is expected will be required to construct this and similar vessels was naturally the subject of adverse criticism, after the repeated statements that have been made as to the facility with which private shipbuilders turn out fully-equipped foreign men-of-war in from two to three years. And we maintain, with Sir Edward Reed, that the truest economy is to push on building both those vessels that are already in hand and the new ones without unavoidable delay. We are glad that both the First Lord and the Secretary to the Admiralty expressed themselves as fully alive to the necessity of increasing our swift armoured cruisers as a means of protection to our commerce, fearful as we felt that they were too much inclined to place reliance on our Mercantile Navy. They ask for six improved *Merseys*; and following as near as possible to Sir Edward Reed's proposals in type and armament, as well as number, they are to be defended with 10-inch belts of steel, in place of the 3-inch steel deck in the *Mersey* class, and to carry two 18-ton, two 6-inch, and numerous machine-guns; with an estimated speed of 17 knots, and a coal capacity sufficient for 2,000 knots at full speed, or 8,000 knots at a cruising speed of 10 knots. Altogether they seem likely to fulfil Sir Thomas Brassey's prediction, "that whatever changes may take place in the future, they will not easily become an obsolete type." Our deficiency in torpedo craft is amply admitted, including the torpedo-ram, declared by the Austrian Minister of Marine to be the "war-vessel of the future." Testimony is borne by Sir Thomas to the fact that the *Polyphemus* has been proved by experience to be a "most successful type of vessel," and Lord Northbrook sees almost revolutionary possibilities in her success. Two rather larger and wider vessels of this description are to be built, with a speed of 17½ knots, and with better accommodation for the ship's company. Of modified scouts, sea-going torpedo cruisers, with twin-screws, steel built, of 1,500 tons and 3,200 horse-power, carrying six 4-ton guns as well as a torpedo armament, there are to be ten; and as they have good coal endurance they will, although only jury-rigged, perform service as cruisers in time of peace, and as fast torpedo auxiliaries in time of war. The estimated speed is 16 knots, the coal supply equal to 1,650 knots at full speed, and 7,000 knots at 10 knots. With regard to smaller torpedo-boats, it is difficult to understand by what standard the number required has been estimated. The proposed number is 30, of which only 10 are to be built in the ensuing year. Considering that of this class of boat France has 50 already, and is building more; that Germany has ordered 70, and Austria has just determined on buying or building about the same number; and, as Sir Donald Currie said, we have in the British Isles a coast-line to protect nearly equal to the whole coast-line of France, Germany, and Austria put together, besides our coaling stations and Naval ports abroad, it would seem as if even three times the proposed number would yet be insufficient for an effective coast defence. Referring to the fact that most of the additional ships would be built by private contract, the First Lord stated that it was expedient that the private shipbuilder should be familiarised with the practice of shipbuilding for the Navy; and although we are always in favour of the public work being carried on as much as possible in the public yards, there is no doubt in this instance that placing these orders on the Northern rivers will give employment to a numerous class of deserving men at present in great distress from want of work. Next, the question of guns receives attention, and herein again we are of opinion that the Government proposals fall somewhat short of what is absolutely required. The proposed expenditure is £1,600,000 for guns, torpedoes, and some slight extension of plant at Woolwich, and this in addition to the half-million already included in the Army Estimates for Naval ordnance. When it is remembered, however, that in consequence of the decision to arm the Navy with steel breech-loaders, some 3,500 guns are wanted, and only about 500 are yet in existence, it is plain that the above sum will go but a small way towards making up the deficiency. It was not, however, the question of expenditure that we mainly took exception to; but that, owing to the divided responsibility caused by the guns being supplied from the War Department, and the fact, pointed out by no less an authority than the Chief Constructor of the Navy, that expensive delay is thereby caused, we looked for some indication of a movement in favour of the Admiralty being allowed to procure its own guns,—from Woolwich, if possible; but if not, from outside. Lastly, we come to the defence, not only of the coaling stations abroad, but of the dockyards and arsenals and great mercantile ports at home. The former, Lord Northbrook said most truly, should rather be ports of refuge to which, if necessary, our ships could resort for repairs and refit; and the small sum named, £825,000, being evidently insufficient to in any way supply adequate protection either in fortification or marine defence, it was only natural that his Lordship should express the advisability of the taxpayers holding themselves in readiness to contribute a much larger sum. Altogether, as far as Naval officers are concerned, they should be contented for the present at the evident intention displayed to trust more to complete protection; and considering also that these proposals, along with the other Navy and Army Estimates, will be referred to a Committee of the House of Commons in the spring, with the important reservations Lord Northbrook made in respect to the proposed additions to the Navy, it is extremely likely further expenditure will be found desirable, if the interests of the country are to be sufficiently and efficiently safeguarded.

THE school of adversity is not a pleasant one, but there are people who will learn nowhere else. Before the breaking-out of the Franco-German War, the Liberals in the French Corps Législatif never ceased assailing the Imperial Government until they forced Marshal Niel to consent to a reduction of the War Estimates. They contended that the National Guard formed a sufficient protection for France, and that the Standing Army should be abolished. What a change came over the spirit of these gentlemen after the war is well known. It was hardly just, however, that they should have reaped the benefit of the disasters for which they were in a great measure responsible. This is what we find. In 1870, the French War Estimates, voted for the ensuing year, amounted, in round numbers, to 369 million francs, thus showing a reduction of three millions on the previous year. It was little anticipated that hostilities were on the point of breaking out, and that 1871 would witness the conclusion of the most disastrous campaign in which France was ever engaged. Had it been otherwise, M. Jules Favre, M. Jules Ferry, M. Jules Grévy, M. Jules Simon, and their allies would hardly have insisted on an economy of £120,000. So severe was the blow, what with the indemnity and other enormous expenses, that the new charges occasioned by the war amounted, as the Minister of Finance declared, to 650 million francs a year. It was with this additional load round her neck that France set to work to repair her losses. In 1872 we find that the war estimates had jumped up to 450 millions, and at the same time the "Account of Liquidation" was voted. This meant that an extraordinary expenditure of over £100,000,000 would be required to make good damages, to replenish magazines, build fortifications, rearm the troops, &c. In 1873, although the effectives had been reduced by 10,000 men and 3,000 horses, the estimates were 459 millions. The strength of the Army in that year was 425,000 men and 84,000 horses, without counting Gendarmerie and Garde Republicaine, 29,000 men and 15,000 horses. The augmentation of 9,000,000 f. was caused by increase of cadres, creation of two new regiments of artillery, and rise in price of sugar and coffee, &c. In 1874, the ascentional movement continued, and the estimate rose to 480 millions. A new storm had appeared to be brewing on the Eastern frontier; there was a concentration of troops, and in addition to this came the expense of creating the nineteen Army Corps into which the French Army, with the exception of some independent divisions of Cavalry and battalions of Chasseurs or Rifles, is divided. In 1875, the War Minister had to ask for an extra 10 millions to carry out the reorganisation of the Army. The estimates for that year amounted to 493 millions. In 1876, the ordinary expenditure attained 500,000,000f., or £20,000,000. In 1877, the War Minister, seeing that the Reserves were to be called out, asked for 535 millions, but the Chamber refused to vote more than 525 millions. In 1878, the War Minister asked for 541 millions, and obtained 531 millions. In 1879, the estimates rose to 553 millions, and to 568 millions in 1880, when money was voted to induce non-commissioned officers to re-engage, and when the number of horses was augmented. In 1881, a variety of changes led to increased expenditure, and the estimates rose to 571 millions; in 1882 there was a slight advance, in 1883 they rose to 587 millions, and for this year to 605 millions, or approaching double the amount laid out by the Empire, taking merely the ordinary Budget, and leaving out the *compte de liquidation*. The extraordinary expenditure for 1884 is set down at 110 millions; and, consequently, the War Budget for this year really exceeds 700 millions. The extraordinary expenditure for 1883 amounted to 81 millions, thus bringing the ordinary and extraordinary expenditure up to 668 millions. In some years the extraordinary expenditure was more heavy still. In 1881 it amounted to 100 millions for artillery alone; in 1880 it amounted to 169 millions,—all this for military purposes. For 1884 we see that the augmentation in the Budget was due to the necessity of forming special corps for Tunis. This occasioned an expense of 20 millions, For 1885 the estimates amount to 596 millions for ordinary, and 85 millions for extraordinary purposes. This shows a considerable reduction on the present year, but we see that two new regiments—one of Foreign Legion and the other of Turcos—are to be raised for service in Tonquin, also that a Colonial Army is to be created. The probability, therefore, is that the military expenditure for 1885 will, in the end, greatly exceed that of 1884. In addition to this, the French War Minister, in asking for only 85 millions for extraordinary expenses, says that he makes this modest demand in a spirit of economy, pointing out at the same time that 191 millions will be required in 1886 and the following years, in order to attain the total expenditure of 2,292,971,451f. foreseen in 1881 liquidation account. It may be mentioned that bills are sometimes sent in after considerable delay. Thus, a debt of 5 million francs which was incurred in 1882 was only presented to Parliament this year. The Parliament, after some grumbling, has ordered its payment. The Franco-German War may, therefore, be said to have completely converted the Republicans. The war estimates are double what they were under the Empire: there is a large standing army, with an immense reserve, improved fortifications, guns, and rifles, and the National Guard, upon whose prowess the Republicans were prepared to depend, is a thing of the past. As far as the French Navy is concerned, the estimates have also augmented since the fall of the Empire. During the Franco-German War there were no naval engagements. France had nothing to fight at sea, and consequently sailors and infantry of marine served ashore. Post captains were appointed Brigadier-Generals. Several Admirals served in Paris during the siege, and several of the detached forts were manned by blue-jackets. At Issy, four Captains fell one after the other, and the fifth, sooner than haul down his flag when Paris capitulated, blew out his brains. The Navy, having suffered merely in men, had not to be reconstructed like the Army, which had lost all its *matériel*, and for a time it was neglected. In 1870, the Naval Estimates stood at 162 millions, the next year at 164, and in 1872 they were reduced by 31 millions. In 1873, the Minister of Marine, asking for 148 millions, mentioned that this sum was much inferior to the last vote of the Empire, taking care to add that he hoped Parliament would soon give more satisfaction to the great interests of France represented by the Navy. In 1874 the estimates rose to 153 millions, the next year to 155, and the year afterwards to 165 millions. In the report on the budget for 1877, it is mentioned that between the years 1872 and 1876 a sum of 20 millions had been spent in the reconstruction of *matériel*. The vote for that year was 185 millions. In 1878 it rose to 189, and in 1879 to 192 millions ordinary, and 21 millions extraordinary expenditure. The French Minister of Marine being also Minister of the Colonies, the estimates above given apply to both the Navy and the Colonies. In 1880, however, we find the Minister asking for 163 millions for his ordinary and 20 millions for his extraordinary Naval expenditure, and 30 millions for the Colonies. In 1881, the ordinary estimates were 168 millions, and the extraordinary 20 millions, the latter sum being required for colonial fortifications. For 1882, we find the ordinary Naval budget set down at 172 millions, and the extraordinary budget at 35 millions. In 1883, the estimates amounted to no less a sum than 284 millions; this year, however, the ordinary and the extraordinary expenditure were merged in one. For 1884, the Naval Estimates alone amounted to 271 millions; while, for next year, the Minister of Marine demands 289 millions. Out of 17 millions for extraordinary purposes, 10 millions are to be devoted to Naval material. What says Admiral Peyron on this subject:—"The artillery of our Fleet and our harbours requires to be completely reconstructed, if we wish to defend our arsenals seriously against the new means of aggression, and if our ironclads, built or building, are effectively to represent what the country expected from them when voting their construction. It is estimated that the cost of reconstructing the artillery will amount to 65 million francs, and this reconstruction ought to be completed in six years." It is, of course, probable that, owing to the continuation of the struggle with China, the Naval Estimates for 1885 will be exceeded, and Admiral Peyron be obliged to ask for fresh supplies. From the above figures we see what efforts France has been making to regain her old position in Europe and in the world. And yet M. Léon Say, in 1882, thought the position of his country so precarious that he protested in his financial *exposé* against any foreign adventures. It was then pointed out that the French Budget amounts to 4 milliards (£160,000,000), against that of Germany a little over, and that of England a little under, 2 milliards; that each Frenchman has to contribute to the State 109 f. a year, each Englishman 58 f., and each German 54 f.; that the National Debt of France is 30 milliards, that of England 19, and that of Germany only 4 milliards; that every Frenchman owes 859 f., every Englishman 579 f., and every German 99 f. How much better would the position of France have been to-day if the Liberals, instead of cutting down War Estimates in 1870, had done a quarter of what they have since been obliged to do,—with loss of prestige and territory to boot!

THERE is, we fear, an utterly inadequate provision to supply trained officers for our Fleet in war-time. We say "trained" advisedly, for no man, however much he may be at home upon the sea, will prove an efficient and capable officer until he has gone through a course of instruction with the material he will be called upon to handle. And this condition, obviously necessary in the regular service, is as indispensable in the case of auxiliary officers, who, without a practical knowledge of the complicated machinery of modern warfare, will simply multiply the premiums already offered to disaster. The effective list at the present time, including Captains, Commanders, Lieutenants, and Sub-Lieutenants, with the Navigating branches, is barely sufficient for the nearly 200 ships in commission, and their reliefs in time of peace. As regards the two senior ranks, a disproportionate number of the younger officers are unemployed; but the overplus there will not in any way assist in supplying Lieutenants—the rank that will be most in demand—who, even now, are all too few. Admitting, however, for the sake of argument, that the executive officers of all ranks on half-pay do form an available reserve for those vessels that could be got ready at short dates for the pennant, it is quite apparent, on looking at the *Navy List*, that they make a totally insufficient provision for officering ships that could be brought forward comparatively quickly, for the armed merchant steamers it is proposed to take into the service, and the swarm of torpedo-boats and small craft for coast and coaling-station defence. Where, then, is the required number of trained and efficient officers to come from to supplement the regular list? Not, certainly, from the merchant service, as in the days when a knowledge of seamanship and navigation was almost the sole desideratum, because, although the readiness of resource and presence of mind, instinctive attributes of the sailor, are now, as then, invaluable, such qualifications will prove delusive, unless there is added the practical experience which, we contend, can only be gained by actual service in the profession. Nor will the Royal Naval Reserve supply the deficiency; for although this body of gentlemen—who cannot be too highly praised for their zeal and patriotism—would no doubt, despite their necessarily somewhat superficial training, provide a large contingent for the merchant vessels upon the Admiralty lists, they scarcely number enough. Allowing, also, that it is within the bounds of possibility a certain proportion of retired officers would come forward in time of public need, the country has no right to reckon on it; and, at the best, this addition would only be partially efficient, owing to the constant change in ships and armament. It is evident an effort must be made to secure a reserve of qualified officers. Several modes have been suggested by which this much-needed reinforcement may be supplied, but no very practicable scheme has been worked out. A few days ago, "One who Knows," a correspondent of the *Pall Mall Gazette*, alluding to the subject, said:—"A valuable reinforcement might be secured if all Marine officers were to enter the service as Naval Cadets, so as to possess such training as would render the Marine officer as handy as the Marine." The objection to this as an immediate remedy is, of course, that many years would elapse before the desired increase would be brought about.

Although the memorable action between the *Chesapeake* and *Shannon* was fought so many years ago, we are informed, on reliable authority, that Thomas A. Lander, a seaman who took part in the engagement, is still living at Anglesea Place, Wellington Park, Clifton, Bristol. This veteran was also present at the Battle of Algiers, August 27, 1816; at a boat action on Christmas Day, 1826; and at Navarino, October 20, 1827. The *Chesapeake* carried 50 guns, her crew consisting of 379 men; the *Shannon* carried 52 guns, her crew numbering 330 men. The historical battle only lasted 15 minutes, and in this brief space of time the *Chesapeake* lost her captain and 70 of the crew, killed, about 100 being wounded. The loss on the British side was about 50 killed and wounded. Lander receives a pension of two shillings per day—too small to provide the necessary comforts of old age. The pension of this old sailor might assuredly be augmented.

The flag of Vice-Admiral the Duke of Edinburgh, who assumed command of the Channel Squadron in December, 1883, was struck on board the *Minotaur* at Portsmouth on Wednesday at sunset on the expiration of his Royal Highness's period of command. The Duke took farewell on Thursday of Captain Britten and the officers. He also expressed a general good-bye to the ship's company. As the Admiral passed over the side the crew gave three hearty rounds of cheers, with one more for "coming up," while the ship's band played "Auld Lang Syne." At the railway-station a large number of Naval officers, including Admiral Hornby, Rear-Admiral Herbert, Captains Nicholson, Colomb, and Fisher, and the Admiral's late shipmates, were in attendance to see his Royal Highness away. In January next it is considered probable that the Duke will assume command of the Mediterranean Fleet, in succession to Admiral Lord J. Hay.

An interesting ceremony took place on board the *Minotaur* on the morning of Sunday, the 30th ult. Immediately after divisions the officers and representatives from the crew assembled on the poop, and in their name Captain Britten presented the Vice-Admiral with a beautiful silk flag, saying how much the donors regretted his Royal Highness's departure, and how warmly they appreciated his universal kindness to all ranks under his command. The Duke, in reply, said he should always value the gift as a reminiscence of many pleasant days spent on board the *Minotaur*.

On Thursday Vice-Admiral Algernon de Horsey hoisted his flag on board the *Minotaur* as successor to H.R.H the Duke of Edinburgh, as senior officer in command of the Channel Squadron. He has appointed Lieutenant William H. Nicholson, of H.M.S. *Agincourt*, to be his flag-lieutenant, and Mr. Henry H. Rickard, paymaster, R.N., to be his secretary. The latter also served in a like capacity to the Duke of Edinburgh.

The *Pall Mall Gazette* gives the following particulars of the present state of the torpedo-mines at the home ports, furnished by a competent authority: —"Chatham, Cork, Gravesend, Harwich, Pembroke, Plymouth, Portsmouth, and Sheerness are all fairly defended as far as the number of mines go, but over 80 per cent. of these are of an antiquated pattern, and not to be considered as really efficient. Glasgow, Liverpool, and Tynemouth are practically undefended by torpedo mines." And as yet we hear nothing of any steps being taken to supply modern ones.

A "Commander, R.N.," wrote last week to an evening paper, which is rather given to making random and reckless statements, to correct a wild assertion that for many years the Navy had drawn large numbers of sailors from the Hebrides, Shetland, and Orkney Islands. He says that in his 23 years' experience he never met a man of the hundreds he has sailed with who belonged to the islands, and that the per-centage of Scotchmen is not more than five, and these mostly from Aberdeen and Glasgow. It is an extraordinary fact that the island and the West Coast fishermen, who are hardy and skilful sailing-boatmen, and who are hardy and strong, detest the service, and rarely enter it.

It is rumoured that the Admiralty intend restoring the old Royal Dockyard at Woolwich, and utilising it for the purpose of fitting and repairing her Majesty's ships; but upon making enquiries, we have been unable to hear anything that substantiates such an announcement.

On Wednesday a special meeting of the North Shields and Tynemouth Chamber of Commerce was held at North Shields, when the following resolution was unanimously adopted:—"That this Chamber highly approves of the proposal of her Majesty's Government to increase the efficiency of the Navy, feeling sure that the commercial prosperity of the country is absolutely dependent on its strength and efficiency."

The *Rambler*, Com. the Hon. F. C. Vereker, fitting for surveying service in the East Indies and China, is ordered to be ready for sea by the 10th inst.

On Monday, Admiral Phillimore took over command at Devonport, in succession to Admiral Sir Houston Stewart, the *Cambridge*, flying the flag of Rear-Admiral Curme, saluting with 17 guns, to which the *Royal Adelaide* replied with 11. Lieutenant W. B. T. Hall has been appointed temporarily Flag-Lieutenant, until the return of Lieutenant Godfrey H. B. Mundy, at present serving in the *Cleopatra*, from China.

We understand that Captain Richard D. King will succeed Captain James G. Mead, in the *Agincourt*, as Flag-Captain to Rear-Admiral Whyte.

The refit of the *Ruby*, unarmoured composite corvette, 1,830 tons, 2,120 horse-power, at Sheerness, is ordered to be pressed forward with all despatch, as she is required to be ready for foreign service by the end of the year. Her armament is to be increased by an equipment of Gardner and Nordenfelt machine-guns.

A great change will be brought about in the active list of Flag officers next year, placing at the disposal of the Admiralty a number of important commands and other good things. Admirals Sir Alfred Ryder, Sir Edward A. Inglefield, and Robert Coote, and Vice-Admirals Wm. G. Luard and Henry Boys will be compulsorily retired through age. Their retirements will bring Vice-Admirals John Corbett, Algernon F. R. de Horsey, and Sir William M. Dowell to the Admirals' list, and Rear-Admirals Thomas B. Lethbridge, Sir Francis W. Sullivan, Edward Hardinge, Wm. Graham, and Sir Anthony H. Hoskins to the Vice-Admirals' list, while Captains Thomas de H. Ward, Wm. Arthur, the Hon. Edward R. Fremantle, John O. Hopkins, and St. George C. D. Irvine will reach flag rank. These promotions will render vacant the command in China, the Presidentship of the Royal Naval College, the command at Queenstown, and the Admiral-Superintendentship of Malta Dockyard, besides two good-service pensions and four aide-de-campships for captains.

The ironclad *Italia* left her moorings at Naples last Sunday, and after a successful trial-trip, proceeded to Spezzia to take on board her 100-ton guns.

The new fish torpedoes now being manufactured in the Royal Laboratory Department at Woolwich will be found to excel in a marked degree the earlier issues, which were made with only some slight modifications on the pattern supplied by the inventor. Many improvements have recently been introduced by the Department by which their speed has been increased to 24 knots an hour through the water, and they are relied upon to strike with absolute accuracy at a range of 600 yards, which was as much as could be guaranteed at 200 yards a year or two ago. The gun-cotton charges have also been increased from 47 lb. to 70 lb., which is sufficient to burst in the plates of the strongest ironclad afloat; but as no ship carries armour more than a few feet below the water-line, and the torpedoes are to be aimed at the vulnerable parts 14 feet under the surface, they are never likely to be put to such a severe test. The new torpedoes are not so graceful in appearance as their originals, being blunt-headed, instead of tapering off to extreme points; but without enlarging their size or augmenting their weight, they have trebled their destructive power and have become a reliable and formidable engine-of-war. The trials recently made from the *Polyphemus* at sea proves that neither cross currents nor rough water has any disturbing effect upon the accuracy of the torpedoes, the high speed at which they travel overcoming such obstacles, and some excellent practice has been made even in the midst of severe storms.

A telegram from Dongola, under date November 28, states that a naval brigade is now being formed, under the superintendence of Lord Charles Beresford, and we know of no better qualified officer to undertake the job, if it be true; but beyond the Blue-jackets already despatched to the front, and who are accompanied by their own officers, we fail to see where the necessary material is to come from, unless the worthy old Mudir possesses a fleet from which it can be drafted.

The *Severn*, 12, twin-screw, second-class steam cruiser, 3,550 tons, 6,000 horse-power, building at Chatham, is to be ready for launching early next year. The order for her machinery and boiler, has been given to Messrs. Humphreys and Co.

According to a correspondent of *Kurier Warsawski*. M. Rogozinski, formerly a Russian naval officer, and a fierce anti-German, succeeded in anticipating Dr. Nachtigal in the annexation of the Cameroon Mountains. He communicated the German designs to the British Agent at Bonny, and a gunboat was sent which placed the whole coast from Calabar to Victoria under British Protectorate.

The command of the Cape and West African Squadron, which will shortly fall vacant on the expiration of Rear-Admiral Nowell Salmon's tenure, is, we understand, likely to be offered to Rear-Admiral H. D. Hickley.

Admiral Gough has the satisfaction of knowing that he has been a true prophet, not a frequent occurrence in these days. It appears that twelve months ago, at the annual festival of the Liverpool Caledonian Association, in returning thanks for the Navy, he took occasion to remark that before the year was out the country would be awakened to the reality of things, and their confidence in the supremacy of the Navy sustain a severe shock. His prediction has proved correct, and as the anniversary came round again last Monday, he seized the opportunity to give another forecast; this time he touches the taxpayers, by declaring,—"If our supremacy is to be maintained, 'John Bull' will have to shell out six millions at least." We think it not unlikely.

Mr. Pearce, of the firm of Elder and Co., Glasgow, in a letter offering work to the unemployed mechanics and labourers of the private shipbuilding works, recognises the mistake the nation would make if it contemplated the abolition of the dockyards, because in an emergency the country would be placed at the mercy of the trades-unions.

Further experiments are to be made in the *Handy*, at Portsmouth, with the 43-ton breech-loading gun, as soon as the hand-loading fittings are properly in place. The hydraulic arrangements in the *Handy* are identical with those placed in the *Colossus* and the *Edinburgh*. They allow of the gun being practically loaded by two men only, one in the turret and one outside, the breech being opened, the projectile and cartridge inserted and rammed home, and the breech closed by the sequence of movements given to one lever inside the turret, while one lever outside raises the projectile and cartridge in turn to the loading-hole. A sense of extra security will be given by the presence of the hand-loading gear, as though an accident to the well-protected hydraulic gear inside and out of the turret is a very remote contingency, the mechanism is so delicate that very little would put it out of action.

An unexplained and terrible accident, with disastrous consequences, has taken place on board the *Rigault de Genouilly*, one of Admiral Courbet's squadron. One of her six boilers exploded on November 11, killing two quartermasters, one engineer, and eleven stokers. An examination of the remaining boilers proving satisfactory, the vessel's services will not be lost, but her powers must be necessarily somewhat reduced.

Mr. George Shaw, the Master of the Worshipful Company of Plumbers, in proposing the health of the Services at a guild dinner on Wednesday, remarked "that the Government had come to the conclusion that if they would not be behindhand in providing for the defence of the country, they must alter the tone which they adopted only a few months ago, when the First Lord of the Admiralty said that if he had some two or three millions of money he should not know how to spend it in promoting the efficiency of the Navy. It had now been discovered that it is necessary that a sum of five millions must be spent, and the only fault they could find with the return to common-sense was that the expenditure was to be spread over a term of years." Considering what a strong public feeling there is on this matter, it is passing strange that the only people who won't see the folly of delay are our rulers.

Mr. Richard Chamberlain, brother to the President of the Board of Trade, speaking at Finsbury on Tuesday night, said:—"He was very much inclined to be incredulous with respect to the recent scare as to the Navy. He was extremely adverse to spending any large sums of money on military services, but of the two he would rather spend money on the Navy."

A correspondent writes:—"It would be interesting to know the history of the repairs to the *Black Prince*, which obsolete armourclad is now in dock at Devonport for that purpose. Lord Northbrook stated in Parliament this week, 'I do not mean to imply the *Warrior* (sister-ship to the *Black Prince*) is at the present time of any particular value as a fighting-ship,' and Mr. Childers in his speech, 'When there was a doubt about patching up or selling a vessel, give the twin to selling her, and instead of patching her up build a new one.' As the *Black Prince* was advertised for sale a year ago, it can only be supposed the present repairs are being undertaken without the knowledge of Lord Northbrook, and against the policy originated by Mr. Childers."

Rear-Admiral J. K. Baird, recently appointed Commander-in-Chief in the Pacific, has nominated Staff Commander George A. Broad, now serving in the *Shannon*, as Staff Commander of the *Triumph*, which ship is to be commissioned in January by Captain Rose, to relieve the *Swiftsure*, as flagship in the Pacific.

"One Who Knows" writes:—"In your issue of the 29th ult. you call attention to alleged 'cooking' of the sick returns of the Marines now in garrison at Suakim, as set forth in a letter of a correspondent of the *Morning Post*, and you remark that it is 'insinuated' that 25 per cent. of sick would be nearer the mark than five. In order to obviate the necessity of any further insinuation in this direction, I give the following simple returns furnished me by a friend at Suakim:—Royal Marines: October 18, total strength, 1,057; total sick, 231. November 14, total strength, 600; sick on board the *Bulimba*, hospital-ship, 93; sent to Suez the preceding week, 57. These returns may perhaps show only in such a salubrious locality as Suakim 'climatic allowance' has been withdrawn; but, in case I may be in error on this point, surely some searcher after truth in the House of Commons could obtain an exact copy of the orders affecting the returns, and the reasons for their issue. That such a man as Lord Northbrook has any cognisance of such a matter as 'cooking' a return, no one who knows his antecedents will for an instant suppose; he is just the man who, if such an affair came to his knowledge, would make it very hot for some one."

The transfer of Staff Commander Jackson, of the *Duke of Wellington*, to the *Excellent*, Captain Fisher, for service at the College at Portsmouth, for the tuition of acting sub-lieutenants in Channel pilotage, will cause a vacancy shortly in that appointment.

On Wednesday night Lord Rosebery, at a dinner at the Liverpool Reform Club, remarked, amid expressions of approval:—"The Navy is the thing which keeps our Empire together, because without it we should soon find ourselves limited to the island which we inhabit. The Navy serves also to protect our trade, and is a safeguard of our liberties which we pride ourselves upon above all things on these shores. We are liable on such a question to two dangers. There is first the danger of an unreasonable panic, and then the danger of losing the dominion of the sea. No panic would be unreasonable if we were in that danger, but we have one or two things to remember. Mr. Cobden wrote to Lord John Russell in 1860 words memorable in our party, as coming from so great an economist as Mr. Cobden. He wrote: 'I would, if necessary, spend a hundred millions sterling to maintain an irresistible superiority over the seas.' And I want to warn this assembly that when hereafter the five or six millions that are going to be spent are thrown in the teeth of this Government, it must be remembered that it was done, not on the sole responsibility of the Government, but also very largely on the responsibility of public opinion. I do not say that opinion is not justified. I would much rather have a Navy too strong and too expensive than a Navy too cheap and too weak."

At a conference of working-men, held on Wednesday night in Farringdon Street, the chairman, Mr. Whetstone, late President of the Amalgamated Society of Engineers, referred to the programme of the Government for the augmentation of the Naval defences of the country, remarking that "he believed the carrying-out of the programme would be the means of placing many thousands of men who were now standing idle in the streets in permanent employment. He was very much surprised to hear it stated in the House of Commons the other night that if the work were hurried on too rapidly some difficulty would be found in providing engineers, because he was well aware that at the present time many of the very best engineers that could be found anywhere were unable to find employment. It might be urged that the increase of the Navy was a great expense to the nation, but he was convinced that the working-men of this country would far rather pay for employment than contribute heavily to poor-rates." His remarks were received by his auditors, including delegates from all the principal trade societies, with applause.

It is interesting while we are on the same tack to note what Admiral Porter, of the United States' Navy, submits to his Government in his annual report as "a beginning in the right direction towards having a respectable Navy." He proposes to :—

"1. Complete the unfinished monitors and arm them with heavy rifled guns, making them rams as far as their models will admit. 2. Appropriate money for all the vessels that were proposed to Congress last winter. 3. Build as a commencement four of the heaviest monitors, of great endurance and speed, each to carry four 16-in. rifles in turrets. 4. Build 20 torpedo-boats of not less than 100 tons each, with a speed of 20 knots. 5. One cruising ironclad of not less than 4,000 tons. 6. Have all our ships of over 1,250 tons supplied with torpedo-boats, fitted with noiseless condensing engines, so that they cannot be heard when approaching an enemy. (The ships' launches, which are now called torpedo-boats in our Navy, are perfectly useless for this purpose.)"

Commodore James E. Erskine telegraphed on Tuesday to the Admiralty his arrival at Sydney, on his return from proclaiming a Protectorate over all the southern portion of New Guinea. The ceremony took place on November 6, in the presence of most of the ships on the Australian station, and some thousands of spectators on shore.

The controversy between Sir William Armstrong and Sir Edward Reed as to the defensive value of armour is continued this week in the *Times*. We are of opinion that as far as the officers who have to fight the ships are concerned—and surely they should have a voice in the matter—the majority would rather have some armour than otherwise, and in the proposed additions to the Navy, the Admiralty seem to have been of the same feeling. Sir William winds up his last letter by remarking that on one matter Sir Edward and himself thoroughly agree, and that is "that our Navy is lamentably insufficient for the security of our shores and possessions, and the protection of the commerce upon which we are so absolutely dependent. We have each stated our views, and the decision must rest with those in authority."

In the debates in Parliament this week no notice was taken of the quasi-obsolete condition of four out of the six armour-clads of the Channel Squadron, of six out of the nine armour-clads of the Coastguard, and of the fact that at the present time but four first-class armour-clads fit for sea service, viz., *Devastation*, *Thunderer*, *Rupert*, and *Hotspur*, none very modern, could be sent out from the dockyards to reinforce our Fleet.

We would suggest to the Admiralty the propriety of removing to the harbour-service pages of the *Navy List* such ships as the *Atlas* and *Endymion*, lent to various local bodies, and the *Ariadne* and vessels turned into hulks. At present there seems little or no system in the placing of ships, and the list of her Majesty's Navy is calculated to somewhat mislead the public as to the true state of the service.

We wonder how many of our ships-of-war on foreign stations are in the same state as her Majesty's ship *Dryad*, lately paid off from the East Indies, and which sloop represented the British flag off Madagascar a year ago. It was stated in Parliament a few days since that of her nine guns there were Admiralty orders against firing eight of them. A truly useful and efficient man-of-war for the protection of our commerce!

It seems a pity that arrangements cannot be made by which the Captain and Executive Officer of every armour-clad about to be commissioned, should be appointed some time before, in order to become acquainted with their capabilities and requirements. Under the present system these vessels are frequently detained in port for weeks after commissioning, in order to complete necessary alterations which might have been made previously.

The Rev G. I. Davie, 44 Cathcart Road, South Kensington, writing on behalf of a marine named William Ashworth, now within six months of his hundredth year, and an inmate of Falmouth Union, says:—"He was born at Sheffield in May, 1785. His first service was in the Baltic, in the *Crescent*, frigate, when the *Hero*, *Defence*, and *St. George* were lost. He was next present at the blockade of Brest in the *Magnificent*, 74, where he was wounded by a splinter in the leg. He was afterwards present at the bombardment of Algiers (1816), and served on board the *Inflexible* and *Conqueror*, guardships at St. Helena, when Buonaparte was confined there. He mounted guard over Buonaparte—the only man now living, most probably, who did so. I, who write this, can absolutely vouch for the truth of the above statements. The Captain of the *Leyden* and the *Conqueror*—Captain John Davie—was my father. Ashworth has no pension or allowance, because his mother, without his knowledge and against his will, procured his discharge before he had served the twenty-one years necessary to obtain one. I submit that such a man as this ought not to be allowed to end his days in a union. Perhaps some of the charitable and wealthy of your readers might be inclined to assist me in procuring some few comforts for one who has served his country so well and lived so long."

Even if we admit that Sir Thomas Brassey had grounds for boasting that our naval construction is more rapid than the French, that does not get over the fact that the *Ajax* and *Agamemnon* took over nine years to build. But that an immense advance is possible in the time now taken to construct our ironclads is proved by the following statement of a Vice-Admiral in the *Pall Mall Gazette*. He says :—

"A well-known Scotch firm of shipbuilders has submitted to the Admiralty a complete set of drawings and the model of a twin-screw barbette cruiser, armoured, one of which could be built and completed in 21 months, and two of them in 22 months, at a cost for each of between £350,000 to £400,000. The displacement to 28 ft. is 10,500 tons, and 26 ft. 6 in. (the usual draft) 9,600 tons. The armament proposed is either four guns of 65 tons each, or two of 110 tons each, of the greatest possible range. The chief features are :—1. To have an armament equal to our largest modern armourclads. 2. To be protected by horizontal and coat armour, and the barbettes by 11-in. composite armour-plating. 3. To carry a sufficient quantity of coal to enable the vessel to steam 8,500 knots at a speed of 12 knots for upwards of 29 days. 4. The full speed to be from 21 to 22 knots, with engines indicating 18,000 horse-power."

The *Avenir Militaire* seems much dissatisfied with the turn Chinese affairs have taken. It declares that the two new regiments which the Government propose to raise will be quite inadequate to the necessities of the moment if it be intended to keep Tonquin and Formosa, the latter place having still to be taken. The *Avenir* also insists that more ships-of-war must be sent out to relieve those at present trying to blockade Formosa, as the vessels engaged in that service must be in want of repair. The bursting of a boiler on board the *Rigault de Genouilly* is taken as a proof of this. The *Avenir* insists that as the English Government has ordered the *Ajax* and the *Agamemnon* for Chinese waters, the French Government should despatch the *Turenne* and the *Victorieuse* to reinforce Admiral Courbet. The same paper mentions that the number of sailors now employed on board the French Fleet is nearly 10,000 men in excess of the ordinary effective. The *Avenir* seems to be much impressed with the Nordenfelt gun, and is astonished that the French Government has neither Nordenfelts or Gatlings. It says nothing about the Hotchkiss which have been adopted in France.

Sir James Ferguson and Staff, Colonel Annesley, &c., having inspected the new harbour defences at Kurrachee, &c., has been looking about the Bhug and Kattowar districts.

In a letter to the *Times* on Imperial strategy, Captain Colomb presses the desirability of holding a Conference, representing the various governments in our empire, to establish a basis for British concert in time of war, as he considers the safety of such an empire as ours can only be secured by a close combination of naval power and military force applied to the requirements of imperial strategetical necessity. He asserts that it is only by the facts of the nature and extent of such strategetical necessities that the total force required can be estimated or the relative proportions of naval power to military force, and *vice versâ*, can be fixed. And he points out that 14 years ago all the measures now asked for were publicly demanded, including the necessity for defending the coal depôts, &c., and for providing them with garrisons; their relative importance, and the requirements of the fleets as regards repairs, supply, and reserves were all fully shown. But, he says, "the Royal Commission asked for by Earl Russell was refused for party reasons, and we are now again on the eve of great changes. Shall we once more lose sight of the safety of the Empire, to find in 1899 we have made a series of mistakes? The blunders of the last 15 years will only be repeated if we now, as we did in 1870, refuse to face the problem of British defence as a one and indivisible whole."

A correspondent tells us that Sir A. Gordon is in the running to succeed Sir J. Ferguson, whose time is up in April at Bombay.

We hear from India that there are rumours in the best-informed circles that Sir W. H. Gregory, ex-Governor of Ceylon, is likely to succeed Sir J. Ferguson, when his time is up in the Bombay Presidency.

There has just died in France a veteran, named Peyssou, who was only 10 years junior to the great Napoleon, under whose orders he fought and bled. This relic of a past age, who had attained the immense age of 106 years, could remember the capture of the Bastille and the execution of Louis XVI., which events made a deep impression on his youthful mind. One of the first military operations in which Peyssou was engaged was the invasion of Ireland by General Hoche; he was on board the *Cassard*. General Grouchy was second-in-command. Peyssou was afterwards engaged in an expedition which turned out far more disastrously than that to Bantry Bay,—the expedition to St. Domingo. He saw Toussaint L'Ouverture after he surrendered to the French, on conditions which were shamefully broken; and he knew General Leclerc, who married Pauline Bonaparte, who commanded the expedition. When his time had expired, Peyssou entered the Civil Service, from which he retired in 1845 on a pension of £36 a year. In 1876, when nearly a century old, he was accorded the Legion of Honour.

Elsewhere will be found a letter from Captain Edward Walter, on the employment of Reserve men, and the employment of soldiers generally; and if any one is entitled to be heard on the subject, it is surely the founder of the Corps of Commissionaires.

Owing to the absence of so many officers on special service abroad, the War Office has recalled for duty in the Ordnance Store Corps a number of retired officers who, on account of age, have been put on half-pay. They will receive the stipulated allowance of £150 a year, in addition to their half-pay, which will make their income about equal to full-pay, and they have been sent to various stations in the United Kingdom with an intimation that their services will be required for about six months. Numerous applications for employment on these conditions have been made by half-pay officers, and preference has been given to those who have recently left the Army, amongst these being several who have just been called in to assist in "Taking the remain at Woolwich Arsenal."

The *Globe* is sadly "out" in its remark *à propos* of Lord Ripon's reception at Benares, that there are "ring-tailed, rat-faced deities" popularly worshipped in that city. But what signifies accuracy to a "funny man," or one "by the way" of being so?

The India Office has been for some time considering —as yet the matter has not gone beyond the "considering" stage—the expediency of abolishing all existing furlough rules and placing Indian officers on the same footing, with regard to leave, as their brethren in the Line, viz., all leave over fifteen months to be on English pay of rank, and all leave to count as service towards pension, it resting with the Commander-in-Chief to decide whether an officer's service can be spared for the time being. The measure would, we believe, meet with the approval of the majority of Indian officers. Some would raise objections, but then there are always a few men whom nothing will satisfy.

Colonel Sutton, Clerk of the Cheque of the Yeomen of the Guard, whose death is recorded this week, was formerly Secretary of the Carlton Club, where he was much esteemed, and his loss will be felt by the members of his corps, and by his many friends.

The *Globe* puts its editorial foot into the facts very neatly in the pretty little story of the escape of Madame de Belbeuf from the demon mob of Toulon during the Terror. Our contemporary spoke of her saviour as none other than General Bonaparte, then in command of the artillery of the Italian Army, who happened to be in Toulon arranging for the defence of the arsenal. There was no General Bonaparte then or there. There was no Italian Army, and—— But, *basta!*

Between the application of the *argumentum baculinum* and the fulminates of the Church launched by Cardinal Manning, the bodies and minds of editors of what are called "Society journals" need comforting. Where is the comfort to come from?

Sir Robert Morier is not strong "in tact, temper, sunny good-humour, and great urbanity." So says the *Pall Mall Gazette*, which ought to be an authority in regard to these gifts. "To look at him," Sir R. Morier seems bursting with Falstaffian, if not "sunny" good-humour, and to be urbanity itself; wherever else he may have failed in impressing natives with a good opinion of his tact and temper, he has scored with Lord Granville and the Foreign Office. It is a great bound from Madrid to Constantinople, whether it be pleasant socially, or not, we are unable to affirm. Sir R. Morier will have to keep his eyes and ears open, and his regards fixed on Central Asia, right through M. de Giers' official body.

There have been public meetings in Natal in favour of the Imperial annexation of Bechuanaland and the "maintenance of order by Imperial forces." Of course there have. That and a rousing Colonial war, plenty of contracts, &c., these are the hopes of Port Elizabeth and Grahamstown.

The latest Musketry Returns for the British and Native troops of the Bengal Army show a marked improvement on those of previous years, especially as far as the Native Army is concerned. Rather more than 55,000 Native cavalry and infantry were exercised, and obtained an average figure of merit of close upon 76. Returns for the 10,866 troopers were 56·81 each,—5·62 points higher than last year's scoring,—and for the 44,248 infantry 96·32, an improvement of rather more than four points within 12 months. The 22,204 British soldiers who went through their course are returned on the rolls with an average figure of merit of 157·99 in individual firing. This is an improvement of nearly 50 points on the previous average. The report, in this connection, says:—"The percentage of marksmen is 5·05 only, but this low number is due to the conditions for firing at the figure target, which made it difficult to qualify. The rules have since been modified, and it is confidently expected that the per-centage of marksmen next year will be higher." This seems to be at least an unsatisfactory method of manufacturing regimental marksmen, inasmuch as however difficult the unaggressive figure target may be to score off, the soldier is confronted with a much more embarrassing mark in actual warfare.

The silly phrase that "the battles of England are won in the Eton playing-fields" should be knocked on the head at once. The battles of England have been won by men of the three kingdoms,—and the Principalities to boot,—the vast majority of whom never were at Eton at all.

In the report of the Board of Visitors to the Royal Military Academy it is stated:—The "Board are of opinion that, though not defective in physique, the countenances of the cadets generally looked pale and jaded. The cases of dyspepsia, numerous for their time of life, lead to the impression that some alteration in their mode of living might be advantageous. Their health, however, is stated to be very good, and the sanitary report of the medical officer in charge of the institution is appended herewith." Dyspepsia must surely be due to causes of diet and want of suitable manly exercises in proportion to the hours of study. The subject is so serious and important as regards our future officers, that the public should be interested in discovering a remedy for a state of things which certainly ought not to exist, with a proper and efficient system of medical supervision.

Lord Ripon's popularity among the people of India appears to be in an inverse ratio to his popularity with his own countrymen in India. Now, which ought an Indian Viceroy to stand well with?—the people he governs, or the people who help him to govern? If both could be pleased, it would be the *summum bonum*.

In reference to the statement of a correspondent that the Defence Scheme for the Colony of Victoria, originated by Colonel Sargood, Minister of Defences, is "hanging fire," we are informed by the Agent-General of the Colony that the "Discipline Amendment Act," passed for the purpose of enabling the Minister to carry out his defence scheme, became law on November 3 last year. By that Act a special appropriation of £110,000 per annum was made for a period of five years from June 30, 1884, until June 30, 1889, so that the question of expense has already been settled. A return of the Victorian Land Forces, published on September 15, 1884, shows that out of a contemplated total of 3,000 men, 2,340 have already been enrolled. Three Royal Artillery and two Infantry officers from England have been seconded in their regiments, and are now in the Colony, as well as seven drill-instructors and two torpedo-artificers. In addition to these results, 106 Rifle Clubs and 50 Cadet Corps have been established, to whom have been issued, on loan or by purchase, 4,321 rifles and carbines. These figures show the success of the defence scheme. The Government has made considerable progress towards placing the Colony in a state of perfect safety, as the enclosed statement of its Naval and Harbour Defences, prepared lately for the information of the Admiralty, will show:—

MEMORANDUM OF THE DEFENCES OF THE COLONY OF VICTORIA.

1. SHIPS. — Cerberus, armour-plated, double-screw, turret-ship, 2,170 tons, 250 horse-power; four 10-in. 18-ton M.L. guns, five Gatling machine-guns; permanent staff, 33 men. Nelson, frigate, 2,730 tons, 500 horse-power; two 7-in. M.L.R. guns, 21 64-pounder rifled shunt guns, 21 32-pounder smoothbore guns; with permanent staff; used only as a receiving-ship and for drill purposes. Victoria, gunboat; one 10-in. 25-ton B.L. gun, two 13-pounder B.L. guns, two Nordenfelt machine-guns; with permanent staff and 15 men. Albert, gunboat; one 8-in. 11½-ton B.L. gun, one 6-in. 3-ton B.L. gun, two 9-pounder B.L. guns, two Nordenfelt machine-guns; with permanent staff and 13 men. Childers, 1st-class torpedo-boat, for 15-in. torpedoes; seven permanent men. Nepean, 2nd-class torpedo-boat, for 14-in. torpedoes; two permanent men. Lonsdale, 2nd-class torpedo-boat, for 14-in. torpedoes; two permanent men. Four Whitehead torpedoes for the above vessels are supplied to the colony, and 10 more are in preparation, and will be sent out shortly. Arrangements are being made for arming six of the tug-boats and Hopper barges, used by the Harbour Trust Board, with a 6-in. 4-ton gun. The Childers and the two gunboats can be used outside the entrance to the port. All the rest of the above vessels are for harbour defence.

2. NAVAL RESERVES.—To supplement the small permanent force of seamen, a Naval Militia force has been organised. Its strength is about 200 men, with 16 petty officers. The men receive an annual payment of £12, and the petty officers £14.

3. DEFENCES OF HARBOURS.—Port Phillip is alone defended, but the provision of some fixed defences for Port Western is in contemplation. At Port Phillip the entrance is commanded by fixed batteries, and two out of the three navigable channels in the Port are defended by guns from the shore. Mines are also provided for closing two out of the three channels. Measures are now being taken for the provision of fixed defences and mines for the main or South Channel, and for much increasing the power of the armament of the batteries at the entrance to the Port.

"Scares" are not becoming to individuals or to nations. A frightened man does not look very dignified, and rarely acts wisely. But "scares" are not uncommon in England. Every grown-up person can recollect at least one in his lifetime. The cause of a scare may be either imaginary or real. The country, in a deep sleep or placid doze, is startled by some loud voice, and starts up in a fright to find that there is a precipice close at hand, or that it is only a dream. The scare in the case of England is always connected with the supposed or actual shortcomings of the Navy. There is, of course, some danger of invasion in the air; and it need scarcely be said that, since Cæsar sailed from Gaul, the enemy has always been looked for in the direction of the French coast. There is no particular reason why France should attempt to invade England just now; and the present scare is not so much alarm lest there should be an invasion attempted, as anger and anxiety about the designs of France against us beyond the narrow seas.

Service Questions in Parliament.

THE STATE OF THE NAVY.

In the House of Lords on Tuesday, Lord Northbrook made his promised statement with regard to the Naval defences of the country, on a motion for a return of ships built and building for the Navy during the tenure of office of the present Government. So far as the Government were concerned, they were determined to maintain our naval supremacy, and their policy was, therefore, very considerably to increase the rate of construction of armour-plated ships, but they preferred making that increase gradually and steadily. It was proposed to lay down, as the slips became vacant, either at the beginning or in the course of the next financial year, four ironclads of between 10,000 and 11,000 tons. It was also intended to build at once two torpedo-rams similar to the Polyphemus, about 3,000 tons, with a speed of 17.12 knots. Two torpedo cruisers were building of about 1,400 tons. They were intended as auxiliaries in action, and it was proposed to build ten of that class, armed with 6-ton guns, and having a speed of 16 knots. Further, it was intended to build 30 first-class torpedo boats, and five additional protected cruisers of 5,000 tons displacement, armed with torpedoes as well as guns, and having a speed of 17 knots. The cost of these additions to the Navy would be about £3,100,000 in excess of the ordinary estimates, and it was calculated that the whole would be completed within five years. It was also proposed that the additional ships should, to a great extent, be provided by contract. For armaments £1,600,000 would be required, and, with £825,000 for the protection of coaling-stations, there would be a total expenditure of £5,525,000. The Government had assented to the appointment next Session of a Committee of the Commons on Naval and Military Expenditure, and to that Committee these estimates would be referred along with the other Navy Estimates. In the course of the debate which ensued, the Earl of Carnarvon expressed his conviction that the Government programme was not sufficiently adequate to the safety and interests of the country. The Earl of Northbrook stated, in reply to Lord Sidmouth, that the proposals of the Government would certainly not be dependent upon the decision of the Commons Committee. Eventually the motion for a return was agreed to.

MEN EMPLOYED IN DOCKYARDS.

In the House of Commons, replying to Sir H. Wolff, on Tuesday, Mr. Caine said that the number of men at present employed in Portsmouth Dockyard was smaller by 200 than the number employed at the commencement of the year. He was not aware of any proposal to discharge men before the end of the year.

ASSISTANT-PAYMASTERS OF THE NAVY.

Sir H. Wolff also asked the Civil Lord of the Admiralty whether provision would be made in the Navy Estimates for the year 1885-86 for increased pay to Assistant-Paymasters of the Royal Navy of over 13 years' service in that rank. Mr. Caine replied that there was no intention to make any alteration in the provisions of the Government order.

THE NAVY.

Sir T. Brassey made a statement on the Naval forces of the country similar in effect to that made by Lord Northbrook. It had, he said, been a special feature of their policy to expedite the construction of ships, not only to lay down two as against one laid down by France, but to accelerate the completion of ships in progress, and he was glad to say that, notwithstanding the inevitable changes which had taken place in armaments, good progress had been made. He then described in detail the ships of various classes—ironclads, belted cruisers, Scouts, and torpedoes—built and building, and those which it was intended to build in the Government and private dockyards and by private contracts, and argued and contended that the proposals of the Government would be a substantial and sufficient addition to our Naval power. In the course of subsequent discussion, which was prolonged for several hours, Sir E. J. Reed advocated improvements in the administration of the Admiralty, but expressed his conviction that the Government programme was a wise one so far as it went. Especially he regarded as in the highest degree satisfactory their recognition of the value of armour in the proposed additions to the Fleet. Mr. Trevelyan contended that what was now proposed was an enlargement of, rather than a departure from, the policy which the Government had hitherto been pursuing. Mr. Gorst regretted that the Admiralty had not shown their earnestness by taking a special vote for the work of restoring the Navy to a proper condition. Sir W. Lawson lamented that the Government had yielded to the clamour of the Press for increased warlike expenditure, instead of having first proposed to France a mutual reduction of armaments. Lord H. Lennox severely criticised the manner in which the functions of the Board of Construction were performed. Mr. Illingworth was of opinion that the proposed action of the Admiralty was caused by a scare, but Mr. A. Egerton regarded the programme of the Government as, on the whole, satisfactory, and the Chancellor of the Exchequer having replied, the motion for a return was agreed to.

INDIAN FURLOUGH RULES.

In reply to Col. Milne Home, Mr. Cross said the question of the Indian furlough rules was under consideration. It was very important and required careful inquiry in India.

THE FORTIFICATIONS AT ADEN.

Sir G. Balfour asked the Under-Secretary for India, in the House of Commons on Monday, with reference to the proposed arrangements under which India was to pay half the cost of additional fortifications at Aden. Mr. J. K. Cross had no reason to believe that the Government of India was dissatisfied with the idea of paying a proportion of the cost.

BRITISH COMMANDERS IN EGYPT.

Mr. O'Kelly asked the Secretary for War what was the amount of pay and allowance received by Gens. Stephenson and Wood, and by the members of their respective staffs in Egypt. The Marquis of Hartington said there was only one commander-in-chief in Egypt—Lord Wolseley. Sir F. Stephenson commands the troops in Lower Egypt, and Sir E. Wood, whose permanent command is that of the Egyptian Army, had been appointed a major-gen. on the staff of the Nile Expedition in command of the line of communications. The Egyptian Exchequer had so far been relieved of the charge for his pay and allowances. The military staff in Egypt was at present, in consequence of the Nile Expedition, very large, but it did not constitute a burden on Egyptian finance.

LORD WOLSELEY'S ORDER.

In answer to Sir H. Tyler, the Marquis of Hartington said, in the House of Commons on Thursday, that he had not received a copy of Lord Wolseley's order, but judging from the telegraphic summary which had appeared in the newspapers, he should not interfere with the discretion of the General Officer Commanding-in-Chief in such a matter. Having in view the rule which is laid down in the Queen's Regulations as to the liability of soldiers to every kind of labour during service in the field, and that they are now receiving field allowances, he was not prepared to sanction the issue of working-pay.

It has been decided by the Admiralty that in future allowances for subsistence are not to be paid to any officer or other person while employed within the limits of the port to which he is attached, but when sent on special duty beyond those limits, involving an absence of 10 hours or upwards, the following allowances will be paid in addition to actual reasonable expenses for carriage and boat-hire:—

CLASSIFICATION OF OFFICERS AND OTHERS.	When out all night, ashore or afloat.	Day allowance afloat or ashore when absent 10 hours.
Admiral Superintendent	First day. £ s. d. 1 10 0 subsequent 1 0 0	£ s. d. 0 6 8 or 10s. if one day only.
Captain Superintendent and Officers whose scale of salary covers £600 a year	1 0 0	0 6 8
Officers and others whose scale of salary covers £300 a year	0 15 0	0 5 0
All other salaried officers	0 10 0	0 3 4
Draughtsmen and dockyard writers on day pay, also all men whose day pay exceeds £100 a year	0 7 6	0 2 6
All other persons on day pay	0 5 0	0 1 8

A day allowance for the day of return after an absence of one or more days is not to be paid unless the return to home or office is after 6 p.m., being 10 hours from 8 a.m. In all claims made under these rules, the hours of proceeding on and returning from the special duty are to be distinctly stated. Subsistence allowance is not to be paid when appropriate messing or victualling is provided by the public, and the value of any victuals supplied to officers, or amount of allowance in lieu paid, is to be abated from the subsistence rates.

The Turkish Naval Department is just now giving much attention, by order of the Sultan, to torpedo defences. A commission composed of naval and artillery officers is about to proceed to the Dardanelles for the purpose of testing a new submarine mine invented by a Turkish officer. The special merit of the new implement is supposed to consist in the means of maintaining its efficiency in the strongest currents. Another trial has also been ordered for the rocket torpedo model, which at the first trial ran at the rate of 18 miles per hour for a distance of 250 yards; while that now prepared is expected to have a range of a mile at a speed of not less than 20 miles. This is somewhat similar to the Berdan torpedo, and is the invention of a Turkish Naval officer. It has no steering apparatus, as with the Berdan, and no screw propeller, like the Whitehead; being in fact a submarine rocket running near the surface, with an arrangement for maintaining the displacement as the composition is consumed.

The gunboat Protector, built in England to the order of the South Australian Government for the defence of Adelaide, has arrived there after a successful run out.

On Oct. 19, while exercising shifting topsail yards on board the Pelican at Callao, a boy named Massey fell from the main royal yard to the deck, a distance of 90 feet; although not killed, his left arm and leg were badly fractured, and he was obliged to be sent on shore to the hospital.

Mr. S. B. Hinshelwood, midshipmen, of H.M.S. Sultan, sustained a severe injury during the cruise of the Channel Fleet. His left hand was badly crushed, while aloft, during drill, and it had to be amputated. We hear that he has recovered from the shock very well, and is progressing favourably. Great sympathy is felt for him, as it is almost certain that it will necessitate his being invalided out of the service.

FRENCH GUN FACTORIES.

From the U.S. report quoted by Mr. W. H. Smith on Tuesday night, we give the following interesting information relating to French gun manufacture:—"Previous to the Franco-German War of 1870, it was the custom in France to confide all matters relating to cannon to the Artillery corps of the Army and Navy; aid from private sources was neither sought nor offered; much secrecy was observed in all things relating to the business of ordnance; admission to the Government foundries was obtained with difficulty; and the experimental ground at Gâvre, with rare exceptions, was closed to all applicants. With the advent of war came the proof that a close corporation such as was constituted by the system heretofore adopted could not work to the best advantage of the country, and with the return of peace and the necessity of re-armament came a revolution of ideas which has led the Government to modify its practice. It was recognised that the Government must have under its control some establishments purely governmental; but, in order to provide for all contingencies as well as to prevent official ideas from running too much in a groove, it was desirable to encourage private industries, so that a spirit of emulation might be excited by competition and a channel afforded through which new ideas and inventions might reach the national works. The adoption of this course was made the more imperative in consequence of the new departure in gun-metal, and this opened the way to the encouragement of the steel industries of the country. The foundry at Ruelle, near Angoulême, has become the principal establishment for the manufacture of the larger guns required for the navy and coast defence. Three circumstances have contributed to the selection of Ruelle, the hydraulic power continuously supplied by the river Touvre, the proximity of special ores producing iron possessing extreme resistance to the action of powder gas, and the charcoal supplied by the neighbouring forests. At the Fonderie à Ruelle, all the constructive force of the marine artillery has been concentrated, and here all the largest guns are made. It contains the most remarkable collection of tools of the age. They are designed for guns of 34 cm. and upwards, and have a capacity for handling guns of 160 tons in weight and 60 ft. in length. The plant has cost millions of francs, and five years elapsed from the giving of the order to the setting-up of the tools. A large portion of the time charged to the manufacture must be credited to the preparation of designs, no tools of their size and great capacity having been before conceived. Ruelle exists for the manufacture of naval guns and coast-defence guns alone, and it is stated that its capacity for turning out weapons is equal to that of Woolwich and that of the Armstrong factory together. Ruelle has already turned out eight 75-ton guns, 42 cm. 21 calibres in length; and six more are at present progressing of 37 cm. 28½ calibres, and of 75 tons. Fifty guns of 34 cm. 28½ calibres of 50 tons are afloat, finished, or in course of construction. The next size is 27 cm. 28½ calibres, of 30 tons. Ruelle is capable of producing 30 heavy guns per annum. Orders for additional machinery have been given to increase their production."

"Government manufactories for the Army comprise the Fonderie de Canons at Bourges, where steel guns of 9 cm., 15 cm., 19 cm., and 24 cm. are made; the Ateliers de Construction at Tarbes in the Hautes Pyrenées, where steel guns of 9 cm. and 12 cm. are constructed, as well as siege and field gun-carriages; and the Ateliers de Construction at Puteaux, near Paris, at which place all the steel mountain and field-guns of 8 cm. are made, also siege-guns of 12 cm. and Hotchkiss revolving cannon. Gun-carriages, limbers, &c., are made at Government shops at Vernon, Avignon, and Angers. The private companies which manufacture ordnance for the Government are given as follows:—Steel manufactories producing steel up to tubes for 16 cm. guns: Jacob Holza and Co., Unieux, Loire; Marrel Frères, Rive de Gier, Loire; Société des Aciéries et Forges, Firminy, Loire; Compagnie des Forges et Aciéries, St. Etienne. Steel manufactories producing steel up to tubes for 42 cm. guns: Henri Schneider and Co., Le Creusôt; Aciérie de la Marine, St. Chamond. Private companies having gun-making plant: Henri Schneider and Co., Le Creusôt; Cail and Co., Paris; Soc. des Forges et Chantiers, Havre; Compagnie de Fives-Lille, Fives-Lille; Soc. An. de Constructions Navales, Havre; Aciérie de la Marine, St. Chamond. 'For tubes and hoops, however, for large guns requiring massive forgings, the supply is limited to the works of St. Chamond and Le Creusôt.' La Compagnie des Hauts-Fourneaux, Forges et Aciéries de la Marine et des Chemins de fer à St. Chamond, is described as an immense establishment. The Board state that the ingots cast here for the 42 cm. 75-ton gun are of 75 tons weight. The tube, after rough boring and turning, weighs about 35 tons. The tempering pit is a large excavation 15 mètres deep. At one extremity is the furnace, where the tube is placed erect and heated. At the other is a cylindrical excavation reaching to 15 mètres below the floor of the pit, where is placed the tank containing 100 tons of colza oil, into which the tube when heated is lowered rapidly. At Le Creusôt, which are the most important steel works in France, fifteen thousand men are employed. It comprises coal-mines, smelting furnaces, foundries, forges, steel works, and construction shops. Advantageously situated in the centre of France, closely connected by rail with the Burgundy and Bourbon districts, united by a private railway to the central canal, which is about 10 kilos. distant, and which gives easy access to the Loire, Saône, and Rhone, it is by its rail and water-ways in communication with the Atlantic and Mediterranean, and with all parts of France. About 1867 the Siemens-Martin furnace was introduced, and the Bessemer soon followed, accompanied by the fabrication of steel rails and soft steel for the construction of ships as well as material for cannons, to the development and improvement of which Le Creusôt has largely contributed. In 1873 the fabrication of steel tyres was undertaken, and for the manufacture of shafts for large marine engines and of the parts of guns of great weight, the 80-ton hammer was erected in 1876 and completed in 1877. With this hammer was forged the armour-plates tried at Spezia, and in 1878 plates weighing 65 tons and cast ingots of 120 tons were produced."

The report concludes:—"How entirely France has now altered her system is shown in a previous part of this report; her present practice is theoretically perfect, and it has been proved to be practically efficient. Her Government establishments are still retained, but as gun factories simply, in which the parts are machined and assembled; but for foundry work she depends upon the private industries of the country, and many of these works have found it to their profit to establish gun factories, which supplement the Government factories to a great extent. The conclusions of the Board on this subject accord with the plain teaching of these historical instances. It accepts the system now pursued in France as the proper standard for imitation, and recommends that, in inaugurating the manufacture of war material in our own country, a conformity as close as circumstances will admit to the plans which have proved so successful in France should be observed."

THE RUSSO-AFGHAN BOUNDARY COMMISSION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In the *National Review*, for November, appeared an article on "The Russo-Afghan Boundary Commission," from the pen of the celebrated Eastern traveller and writer, Prof. Arminius Vambery. The views of one so well acquainted with the bearings of the Eastern Question, and who is one of the very few European travellers who has traversed the regions of Central Asia, must ever command attention and respect, and the article will have been read by many with very deep interest. The writer demonstrates the difficulty, indeed the impossibility, of assigning a fixed boundary on the northern and western frontiers of Afghanistan; he shows the discordant elements of lawless tribes and unsettled people existing in the provinces of what may be termed Afghan Turkestan, between Ferghana and Terefshan on the one side, and between Chitral and Afghanistan Proper on the other side; he points to the uncertainty of Russia's position on the Steppe of Karakum, that, unable to stand firmly on insecure and ever-shifting nomadic ground, she must obtain a firm footing on the western ridges of the Paropamisis, and so he argues that the force of circumstances must bring Russia to the crests of the Hindu Kush on the North, and that she must steadily advance on the western frontier of Afghanistan until Alexander III. obtains possession of the city founded by Alexander the Great, on the banks of the Heri-rud, viz., Herat, that important gate in the communication between India and Central Asia. In the necessity for Russia's advance, Professor Vambery seems to consider the appointment of the Boundary Commission a farce; and he concludes the article by criticism on the constitution and personnel of the British Commission. If not guilty of presumption in offering an opinion in conflict with views expressed by so great an authority as Professor Vambery, I venture to repeat what I wrote in the *Army and Navy Gazette* in February and in September of this year, "that the appointment of a Boundary Commission is the only possible peaceable solution of a grave and pressing difficulty, that it might not entirely frustrate the ulterior design of Russia, but that assuredly it would retard her progress and delay attempts at the dismemberment of Persia and Afghanistan." The one matter for regret is that Persia does not appear to have been associated with the work of the Commission. It is true, as observed in the article under notice, Russia holds in her embrace the whole of North and North-Western Si-an. But are there not districts on the North and towards the Eastern frontier of Persia from which the grip of Russia might be removed by the efforts of the Boundary Commission, if only Persia were associated in the work? Professor Vambery has by no means exaggerated the difficulties that must arise from the discordant elements and the conflicting interests among lawless tribes and people in Afghan Turkestan, and in the regions of the Murgab, and round and about Gourian. These are just the difficulties Russia seeks to create,—that she may stir up the elements of strife outside and along her frontiers in Central Asia, so that she may have an unsettled frontier as a pretext for further advance to secure a settled frontier, and certainly Russia will never retire permanently from a position once occupied. Assuredly, Russia contemplates an advance to the slopes and passes of the Hindu Kush, and along the valley of the Heri-rud to Herat. It will be the work of the Commission to try and remove the pretext for such advance, and so retard the progress of Russia. All who have served in the East, and no one better than Professor Vambery, know the value of "prestige" in Eastern countries. The progress of the Boundary Commission along the northern frontiers of Persia and Afghanistan, on the confines of Russian territory, will add materially to the prestige of the British Government, in the minds of the people of Central Asia, from the shores of the Caspian to the distant Tienshan ranges of Eastern Turkestan. Russian Generals have declared that Persia and Afghanistan are parallels of approach for Russia towards India, and that with her Asiatic hordes she will sweep through those countries and cross the frontier of India. When the people of Central Asia see that the Cossack and the Sepoy have met in conflict on the frontiers of India, but in peaceful work along the northern frontiers of Persia and Afghanistan, on the outer line of Russian so-called parallels of approach; when they see a British General and his staff delineating the boundary-line that should separate Russia from Persia and Afghanistan; and when they mark the power of the British Government to interfere in the frontier affairs of her northern neighbours, assuredly they will learn to believe the power and might of the British Empire in India, and will realise that the White Czar is not the only powerful ruler in Asia! Our estimate of Russia's strength in Central Asia may, to some extent, be based upon our ignorance of her weakness. It is well for Russian authorities to point to elements of strife and discontent in India, which they may hereafter try to turn to their own purposes. But what about such elements of strife and discontent existing within Russia's Asiatic territories? A close alliance between Great Britain, Turkey, and China, and an understanding with discordant elements along the borders and within the limits of the three Khanates in the Caucasus and in Eastern Turkestan, would give Russia so much occupation within her own territories that she could no longer think of aggression beyond. The observations of the British Commission will bring to light the weak points along Russia's frontier lines and within her Central-Asian territories, and will show how far the discordant elements along her borders may be turned against her in the future. Thus, then, the appointment of the Boundary Commission, so far from being a farce, may lead to great and permanent advantage in the interests of peace and the security of British India. With regard to the constitution of the British Commission and Professor Vambery's remarks relative thereto, while sufficiently large to be imposing, and to create an impression upon the minds of the people of the territories through which it may pass, and which is very desirable, the Commission, its escort, and followers are not so numerous as to be unwieldy, or to create difficulties in the matter of transport, forage, supplies, &c.; it seems to be just the proper size and strength, strong enough for self-defence, but without aggressive force. The leader of the Commission may not have special insight into the politics and ethnogeographic conditions of the regions to be traversed (which Professor Vambery naturally considers so desirable). That is not possible, seeing that these regions are *terra incognita* to British officers. But Sir Peter Lumsden is a distinguished General officer, who rose through all grades to the head of the Quartermaster-General's Department in India, a good observer, a man of sound judgment, with a good knowledge of Asiatic, one who has served in Afghanistan, and is acquainted with the character of the Afghans. No better selection could have been made. Under him are sub-commissioners acknowledged to possess special aptitude for the work, and as for the specialists, the surveyors, the geologist, and the naturalist, somewhat sarcastically alluded to in the article under notice, these are just the men who will secure the ethnogeographic information the professor tells us we so much want. Among the escort of cavalry and infantry are picked men of picked native regiments, who will let the Cossack see the material he will have to deal with in any future conflict between the Cossack and the Sepoy. As the breakwater checks the rush of waves, and leaves smooth water behind, so we may hope that the work of the Afghan Boundary Commission will retard the advance and progress of Russia, and prolong the times of peace and tranquillity in India. Should it be otherwise, the work of the Commission will, at all events, have taught the British Government how, when, and where to meet the advance of Russia.—I am, &c., EDWARD H. PASKE, Colonel.

Merrow, Guildford, Dec. 3.

Summary of Events.

NOVEMBER 29.—Messenger reached Dongola from Gen. Gordon, announcing that the Mahdi had called upon him to surrender Khartoum, which request he had refused to comply with. Col. Buller reached Handek.

DECEMBER 2.—Lord Wolseley inspected the Guards Division of the Camel Corps at Dongola, previous to its departure for Handek. Col. F. Burnaby arrived at Wady Halfa. Discussion in the House of Commons as to the state of the Navy, and announcement of Ministerial proposals. Lieut.-Gen. A. Robertson, C.B., died at Liverpool.

DECEMBER 3.—Attack on Suakim by Arabs.

DECEMBER 4.—Departure of last contingent of Methuen's Horse for the Cape. Sir C. Warren arrived at Cape Town from England.

Obituary.

Major-Gen. G. A. G. Blackford died on the 13th ult., in his 79th year. He was the son of Lieut.-Gen. W. H. Blackford, East India Company's service, and entered the Army in 1825. He obtained a lieutenancy in 1826, and was promoted to a captaincy in 1841, and served with the 24th Regt. in the Punjab Campaign of 1848-49 (medal), including the passage of the Chenab and battles of Sadoolapore, Chillianwallah (succeeded to the command of the regiment), and Goojerat (medal and clasps). At Chillianwallah this gallant officer, then acting as supernumerary field-officer, had a very narrow escape, his horse being grazed by a wound-shot on the withers, cutting through the reins, the shoulder, however, not being injured. The animal managed to carry him till he obtained a remount.

George Thomas Holland, naval schoolmaster, of the Ganges; Samuel George Taylor, yeoman of signals, of the Minotaur; Thomas Roberts, chief steward, 3rd class, of the St. Vincent; Esau Gilham, gunner, 9th Company, R.M.A.; J. C. L. Millington, musician, 29th Company, and W. C. Riordan, musician, 1st Company, R.M.L.I.; John Friend, carpenter's crew, of the Crocodile; James S. Reed, commissioned boatman, Herbert Legg, chief boatman, and Daniel E. Craddick, divisional carpenter, of the Coastguard, have been awarded the long-service and good-conduct medal.

The *Times* states that Gen. Sir E. B. Johnson, K.C.B., R.A., will succeed Sir Beauchamp Walker as Director-General of Military Education.

The Chinese Government has notified to foreigners that torpedoes have been laid across the Kinpai Channel, with the exception of a steamer passage 100ft. wide.

Torpedo nets, on the average of 40 a week, are being fitted by the riggers of Portsmouth Dockyard for store.

ROWLAND'S MACASSAR OIL is universally in high repute for its unprecedented success during the last eighty years, in promoting the growth, restoring, improving, and beautifying the human hair. It may now also be had in a golden colour, and is especially suited for fair-haired children. Ask anywhere for Rowland's Macassar Oil, and avoid spurious imitations. Sizes, 3s 6d, 7s, 10s 6d, and 21s; sent by post for 3d above these prices to A. ROWLAND and SONS, 20 Hatton Garden, London.

The Army.

1st Life Guards. Major Dansey completes his period of service as adjutant of the Gloucestershire Yeomanry on Friday next.

1st, or Royal Dragoons. Capt. H. F. G. Coleman, formerly of the regiment, died at Oakley House, Alpha Place, N.W., on the 3rd inst., aged 55 years.

10th Hussars. The *Pioneer* says:—"The prospects of the junior majors and captains of this corps are not such as are likely to give them pleasure. Under the present rulings of the Royal Warrant, not one of the three junior majors will ever succeed to a regimental lieutenant-colonelcy, and the captains will remain so for a very goodly time. At present there are no fewer than six majors in the regiment, three being seconded; two will rejoin at once—Major and Brevet Lieut.-Col. Coombe, from the Adjutant-General's Department, and Major Spottiswoode, from aide-de-camp to Gen. Cureton. The command of the regiment need not change hands till May 31, 1886. Major St. Quintin, as remount agent at the Presidency, will complete his five years' tenure on May 4 that year, and step into the vacancy caused by Col. Wood's retirement on May 31. On Sept. 13, 1887, he will obtain the command, thus giving Lieut.-Col. Coombe substantive rank, but still leaving four majors in place of three. On Sept. 13, 1891, Lieut.-Gen. Coombe will obtain command, allowing Major Spottiswoode to become lieut.-col., thus saving him from retirement, as he will be 50 years of age, and so too old for a lieutenant-colonel on Dec. 24 following. Before this time arrives the three present junior majors will have gone over to the half-pay list, for Majors Gough, Wood, and Napier will all have done their seven years' major's work on Sept. 13, 1888, April 6, 1889, and March 1, 1891, respectively. To follow the fortunes of the captains is almost impossible, but Capt. and Brevet Lieut.-Col. Brabazon will be 42 years of age next February, and so be available for retirement on half-pay, whereas the look-out of Capt. E. T. Rose is most hopeful, for he only entered this world in 1855, and therefore stands no chance of ever being caught by the age-clause of any Royal Warrant now in force; in fact, before he reaches the age of 40 he should be amongst the lieutenant-colonels and not far off from the command of the 10th Royal Hussars."

12th Lancers. The leave from India granted to Major Hornby has been extended to Feb. 10 next.

13th Hussars. H.M.S. Serapis, with the head-quarters and service troops on board, has arrived in South Africa from India.

17th Lancers. Lieut. and Adjt. Hon. L. H. D. Fortescue has been granted leave to England for nine months, on private affairs.

18th Hussars. Capt. Butler takes up the appointment of adjutant of the Gloucestershire Yeomanry from Friday next.

19th Hussars. Lieut. Nicholson is a candidate for the Indian S.C.

ROYAL ARTILLERY.

Capts. E. A. Smith and S. M. Rogers proceed home from India to join the School of Gunnery at Shoeburyness.

Capt. G. R. Moore is attached to the 1st Dragoon Guards, in India, as a probationer for the Army Pay Department.

Royal Scots (1st). Lieut. De Lisle, 1st Batn., is a candidate for the Indian S.C.

The King's Regiment (8th). Lieut. Perkins, 1st Batn., is a candidate for the Indian S.C. Lieut.-Gen. A. C. Robertson, C.B., who died on Tuesday, after a long and painful illness, at 142 Prince's Road, Liverpool, obtained his first commission on Sept. 15, 1837. His war services were as follows:—Served in the Anglo-Spanish Legion from July, 1835, to June, 1837; received a medal for the action of May 5, 1837; the cross of the 1st Class of San Fernando for the actions of March 15 and 16, 1837; and another medal for the storming of Irun, May 17 following; severely wounded in the face by a splinter in the general action on the Heights of Ametza, Oct. 1, 1836; served with the 1st Batn. 8th, at the siege of Delhi in 1857, including repulse of sorties on 9th, 14th, and 18th July (commanded the regiment), and commanded detachments of 8th and 61st Regts. at the capture of four guns in front of the advanced picquet on Aug. 12; acted as D.A.Q.M.G. to Seaton's column in December, including affairs of Gungaree, Puttiala, and Mypoorie; present during operations from 2nd to 22nd March, 1858, resulting in the occupation of Lucknow, in the capacity of Deputy-Judge-Advocate-Gen. to the Army in the Field (brevet of major and lieut.-col., medal with two clasps). As a highly distinguished and fearless soldier, a kind-hearted, sterling, honest, English gentleman, the memory of Alexander Cunningham Robertson will ever be cherished by all true "Kingsmen" with feelings of the deepest affection and regard. During the past few years, Lieut.-Gen. A. C. Robertson, C.B., honoured the 15th Lancashire Rifle Volunteers, at Liverpool, by becoming their Hon. Col.

West Yorkshire Regiment (14th). Lieut. MacAdam has been specially selected to proceed with Methuen's Horse to Bechuanaland, and has left England for the Cape.

East Yorkshire Regiment (15th). The *Times of India* says:—"Major H. L. Dundas, of the East Yorkshire Regt., has been appointed A.A.G. on the establishment, vice Col. Robinson, Rifle Brigade, who has been appointed A.Q.M.G., Aldershot. Major Dundas passed the Staff College in 1871, and was D.A.A.G. at Portsmouth from June, 1874, till Dec., 1879, at the termination of which appointment he rejoined his regiment. Exchanging to the battalion in India, he accompanied it in the arduous march under Gen. Phayre, C.B., to Candahar. He was appointed A.A.G., Southern Afghanistan Field Force, which appointment he held till the evacuation of the country by Major-Gen. Hume, C.B., in 1881. Major Dundas was appointed Brig.-Major on the Bombay Establishment in May, 1881." Lieut. Fisher, 2nd Batn., is a candidate for the Indian S.C., and has been appointed to the 5th Bombay N.I., on probation.

Royal Welsh Fusiliers (23rd). Lieut. Hon. R. White, 2nd Batn., has been selected for special service in Egypt.

Duke of Cornwall's Light Infantry (32nd). Lieuts. Hatherell and Pelly are candidates for the Indian S.C.

Royal Sussex Regiment (35th). Lieut. Ievers is a candidate for the Indian S.C.

Black Watch, Royal Highlanders (42nd). Lieut. Cuthbertson has been appointed baggage-master at Cairo in connection with the Nile Expedition, and will be responsible for the safe custody and despatch of baggage and parcels committed to his charge.

Essex Regiment (44th). The *Madras Mail* says:—"The court-martial appointed to try Lieut. Power, at Aden, for striking his commanding officer, Lieut.-Col. Rennie, has, we learn, concluded its sittings, with the result that the prisoner is cashiered, and that Col. Rennie has been deprived of his command. The defence that was offered regarding the long-continued provocation which was given by Col. Rennie proved that that officer had not conducted himself with good temper and good taste towards the subaltern, but had pursued that nagging line which caused Col. Kennedy to lose his command in connection with the Gilbert Court-martial case at Madras several years ago. But the provocation, great though it obviously was, could not with due regard to the imperative demands of military discipline be accepted as an excuse for a subaltern walking into his colonel's house and administering to him very severe personal chastisement. Mr. Power probably foresaw that the consequence to him of giving one blow to his superior officer would be quite as serious as his favouring that gentleman with many striking proofs of the opinion which he had formed of him. So while he was about it he paid off old scores with interest. The wrongs of the subaltern excited a good deal of sympathy, but it was impossible to avoid the penalty that has been exacted."

Berkshire Regiment (49th). Lieut. McClintock does duty with the Military Police at Cairo, during the absence of Capt. Maxwell with the Nile Expedition. Lieuts. Delamain and Nicholls are candidates for the Indian S.C.

ROYAL MARINES.

Major E. H. Moore, R.M.A., has embarked in H.M.S. Minotaur to replace Major F. H. Poore, R.M.A., disembarked for duty as Equerry to H.R.H. the Duke of Edinburgh.

Oxfordshire Light Infantry (52nd). Lieut. O'Connell is a candidate for the Indian S.C.

Border Regiment (55th). Lieut. Caird has been selected for special service in Egypt.

Essex Regiment (56th). Lieuts. Bernard and Young are candidates for the Indian S.C.

Northamptonshire Regiment (58th). Lieuts. Hudson and Woods are candidates for the Indian S.C.

King's Royal Rifle Corps (60th). Major Hutton, commandant of the Mounted Infantry in Egypt, has been appointed Deputy-Assist.-Adjt.-Gen. on the line of communication in connection with the Nile Expedition. Lieut. and Adjt. Boultbee, 4th Batn., has leave from India to England for nine months, on private affairs.

Gloucestershire Regiment (61st). Lieut. Capel-Cure has leave from India to England for 12 months, on private affairs.

Durham Light Infantry (68th). Lieut. Gardiner has obtained leave to England.

Welsh Regiment (69th). Lieut. Swayne is a candidate for the Indian S.C. Lieut. Peile has been selected for special service in Egypt.

Middlesex Regiment (77th). Lieut. Wilson is a candidate for the Indian S.C., and has been appointed to the 23rd Bombay N.I., on probation.

South Staffordshire Regiment (80th). Lieut. Forbes is a candidate for the Indian S.C.

Connaught Rangers (88th). Lieut. Freckleton has leave from India to England for 12 months, on private affairs.

Cameronians, Scottish Rifles (90th). Major Brunker has passed the higher-standard examination in Hindostanee.

Gordon Highlanders (92nd). Capt. Hamilton, A.D.C. to Sir F. Roberts in Madras, has leave to England for four months, on private affairs.

Royal Munster Fusiliers (101st). Lieut. Denne is a candidate for the Indian S.C.

Durham Light Infantry (106th). The *Times of India* says:—"Brigdr.-Gen. Gillespie, lately commanding the 106th L.I., will succeed Brigdr.-Gen. Hogg as Qrmr.-Gen. of the Bombay Army when the latter's term of office is completed next February. The appointment is one that will commend itself to the majority of military men. Gen. Gillespie belonged to the old Bombay Fusiliers, and for many years commanded them. His success as a commanding officer attracted the notice of the military authorities at home, and he was appointed to the Adjutant-General's Department at York. For his services in Egypt he was made a C.B. He has commanded the Nusseerabad Brigade."

Royal Inniskilling Fusiliers (108th). Lieut. Daniel has been selected for special service in Egypt.

Rifle Brigade. Lieut. King-Salter has leave from India to England for 15 months, on private affairs.

Commissariat and Transport Staff. The death is announced from Malta of Assist.-Comy.-Gen. Beale, whilst *en route* to Cairo. The deceased returned home lately from Bahamas on sick-leave, on the termination of which he set out for Egypt. He obtained his first commission June 14, 1855; became Assist.-Comy.-Gen., June 8, 1879. Served in the Eastern Campaign of 1854-55 (medal and Turkish medal).

Veterinary Department. Vet.-Surgs. R. Poyser, J. J. Phillips, Flintoff, and J. B. Savage are to be relieved during the ensuing trooping service, having completed a tour of Indian service.

Medical Department. A monumental brass to the memory of the officers of this Department, and non-commissioned officers and men, Army Hospital Corps, who lost their lives in Egypt in the years 1882-3, has just been erected in the chapel of the Royal Victoria Hospital, Netley. The memorial was raised by subscription among those officers of the Department and the Corps who served in Egypt during that period. Messrs. Mathews and Hodgson, of Regent Street, London, executed the work.

The Auxiliary Forces.

MILITIA.

3rd and 4th Battalions, Worcestershire Regiment. Lieut. G. A. Bramwell, 3rd Batn., left England on the 26th ult., in the Pembroke Castle, for South Africa, having volunteered to serve as a trooper in "Methuen's Horse." Capt. R. Holden, 4th Batn., also volunteered to serve with the same corps in Bechuanaland, if his services would be accepted as an officer, but declined the offer to serve in any other capacity.

YEOMANRY CAVALRY.

The *Globe* says:—"Major Helyar, of the West Somerset Yeomanry Cavalry, who has during the past week been engaged in London in connection with the preparations for the South African Expedition, telegraphed to Taunton on Saturday for 50 volunteers from the Yeomanry regiment. The regimental serjeant-major had no difficulty in communicating with the men, as Saturday is market day in Taunton, and most of them were in town. Many of them readily volunteered. They are principally young farmers who ride to hounds, and are accustomed to the use of the rifle and gun."

THE VOLUNTEERS.

The report by Lieut.-Col. Ray to the Council of the National Artillery Association regarding the British Artillery detachment for Canada, 1884, gives an account of the proceedings and achievements of the detachment at the recent prize meeting of the Canadian Artillery Association. The prizes they won were as follows:—The Queen's Prize (gold cup, badges, and $100), won by the 2nd Detachment, British Artillery, as were also the Montreal Challenge Cup, the first prize (nine silver cups, badge for No. 1, and $50), and the second prize of $50; while the third prize of $25 fell to the 1st Detachment. There were also some individual prizes. The colonel, concluding his report, says that the expedition proves that the Volunteer artillery of this country, of which this detachment was a fair example, was composed of men who were capable of being trained to a very high state of efficiency. In case of emergency any number of men, if properly handled, would in a very short time be able to take their places with credit alongside their brethren of the Royal Artillery.

WOOLWICH ARSENAL.

Orders have been received at the Royal Arsenal, Woolwich, for the first portion of the new guns referred to in Parliament on Tuesday night, and some increase of activity is observed in the Royal Laboratory and Gun Factories. A few engineers and fitters and a few labourers have been taken on in both departments, but for about 25 places there were nearly 500 applicants. In the Laboratory the chief pressure is due to an effort to push ahead with the work already in hand in order to prepare for the supplemental requisitions which are expected, especially for torpedoes and fuzes, but in the Gun Factories the demand for guns which has been so long awaited has been already received from the War Office, and the work has commenced. Much disappointment has, however, been felt at the decision of the Government to take the manufacture of steel from the national establishment at Woolwich to private manufacturers at Sheffield. During the interval of inactivity in gun-making which has marked the transition from wrought-iron to steel, the Royal Gun Factories have been almost devoted to the production and improvement of steel castings, and for two or three years past continual study and experiments have achieved some most successful results, with so much satisfaction to the authorities that a commission to supply the new guns from the Royal Arsenal was fully counted upon, both as to the material and the building up. Nevertheless, it is almost certain that the resolve of the Government to strengthen the Navy in guns and torpedoes, as well as in ships, will keep the Royal Arsenal at quite its average prosperity for some time to come. A court of inquiry is now sitting to investigate the circumstances attending the bursting on Monday at the Government proof butts of an 18-ton breech-loading gun, having a calibre of 9·2 in. The gun was being used for proving gunpowder, and not for testing the gun itself. So far as the inquiry has gone, the accident is attributed to the quality of the steel portion of the gun. This steel was supplied by contract, and the Arsenal claims that it can now turn out steel for ordnance purposes of better quality than any manufactured outside. As this is the second or third steel gun which has recently burst at Woolwich, it is probable that the inquiry will result in some radical change in the mode of manufacture.

A new pattern of the 6-in. breech-loading gun is in course of construction, and will be christened "Mark IV." Its specialities are an improved breech action, and a considerable alteration in the construction of the rear end of the tube, making it stronger and better able to stand the wear and tear of continued firing.

The Scourge was commissioned on Monday as tender to the Cambridge for a school of instruction in torpedoes and electric light.

STIMULANTS and insufficient amount of exercise frequently derange the liver. Eno's Fruit Salt is peculiarly adapted for any constitutional weakness of the liver. A world of woes is avoided by those who keep and use Eno's Fruit Salt.—"All our customers for Eno's Fruit Salt would not be without it upon any consideration, they having received so much benefit from it.—Wood Brothers, Chemists, Jersey, 1878." CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the capsule is marked "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists. Directions in Sixteen Languages, how to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by C. J. Eno's Patent.

ROYAL CAMBRIDGE ASYLUM
for SOLDIERS' WIDOWS, KINGSTON-ON-THAMES.
Supported by Voluntary Contributions.
LADY-PRESIDENT.
H.R.H. the DUCHESS of CAMBRIDGE.
PRESIDENT.
H.R.H. the DUKE of CAMBRIDGE, K.G.
CHAIRMAN OF COMMITTEE.
General H.S.H. Prince EDWARD of SAXE-WEIMAR, K.C.B.
OFFICE—40 CHARING CROSS, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army of not less than 50 years of age.

There are 69 widows in the Asylum.

Each widow has a furnished room, and receives seven shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The funded income of the charity yields only £930, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £3,000 per annum.

The Committee earnestly appeal for funds to meet the current expenses.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

J. A. STEWART, Colonel, Secretary.

IMPORTANT to NAVAL and MILITARY MEN.

THE MUTUAL LIFE ASSURANCE SOCIETY.
(*Established* 1834.)

No **EXTRA PREMIUM** for Climate or War Risk is Charged after the Policy has been Five Years in force, and the Life Assured is aged Thirty.

For Prospectus, Form of Proposal, Accounts, &c., apply to
THE ACTUARY,
39 KING STREET, CHEAPSIDE, LONDON.

NOTICES TO CORRESPONDENTS, Etc.

ERRATUM.—The name of the hill fort where Major-General Hardinge was "recuperating" by last accounts, is not "Pertabghur," as we printed it, but "Purandhur," one of the old Sivajees' hill strongholds. The General was hunting, and came upon some soft ground, in which his horse floundered, and in trying to get out the animal kicked him in the side, and broke two of his ribs.

For Books Received, &c., and Notices to Correspondents, see page 903.

Many interesting communications, reviews and letters, &c., are unavoidably omitted, owing to want of space, this week.

The ARMY AND NAVY GAZETTE this week contains eight pages extra.

Army & Navy Gazette.
LONDON, SATURDAY, DECEMBER 6, 1884.

WHILST the excitement about the condition of the Navy is almost at white-heat, the statements of Lord Northbrook and of Sir T. Brassey are like so many jets of water upon molten iron. Elsewhere we deal with the questions raised in both Houses from the service point of view; but it would be well if out of the awakened interest of the public the Government could find the means of support for a comprehensive reconstruction of the important relations between the Admiralty and the War Office affecting the armament of ships and the provision of ordnance for them. We recently called attention to the utter incompetence of the establishment at Woolwich to provide guns for forts and ironclads exceeding in dimensions the new model 43-ton steel gun, the reason being that the Government,—it is always the Government, and in the lower depths of that great organisation there is still the lower depth of the Lords of the Treasury,—refusing obstinately to ask from Parliament such a sum as would place a great gun-making establishment independent to some extent of the great private firms, has hitherto completely throttled the energies of the officers and staff of the Royal Arsenal. We hear, however, that they are going at last to take a small vote—a timid, tentative step, halting a long way off from anything like a complete and efficient outfit—for the production of the great steel ingots such as are furnished by Sir Joseph Whitworth for the larger natures of cannon. Without any disparagement to that most eminent metallurgist, to whom the country is indebted, *pro râta*, in the same way as Germany is indebted to Krupp, it is not to be supposed that Sir J. Whitworth furnishes steel to Woolwich for the pure pleasure or honour and glory of the thing. The labourer is worthy of his hire; the inventor and improver are entitled to a large percentage of profit on those articles which are due in all their excellence to scientific research and mechanical industry. But if Woolwich were "donated," as the Americans say, by the country with the means of making the Whitworth steel, the price of it would be reduced to the taxpayer very considerably; and what now costs £70 a ton might be produced in the Government yard for little more than half that amount, including the interest on the capital for the laying-out and establishment of the plant. Great changes have been effected under our eyes at Woolwich lately, but the country generally has been little the wiser. The enormous Nasmyth steam-hammers, which excited the wonder of admiring visitors at the Arsenal, are now almost unused, and new machinery is employed to drill out the cores of the solid blocks of steel from which our guns are made. The angry controversies over the nature of initial tubes and jackets, over coils and hooping, over different systems of "strengthening," have all died out. Years and years ago in this journal we entreated the authorities to look at what was doing abroad in the manufacture of guns. We called attention to Krupp and to Essen, to breech-loading artillery, and to the confidence expressed by the German artillerists not only in that system, but in the employment of steel for field guns, battering guns, and the largest natures of ordnance in ships and forts. But there was a blind leader of the blind, who had no eyes to see anything but the obsolete old muzzle-loader, with "the longest range, the flattest trajectory, and the hardest hit" in the world, at the head of our gun-making department. Trials and proofs of foreign work were of no avail; nothing so good as the English muzzle-loading gun, which was introduced on the alleged failure of the breech-loading system of Armstrong, by a comical perversity, enough to make the gods laugh and artillerymen jump with rage. So now it is in this year of grace, 1884, that the First Lord of the Admiralty has to stand before his peers and deplore the lack of proper guns and the lamentable backwardness of the Navy, and of the fortresses in the matter of breech-loading armament. It ought, however, to be remembered that it was to the outcry from the Navy, caused by the unsatisfactory working of a bad type of Armstrong breech-loader, the old 40-pounder, that the breech-loading system was for a time abandoned, and the muzzle-loader revived. With the new light cast upon the real nature of the energy of improved powder, and on the relations of calibre, projectile, and length of gun to each other, we have gone on increasing the length of guns till we have come to dimensions which absolutely require breech-loading. It is to be hoped that the great workship at Woolwich, aided by Elswick, by Whitworth, &c., will soon be able to make up for lost time. Certain it is that if the country were but acquainted with the real condition of ships and forts at home and abroad in the matter of ordnance, there would be no reluctance on the part of Parliament to agree to a substantial vote for the immediate inauguration of all the necessary appliances to meet the wants of the service in providing for the national defence.

Colonel Alderson will move up from the office of one of the Assistant-Directors to the post of Director of Artillery and Stores vacated, as we announced last week, by Brigadier-General Reilly, in pursuance of the advice of his medical attendants; and an intelligent informed and able officer will be replaced by another who is admitted to be very near the head of the list of the most accomplished Artillerists in the Queen's service. Colonel Alderson was very young when he received his baptism of fire at the Alma, having only entered the regiment on June 23, 1852; he was also present at Inkerman (siege train), and served in the trenches and batteries from the opening bombardment of Sebastopol—October 17, 1854—till that of June 17 preceding the unfortunate assault on the Redan.

Major-General Martin Dillon, C.B., C.S.I., has arrived in India, and assumed his Divisional Command in Bengal, vice Lieutenant-General R. Hume, C.B., who is now *en route* to England.

The Egyptian Government has, we understand, been obliged to withdraw the special permission which had been granted to the cattle contractor for the Army of Occupation, in consequence of diseased Russian cattle having been transported in quarantine trains from Alexandria into the interior for consumption by the British troops. No less than five batches have been attacked by disease. Eight died at Assouan in a consignment of fifty, and in another lot of fifty, no less than twenty-four succumbed to disease between Assiout and Assouan as testified by the examination of English and native veterinary surgeons. These cases have occurred in the direct line of route between Alexandria and Esneh, and the British military authorities have done everything in their power to assist the native officials in preventing any spread of the disease.

Capt. F. B. de Wolski, R.E., has returned to England from the special mission on which he has been employed at Philadelphia.

An unexpected difference is said to have arisen between the Government of the Czar and that of the Sultan. Russia having made a request that the vessels carrying troops destined for the garrisoning of her possessions in the Arctic seas be allowed to pass through the Bosphorus, Turkey, acting conformably with the letter of the Treaty, has refused the request.

We learn from Egypt that Captain H. A. Yorke, R.E., has been appointed General Manager of the Assouan Railway.

The 1st Battalion, Royal Fusiliers (7th), at Colchester, and the King's Own Light Infantry (105th), at York, are being got ready for immediate embarkation for the Mediterranean, to relieve the 2nd Battalion, Royal Irish (18th), at Malta, and East Jersey Regiment (31st), at Gibraltar, ordered on to India.

Nothing is known officially as to the removal of the 1st Battalion, Yorkshire Regiment (19th), up the Nile, and consequently the report that the Royal Sussex (107th) is to go to Egypt from Malta must be considered premature.

The appointment of Assistant-Adjutant and Quartermaster-General at Dublin falls vacant immediately, as Colonel Montgomery-Moore is about to be promoted Major-General. Colonel Moore will be much missed in Dublin, where he has not only been exceedingly popular, but has had the reputation of being a thorough practical Staff Officer.

Lieutentant-Colonel H. M. Moorsom, half-pay, R.A., and Major F. H. Innes, R.A., have joined the Intelligence Department at the Horse Guards.

Colonel G. D. Barker, who has succeeded Colonel W. F. Butler as Assistant-Adjutant and Quartermaster-General at Devonport, will retain his appointment for the usual period, as Colonel Butler will not resume duty in the Western Command on his return from Egypt.

Lieutenant L. S. Peyton, Bengal Staff Corps, has been appointed A.D.C. to Major-General Murray, who has assumed command of the Oude Division, Bengal Army.

The resignation of Colonel Chapman, Military Secretary, who is coming home in February, has caused speculation and gossip, and there is a report that he is to succeed Sir C. Macgregor, who was, before some present troubles at all events, booked for an extension of his term, thus enabling Colonel Chapman to drop into the place after he had completed the two years' regimental duty which he must have before he can take a brigade command.

Major-Generals seeking employment may be interested in learning that there is every probability of the China command falling vacant in April next, as General Sargent is likely to be "run out" on promotion.

Colonel J. H. Hall, commanding the 22nd Regimental District at Chester, who succeeds Colonel Methuen as Assistant-Adjutant and Quartermaster-General of the Home District, has not had any previous Staff service. He served in the Coldstream Guards from August, 1854, to September, 1879, and has been in command at Chester since May, 1883.

Lieutenant-Colonel A. G. Durnford, from Assistant-Director of Works for Fortifications at the War Office, has been appointed Commanding R.E. of the Bechuanaland Expedition.

Information from Egypt states that the uncertainty attending the settlement of the indemnities has now reached such an acute stage that many persons whose whole property was destroyed in July, 1882, are seriously embarrassed, and unless the financial question receives a speedy solution, grave difficulties may arise among the secondary class of traders.

Captain J. du T. Bogle, R.E., succeeds Sir Charles Warren as Instructor in Surveying at the S.M.E., Chatham.

The Commander-in-Chief has approved of officers of Militia battalions of territorial regiments being attached to Line battalions, for duty in place of those officers who have proceeded with the expedition to Bechuanaland. This is a wise, and we feel sure it will be a popular measure.

Brigade-General Reilly, who is leaving the War Office, will shortly be promoted to the establishment of General Officers as a Major-General.

Major Hornby, 70th East Surrey Regiment, has been appointed Brigade-Major to the 2nd Brigade of the Army of Occupation in Egypt, during the absence of Lieutenant-Colonel Gordon (93rd) with the Nile Expeditionary Force.

The appointment of Inspector-General of Recruiting becomes vacant on January 1, when Major-General Bulwer completes his five years.

Major-General Sir D. C. Drury-Lowe, K.C.B., has been selected to succeed Major-General Fraser, at Aldershot, and will assume command of the Cavalry Brigade at the Camp, and the Inspector-Generalship of Cavalry in Great Britain, on January 1 next.

Lieutenant-General A. C. Robertson, C.B., formerly of the 8th King's, died in Liverpool on Sunday, after a long and painful illness.

The "service" of the Queen by land will be soon handed over to "Volunteer" and Reserve men if the present "system" goes on! At the time of the Crimean War, it was proposed to let a contract to take Sebastopol to some great railway-making firm; but what was then a grim jest appears to be coming within a measurable distance of actual working-out. The offer of a reward of £100 to the battalion which first gets from Sarras to Debbeh in good order is quite in keeping with the spirit of the day. Why not offer a reward for the Mahdi's head, as Sir W. Hewitt did for Osman Digna? An evening paper talks of *esprit de corps*, as if such a thing existed, or could exist, in the heterogeneous bodies of men fighting the Nile in its course.

The fortieth anniversary of the birthday of the Princess of Wales (December 1) was celebrated universally, and at Sandringham there was a large family party, which was joined by Prince Albert Victor from Cambridge, and Prince George from Greenwich.

Major. P. J. Hughes, 26th Cameronians, has been appointed Brigade-Major of 3rd Infantry Brigade, at Aldershot, in succession to Lieutenant-Colonel Molyneux, 22nd Regiment, who has proceeded to South Africa.

Several fatal cases of diphtheria have recently occurred at Aldershot Camp among the soldiers' children. Although all necessary sanitary precautions are being taken, this disease, which now seems to be never absent from the Camp, shows no sign of abatement.

Captain the Hon. A. J. G. Byng, 7th Hussars, has been appointed Military Private Secretary to the Lord-Lieutenant of Ireland, vice Major A. E. Turner, R.A., proceeded to Egypt on special service.

Private letters from Egypt state that Major Kitchener entertains hopes of being able to effect the arrest of some of the murderers of Colonel Stewart. Anyway, he is endeavouring to collect information with a view of bringing some of the culprits to justice if possible.

Major Bekir Effendi Kaimal assumed the command of the Cavalry Regiment of the Egyptian Army on Lieutenant-Colonel Taylor's resignation of his commission in the service of His Highness.

We regret to learn that Mr. Scudamore, the *Times* correspondent with the Nile Expeditionary Force, has been laid up in hospital for about three weeks, suffering from a severe attack of dysentery. It is hoped that he will be able to leave the hospital early next week.

We learn from India that at the time the mail left nothing has transpired as to Colonel Chapman's successor in the Military Secretaryship, and it was expected that some little time would elapse before any appointment was made, as Colonel Chapman did not intend to leave for England at once.

The appointment of Colonel W. D. Marsh as Commanding R.E. at Mauritius, which was lately announced, has been cancelled. Lieutenant-Colonel R. W. Stewart, from Portsmouth, takes Colonel Marsh's place.

The Navy.

ADMIRALTY, Nov. 29, 1884.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Staff Com. J. G. O'Connell has been placed on the Retired List, with permission to assume the rank and title of Retired Com. (Nov. 25).

Fleet Surg. W. H. Lloyd, M.D., has been promoted to the rank of Deputy-Inspector-Gen. of Hospitals and Fleets in her Majesty's Fleet (Nov. 27).

ADMIRALTY, Dec. 1, 1884.

The under-mentioned Assist.-Engineers have been promoted to the rank of Engineer in her Majesty's Fleet:—E. J. Austen and J. M. Downer (both dated Dec. 1).

APPOINTMENTS.

Staff Commanders—George A. Broad, to the Asia, for the Triumph; Robert Jackson, to the Excellent, additional; William H. Adlam, to the Duke of Wellington.

Lieutenants — Thomas H. M. Jerman, Arthur Y. Moggridge, and Harry M. Murphy, to the Reindeer; Richard O. Polwhele, to the Royal Adelaide; Stanley T. Dean-Pitt, to the Duke of Wellington; George C. Hammond, to the President, additional; William H. Nicholson, to the Minotaur (as Flag-Lieutenant to Vice-Admiral de Horsey); Edmund W. Yorke and Walter Carey, to the Agincourt.

Navigating Lieutenants—George S. Ralph, to the Shannon; Charles R. H. Robinson, to the Indus, for the Raleigh.

Sub-Lieutenants—Drury St. A. Wake, to the Reindeer; Charles W. Sutton, to the Repulse, for the Ariel.

Assistant Paymaster—Henry H. Rickard, to be Secretary to Vice-Admiral de Horsey.

Gunners—Richard S. C. Staddon, to the Reindeer; Thomas Birchby, to the Grappler; James C. Rockett, to the Excellent, additional.

Boatswain—Thomas Hills, to the Humber.

COASTGUARD.

Chief Boatmen—H. Grainger, Studland Bay, to be chief boatman-in-charge, Challabro, vice John Stevens, invalided; William Warlow, Warlow Station, to be chief boatman-in-charge, Hoylake, vice J. P. Walters, pensioned.

Commissioned Boatmen—Alfred Bishop, Filey, to be chief boatman, Tynemouth, vice E. Fox, promoted; James Collings, Portobello, to be chief boatman, Sandgate, vice Legg, promoted; Edward Dennis, Lyne Cobb, to be chief boatman, Studland Bay, vice H. Grainger, promoted.

Achilles, Capt. Buller, arrived at Portland from Gibraltar on Tuesday.

Agincourt, Capt. Mead, flying the flag of Rear-Admiral Whyte, arrived at Portland from Gibraltar on Tuesday.

Albatross, Com. Hicks, is in the Yangtse River; was at Hankow on Oct. 21, where she would be relieved by the Linnet.

Alecto, Lieut.-Com. Harston, was at Accra on Oct. 30.

Audacious, Capt. Pearson, was at Amoy up to Oct. 25.

Champion, Capt. Powlett, was at Hong Kong on Oct. 27, and would relieve the Audacious at Amoy on Nov. 11.

Cherub, Lieut.-Com. Haszard, arrived at Sheerness on Tuesday.

Cleopatra, Capt. Hippisley, was at Shanghai on Oct. 22.

Cockchafer, Lieut.-Com. Boteler, was at Tamsui, Formosa, on Oct. 22.

Coquette, Lieut.-Com. Crowe, was at Suakim on Nov. 21.

Crocodile, Capt. Carr, will leave for Bombay on the 14th inst.

Curacoa, Capt. Hanmer, was at Chefoo on Oct. 19, and would proceed to Woosung on the arrival of the Espoir.

Cygnet, Lieut.-Com. Gardiner, was at Massowah on Nov. 21.

Daring, Com. Ching, was at Ningpo on Oct. 20.

Dart, Lieut.-Com. Moore, was at Sydney on Oct. 22, preparing for sea.

Diamond, Capt. Dale, was at Sydney, and would visit Melbourne and Adelaide shortly.

Dido, Capt. Vander-Meulen, was at Barbadoes on Monday.

Dolphin, Com. Wilmot, was at Suakim on Nov. 21.

Dragon, Com. Anson, remains at Busreh.

Dreadnought, Capt. Hon. E. Fremantle, left Gibraltar on Nov. 27 for Malta, where she arrived on Wednesday.

Esk, Lieut.-Com. Cochrane, was at Swatow on Oct. 20.

Espiègle, Capt. Bridge, left Sydney on Oct. 19 for New Guinea, *viâ* Brisbane.

Espoir, Lieut.-Com. Gamble, was ordered to leave Tientsin for Chefoo on Oct. 24.

Falcon, Com. Pringle, left Suakim on Nov. 17 for Roweyyah, and on her return, was ordered to relieve the Condor at Massowah.

Firebrand, Lieut.-Com. Dickson, was at Singapore on Oct. 16, and would remain in the Straits of Malacca Division.

Flirt, Com. Craigie, will proceed to Ascension shortly.

Fly, Com. Hope, was at Takao, Formosa, on Oct. 19, where she remains for protection of foreign residents at Takao, Taiwanfun, and Amping.

Flying Fish, Capt. Maclear, is still surveying the coast of Corea and off-lying islands.

Forward, Lieut.-Com. Furlonger, sailed on Oct. 30 for St. Paul de Loando, to relieve H.M.S. Flirt on South Sub-Division.

Foxhound, Lieut.-Com. McQuhae, was in the Gulf of Tonquin at Hoihow on Sept. 26.

Frolic, Com. Parr, was at Accra on Oct. 30. She will visit intermediate ports between Accra and Lagos, and also the different Oil Rivers.

Goshawk, Lieut.-Com. Moore, was to leave Simon's Town for St. Helena, Ascension, and the West Coast on arrival of the Tamar.

Griffon, Com. Davies, will probably be paid off at Devonport on the 13th inst.

Harrier, Lieut.-Com. Pike, left Cooktown on Oct. 12 for New Guinea.

Himalaya, Capt. Palliser, left Malta for Alexandria on Wednesday.

Humber, Com. Errington, was expected to leave Suakim for Suez about Dec. 5.

Jumna, Capt. Singleton, has left Suez for England.

Lark, Lieut.-Com. Oldham, is still surveying among the Solomon Islands.

Linnet, Com. Hill, was at Hankow on Dec. 4.

Merlin, Lieut.-Com. Brenton, arrived at Hong Kong from Amping, Formosa, on Oct. 28; she is ordered to proceed to Sharp Peak, River Min, to relieve the Zephyr.

Midge, Com. Hotham, was at Foochow on Oct. 21.

Minotaur, Capt. Britten, bearing the flag of the Duke of Edinburgh, arrived at Spithead from Gibraltar on Monday. On Thursday Vice-Admiral De Horsey succeeded his Royal Highness in command. The coaling of the Minotaur and Seahorse is to be proceeded with immediately, and these vessels will sail in a week or ten days to join the remainder of the Squadron at Portland. On board the Minotaur it is believed that the Squadron will be home again before Christmas.

Miranda, Com. Acland, was at Sydney on Oct. 22.

Myrmidon, Com. Hoskyn, was, on Nov. 21, still surveying in the southern part of the Red Sea.

Nelson, Comdre. Erskine, arrived at Sydney on Tuesday.

Neptune, Capt. Maxwell, arrived at Portland from Gibraltar on Tuesday.

Northumberland, Capt. Robinson, arrived at Portland from Gibraltar on Tuesday.

Opal, Capt. Brooke, was at Accra on Oct. 30, and would remain in the vicinity, awaiting arrival of the Rapid.

Paluma, Lieut.-Com. Richards, is still at Chatham.

Pegasus, Com. Bickford, was at Singapore on Oct. 16.

Pelican, Com. Hope, arrived at Panama on Nov. 10.

Raven, Lieut.-Com. Ross, left Brisbane on Oct. 17 for New Guinea, and has since arrived there.

Reindeer, Com. G. L. Atkinson, was commissioned at Devonport on Thursday, with a complement of 110 men, for service on the East India station.

Ruby has completed the official trial of her machinery on the measured mile, off Maplin Sands. It was attended with satisfactory results, 13·2 knots per hour having been obtained. She is ordered to be ready for foreign service by Dec. 30.

Sapphire, Capt. Kinahan, was at Sharp Peak, River Min, on Oct. 21, where she remains until the return of the Zephyr from Wenchow, and then proceeds to Pagoda Anchorage.

Serapis, Capt. Douglas, arrived at the Cape of Good Hope on Tuesday, and would leave to-day.

Sphinx, Comdre. Molyneux, was at Suakim on Nov. 21.

Starling, Lieut.-Com. Saunders, arrived at Malta on Nov. 29.

Sultan, Capt. Tracey, arrived at Portland from Gibraltar on Tuesday.

Swift, Com. Bromley, was at Canton on Oct. 22.

Swinger, Lieut.-Com. Marx, left Brisbane on Oct. 18 for New Guinea.

Triumph is to be ready for commissioning early next month, by Capt. H. Rose, for service in the Pacific, where she will relieve the Swiftsure as flagship on that station.

Tyne, Com. Cochrane, was expected to leave Suakim for Suez about Nov. 26.

Undine, Lieut.-Com. Cross, was at New Hebrides on Sept. 26, and would return to Sydney about the end of November.

Vigilant, Lieut.-Com. Maxwell, was at Amoy on Oct. 25, and was about to convey the Commander-in-Chief to Shanghai, calling at Wenchow.

Wanderer, Com. Churchill, was at Hong Kong on Oct. 22.

Watchful, Lieut.-Com. Goodrich, left Cape Coast Castle on Oct. 26 for Grand Bassa, and on visit to the northern ports on Ivory Coast.

Zephyr, Lieut.-Com. Hope, left Sharp Peak, Min River, on Oct. 20, to visit Wenchow.

THE WAR BETWEEN FRANCE AND CHINA.

In a telegram from Tientsin of Dec. 2, the Chinese claim to have gained the following successes over the French:—"On Oct. 2 the Chinese, under Gen. Su Yüen-Chün, attacked and captured the forts and city Loh-guan Hsien, in Tonquin, and sank a French gunboat. After the engagement the elders of more than 20 Christian villages came in and tendered their submission to the Chinese commander. On Oct. 8 Gens. Liu and Sun Kai-hwa gained a victory over the French at Hoo-wei, in Formosa. The fighting continued for six hours. The French losses were very heavy. Among the dead left on the field were two French officers *de quatre galons*. The Chinese captured three guns, pursued the enemy to the waterside, and sank four of the launches sent from the fleet to carry them off. On Nov. 7, the troops of the Kamgsi province were successful in an engagement with the French troops in Tonquin, in which the latter lost seven commissioned and non-commissioned officers, and had their General severely wounded. On the same day the French made an unsuccessful attack on the Chinese positions at Kwan-Yin Kio, in Tonquin, at the end of which the French officer in command shot himself, thus producing great disorder among his troops, which then precipitately retired. On Nov. 13, the Black Flags, under Liu Jung Fu, repulsed the French on three occasions at Seün Kwan. On Nov. 13, the French suffered another defeat at Tamsui. On Nov. 19, a French force, in which some Turcos were included, was forced by the Black Flags and some Yunnan regulars to take refuge in the woods near Seün Kwan."

The Chinese appear to have abandoned all hope of the war being settled by negotiation, and to have determined upon a vigorous policy.

It is stated from Hong Kong that a German admiral and other European officers are employed in the Chinese Northern Fleet. Thirty Germans have reached Port Arthur lately.

THE NAVAL DEBATE.

In the House of Lords, on Tuesday, Lord Northbrook made his promised statement respecting the state of the Navy. At the outset he admitted that the action of the Government in this matter is due to the agitation which has arisen in the country, and said it was unfortunate that the discussion had been hitherto conducted without any expression of opinion from those who were responsible for the Navy. After an assertion of the determination the Government feel to maintain the Naval supremacy of England to the best of their ability, he complained that there had been a disposition not to recognise what they had done in this direction. The Admiralty had increased the rate of construction of armour-plated ships from 8,000 tons a year to 12,000 tons, and at an augmented charge of one million a year. He was satisfied that our expenditure in the construction of armour-plated ships is much larger than that of the French Government, though the number of ships in progress in the French dockyards is larger than in this country. There would soon, however, be three slips vacant, and it was proposed to lay down three new ships in the place of those which either had been, or would shortly be, launched. The Benbow, also, was getting on rapidly, and would be launched shortly; and it was proposed then to lay down one more ironclad, or four in all, in the course of the next financial year. The first would be a turret-ship of the Conqueror type, a little over 10,000 tons burthen, with 18 in. of armour, and carrying two 110-ton guns, an 18-ton stern-gun, and 12 6-in. guns in a steel-protected battery. She would have a speed of 15½ knots, and would be equal in strength to any armour-clad ship constructed, or being constructed, by any other nation. What the designs of the other three armour-clad ships were to be was not necessary now absolutely to decide, but they would be between 10,000 and 11,000 tons. It was proposed also to build at once two more torpedo rams similar to the Polyphemus. Two torpedo cruisers were being built, and ten more would be built. They would be armed with sixty 4-ton guns, and have a speed of 16 knots. Thirty first-class torpedo-boats would also be added to the Navy, together with five more protected cruisers of 3,000 tons displacement, armed with torpedoes as well as guns, and having a speed of 17½ knots. The latter boats Lord Northbrook described as superior to anything which is now being built in Europe. The additions to the Navy, it was next stated, would cost altogether about £3,100,000, which would be spread over a period of five years. The additional ships would be, to a great extent, provided by contract. The cost would be supplemented by £1,600,000 required for armaments, and £825,000 for the protection of coaling-stations. The First Lord intimated further that these estimates, together with the other military estimates of next year, will be submitted to a select committee of the House of Commons, and that a proposal with regard to the defences of the commercial harbours may possibly be made by the Government in the meantime. Lord Carnarvon, who followed the First Lord of the Admiralty, complained of the inadequacy of the Ministerial proposals for any immediate purpose. Lord Alcester claimed some credit for the Government, as having increased the numerical strength of the Navy. Lord Dunsany urged the necessity of expediting the promised additions. Lord Camperdown asserted that the English Navy is at present "undoubtedly the strongest in the world," and demurred to the present tendency to under-rate its qualities. Lord Clanwilliam concurred in the belief that the proposals are inadequate, and Lord Sidmouth addressed some questions to the Government which elicited from the First Lord that it is not intended to await the decision of next year's Financial Committee in the House of Commons before proceeding with the new ships which have been promised. Lord Northbrook's formal motion for returns of the strength of the Navy was agreed to, and the House rose at 8.5.

In the House of Commons, there was a large attendance of Members, in anticipation of the Ministerial statement with regard to the Navy. Sir Thomas Brassey, Secretary of the Admiralty, explained in great detail the plans of the department for the reinforcement of the Navy. He laid somewhat more stress than Lord Northbrook had done upon the large proportion of the new work which is to be given to private contractors. More details as to the defence of the coaling-stations abroad were also furnished; but, on the whole, the Secretary of the Admiralty summed up the substance of the intended expenditure to the same effect as the First Lord. Mr. W. H. Smith followed the Secretary of the Admiralty, and at once pointed out that the Government scheme does not include the actual doing of anything, but merely a programme of work for future years. Supposing that there is actual necessity for reinforcement of the Navy, the late Lord pointed out that a dilatory proposal of this kind is simply "absurd." Mr. Smith showed the defenceless condition of our coasts in the event of a sudden outbreak of war, and the necessity of some increase of torpedo preparations. At present, he said, our yearly output of torpedoes is 50, which would be no more than the requirements of one week of active operations. He dwelt strongly upon the responsibility which lies upon public men who leave the country uninformed as to the state of its defences. The policy of concealment, he said, was the departmental policy, but he believed in a policy of publicity. He believed a war would come without notice, and those who left the country unprepared would then have a great account to render to the people. Sir Donald Currie and Sir John Hay, from different standpoints, urged upon the Government the necessity of a more energetic Naval policy. Sir Edward Reed expressed satisfaction at the character of the proposals announced, which, however, he did not consider went far enough. Mr. Gorst impressed the necessity of activity upon the Government. Some other discussion followed, and after a brief reply from the Chancellor of the Exchequer, the formal motion for returns was agreed to, and the House adjourned at 1.15.

THE TRUTH ABOUT THE ARMY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I challenge any person, be he military, naval, or civilian, to deny the absolute truthfulness of the criticisms of Capt. White in his articles upon the subject of "The Truth about the Army," (now issued in pamphlet form by Messrs. Cousins and Co., 3 York Street, Covent Garden). The Army itself owes a debt of gratitude to the author of the several articles which have appeared in the *Whitehall Review* upon the military question, and for the utterly fearless and truthful manner in which he has brought the subject before the public. I, as a soldier of some experience, have no hesitation whatever in endorsing every word Capt. White has written, and I can only say that he deserves well of his country. At this moment, when the horizon of Europe is, metaphorically speaking, obscured by the smoke of gunpowder, such an *exposé* of the state of this country with regard to its Army should appeal to the hearts of all Englishmen. The sea and land defences of England should at once be placed in such a condition as to inspire confidence in the breasts of the people of this country, and cause them to fear but little the combination of all Europe against her. Capt. White's pamphlet, "The Truth about the Army," should find a place upon every mess-table throughout the service; and not only there, but in the reading-room of every political club in the country.—I am, &c.,

A SOLDIER OF THREE CAMPAIGNS.

Lieut. Huntingford, R.N., who has been appointed transport officer in connection with the Bechuanaland Expedition, left London last week for the Cape.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

BOOKS, Etc., RECEIVED FOR REVIEW.

DR. J. COLLIS BROWNE'S CHLORODYNE

ORIGINAL AND ONLY GENUINE.

COUGHS,
COLDS,
ASTHMA,
BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE.
Dr. J. C. BROWNE (late Army Medical Staff) discovered a remedy to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false.*

Vice-Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the *Times*, July 13th, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE is the true Palliative in
NEURALGIA, GOUT, CANCER, TOOTHACHE, RHEUMATISM.

IS THE GREAT SPECIFIC for
CHOLERA,
DIARRHŒA, DYSENTERY.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

From SYMES and CO., Simla:
Dear Sir,—We congratulate you upon the wide-spread reputation this justly esteemed medicine has earned for itself all over the East. As a remedy of general utility, we much question whether a better is imported, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike.—We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, his Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of
EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.

IMPORTANT CAUTION.
The immense sale of this remedy has given rise to many unscrupulous imitations. Of all Chemists, 1s 1½d, 2s 9d, and 4s 6d.

Sole Manufacturer,
J. T. DAVENPORT,
33 Great Russell Street, W.C.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.
Store Warehouses, Baker-Street Bazaar, W.

HOLLOWAY'S PILLS.—The stomach and its troubles cause more discomfort and bring more unhappiness than is commonly supposed. The thousand ills that settle there may be prevented and dislodged by the judicious use of these purifying Pills, which act as a sure, gentle, and anti-acid aperient, without annoying the nerves of the most susceptible, or irritating the most delicate organisation. Holloway's Pills will bestow comfort and confer relief on every headachy, dyspeptic, and sickly sufferer, whose tortures make him a burden to himself and a nuisance to his friends. These Pills have long been the popular remedy for a weak stomach, for a disordered liver, or a paralysed digestion, which yield without difficulty to their regulating, puriyfng, and tonic qualities.

MILITIA COMPETITIVE. — Major LENDY, assisted by a Field Officer, Graduate of the Staff College, PREPARES a limited number of Candidates. Two hundred and thirty-one of his Pupils have passed for the Staff College and Militia.—Sunbury-on-Thames.

SANDHURST & WOOLWICH.—Assisted by Four Resident Tutors (Cambridge Wrangler, Oxford Honoursman, French and German Diplomés), Major LENDY RECEIVES a limited number of Candidates. Of the last 22 Pupils sent up to compete, 19 were successful. Last July four only went up, and passed 4th, 7th, 10th, and 77th.—Sunbury-on-Thames.

ARMY EXAMINATIONS.—Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

Candidates also prepared for Woolwich and Sandhurst, and for the Militia Literary Examinations.

PRELIMINARY.—Twenty-eight have passed this year.

INDIAN CIVIL SERVICE.—A Special Class, limited to eight.

FOREIGN OFFICE and DIPLOMATIC. — A Special Class, limited to six.

Courses for all Examinations now proceeding.

NEXT TERM COMMENCES JANUARY 13.

THE MANOR HOUSE, LEE, S.E.

The SPECIAL CLASSES for the MILITIA COMPETITIVE, the STAFF COLLEGE, and PROMOTION EXAMINATIONS commenced October 15, under the direction of Lieutenant-Colonel J. L. NEEDHAM, P.S.C., late Professor of Fortification, Tactics, &c., at the Royal Naval College, Greenwich, and formerly Garrison Instructor. Each Class limited to eight.

At the MILITIA COMPETITIVE EXAMINATION, held in September last, out of FIVE Lieutenants of Militia sent up by Mr. WOLFFRAM, the following were successful:—

Place.	Name.	Marks.
3.	... Lieut. B. Upperton	1906
4.	... Lieut. W. J. Mangles	1875
54.	... Lieut. J. R. O'Connell	1575

Out of twenty-seven MILITIA OFFICERS sent up from the Manor House for the MILITARY COMPETITIVE EXAMINATION since 1881, the following twenty-two have been successful:—

Lieut. H. de S. Barrow.
Lieut. Sir Henry Bellew, Bart.
Lieut. C. C. Daniel.
Lieut. H. J. Elphinstone.
Lieut. C. S. Evans-Lombe.
Lieut. M. A. Foster.
Lieut. Henry Graham.
Lieut. H. F. Holland.
Lieut. W. R. Inglis.
Lieut. William Keates.
Lieut. Percy Lees.
Lieut. W. J. Mangles.
Lieut. Graham Marsh.
Lieut. A. P. Murray.
Lieut. J. R. O'Connell.
Lieut. L. W. Pease.
Lieut. H. K. Stewart.
Lieut. Harrington Swann.
Lieut. R. W. Trim.
Lieut. Bryan Upperton.
Lieut. F. O. F. Vane.
Lieut. G. F. Whitehead.

ARMY EXAMINATIONS. — LIEUTENANTS of MILITIA PREPARING for the MILITARY COMPETITIVE EXAMINATION can be RECEIVED by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath, whose pupils for some years past have continuously maintained a steady average of success, second to none. This year fifteen have been sent up, seven of whom have passed; four in March (one taking first place on the list), and three at the recent Examination. Very few pupils are taken, and there are two resident Military Instructors of high qualifications constantly at work, with a third in reserve in case of pressure. Thus very great individual attention is guaranteed, and the system of lecturing classes entirely avoided. Batcombe is a country village, near no town, but affording opportunity for shooting and other healthy amusements in moderation. References are permitted to the Earl of Harewood, Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of successful pupils.

JERSEY HIGH SCHOOL for GIRLS
(Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.
His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

DOVER COLLEGE.
President.—Earl GRANVILLE, K.G.

There will be an EXAMINATION for SEVEN SCHOLARSHIPS, tenable in the College at Easter, 1885. There are also valuable Scholarships tenable at the Universities, Woolwich, &c.

The Boarding arrangements are such that each Boarder has a separate bedroom.

For particulars, apply to the Rev. W. BELL, M.A., the Head Master, or W. KNOCKER, Esq., the Hon. Sec.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the seven MILITIA COMPETITIONS which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils SIXTY COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates.

MARCH, 1884.

ELEVEN SUCCESSFUL of out SIXTEEN SENT UP.

* Passed FIRST TRIAL.

At the recent WOOLWICH and SANDHURST Examinations NINE PUPILS competed, and EIGHT CADETSHIPS were obtained (one Woolwich, seven Sandhurst); Mr. H. D. Radcliffe taking SIXTH PLACE on the Infantry list for Sandhurst, with 7,308 marks, and making the highest score of any candidate in German—1,855 marks out of 2,000.

For the Staff College, Captains G. F. C. Mackenzie and C. E. de la P. Beresford have been successful; no other candidates sent up.

The general score now amounts to ONE HUNDRED AND SIXTEEN SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.— C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

WOOLWICH, SANDHURST, and the MILITIA.—(*Candidates for the Further Examinations preferred.*)—Resident and Visiting Pupils prepared by a FRENCH and ENGLISH UNIVERSITY MAN, formerly on the French Staff, and late Modern Language Master in Haileybury, Wellington, and Winchester Colleges. *FRENCH and GERMAN MASTERS reside in the House.* Local references to Colonel H. P. Montgomery, late commanding Rifle Depôt; or to Lieutenant-Colonel C. T. Bunbury, late Rifle Brigade. Passed:—Lieut. C. C. Daniel (the Royal Scots); Lieut. E. P. Webber (the Royal Sussex); Mr. E. H. Somerset (passed his Preliminary in March, and qualified for Queen's Cadetship in July, 1884).

NEXT TERM COMMENCES JANUARY, 1885.
WELLINGTON HOUSE, Winchester.
SPECIAL CLASSES FOR ENTRANCE TO THE STAFF COLLEGE AND MILITIA COMPETITIVE EXAMINATION.

SANDHURST, WOOLWICH, and MILITIA EXAMINATIONS.—Preparation by JOHN GIBSON, M.A., and large Resident Staff, at Bromley, Kent, and Coblenz-on-Rhine.

N.B.—GIBSON'S SANDHURST "FURTHER" GUIDE (No. 3), containing Papers set in November and December, 1884, and Solutions, will be published on Wednesday after the Examination.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.
Under the patronage of her most Gracious Majesty the QUEEN.

CHAIRMAN—Major-General J. T. BOILEAU, R.E., F.R.S.

Applications from Candidates for admission to this School, either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

The Daughters of all Officers on the Active and Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible; but the Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

Office, 20 Charing Cross, corner of Craig's Court, London.

By Order,
G. W. FORSTER, Secretary.

MILITIA, ARMY COMPETITIVE, and PROMOTION EXAMINATIONS.—Private Tuition for above by Captain HAYES (late R.A.). Has had marked success during past five years.—Address, Junior Army and Navy Club, St. James's Street, S.W.

ARMY.—LINE and MILITIA
IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, 16 Nevern Square, Earl's Court, S.W.

MILITARY EXAMINATIONS.

Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c. — Address, HEAD MASTER.

MILITIA CANDIDATES for the LINE. —TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above. Careful individual attention, A Class now at work for the March Examination. References permitted to Colonel Aylmer, S. Cameron V.C., Assist.-Qrmr.-Gen. (Intelligence Branch), War Office; and Colonel C. W. Robinson, Rifle Brigade, Assist.-Qrmr.-Gen., Aldershot.

For prospectus, containing terms, testimonials, and references, address, East Bergholt, Colchester.

MILITIA COMPETITIVE EXAMINATIONS.—MILITIA OFFICERS are prepared in all the subjects for the above Examinations by Lieut.-Colonel N. STEEVENS (late 20th and 88th Regiments and Staff), and Colonel F. J. HUTCHISON (late 64th Regiment, seven years Garrison Instructor at Devonport, and for several months Acting Professor of Fortification at the Staff College).—For further particulars, apply to Lieut.-Colonel STEEVENS, 1 Wolseley Terrace, Cheltenham.

ARMY (PRELIMINARY, FURTHER, and COMPETITIVE) LITERARY EXAMINATIONS.—The Rev. WALTER BAKER, M.A. (Cantab.), late Scholar of his College, &c., offers an unusual combination of advantages. A few Pupils only received. All work is done by individual teaching. No lectures to Classes, but a resident Tutor to every three Pupils, and each Tutor first-rate in his own subjects. For fourteen years, up to and including the last Sandhurst Competition, a steady average of successes, second to none, has been maintained. No town is near, but there are plenty of country amusements, and a liberal establishment is kept. The highest references can be given to noblemen, officers high in the service, and other parents of successful Pupils.— Address, Batcombe Rectory, Evercreech, Bath.

ROYAL INDIAN ENGINEERING COLLEGE, COOPER'S HILL, STAINES. —The Course of Study is arranged to fit an Engineer for employment in Europe, India, or the Colonies. Sixty Students will be admitted in September, 1885. For competition the Secretary of State will offer Fifteen Appointments in the Indian Public Works Department, and Two in the Indian Telegraph Department.—For particulars, apply to the SECRETARY, at the College.

ARMY and UNIVERSITY EXAMINATIONS.—J. WEST, Edinburgh University (two First Classes), F.R.Hist.S., F.A.S., and F. G. BRABANT, M.A. Oxford (three First Classes), RECEIVE a LIMITED NUMBER of RESIDENT PUPILS, to whom they offer special individual attention and a pleasant country home. Long and varied experience, especially in Sandhurst Preliminary and Sandhurst and Woolwich Competitive. Highest references. List and terms on application. —Address, Heathview, Storrington, Sussex.

MILITIA MILITARY COMPETITIVE. MAJOR de THOREN'S very remarkable success with Classes of Militia Officers, strictly limited in number, and to whom he gives his individual and sole attention, continues as usual. The fees at this establishment are extremely low.—For particulars, address Bellefield, St. Helier's.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Officers prepared for Examinations. Correct Idiom guaranteed.—PUNDIT, 7 Beechholme Road, Clapton.

CONNAUGHT MILITARY COLLEGE,
WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

NEWTON COLLEGE, S. DEVON.

PRESIDENT OF COUNCIL.—Earl of DEVON.
HEAD MASTER.—Rev. G. TOWNSEND WARNER, M.A., Trin. Coll. Camb. (appointed, 1875.)
TWELVE RESIDENT MASTERS.—First-Class Honour Men are at the Head of each Department.

The New Buildings lately built accommodate 200 boys, to which number from its present limit of 150 it is proposed to increase the School. The advantages offered are—

1. A large staff of Masters, of undoubted calibre and experience, so that the teaching is careful and thorough.
2. Small Classes so that all can be taught properly.
3. Supervision in study to prevent idleness as far as possible.
4. Complete subdivision into Classical and Modern Sides, Non-Latin Divisions, Junior and Preparatory Schools; so that boys can take up any branch of education, scientific or otherwise, and be thoroughly taught in it.
5. Large airy class-rooms where teaching is carried on at the least pressure to master and boy.
6. Excellent situation and playing fields, large swimming-bath, gymnasium, carpenter's shop, &c., with all kinds of appliances for keeping boys employed and so out of mischief.
7. A system of Scholarships, entrance and others, open to all.
8. A regular succession of annual public Examinations, so that parents can judge for themselves how their sons stand in comparison with those from other schools.
9. Comfortable and well-arranged accommodation, &c., in the houses, &c.
10. Opportunity for that friendly intercourse between Masters and Boys in out-of-door games, which is so conducive to the good tone of a school.
11. The Head Master has had great experience in dealing with delicate boys, and makes special arrangement for those who desire school life and yet require careful watching.
12. Army Candidates trained without the aid of a Crammer, if entered in fair time.
13. The Preparatory School is specially provided for in a separate House, with Fives' Courts of its own, &c.

The School offers SPECIAL TERMS to the Sons of Clergy, Officers, Professional Men, &c., and the fact that Six Entrance Scholarships have been won since 1882 at Winchester and Marlborough bears testimony to its excellence in the Preparatory School, while the List of other Honours is no less satisfactory.

HINDUSTANEE TAUGHT by a RETIRED OFFICER, Bengal Staff Corps. Has passed High Proficiency Examinations in both Hindi and Urdu at Calcutta.—Address, Captain HAYES, Junior Army and Navy Club, St. James's Street, S.W.

MEMORY and SUCCESS.—What contributes to success? A good memory.—What causes failure in life? A poor memory.—What can all obtain from Prof. Loisette's Discoveries? A good memory—the PHYSIOLOGICAL ART of NEVER FORGETTING—using none of the "Links," "Pegs," "Localities," or "Associations" of Mnemonics. Lost memories restored—the worst made good, and the best better. *Any book learned in one reading.* Prospectus post-free, giving opinions of Mr. RICHARD A. PROCTOR, Dr. ANDREW WILSON, and others who have studied the System. A Day Class in Never Forgetting and for Cure of Mind-Wandering commences every Monday at 3 p.m. An Evening Class every Tuesday at 8 p.m. Lectures in Families of the Nobility; also taught thoroughly by POST. —Prof. LOISETTE, 37 New Oxford Street (opposite Mudie's), W.C.

J. AND W. TOLLEY'S EXPRESS RIFLES,

BIG GAME RIFLES.

GIVING THE HIGHEST VELOCITY, THE FLATTEST TRAJECTORY, AND THE GREATEST ACCURACY YET OBTAINED.

·360, ·400, ·450, ·500, & ·577, Double Express, £25.

From A. H. MACARTNEY, Esq., Newera Elliya, Ceylon, April 25, 1882:—"The 12-bore 'Forsyth' Rifle you sent me was an excellent weapon, none could be better; it did such execution as has never before been equalled. The first time I went out I saw three rogue elephants of enormous size, one shot sufficed for each of them. Then I went out with Lieut. Hannay, R.E., now in England; we saw twenty-one elephants, and killed them all between us, fourteen falling to your rifle. Once it saved our lives; a charging rogue falling dead to it within six feet of where we stood."

From H. T. SHUBRICK, Esq., 13th L.I., 39 Onslow Gardens, London, S.W., October 8, 1884.—"After nearly five years' experience of the ·577 Express Rifle, No. 5,514, you built for me, I have much pleasure in stating that it has from first to last given me entire satisfaction. In my last jungle trip I killed four bison and a bear, each with a single shot. The penetration and killing power is something enormous, as the following particulars will show. Bison, No. 1: Shot in the throat end-on; the piece penetrated the muscles of the neck, broke one of the breast ribs, pierced the heart and lungs, and finally there were six holes in the diaphragm; further we did not trace. Bison, No. 2: Shot through the right shoulder while lying down, showing the right shoulder broken; left appeared to be so also, but had not time to skin sufficiently to make certain. Bison, No. 3: Shot behind the shoulder; bullet broke up into five pieces, two of which went clean through. The above I think is enough to show what the penetration is like. I have recommended several gentlemen from you, and in each case they were as well served as I was."

J. AND W. TOLLEY,

Makers by Special Appointment to the Persian Royal Family.
PIONEER WORKS, BIRMINGHAM;
1 CONDUIT STREET, REGENT STREET, LONDON.

LEFT-OFF CLOTHES, Old Uniforms, Epaulettes, Books, Jewellery, Miscellaneous Property, &c. Mr. J. Norton, 5 Wych Street, Strand, continues giving the highest price in the trade for the above. The utmost value remitted by Post-Office order the same day for all Parcels forwarded.

All letters punctually attended to.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, equal to new, at very low prices.

"FOR THE BLOOD IS THE LIFE."
CLARKE'S
WORLD-FAMED
BLOOD MIXTURE.
THE GREAT BLOOD PURIFIER AND RESTORER.

For cleansing and clearing the blood from all impurities, it cannot be too highly recommended. For Scrofula, Scurvy, Skin Diseases, and Sores of all kinds, it is a never-failing and permanent cure.

It Cures Old Sores.
Cures Ulcerated Sores on the Neck.
Cures Ulcerated Sore Legs.
Cures Blackheads, or Pimples on the Face.
Cures Scurvy Sores.
Cures Cancerous Ulcers.
Cures Blood and Skin Diseases.
Cures Glandular Swellings.
Clears the Blood from all impure matter,
From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietor solicits sufferers to give it a trial, to test its value.

Thousands of Testimonials from all Parts.

Sold in Bottles, 2s 6d each; and in cases, containing six times the quantity 11s each—sufficient to effect a permanent cure in the great majority of long standing cases—BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world, or sent on receipt of 30 or 132 stamps by The LINCOLN and MIDLAND COUNTIES DRUG CO., Lincoln.

Trade Mark—"BLOOD MIXTURE."

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—SATURDAY, December 6, 1884. Letters on Business and Remittances should be made to Mr. RICHARD JAMES WOOD.

CORRECTED UP TO DECEMBER 6.]

SPECIAL SUPPLEMENT TO THE

ARMY AND NAVY GAZETTE.

JOURNAL OF THE RESERVE, AND AUXILIARY FORCES.

No. 1,298.—Vol. XXV.] SATURDAY, DECEMBER 6, 1884. [REGISTERED FOR TRANSMISSION ABROAD.} GRATIS.

THE KHARTOUM EXPEDITION.

Lord Wolseley's Address to the Army.

The following was issued by Lord Wolseley recently from Head-quarters, at Dongola:—"To the Sailors, Soldiers, and Marines of the Nile Expedition.—The relief of Gen. Gordon and his garrison, so long besieged in Khartoum, is the glorious mission which the Queen has entrusted to us. It is an enterprise that will stir the heart of every soldier and sailor fortunate enough to have been selected to share in it, and the very magnitude of its difficulty only stimulates us to increased exertions. We are all proud of Gen. Gordon and his gallant and self-sacrificing defence of Khartoum, which has added, if possible, to his already high reputation. He cannot hold out many months longer, and he now calls upon us to save his garrison. His heroism and his patriotism are household words wherever our language is spoken; and not only has his safety become a matter of national importance, but the knowledge that our brave comrade needs help urges us to push forward with redoubled energy. Neither he nor his garrison can be allowed to meet the sad fate which befell his gallant companion-in-arms, Col. Stewart, who, when endeavouring to carry out an enterprise of unusual danger and folly, was treacherously murdered by his captors. We can—and with God's help will—save Gen. Gordon from such a death. The labour of working up this river is immense, and to bear it uncomplainingly demands the highest soldierlike qualities, that contempt for danger, and that determination to overcome difficulty which in previous campaigns have so distinguished all ranks of her Majesty's Army and Navy. The physical obstacles that impede our rapid progress are considerable, but who cares for them when it is remembered that Gen. Gordon and his garrison are in danger. Under God, their safety is now in our hands, and come what may we must save them. It is needless to say more to British soldiers and sailors.—Signed, Wolseley."

Enteric fever is said to be very bad at Assouan and Wady Halfa.

Com. Hammill, R.N., successfully launched the Yarrow at Semneh on the 2nd inst. Neither engines nor fittings of any kind are yet on board of her, and it is feared that, when completed, she will be unable to pass the Ambukol and Dal rapids.

The head-quarters of all regiments taking part in the Expedition have now passed Wady Halfa, and the remaining drafts of troopers are rapidly arriving. The Cameron Highlanders reached Korosko yesterday. They are to garrison that post throughout the campaign.

The second division of the Guards' Camel Corps started from Dongola for Handek on Tuesday. The men were inspected by Lord Wolseley, first on foot, and then as they passed before him on their camels. The Mudir was present at the inspection, but preserved an air of sullen indifference. Not so, however, the Turkish officers of his Staff, who could not conceal their astonishment and admiration at the physique and appearance of the men. The camels were all under perfect control, and moved off in excellent order into the Desert.

The five pioneer boats of the Royal Engineers arrived at Dongola on Tuesday, having made much more rapid progress up the upper reaches of the river than was expected, and having accomplished the journey from Sarras in 26 days. All the troops for the Expedition have now got as far as Wady Halfa, with the exception of the 1st Batn. Cameron Highlanders (79th), which remains at Korosko.

Col. Burnaby arrived at Wady Halfa on Tuesday.

Col. Butler reached Handek, at the top of the Third Cataract, on Saturday. He gives it as his opinion that the voyage to Dongola ought to be accomplished in twenty-two days. Experience, so far as it has gone at present, is opposed to him, for the Engineers' boats are not expected to arrive at Dongola for another four or five days, which will make them exactly a month upon the river from Sarras. The more heavily laden infantry boats cannot be expected to make better time, and it will be fortunate if they do it equally quickly.

The difficulties of the Nile Expedition are increasing daily. The Nile still continues falling about six inches daily. The difficulties attending the advance of the flotilla are said to be hourly becoming greater, and a point will soon be reached at which it will be found extremely difficult to make further headway this season. The Cataracts keep increasing in number and are getting more dangerous. At the same time the gates are shifting further from the shore, making it necessary to use longer tow-lines. Through the greater swaying of boats thus superinduced more of these have been coming to grief. Although at Gemai and Sarras, on Nov. 25, there were nearly 200 whalers, and the head-quarters of the Black Watch, as well as some companies of other regiments, were waiting at Halfa to go forward, they were unable to move on account of there being no voyageurs to pilot the boats. Five days later the Canadians, who had gone with stores to Dal, began returning with their boats, shooting the Cataracts, and making the return trip to Sarras within two days. The special correspondent of the *Daily Telegraph* writes:—"On my way up, in a little low boat, I have passed boats with men and stores belonging to the Essex, Duke of Cornwall, and Black Watch Regts., with drafts for the South Staffordshire Regt., strung out along the river. Their average rate of progress is not over four miles a day. In the stretch of broken water extending from Sarras to Dal the boats move in groups of from seven to ten, in order to be enabled to help one another in towing past the rapids. I regret to say that but few boats get to Dal without having to be hauled up on the bank for repairs. Some have to be tinkered up daily. The whalers, in my opinion, will soon have to be unloaded and portaged at Dal."

The health of the troops is, on the whole, very good, and though certain hospitals are very full, the per-centage of sick for the 10,000 troops south of Korosko is under 4½.

The Staffordshire Regt. is expected to pass through Dongola on its way to Ambukol next week, when the Camel Corps will accompany it, following the west bank of the Nile.

Since the arrival of the British troops at Dongola seven deaths have occurred, two being from small-pox and the other five from various causes. No invalids have been forwarded to Cairo, none of the cases being serious enough.

No news of the reported death of the Mahdi has been received from Lord Wolseley or the Mudir of Dongola either by the Khedive or Sir Evelyn Baring.

Col. Burnaby has been appointed Inspecting Staff Officer between Ambukol and Dal.

Gen. Buller has left Wady Halfa for Dal on a tour of inspection.

There is a report that the 1st Batn. Yorkshire Regt. (19th) will be ordered to join the Expedition.

The Yarrow stern-wheel steamer Water Lily has arrived at Assouan, after a rapid passage, towing barges. She passed the rapids of Philae all well.

A messenger arrived at Dongola on Sunday from Gen. Gordon conveying a letter, dated Sept. 9, therefore long previous to the despatch received by Lord Wolseley on the 14th ult. Gen. Gordon refers in it to the Mahdi's attack on Omdermann. When the Khartoum garrison was summoned to surrender, Gen. Gordon replied:—"If you are the true Mahdi, dry up the waters of the Nile, and come and take me." The messenger, in explanation of the delay, said he was made prisoner at the enemy's outposts near Shendy, and kept there for several weeks. He learned that there was much sickness and scarcity of food in the Mahdi's camp, and disaffection amongst his followers, which he thinks would necessitate a retreat southward. The messenger confirmed the news telegraphed a week ago to the effect that 500 fighting men had deserted the Mahdi's cause and joined Gen. Gordon.

The rebels are said still to occupy a position north of Khartoum, and have even advanced 20 miles beyond Herreri. Two thousand of the Mahdi's followers are, it is reported, employed in throwing-up earthworks across the Ambukol and Khartoum caravan route, and are advancing towards the Bayuda wells, with the object of establishing communications with Wady Ammai, whence to strike at the Gakoul wells on the Merawee road.

There have for some little time been rumours in the bazaars at Dongola of a gathering of the tribes beyond Merawi, with the intention of opposing the British advance. These rumours gain strength and consistency, and it is now reported that the spot where the assemblage is taking place is a day and a half's march beyond Merawi. It is said that the tribes are under the leadership of a daughter of Mahmoud, one of the Mahdi's leaders, who was killed in the late battle with the troops of the Mudir.

A correspondent at Dongola writes:—"The opinion in the bazaars is by no means favourable to our chances of success. The people are, of course, ignorant of the value of our superior arms and discipline, and as our troops for the most part pass up the opposite side of the river, they under-estimate our number. It is difficult to say to which side their sympathies incline. Those who have anything to lose no doubt wish us success, but the lower class, although not strongly hostile to us, are yet in favour of their co-religionists."

The last boat with troops on board left Wady Halfa on the 1st inst. This event, says the special correspondent of the *Standard*, telegraphing from Dongola, marked the conclusion of the first or preparatory stage of the Expedition. The second phase may be taken as the passage between Sarras and Dongola; the third will be completed when the whole force is concentrated at Ambukol, which will, according to present appearances and expectation, be about the end of January. Beyond this nothing is as yet absolutely settled, and the course taken by the Expedition must depend greatly upon the height of the Nile and the reports of the state of the Cataracts above Ambukol. Should these be favourable, the Expedition will proceed in its boats. The journey will be a long one, for the distance by river is 500 miles. Should the river prove impracticable, the land route alone remains. The distance to Shendy is small in comparison with that by the river, and the Camel Corps could do it in five days. Sufficient water for them is to be found in the wells, and a fair amount of supplies could be obtained on the road. But for the Infantry there is no transport available save by the boats, and failing the Nile it is difficult to see how they are to get on. At present, the road to Shendy is reported as clear of the enemy, but they may at any moment advance. In speaking of the arduous work entailed upon the men in getting their boats up the river, the correspondent adds that it is most unsatisfactory for men and officers to be aware, as they are, that all their hardships are entirely owing to the procrastination of the Home Government, and that had the arrangements been made in proper time, the journey to Ambukol would have been performed without any substantial difficulty. From Suakim it is reported that the rebels opened a brisk on the marines' zeriba to the north of the town at 10 o'clock on Wednesday night, and made good practice. They then passed round the outside of the lines to the south, making a determined attack there, and firing from pits at some 250 yards' distance. Their shots were returned by the Marines and Egyptian soldiers from the houses occupied as forts, and by the Royal Engineers. The Gardiner and musketry fire directed on the enemy was of terrific volume, and in 20 minutes the Arab skirmishers were nearly quieted. Afterwards the contest became something like rabbiting. In the bright moonlight the rebels were seen darting out of their hiding-places in the pits. As they ran they received showers of ball, and many fell, but were dragged off by their comrades. This lasted for three hours until the ground was covered with pools of blood. Two dead bodies were left on the field, and the trackers say that 15 of the enemy were killed, and many more wounded. The camelmen waiting in the background received the killed and wounded.

THE BECHUANALAND EXPEDITION.

The Durban correspondent of the *Times* telegraphs:—"Three delegates from the New Boer Republic established in Zululand, Messrs. Esselin, Krogh, and Van Staden, have arrived in Maritzburg, in order to confer with the Governor, Sir Henry Bulwer. All the information in my possession is in favour of the belief that Dinizulu and the Usutu party generally regard the land claims and political pretensions of the Boers with much distrust. Usibepu contemplates the sending of a mission to London. The treatment accorded to the German missionaries in Zululand causes some discussion."

A late telegram, dated Dec. 3, says:—"The text of the terms provisionally concluded at Rooi Grond have been wired to Earl Derby, and the matter awaits the decision of the Cabinet. Sir C. Warren's presence in Bechuanaland as Commissioner is necessary in any case. A public meeting of Goshenites was held on Friday last at Rooi Grond in the presence of the Cape Ministers. Two hundred burghers were present, who unanimously resolved to accept annexation to the Cape Colony upon the conditions proposed by the Ministers, which embrace all the requirements of the Imperial Government. Comdt. Schoeman, the Transvaal Commissioner of the Western Border, has returned to Pretoria, and reports all matters to have been amicably settled." There is now no prospect of any further trouble.

The second and last detachment of 300 men who have volunteered for service in the irregular force raised for the Bechuanaland Expedition left Waterloo Station on Thursday morning by special train for Southampton, where they embarked on board the Spartan.

THE DUKE OF EDINBURGH AND THE CHANNEL SQUADRON.

The Duke of Edinburgh, before leaving the Channel Squadron, issued the following memorandum to the Rear-Admiral and officers commanding, to be read out on the quarter-decks of their respective ships:—"The Lords Commissioners of the Admiralty have informed me that, on the 3rd inst., I shall be succeeded in the command of the Channel Squadron by Vice-Admiral Algernon Frederick Rous de Horsey. In making this known for your information, I desire to thank you for the cordial support and assistance you have afforded me in carrying out the duties of my command. The zeal and intelligence of the officers of the Squadron have merited my warm approval; the men have done their work well, and their general good conduct on shore has afforded me much satisfaction."—(Signed) "Alfred."

The following vessels of the French Navy will leave during the ensuing month or early in January for China:—The barbette cruiser Magon, Capt. de vaisseau L. A. E. Puech; the Lapèrouse, Capt. de vaisseau A. C. Mèquet; the Primauguet, Capt. de vaisseau F. A. Buge.

WOOLWICH AND SANDHURST.

The Reports of the Board of Visitors upon the Royal Military Academy, Woolwich, and upon the Royal Military College, Sandhurst, for the year 1884, have been issued as Parliamentary papers:—

Report of the Board of Visitors upon the Royal Military Academy, Woolwich, for the year 1884.

The Board of Visitors inspected the Royal Military Academy on June 27, and were received by the Governor, the secretary, and other officers of the institution. The demand for officers to complete the establishment of the Royal Artillery and Royal Engineers having for the past year been still in excess of the supply, a call was made upon the Governor of the Academy, immediately after the public day in February last, to consider the possibility of accelerating the promotion of the remaining cadets to meet the wants of the two corps. This resulted in 10 cadets of the new 1st-class receiving immediate commissions in the Royal Artillery, and in 10 cadets each from the junior classes receiving accelerated promotion of a class, the vacancies thus caused being filled by the 10 seniors on the list of candidates who had qualified in the Competitive Examination of December, 1883. It was further decided, in order to meet continued demands for the Royal Artillery and Royal Engineers, that, although it was inexpedient to increase the number of admissions—viz., 50, to the Royal Military Academy at each examination, arrangements should be made to pass out of the Academy during the next two years five classes instead of the normal number of four. This will be managed by dividing the next two years into five terms of somewhat shorter periods each than the ordinary terms, and will result in an extra batch of 50 cadets being commissioned in the period. At the same time it will necessitate three instead of two examinations for admission to the Academy in 1885. The curtailment of each term from 132 to 112 days each, only involves, apparently, a slight modification in the various courses of study. The governor is of opinion that should these extra requirements continue, and should he be called upon to bring forward annually a larger number of cadets for commissions than the Academy with its present numbers can supply—viz., 100 in the year, he would require additional accommodation in the shape of fresh buildings, as the institution is now only capable of holding 200 cadets. It has recently been decided that the subjects of Greek and Latin shall cease to be included among the voluntary subjects of education at the Academy, due regard, however, being had for the interests of the cadets now there. The Board are inclined to regret that Latin should have been withdrawn from the voluntary educational course; but as they are not aware upon what grounds the change has been decided, they refrain from further remark. The examinations being in progress, the Board did not see the cadets in their class-rooms. They had, however, the opportunity of inspecting them as a body on parade, and also in the hall at their luncheon. The Board are of opinion that, though not defective in physique, the countenances of the cadets generally looked pale and jaded. The cases of dyspepsia, numerous for their time of life, lead to the impression that some alteration in their mode of living might be advantageous. Their health, however, is stated to be very good, and the sanitary report of the medical officer in charge of the institution is appended herewith. The failures in the Term examinations are largely in excess of those reported by the Board in the previous year. In July, 1883, no less than 15 cadets failed in studies, and one by sickness; and in February, 1884, seven cadets failed in studies, and four by sickness. The conduct and discipline of the cadets during the past year have been very good, only one serious case having occurred, which resulted in the rustication of the offender for the remainder of the term. One cadet resigned in February last on account of ill-health, and there are two cadets absent sick at their own homes. With regard to the buildings, rooms, &c., it is reported to the Board that improved fire-prevention arrangements are in course of execution. The Board notice with regret that their recommendation of last year in regard to the laying-on of hot water to the bath-rooms has not been given effect to, and they desire to repeat their opinion as to its necessity, both on the score of cleanliness, and also of health. They consider that this question should be brought forward by the Governor in his next annual demand. The Board are also of opinion that the passages to the bath-rooms in the main block should be covered in, as the cadets now have to pass thereto in the open air from their bed-rooms, which the Board consider, in winter time especially, very prejudicial to health. The remainder of the buildings and sanitary arrangements appeared to be in good order and repair. The changes in the Staff of the Academy during the past year are appended. The return showing the distribution among the public and other schools at which the gentlemen cadets of the Royal Military Academy were educated is of considerable interest. By this return it appears that of 202 cadets, no less than 142, or about 70 per cent., passed direct from school into the Academy without the assistance of private crammers. The return is appended. A table also of the parentage of the gentlemen cadets of the Royal Military Academy is appended.

July 11, 1884.

Report by the Board of Visitors on the Royal Military College, Sandhurst, for the year 1884.

The Board of Visitors inspected the Royal Military College on June 25, and were received by the Governor, the Commandant, and the other officers of the College. Owing to the large number of vacancies existing for subalterns in the Line, it was decided to commission, in addition to the senior class, the 20 senior cadets of the junior division at the college as they stood in order of merit at the probationary examination in December last, replacing them by putting at once into the senior division the first 20 successful candidates in the competitive examination for admission to the College, and in order not to destroy the equilibrium of the classes, admitting the next 20 gentlemen qualified upon the list of candidates in that examination. The normal establishment of the College has been increased to 300, and there are at present actually 287 cadets under instruction. Of this number, 23 are Queen's or Queen's India Cadets, about 125 in addition being also sons of officers of the Army or Navy, and the remainder the sons of private gentlemen, &c. The Board were fortunate in seeing classes of the cadets engaged in outdoor field-work. The course of instruction had been completed, and the results were awaiting the examination of the inspector. The manner in which these classes seemed to have performed their work was, in the opinion of the Board, much to the credit of all concerned, and reflected highly on the care and attention bestowed upon the cadets by the professors and instructors throughout the course of instruction. The cadets so engaged were without their tunics, and the Board were much impressed with their muscular development and general healthy appearance. At a parade of the cadets afterwards the same observation as to their healthy appearance applied to them. The conduct of the cadets is reported by the Governor as good. The defaulters' book shows that the offences generally are of a trivial character, the only serious cases which have occurred since the last inspection being those of two cadets, whose examinations were cancelled in July last, for unfair practices; and of one cadet who is under sentence of rustication for the remainder of the present term. The reports made by the professors as to the progress of the cadets are satisfactory. The Professor of Fortifications, however, considers that more progress might still be made in fortification instruction were the cadets generally better acquainted with the rudiments of plan drawing at the time of their entrance into the college. The Board closely inspected the hospital, and they are well satisfied with its general arrangements for ordinary illness. They, however, entirely endorse a representation made to them by the medical officer of the college as to the extreme desirability of fitting up one of the wards for the treatment of cases of serious illness, such as rheumatic fever, inflammation of the lungs, or any other dangerous complaint, the chief requirements, as stated by the medical officer, being a carpeted floor, a more comfortable bed, and other accessories suitable for an invalid whose case is likely to be of a lengthened character. It is stated that the want of a room with such comforts was much felt last year, when a cadet was very dangerously ill with pneumonia. The addition of a bath with hot and cold water would be of the greatest service in such cases, and could be fitted up without much expense, as water is already laid on to the upper floor. The advantages to be derived by the adoption of the above representation far outweigh, in the opinion of the Board, any question of expense, and they strongly recommend that this proposal be given effect to without delay. The professors, instructors, and the other military officers connected with the College have at present no room as a place of general resort for their private use when off duty. The Board consider it would be an advantage if such accommodation could be provided for them, and, after consideration, they desire to make the following recommendation. The present museum and library should be entirely cleared of the various models which take up the whole of the floor space, more especially of two enormous models of the system of attack by Vauban and Cormontaigne, which are stated to be out of date for purposes of instruction, and the hall converted into the board-room and library, for which it is admirably suited, the present board-room being fitted up as a general room for the professors, the books and pictures (which are in a bad state of preservation, and urgently require cleaning and regilding) being removed therefrom to the proposed new board-room. At present the books are distributed in cases over both rooms. The disadvantages connected with the accommodation for the servants of the college were most prominently brought to the notice of the Board. They appear at present to live where they can, finding lodgings at places some distance from the college, where they are but little, if at all, under the control of the authorities, and where they are, moreover, liable to contract and introduce disease into the college. It is proposed that servants' blocks of houses or huts should be erected on the college estate, and let out to the servants at a rent which would pay interest on the outlay involved, such rent probably being at a considerably less rate than they are now paying for their lodgings outside. The Board strongly recommend this proposal for favourable consideration, both on sanitary and disciplinary grounds. The only other points to be touched upon are as regards the gymnasium, the racket-courts, and the cadets' bed-rooms. With regard to the gymnasium, it would much conduce to the comfort of the cadets were a small room to be erected outside but adjoining the present building, and fitted as a lavatory, forming a room where they could dress, wash, and be weighed, &c. The Board again desire to draw attention to the defective state of the roof of one of the racquet-courts, which, in their last year's report, they recommended should be repaired, but to which recommendation no effect has been given. The Board are of opinion that these repairs should be carried out, particularly as, with the large numbers of cadets now resident at the college, it is very advisable that every facility in the way of healthy recreation should be provided for them, especially during the winter months, and at present the court is useless in wet weather. The Board remarked upon the state of the washstands and other articles of furniture supplied by the Government in the cadets' bed-rooms. A coating of paint on these things as wanted would involve but little expense, and would make their rooms look clean and wholesome. The Board cannot close the report without referring to the loss the College will sustain in the resignation of Col. Middleton, C.B., of the post of Commandant, on his appointment to the command of the Militia in the Dominion of Canada; and they further desire to express their appreciation of his unvarying attention and courtesy to the Board on the occasion of their visits to the College. The following returns are appended:—A. Return of Cadets' College, June 25, 1884. B. Study Table. C. Time Table. D. Abstract showing the distribution among the public and other schools of the gentlemen cadets of the Royal Military College. E. Return of gentlemen cadets admitted into hospital from June 30, 1883, to June 25, 1884. F. Table showing the parentage of the gentlemen cadets. G. Return showing the average age of cadets, receiving their commissions in August, 1883, and February, 1884.

July 11, 1884.

THE ACTION ON THE MIN RIVER.

Some interesting deductions have been drawn by two United States naval officers who were present during the action on the Min River, which they have published in pamphlet form. They state that the result of the fight turned in favour of the French Fleet on account of its armament of revolving cannon and the superiority of its torpedo service, and they consider that these points are the only ones from which instruction may be gained by this action. "The power of revolving cannon," they say, "their inestimable value in naval engagements, and the importance of a well-organised torpedo service, were plainly visible to all naval people." A shower of shell fired by the revolver cannon from the tops of the French vessels swept the enemy down like grain under the scythe. Reliefs could not get on deck fast enough to fill the gaps in the ranks of the Chinese gunners. The little shells pierced the rails and bulwarks of the vessels, and their explosion spread death in all directions. The torrents of fire shed on the Chinese vessels were so murderous, that it is safe to estimate that 800 men out of the 1,000 manning the Chinese Squadron were killed." According to these officers, the high functionaries of the Foochow Arsenal refused to trust the Gatlings belonging to the Arsenal to their men. They state that the majority of the officers of the Squadron were not on board at the time of the fight, thus putting into application the Chinese aphorism that "Discretion is the better part of valour." *Le Temps*, in referring to the above, says:—"It is scarcely necessary to state that the French officers who made such brilliant work with these guns have made a most thorough report with regard to their value. Nevertheless, the lesson to be learned by this combat is that hereafter no vessel can go into action if the guns which she has mounted in open decks are not protected against the effects of rapid-firing guns. It is therefore necessary that every piece of artillery should be covered by a metal shield as a protection against rapid-firing guns, that the gunners should be equally protected, not against the effect of heavy projectiles, which would necessitate covering the vessel completely with armour, but against machine-gun fire directed from the enemy's tops, which send in showers of projectiles whose explosion would render totally untenable the decks of most vessels." The revolver cannon which formed the auxiliary armament of the French vessels have a calibre of 1½ in.; length of bore, 29 in.; weight, 450 lb.; and they fire a shell weighing 1 lb., with a bursting charge of three-quarters of an ounce.

Twelve Chinese men-of-war have been ordered to sea, and to sail to meet the French fleet and relieve Formosa. Five of these ships belong to the Nankin squadron, the other seven are drawn from the Tientsin division. Twenty-four Germans hold various posts on board this fleet, one of them being in command of one of the ships under the Chinese admiral.

The third and most successful of a series of admirable vocal and instrumental concerts took place in the Gymnasium, Royal Military College, on Wednesday, 26th ult. These concerts have been instituted by Sir Richard Taylor and Lady Jane Taylor, for the benefit of the gentlemen cadets, to afford them a little relaxation during their course of military studies, and to bring forward those who have musical abilities. The result has been unqualified success, and shows what can be done when great administrative ability is supported by unremitting attention to detail. The attendance at these concerts, always large, was surpassed on this occasion, and the audience fully appreciated the excellence of the programme prepared for them. The first piece was Sir A. Sullivan on "Sea and Shore," which was rendered with great taste and feeling; a trio for clarionet (Lord Chelmsford), violincello (Mr. Hambledon), and piano (Mr. Septimus Webbe), excellently played, but rather too long; a valse, "Neglect," for sopranos and instruments, was most effective. Miss Drew's singing was much appreciated for its good taste and finished style. The solos of Mr. Tapley (tenor) were also encored. Of the rest of the concert it is only necessary to say that the results of careful study and preparation were remarkable throughout. The proceeds (about £50) will be handed over to the College Servants' Benevolent Fund, an institution founded by Sir Richard and Lady Jane Taylor, for the support of the servants of the College when they are no longer able to work, and for their wives and families.

The *Egyptian Gazette* says:—"The Chancel of All Saints' Church, Cairo, has been enriched by filling the windows with some very beautiful stained glass, placed there, as the inscription says, 'To the glory of God and in memory of their comrades, who died from wounds or sickness during the autumn and winter of 1882, by some officers of the British Expeditionary Force.' The work has been admirably executed by Messrs. Clayton and Bell, of London, and represents the Lord of Hosts attended by warrior saints. The sincere thanks of the congregation of All Saints' Church are due to the officers of the Army of Occupation for their costly offerings to the Church. Last year they subscribed largely towards the purchase of the handsome brass gas standards with which the building is lighted, and this year they have given these five appropriate windows. Special mention should be made of the efforts of Major Browell, R.A., who has acted as honorary treasurer to the Memorial Fund."

Reviews.

Recent British Battles on Land and Sea. Profusely Illustrated. By James Grant. (Cassell and Co)

This handsome volume, recently published by Messrs. Cassell and Co., cannot fail to be regarded as an historical work of a high order of merit. It describes the most remarkable British battles that have been recently waged by land and sea, commencing with the expedition to Perak, in 1875-6, and closing with the termination of General Sir Gerald Graham's campaign in the Soudan. It would be simply impossible to do justice to a work like this within the space which can fairly be allotted to it; but, at the same time, no great difficulty can be found by the reader in selecting some of the most remarkable events which are narrated within its pages. The descriptive power possessed by the compiler is too well known to create any doubt as to his competency to discharge the arduous task he has undertaken. The Zulu War, the Transvaal War, the Egyptian Campaign, and the Soudan "Expedition," present to the reader a carefully prepared narrative of the important events that marked the progress of each. In the fifty-sixth chapter of Captain Grant's narrative of the Egyptian War, its commencement and its prosecution under Arabi are commented on by the author at considerable length. Speaking of that officer, we learn that his military career was marked only by a restless and insubordinate spirit that led him into perpetual intrigues and troubles, though many have averred that Arabi's actions arose from an honest and patriotic desire to reform the many abuses existing in the Egyptian military system. By the Khedive Ismail he was promoted from the ranks, and subsequently cashiered and even subjected to the bastinado, it is asserted. In 1873 he was reinstated in his rank, and made Colonel, with the command of a regiment; but he never forgot his disgrace or his thirst for vengeance. In the following chapters Captain Grant gives much interesting information as to matters connected with the bombardment of Alexandria, and details at considerable length the minutest operations of that eventful day. When discussing "The War in the Soudan and its Causes," the compiler tells a good deal respecting Khartoum and the Mahdi. It appears that Khartoum is about equi-distant—between 1,100 and 1,200 miles—from the northern frontier of Egypt, the Mediterranean, and the southern boundary of the Khedive's Equatorial dominions—the Lake Nyanza and the principality of Uganda. The actual extent of the Soudan is 1,600 miles in one direction and 1,300 in another, and from first to last this most inaccessible country has never paid the cost of its government. In referring to this inhospitable territory in December, 1883, Lord Wolseley said it "had at all times been the home of the slave-trade, and if any part of God's earth was dyed with human blood it was there. He was not a prophet, but he hoped that whatever was the future of our dealings with the Soudan, it would be insisted on by the people of this country who had been leaders in all anti-slavery movements that all dealings in flesh and blood should be abolished once and for ever." We regret very much our inability to become more intimate than we are with the interesting contents of Captain Grant's volume. It certainly deserves marked attention, the result of which will, in all probability, be its adoption generally as a standard authority on all matters recently connected with the Soudan.

SOME MAGAZINES.

The Army and Navy Magazine, for December, opens with Col. Malleson's further notice of "Ambushes and Surprises." The subject is "Kerko Porta." It will interest the readers of the *Army and Navy Magazine* to know that its next number will be made exceptionally interesting by the author's introduction of a few paragraphs which will fully explain the error that was inadvertently made in the title of "Castra Trajana," and that the consequences of his success in his exertions to procure materials for some other most important battles were such that the author decided upon extending the story to the capture of Constantinople, and to illustrate it by the surprise which gave that city to the Turks. This decision was arrived at too late to allow the necessary alteration to appear in the last number. Some not very interesting matter in this number is pleasantly relieved by "Private Lawrie and his Love: a Tale of Military Life," by Shirley Jevons.

The English Illustrated Magazine, for December, contains eight full-page illustrations of considerable merit, including a study from the picture of "King Cophetua and the Beggar Maid," by E. Burne Jones; three full-length figures of the Princess Royal, Princess Augusta, and Princess Elizabeth, by Gainsborough, engraved by Biscombe Gardner; "The Hon. Mrs. Graham," by Gainsborough; "Clovelly Pier at Half Tide," by L. R. O'Brien, engraved by Biscombe Gardner; "Feeding the Pigeons," by C. E. Halle, engraved by Biscombe Gardner; "Calvados: the Gleaners," by W. J. Hennessey, engraved by T. W. Lascelles; "Signora Baccilli," by Gainsborough, engraved by Biscombe Gardner; "Cottage Children," by Thomas Gainsborough, engraved by Ohme. In addition to these full-page illustrations, the *English Illustrated Magazine* contains a great variety of very readable matter. Among others, a brief sketch of how Mr. Archibald Forbes lost his Christmas dinner in the Khyber Pass, a most amusing paper. We found also Part 1 of a new story by Miss Mather, some additional chapters of Mr. Norris's "That Terrible Man," and Mr. Henry James's "London Reflections." Altogether, the number is an excellent one.

Temple Bar is always interesting; somewhat more than ordinarily so, by the able political article for December, with which it opens. The article referred to is "A Defence of the House of Lords, by a Constitutionalist and No-Party Man." A review of Mr. Yates's work is, of course, an attraction of no ordinary character.

Harper's Magazine.—For many years *Harper*, as a magazine, has held its place among the publications of the day in the literary world. There can be no doubt that to the almost superexcellence of its illustrations this must in a great degree be attributed. Recently, however, public opinion has pointed to this fact, and some very admirable specimens of high art are now published here. In the number for December, a striking hit has been made by the publication of the first act of "She Stoops to Conquer," in large type, and containing twelve illustrations by E. A. Abbey. Mr. Black also sends a contribution in his own style, and Mr. Conway in his; each excellent in its way.

The Argosy for December is quite up to the average, it offers abundance of pleasant matter. "The White Witch" has served her purpose, and gone to rest.

The political articles in the *National Review*, entitled "The Adjustment of the Quarrel," followed by the continuation of "Tory Prime Ministers," including the "Mediocrities, Lord Liverpool, the Duke of Portland, and Mr. Perceval, are somewhat lightened by a poem by Alfred Alfred Austin, called "Apollo at Delphi."

There is nothing in *Longman* for this month to require particular attention, but "Jack's Courtship" still survives, and so does "Madam." "A Stormy Night" is graphic. There is a good deal to please in *Longman's Christmas Number*. A legend called "Two Robbers," by the Author of "Reata," and one of Bret Harte's amusing tales, which fetch everyone. Then we find Mr. Besant as a contributor, and —prepare to be astonished—a story (called "Royal Love,") by Wilkie Collins.

The merit of the winter number of *Society* is up to the average.

In *Blackwood*, "The Waters of Hercules" show no symptoms of distress. The plot is undergoing a process which will, no doubt, lead to an interesting *dénouement*. "Dorothy, an Interlude," is one of those bright gems which so frequently glisten in the pages of *Blackwood's Magazine*. "John Wycliffe: his Life and Works," will interest a large class of readers.

Let all magazine and other readers refrain from closing the December number of *Cornhill* until they have made the acquaintance of Guy, Nep, Tros, and others. We see those gay dogs before us in high romps, thanks to the well-executed illustration which tells the idiosyncrasies of each of them. This pleasantly written article about dogs will assuredly become a favourite. It abounds in anecdote, and is written evidently by a lover of dogs, no matter what may be their personal reputation. The January number of *Cornhill* will contain the first part of a new story by D. Christie Murray, entitled, "Rainbow Gold."

Face to Face, Messrs. Grant and Co.'s Christmas number, makes a high bid for popularity. Mr. Francillon contributes "A Story of Seven Fables," which looks very tempting, and will attract many readers.

Christmas and New Year's Cards.—A grateful town has erected a statue in honour of the man who founded the "cyclical" industry. He had no rivals near the throne, and there were no competitors to dispute the claim made by the grateful "trade" he invented on his behalf; but it would be very difficult indeed to determine who is entitled to the first place in the array of publishers who have given such an impetus and encouragement to taste, talent, and inventiveness in the preparation of the beautiful, elegant, and oftentimes elaborate Christmas and New-Year Cards by a liberal and, indeed, lavish outlay on the work of a great body of meritorious artists. We may include even poets in the category. It would be very easy to say which of the hundreds of these productions we have seen appeared to us to be the best, but it would by no means follow that our judgment was correct, or that it was supported by a general consensus of opinion, and for that reason we prefer to indulge in pretty general but well-deserved commendation. Messrs. Marcus Ward and Co. are closely pressed by Hildesheimer and Faulkner, Mr. Raphael Tuck, and Meissner and Buck, of Leipsic, in the finish, variety, and excellence of their productions; but we may, without offence or disparagement to any, express a wish that there were less of cottages in snow, of flowers in vases, &c., and more of *genre* pieces, and that our familiar "All Christmas joys be thine" might be subjected to a little alteration.

On Tuesday a Spanish revenue-cutter having attacked and captured a felucca close to the rock of Gibraltar and in British waters, was pursued by a steam-launch from one of the British war vessels there. The cutter at first appeared inclined to show fight, but upon a cannon-shot being fired at her from the fortress, she surrendered and, together with the felucca, was brought into the dockyard.

HOGE'S HOREHOUND HONEY.—What is known as the "Bee Belt" of Southern California is one continuous bed of honey-bloom, one sweet bee-garden throughout its entire length; but there is one part of it which the plough has not yet invaded, that is the region where the Horehound plant flourishes in one glorious blaze of purple and gold. The tropical luxuriance of these plants is so profuse that they brush against the feet at every step, and close over them as if you were wading in liquid gold. The air is sweet with its fragrance, and tuneful with the humming wings of the bees gathering this precious panacea: this honey-full horehound is a great favourite with the bees, and is one perpetual feast for them. They revel in its bloom long after the flowers of other countries have withered and gone to seed. A single plant will at times be visited by a whole hive of bees at once; the grand hum of such a multitude of wings impresses the listener with the fact that the winning of more than ordinary honey is going on. The product of a dozen or two of these plants is sufficient for the wants of a whole hive. In this perfect paradise for bees the petals of the continuous sheet of blooms drink in the vital sunbeams, and the bees hug this favourite flower with profound cordiality, and push their blunt polleny faces against them, like babies on their mother's bosom; and fondly, too, with eternal love, does Mother Nature clasp her small bee babies and suckle them, multitudes at once, on her warm Californian breast. The Horehound Honey so gathered by these little almoners of Nature is put up in bottles, and retailed by all Chemists, &c., at 1s 1½d each. W. L. Bright, Esq., son of the Right Hon. John Bright, M.P., says:—"Hoge's Horehound Honey cured his father of a bad cough."

THE EMPLOYMENT OF RESERVE MEN.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I have been so frequently asked of late to express an opinion on the recent movement for promoting the employment of Reservists, and the possible influence its success might exercise upon the future of this Corps, that I shall feel obliged if you will afford me the means of doing so in your columns. I need hardly say that I heartily wish the promoters all the success they anticipate and deserve; and though I am as much opposed as ever to the so-called territorial system, I think they are wise in availing themselves of it as an important means of attaining the excellent object they have in view. I will not dwell upon the difficulties which will have to be encountered—these must be expected to accompany every undertaking; and all will be surmounted, provided the article to be disposed of is really suited to the requirements of those who are invited to purchase. The English, if not a practical, are eminently a commercial nation, and I very much doubt whether "men of business" will engage useless or inferior servants on the score of patriotic feeling, especially when the professional politicians have steadily refused to look on a soldier in any other light but as food for powder. The first step, therefore, should be in the direction of obtaining a proper supply of good material, and to assist this important end the country should insist upon confining the selection for subordinate posts in the Civil Service to those who had established a preferential claim by serving in the military branches of the State, and were otherwise properly qualified by character and education. This has been the practice of every civilised State in Europe since the establishment of conscription, and will have to be adopted by England if she wishes to maintain her old position. With respect to the interests of this institution, I can only express my conviction that they cannot fail to be advanced by any success which may attend the soldier—whether Pensioner or Reservist—in civil life, and that if our decay commences, it will be found to proceed from within, and not from without. The Corps has nothing to fear so long as its rules and principles are strictly maintained; and if my successors are content to leave well alone, they will undoubtedly see as many thousands on the roll as there are hundreds at present. We have an increasing number of customers, and though our progress has not been as rapid as I could wish, it is, I hope, on a sound basis. Our clients require first-class service, and as they are willing to pay corresponding wages, the best men from every branch of the naval and military services have come to regard the Corps as the most remunerative market for their labour. We could not therefore lower our standard of efficiency to the present level of the recruiting department, nor would it be prudent on our part to increase our supply much beyond the daily demand; consequently, there is plenty of room for the proposed organisation, and if its managers could connect themselves with the Army and Navy Pensioners' Employment Society, who for the last 30 years have carried on a work similar to the one now proposed, it might be to the advantage of both. We might extend our business if we had additional means, but as quality is preferable to quantity, I should prefer our present gradual but increasing ratio of progress to those leaps and bounds which too often end in a general fiasco. Our rules are as open to the observance of all who like them as the Ten Commandments; there is no secret about the manner in which our success has been attained, and there is no short cut to it. After all, the fault, or perhaps we should say, the misfortune, is rather on the side of those who seek employment, than on the part of those who have it to give; but as the State is entirely responsible for the quality of the labour it is forcing daily upon an overstocked market, it ought to be compelled to take its share at least in the burden it is throwing upon other people, and I therefore hope that the action of the new organisation will not tend to relieve our so-called Government from its proper responsibilities.—I am, &c.,

Edward Walter.

Barracks of the Corps of Commissionaires,
Exchange Court, 419 Strand, Dec. 1.

Admiral Corbett returned from leave, and rehoisted his flag in the Duncan on Wednesday. During his absence, the official residence has been entirely renovated and improved.

From Madeira on Wednesday, a telegram states that the British ship Tyburnia, cruising for pleasure, which was under threat of seizure by the Custom-house, got under way at midnight. The fort opened fire, but the Tyburnia ran the gauntlet, keeping well in shore. The Customs steamer threatened to sink her unless she stopped, but was answered by derisive cheers from the lady passengers, the captain, and crew, who kept on deck, acknowledging each shot by dipping the British ensign. The vessel got clear away.

The Admiralty have issued a Fleet Circular to the effect that when ships are paid off abroad, and their crews are sent home in troopships, transports, or merchant ships, separate transfer lists are to be prepared and forwarded with the men, discharging the C.S. seamen and boys to the flagships, the seamen gunners and armourers to the gunnery ships, and the stokers and artificers to the Steam Reserve ships at the respective ports to which the men will return at the expiration of their leave. Any requisite advance of wages may be made by the flagship at the port of arrival, due notation being made on the transfer lists; but the men are only to be entered on the books for wages at the ports to which they will be attached on return from leave. Separate transfer lists are also to be prepared for the Marines and the non-C.S. men, discharging the former to their respective head-quarters, and the latter to the flagship at the port of arrival.

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. Laurance, F.S.S., Oculist Optician, 1a Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

The Gazettes.

TUESDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, Dec. 2, 1884.

19TH HUSSARS.—Major C. Smith has been seconded for service with the Army Pay Department (Nov. 11).

GRENADIER GUARDS.—The commission of Qrmr. W. Holmes is antedated to July 28.

LINE BATTALIONS.

THE PRINCE OF WALES'S OWN (WEST YORKSHIRE REGIMENT).—Lieut. C. J. M. Heigham to be Adjt., vice Capt. E. C. Mills, who resigns that appointment.

THE ROYAL IRISH REGIMENT.—Capt. F. E. L. Schreiber has been placed on half-pay (Nov. 22).

THE DORSETSHIRE REGIMENT.—Capt. J. H. Poett resigns the appointment of Adjt.; Lieut. A. G. W. Tod, from Princess Louise's (Argyll and Sutherland Highlanders), to be Lieut., vice P. J. Gordon, transferred to the Indian S.C.

THE DUKE OF CAMBRIDGE'S OWN (MIDDLESEX REGIMENT).—Lieut. R. T. H. Law has been seconded for service as a Deputy-Assist.-Comy.-Gen. of Ordnance, on probation (Nov. 18).

THE HIGHLAND LIGHT INFANTRY.—Capt. F. M. Reid has been seconded for service as an Adjt. of Auxiliary Forces (Oct. 25).

PRINCESS LOUISE'S (ARGYLL AND SUTHERLAND HIGHLANDERS).—Lieut. S. E. Douglas, from the Royal Irish Regt., to be Lieut., vice G. D. Collings, seconded.

THE RIFLE BRIGADE (THE PRINCE CONSORT'S OWN).—Major R. F. Meysey-Thompson retires from the service, receiving a gratuity.

STAFF.—Major and Brevet Lieut.-Col. T. Fraser, C.M.G., R.E., to be an Assist.-Adjt. and Qrmr.-Gen. with the Force on the Nile (Oct. 29).

CHAPLAINS' DEPARTMENT.—The Rev. A. Maline, M.A., Chaplain to the Forces of the Fourth Class, to be Chaplain to the Forces of the Third Class (Dec. 1).

COMMISSARIAT AND TRANSPORT STAFF.—Conductor of Supplies H. Dorman to be Qrmr., vice J. A. White, deceased (Sept. 30).

MEDICAL STAFF.—Deputy-Surgs.-Gen. A. H. Fraser to be Surg.-Gen., vice A. Smith, M.D., C.B., granted retired pay; H. T. Reade, V.C., from half-pay, to be Deputy-Surg.-Gen., vice A. H. Fraser, promoted (both dated Oct. 14); J. Hendley, C.B., to be Surg.-Gen., vice J. Lamprey, M.B., granted retired pay; Brig.-Surgs. S. A. Lithgow, M.D., to be Deputy-Surg.-Gen., vice J. Hendley, C.B., promoted (both dated Oct. 16); W. Skeen, M.D., to be Deputy-Surg.-Gen., vice L. Kidd, M.B., deceased (Nov. 1); Surg. R. H. S. Sawyer, M.B., has been placed on temporary half-pay, on account of ill-health (Nov. 16).

ORDNANCE STORE DEPARTMENT.—Lieut. R. T. H. Law, the Duke of Cambridge's Own (Middlesex Regt.), to be Deputy-Assist.-Comy.-Gen. of Ordnance on probation, with the temporary rank of Capt. in the Army (Aug. 18).

ARMY PAY DEPARTMENT.—Pymr. E. L. Herapath, Lieut., the Princess of Wales's Own (Yorkshire Regt.), to have the hon. rank of Capt. in the Army (May 21).

MEMORANDA.

Major and Lieut.-Col. W. J. Gascoigne, Scots Guards, to be Col. (Dec. 1).

Major F. S. Terry, half-pay, has retired from the service by the surrender of his half-pay, with the hon. rank of Lieut.-Col. (June 8).

Capts. E. Harrison, retired pay, has retired from the service, receiving the value of his commission (Oct. 31); F. E. L. Schreiber, half-pay, has been placed on retired pay (Nov. 22); and M. M. M. Festing, half-pay, is retired on retired pay.

Vet.-Surg., First Class, W. Burt, to have the local rank of Inspecting Vet.-Surg. whilst employed as Senior Vet.-Surg. with the Force on the Nile (Oct. 17).

RESERVE OF OFFICERS.

Lieut. H. V. Bathurst, 3rd Batn. the Royal Welsh Fusiliers, to be Lieut.; Capt. H. Coupland, 5th Lancashire Artillery Volunteers, to be Lieut.

MILITIA.

WAR OFFICE, PALL MALL, Dec. 2, 1884.

ROYAL ARTILLERY.

2ND BRIGADE, NORTHERN DIVISION.—Lieut. A. H. Allenby resigns his commission.

2ND BRIGADE, WELSH DIVISION.—Lieut. R. C. Heyworth resigns his commission.

3RD BRIGADE, NORTH IRISH DIVISION.—William Scott Stewart, gent., to be Lieut.

INFANTRY.

4TH BATTALION, THE ROYAL FUSILIERS (CITY OF LONDON REGIMENT).—Lieut. W. A. W. Whieldon resigns his commission.

4TH BATTALION, THE PRINCE ALBERT'S (SOMERSETSHIRE LIGHT INFANTRY).—Harold Fielden Campbell, gent., to be Lieut.

3RD BATTALION, THE PRINCE OF WALES'S OWN (WEST YORKSHIRE REGIMENT).—Francis Boynton, gent., to be Lieut.

3RD BATTALION, THE BEDFORDSHIRE REGIMENT.—William John Francis Lilburn, gent., to be Lieut.

4TH BATTALION, THE CHESHIRE REGIMENT.—Capt. A. W. a'Beckett resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement. Lieut. H. M. Nicholls to be Capt.

3RD BATTALION, THE ROYAL INNISKILLING FUSILIERS.—Lieut. J. P. Wood to be Capt.

3RD BATTALION, THE GLOUCESTERSHIRE REGIMENT.—George Cleland McIntryre, gent., to be Lieut.

3RD AND 4TH BATTALIONS, THE DUKE OF WELLINGTON'S (WEST RIDING REGIMENT).—Lindsay Anstruther Forbes, gent., to be Lieut.

3RD AND 4TH BATTALIONS, THE SOUTH STAFFORDSHIRE REGIMENT.—Lieut. E. V. D. Pearse to be Capt.

9TH BATTALION, THE KING'S ROYAL RIFLE CORPS.—The under-mentioned gentlemen to be Lieuts.:—Charles Alphonsus de Marie Keegan and John Creagh.

3RD BATTALION, THE PRINCE OF WALES'S (NORTH STAFFORDSHIRE REGIMENT).—Lieut. E. Jessop resigns his commission; Guy Lipscomb Thorne Seckham, gent., to be Lieut.

4TH BATTALION, PRINCESS LOUISE'S (ARGYLL AND SUTHERLAND HIGHLANDERS).—Capt. S. MacDougall, 2nd Batn., to be Adjt., in succession to Capt. H. G. Fallowfield, who has retired from the service (Dec. 1).

3RD BATTALION, THE ROYAL MUNSTER FUSILIERS.—Henry Innes L'Estrange, gent., to be Lieut.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, Dec. 2, 1884.

HERTS.—Lieut. H. Flower resigns his commission.

WEST KENT.—Lieut. S. P. M. Maryon-Wilson to be Capt.

VOLUNTEERS.

WAR OFFICE, PALL MALL, Dec. 2, 1884.

ARTILLERY.

1ST CORNWALL (DUKE OF CORNWALL'S).—The name of the officer hitherto described as "Reginald Peter" is "Reginald Arthur Peter."

1ST CUMBERLAND.—Thomas Losh Thorpe, gent., to be Lieut.

1ST INVERNESS-SHIRE.—Lieut. J. N. Forsyth to be Capt.

1ST KENT.—John Metcalfe Pollard, gent., to be Lieut. Acting Chaplain the Rev. G. Bryant resigns his appointment.

1ST LANARKSHIRE.—Lieut. W. S. Edmiston resigns his commission.

1ST LONDON (THE CITY OF LONDON).—Walter Ernest Thiselton, gent., to be Lieut.

2ND MIDDLESEX.—The under-mentioned Lieutenants resign their commissions:—W. G. Peyton and A. W. Tickle.

1ST NORFOLK.—The under-mentioned officers resign their commissions:—Capt. W. Woodhouse and Lieuts. J. F. Remnant, R. A. Fuller, and T. A. Walne.

4TH WEST RIDING OF YORKSHIRE (SHEFFIELD).—Capt. W. H. Newton, R.A., to be Adjt., in succession to Major W. Cotton, R.A., whose period of service as Adjt. has expired (Nov. 22).

ENGINEER.

1ST GLOUCESTERSHIRE.—The appointment of Acting Surg. M. L Brown to be Lieut., notified in the *Gazette* of June 6, is cancelled.

RIFLE.

6TH VOLUNTEER BATTALION, THE GORDON HIGHLANDERS.—Capt. J. Shand resigns his commission.

1ST BERWICKSHIRE.—Capt. A. S. Logan resigns his commission; Capt. J. Hunter to be Major.

2ND BUCKS (ETON COLLEGE).—Mackworth Præd Parker, gent., to be Lieut.; Cameron Barclay, gent., to be Lieut. (supernumerary).

3RD CHESHIRE.—Capt. J. Bower resigns his commission. The Rev. Frederick Augustus Macdona, B.A., to be Acting Chaplain.

1ST VOLUNTEER BATTALION, THE ROYAL WELSH FUSILIERS.—John Charles Griffiths Foulkes, gent., to be Lieut. (supernumerary).

1ST DERBYSHIRE.—Lieut. E. M. Wilmot resigns his commission.

4TH DEVONSHIRE.—Acting Chaplain the Rev. H. W. Majendie, M.A., resigns his appointment.

1ST EDINBURGH (THE QUEEN'S CITY OF EDINBURGH RIFLE VOLUNTEER BRIGADE).—Lieut. G. S. Ferrier resigns his commission.

2ND FORFAR (ANGUS).—Lieut.-Col. J. A. Dickson is granted the hon. rank of Col. (Nov. 15). The under-mentioned Surgs. are granted the hon. rank of Surg.-Major:—J. Traill and S. Lawrence, M.D. (both dated Nov. 15).

1ST HAMPSHIRE.—A. D. Lang, Esq., late Lieut. the Prince of Wales's Volunteers (South Lancashire Regt.), to be Capt.

1ST INVERNESS-SHIRE (INVERNESS HIGHLAND).—Major H. C. MacAndrew is granted the hon. rank of Lieut.-Col. (Nov. 18).

2ND VOLUNTEER BATTALION, THE QUEEN'S OWN (ROYAL WEST REGIMENT).—Lieut.-Col. W. Bristow is granted the hon. rank of Col. (Nov. 11).

3RD LANARKSHIRE.—Major J. M. Robson resigns his commission. Major and Hon. Lieut.-Col. W. Mactear resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

5TH LANARKSHIRE (GLASGOW 2ND NORTHERN).—Lieut. J. McLaren is appointed Qrmr.

6TH LANARKSHIRE.—Thomas Bremner Fotheringham, gent., to be Lieut.

8TH LANARKSHIRE (THE BLYTHSWOOD).—Capt. W. Chrystal resigns his commission; Lieut. J. Gardiner to be Capt.

4TH LANCASHIRE.—Capt. A. Stott to be Major; Lieut. J. E. Walker to be Capt.

1ST VOLUNTEER BATTALION, THE LANCASHIRE FUSILIERS.—John Hall, gent., to be Lieut.

9TH LANCASHIRE.—The hon. rank of Col. granted to Lieut.-Col. J. F. Greenall in the *Gazette* of Oct. 10, 1884, is antedated to Sept. 16.

1ST LINLITHGOWSHIRE.—Capt. J. Wilson resigns his commission.

1ST LONDON (THE CITY OF LONDON RIFLE VOLUNTEER BRIGADE).—Lieut. W. Morris, jun., resigns his commission.

3RD LONDON.—The under-mentioned Lieuts. resign their commissions:—L. Peevor and J. H. Wolton, jun. William James Tasman, gent., to be Lieut.

1ST MIDDLESEX (VICTORIA).—Lieut. J. E. Anderson to be Capt.

2ND VOLUNTEER BATTALION, THE ROYAL FUSILIERS (CITY OF LONDON REGIMENT).—The under-mentioned Lieuts. to be Capts.:—F. G. Williams and R. G. Routledge.

24TH MIDDLESEX.—Ferdinand John St. John, gent., to be Lieut.

1ST VOLUNTEER BATTALION, THE PRINCE OF WALES'S (NORTH STAFFORDSHIRE REGIMENT).—Capt. H. Minton resigns his commission.

1ST WILTSHIRE.—Capt. and Hon. Major W. P. Clark resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement. Lieut. W. P. Clark, jun., to be Capt.

1ST VOLUNTEER BATTALION, THE KING'S OWN LIGHT INFANTRY (SOUTH YORKSHIRE REGIMENT).—Lieut. G. B. Jubb resigns his commission.

[Where not otherwise stated, the foregoing commissions and announcements bear date Dec. 3, and the current year must be understood.]

FRIDAY EVENING.

CHANCERY OF THE ORDER OF SAINT MICHAEL AND SAINT GEORGE.

DOWNING STREET, Dec. 3, 1884.

The Queen has been graciously pleased to make the following appointment to the Most Distinguished Order of Saint Michael and Saint George:—To be an Honorary Member of the Second Class, or Knights Commanders of the said Most Distinguished Order—Moustapha Bey Yawer, Mudir of Dongola, in recognition of the services rendered by him to the British Troops and Government.

ARMY.

WAR OFFICE, PALL MALL, Dec. 5, 1884.

ROYAL ARTILLERY.

Lieut.-Col. M. C. Newall (late Bombay) has retired on retired pay and extra annuity, with the hon. rank of Col. (Nov. 4).

Lieut.-Col. and Col. H. McLeod (late Madras), from the Seconded List, to be Col., vice B. L. Gordon, C.B. (late Madras), seconded for service on the Staff (Sept. 14).

Major and Brevet Lieut.-Col. J. C. Auchinleck to be Lieut.-Col., vice Brevet Col. H. Brackenbury, C.B., seconded for service on the Staff (Nov. 20).

To be Majors:—Capts. W. Riddell, vice E. H. Cameron, promoted on half-pay (Nov. 7); E. B. Evans, upon the Seconded List; G. M. Stevens, upon the Seconded List; F. M. E. Vibart, vice J. H. Stratton, promoted on half-pay; F. Bigg, vice Brevet Lieut.-Col. J. C. Auchinleck, promoted (all four dated Nov. 19).

To be Captains:—Capt. R. C. E. North, from the Seconded List, vice H. E. Preston, seconded for service as an Adjt. of Auxiliary Artillery (Nov. 16); Lieuts. C. A. Anderson, vice W. Riddell, promoted (Nov. 7); D. C. Carter, upon the Seconded List; J. J. Hewson, vice F. M. E. Vibart, promoted; L. Barrett, upon the Seconded List; A. E. Hay, vice F. Bigg, promoted (all four dated Nov. 19); and W. N. Lloyd, vice W. H. Newton, seconded for service as an Adjt. of Auxiliary Artillery (Nov. 20).

Capt. and Brevet Major H. V. Cowan to be Adjt., vice Capt. K. Stephenson, promoted (Nov. 4).

The absorption from the Seconded List of the under-mentioned officers to be antedated as follows:—Major W. S. Langley (Nov. 4), and Major and Brevet Lieut.-Col. G. T. Pretyman (Nov. 7).

HALF-PAY.—Major E. S. Gordon, from the Royal Artillery, to be Lieut.-Col.; Major and Brevet Lieut.-Col. F. T. Lloyd, from the Royal Artillery, to be Lieut.-Col. (both dated Nov. 24).

MEMORANDA.

Lieut.-Cols. W. G. Martin, R.A., to be Col. (Nov. 26); P. H. Sandilands, R.A., to be Col. (Nov. 28); A. T. Wodehouse, half-pay, R.A., retires upon retired pay, with the hon. rank of Col. (Dec. 6).

THE HONOURABLE ARTILLERY COMPANY OF LONDON.

WAR OFFICE, PALL MALL, Dec. 5, 1884.

Capt. L. T. Crook retires into the Veteran Company, and is permitted to retain his rank and wear his uniform on retirement; Lieuts. W. W. Pearson, Veteran Company, to have the hon. rank of Capt.; C. Woolmer-Williams to be Capt., vice Crook, retired; Charles James Langton, gent., to be Lieut., vice Woolmer-Williams (all four dated Dec. 6).

MR. CAINE AND THE CANTEEN SYSTEM.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I write with reference to a paragraph in last week's impression of your journal, wherein it is stated that Mr. Caine on more than one occasion attacked the canteen system of the Army. This is quite true, he did so from a public platform; but Mr. Caine was open to conviction, and I had the pleasure of an interview with him, and so fully persuaded him that the abolition of the regimental canteen system would lead to greater drunkenness than ever, that he promised to say nothing more upon the subject. From what I know of this gentleman's opinions about the services, I feel certain that he has the good of them thoroughly at heart.—I am, &c.,

B.

The launch of the Howe, which was to have taken place at Pembroke in February next, we understand, has been postponed to April 28.

CAUTION.—HOMŒOPATHIC MEDICINES.—It is essential to success with these remedies that they should be prepared with scrupulous care, and preferably by one who makes it his sole business; hence it is very desirable that those using them should insist on each bottle obtained from a vendor bearing the label of a firm of repute. Those sold by the agents of JAMES EPPS and CO. (the first-established Homœopathic Chemists in England) have a label over the cork with their autograph trade mark.

London Amusements.

Mr. William Yardley's new burlesque, produced at the GAIETY THEATRE under the title of "Very Little Hamlet," is a good-natured quizzical sketch referring less to Shakespeare's play than to Mr. Wilson Barrett's recent revival at the Princess's. The prologue illustrates the now famous story of the poor friendless boy who five and-twenty years ago registered a vow that he would become the lessee of that establishment and represent the Prince of Denmark. The scenes which follow, reproducing some of the situations of the tragedy, chiefly depend on jests about the new readings and the various songs and dances introduced by Miss E. Farren as Hamlet, Miss Phyllis Broughton as Ophelia, Mr. Royce as Claudius, and Mr. Shine as a burly Ghost who indulges in colloquial familiarities whenever he appears. Miss K. Leamar is the youthful queen, and clever Miss Clara Jecks is the sprightly Laertes here identified with Eton School and Gainsborough's picture of the "Blue Boy." Bright costumes and brisk music have been provided for the travesty, which has been favourably received.

Mr. Paulton's eccentric production called "Lilies; or, Hearts and Actresses," is now transferred to the AVENUE THEATRE, where the merriment of the audience is chiefly excited by the comic gravity with which Mr. Paulton, as Professor Muggeridge, delivers his lectures on the various qualifications required for success on the stage.

The brief and brilliant divertissement called "The Swans" is a welcome addition to the varied programme of the ALHAMBRA. There is most excellent dancing by Mdlle. Palladino, some effective evolutions by the numerous and well-trained corps de ballet, a pretty forest scene, painted by Mr. Charles Brew, and fanciful costumes setting forth shapely figures to the best advantage. A French troupe of pantomimists, known as the Osranis, afterwards go through a novel kind of entertainment in which some unusual eccentricities are performed, accompanied by exceedingly grotesque action.

A series of "mid-week matinées" will be commenced on Wednesday next at the COURT THEATRE, when three short pieces of a lively description will be represented. The example is likely to be followed at other establishments.

"Les Domestiques" is now being played by the French company at the ROYALTY THEATRE. An English version of the piece, which resembles our old farce of "High Life Below Stairs," was brought out at the Strand Theatre nearly twenty years ago, under the literally translated title of "Our Domestics."

When Mrs. Langtry takes possession of the Prince's Theatre, early in the ensuing year, it is understood the drama of "Called Back" will be transferred to the Olympic, with the original cast.

The *St. James's Gazette* tells us that there lately died at Benares an old lady who was in many respects one of the most remarkable personages in Northern India. This was Anna, widow of Gen. James Kennedy, of the Bengal Cavalry. She was in her 97th year, having been born in 1787, and she lived to see no fewer than 176 lineal descendants, of whom 128 survive her. She had 18 children, 80 grandchildren, 73 great-grandchildren, and 5 great-great-grandchildren. Her father, husband, two sons, one son-in-law, and four grandsons have been generals in the Army, and her descendants include many military officers of lower rank. As a notice of her which has appeared in a leading Indian paper puts it, her life has set at defiance all well-established medical theories. She was married at 15, had 18 children, was never out of India for a single day, spent all her life in the plains, except once, when she paid a brief visit to the hills, the climate of which disagreed with her. Her husband died a quarter of a century ago at the ripe age of 82, after 55 years of married life. For nearly 40 years she has been the centre of society at Benares, where she has been as popular amongst the natives as amongst Europeans. She was proud of her activity of mind and body, which remained unimpaired almost up to the last; and it is said of her that whenever the Maharajah of Benares, who was one of her intimate friends, paid her a visit she never failed to offer him, on leaving, the assistance of her arm, though he was 30 years her junior. Truly a "mother of men!"

According to the *Egyptian Gazette*,—"It appears that Mr. Bosch bought 100 of the 200 Krupp guns that the Egyptian Government had offered for sale, and paid for the guns purchased by him. It will be remembered that M. Barrère, having reason to believe that the ultimate destination of these guns was China, protested against their being allowed to leave the country. In consequence of this protest the Egyptian Government gave orders that the second lot of 100 guns should not be sold. Mr. Bosch on the Nov. 4 applied to the railway authorities for a train to convey the 100 guns belonging to him to Suez, and gave the 48 hours' notice which is required by the regulations of the Railway Administration. In the meantime, M Barrère heard of the application that had been made, and it is understood that he at once telegraphed to the French Minister of Foreign Affairs for instructions. After having received his instructions, M. Barrère made a communication to his Excellency Nubar Pasha, who wrote to the railway authorities requesting them not to furnish a train for the transport of these guns from the capital. It is now stated that, in addition to the proceedings already instituted by Mr. Bosch against the Egyptian Government, that gentleman intends instituting proceedings against his Excellency Nubar Pasha personally for his action in preventing his obtaining the train for which he had applied.'

Major-Gen. Sir Charles Warren arrived at Cape Town on Thursday, and was most enthusiastically received. A dense crowd assembled to welcome him, and the streets were decorated in his honour.

THE Report made by Colonel Fox-Strangways, R.A., on this summer's meeting of the Volunteer Artillery at Shoeburyness is exceptionally late in making its appearance, but this is probably due to the many suggestions it contains, and the amount of consideration given to them before being announced. This should be a source of congratulation to the Force, as holding out hopes to its members that their wants will in time be supplied. There is a vein of kindly sympathy running throughout the Report, which shows how great an interest the Commandant takes in his annual charge; and, indeed, there is little doubt but that he looks upon the Artillery branch of the Volunteers as a valuable addition to our military strength. Owing to the local camps that were formed during the earlier part of the year (particularly the Northern), the falling-off in the attendance at Shoebury was considerable, nearly 300 less than the previous year's strength being recorded; but the Commandant hopes that next year, and in years to come, commanding officers of all corps may see their way to sending up at least one detachment; and he wisely points out the advantages to be derived from each corps seeing what others are doing. Dealing with the all-important question of discipline, the report speaks in the highest terms of that maintained throughout the meeting; and, indeed, those who had opportunities of visiting the Camp in August last could not fail to notice that the strictures of previous years had been efficacious in producing satisfactory results. In this matter Colonel Lewes, the Camp Commandant, whose report is appended to that of his senior officer, can only say that there were a few irregularities committed without the precincts of the Camp proper. In clothing and accoutrements there also seems to be an advance, although in the wearing of the latter, particularly on occasions of parades in marching-order, some want of regularity was observable. This is due to want of care on the part of commanding officers and adjutants, and their attention is very properly drawn to the subject. The faults lie principally with provincial corps, and are easily remedied. On the practical question of shooting, much is said; that with the 40-pounder is pronounced a decided improvement upon last year, the number of detachments failing to score being considerably less in proportion, and the average scoring higher; of faults in drill many are pointed out, principally owing to undue haste; and the Commandant strongly urges the men generally to pay more attention to laying their guns, giving them their faults in this direction in detail. With the 64-pounder the practice was, to say the least, bad over 50 per cent. of the detachments failing to score, at the same time the drill was good. Although it is not so stated in the Report, the failures to score were probably due to the alteration in the conditions under which the competitions with this gun were carried out on the present occasion. Hitherto common shell only has been used; but when it is laid down that, whilst using the same projectile, the idea shall be that the practice is with shrapnel shell, the fact should be made thoroughly clear, and this does not seem to have been the case. Then time-fuzes have much to answer for in promoting bad results in competitions; those served out to Volunteers are not, as a rule, the latest productions from the Royal Laboratory, and gunners who have so few opportunities of using them can hardly be expected to form accurate judgments as to the amount of deterioration that has taken place since they were filled, therefore it is not surprising to find that Colonel Fox-Strangways deprecates the use of these fuzes in competitions, however useful they may be on service or for instructional purposes. He advocates practice in which exactness of laying can be shown,—or, in other words, the use of blind shells. Of the 10-inch practice he speaks highly, in spite of the difficulties which beset the Volunteer gunner in the shape of want of drill and familiarity with his weapon. Instead of firing, as on previous occasions, at one fixed target, the practice was carried on at targets representing the course of a ship passing a battery, and therefore the difficulties were increased; nevertheless, very good results seem to have been achieved, and if they could only get more practice with this particular gun, our possible coast defenders would be yet more reliable. Last in the Report, as far as the men are concerned, come the remarks on repository work; and here the Commandant fails again to see improvement, except as to silence during the operations. He admits there were several exceptionally good squads, but strongly urges that the element of time should be eliminated from these competitions,—at least, as an important factor; he desires rather that there should be a stipulated time for the shift to be completed in, and only after that has elapsed should points be deducted. It would, therefore, come to a question of points for drill to decide the winner. With a few words of congratulation to the officers for having revived the repository competition between themselves, the expression of a wish that it may lead to competitions between the men with their officers as No. 1, and a suggestion that it would benefit the service if more of the Senior Officers of the force were to visit the camp, if only for a day or two, the Report concludes. Colonel Fox-Strangways deserves all credit for the way in which he urges the claims of the men not only on their commanding officers, but on the authorities. He is not alone in thinking that it is a valuable force, although still capable of improvement; this, however, is not so much wanted internally as from outside. It is a mistake to supply old, though not obsolete stores; a far larger money grant is wanted, and must some day or other be given, if efficiency is to be kept up; and, to quote the words the gallant Commandant himself made use of in last year's Report, when speaking of the unremitting attention to drill which must have been necessary to bring them into the present state of efficiency,—"The men who have done this deserve recognition, deserve liberality in the supply of stores, of which they have shown they can make good use, and deserve to have more opportunities of drilling with and practising from the heavy guns they would have to use when their services were called for."

THE announcement made by Lord Northbrook, that a Committee of the House of Commons, as suggested by Mr. W. H. Smith, will be appointed next session to inquire into matters of Naval and Military expenditure, is a step in the right direction. But we trust that before Parliament meets again, it will have been decided to enlarge both its constitution and the scope of its labours. The wide and technical considerations involved in a thorough examination of the whole subject of our Naval requirements can only be dealt with by a Committee, or possibly a Royal Commission, specially selected and qualified to discuss the questions of Imperial interest which are pressing for solution. The wealth, commerce, shipping, food supply, Colonial possessions, dependencies, and national safety of Imperial Britain, are of such vast importance that, to adequately fulfil the objects proposed, the constitution of the Committee must, before all things, command the confidence of the nation both here and over the sea. In addition to the knowledge already at the service of the Admiralty, an exhaustive inquiry into the contemplated developments of the marine forces of foreign Powers is urgently needed, and requires to be conducted confidentially. It is also necessary to draw up once and for all a statement of the normal proportion our Naval forces should bear to those of other nations, if Great Britain is to secure that maritime supremacy which all parties are agreed must be maintained. Considering, also, the vital importance of protecting our enormous and innumerable interests in every quarter of the globe, the complex question of Home and Colonial defence requires a more thorough examination and investigation than it has yet received. The recent movement in favour of Imperial federation has shown that politicians of nearly every shade of opinion fully realise that the best pledge for the future safety and honour of our ocean empire consists in unity of interest and combined action in securing the efficiency of our maritime forces. The colonists have spoken out in no half-hearted manner; they no more desire to be protected and defended at sea by Fleets exclusively manned and equipped by this country, than we desire to profit by their aid on other terms than those of indefeasible alliance. Mr. Merriman, ex-Minister of Works at the Cape, and admittedly one of the cleverest men in that Colony, put the matter very plainly from their point of view when he wrote:—

> "The Navy is a matter concerning the whole Empire. Why should you not call the colonists to your councils in deciding the strength of your Naval armaments and the method by which your coaling-stations can best be protected? You may say that it is too great a risk to run to expose yourselves to any rebuff from colonies that would disclaim any interest in a question that has hitherto been settled by the mother-country. But the risk would be slight, and some risks must be run if you are not to let your Empire crumble into dust. The colonists are men of business, and if approached in a business-like way would respond in a sensible and practical style. But it must be business, and not mere make-believe. That is to say, if the colonists are to be invited to send representatives in proportion to their numbers and importance to an Imperial Commission appointed to decide upon the strength of the Navy and the best method of maintaining it, you must take the matter up seriously, and put it through with despatch. At present Imperial unity is only a sentiment, and it has never been exposed to any strain such as would occur in case you went to war with any great European Power, and its cruisers—in consequence of the inefficiency of your Navy—were to sweep your commerce from the seas. Suppose, for instance, that you had gone to war with Russia about the Turks on the Black Sea, and because you chose to do so Canada were to have her commerce annihilated. I am afraid that Imperial unity and the sentiment of patriotism about which Sir John Macdonald talks so largely would hardly stand the strain of such a sacrifice for such an object. Let us at least begin to work together for a common end, for the maintenance and the efficiency of our Imperial defence before that crucial strain comes; and if we do there is much more hope that it will never come than if we allow things to drift as they are drifting at present."

If, then, we are to have a Committee whose report shall be of real practical utility, entirely free from bias or prejudice, and commanding public confidence should it not include, besides statesmen of both parties, Naval and Military officers of experience, influential members of the engineering professions and gentlemen connected with the Mercantile Marine, also representatives from all our self-governing Colonies? And while it is not absolutely necessary, and may be inadvisable, to publish their report, or the reasons which have led to their conclusions, there should be no hesitation about carrying into effect their recommendations unhampered by departmental or quasi-economic considerations. Among the subjects which should be included in the scope of its consultations are the types and classes of war-ships and the amount of each which should form the normal establishment of our future fleet, with the financial estimate required for its maintenance and renewal; the numbers and characteristics of the squadrons employed on the home and foreign stations; the necessary reserves in officers and men, their supply, and the readiest method for rendering them available; the state of our stores and facilities for procuring them, the best system for protecting the home and colonial mercantile marine from the attacks of an enemy, the extent and mode of assistance which the merchant service in ships and men could send to the Imperial defence; the needful preparations to ensure the safety of our Colonies, possessions, and coaling-stations from hostile cruisers; and the methods by which the construction of war-vessels can be made more rapid, and the private shipbuilding resources more readily available for the public service. There would, no doubt, be difficulties about apportioning the expense to be borne by the mother-country and the various Colonies, and other matters requiring delicate judgment and tact, before a definite settlement could be arrived at; nevertheless, it is plainly our duty to take the initiative in arranging for the common defence of the Empire, with a view to consolidate, foster, and encourage, by every means in our power, the peaceful extension of commerce and civilisation.

A CONVICTION of the expediency of the Federation of the British Empire, of the more complete unification for government, for defence, and for commerce, of the British Isles with all their outlying dominions, is becoming more general. The latest evidence of the growing interest in this momentous question was afforded by an influential and representative meeting at the Westminster Palace Hotel, on Tuesday, the 9th inst., to hear a paper on "National Unity" read by Mr. Baden-Powell, C.M.G. The paper sketched a bold and comprehensive policy of legislative union which can only be carried into effect in its entirety by both Houses of Parliament becoming really imperial, and comprising representatives from at least all the important portions of the Empire. This would, of course, necessitate the relegation of all merely local legislation to subordinate Parliaments, and the restriction of the functions of the Imperial Assemblies to matters of more general interest and greater importance. The reading of Mr. Baden-Powell's paper was followed by a discussion, and the Earl of Dunraven, who presided, concluded the proceedings by a speech which evinced extensive knowledge of the subject, and moderation and tact in the expression of his views. Though it would be premature, as well as beyond our province, to discuss the political aspect of the question, and the difficulties with which it is beset, the consideration of its bearing on naval and military organisation and administration has urgent claims on our attention. Being thoroughly convinced that the efficiency of regular troops is increased by their being sent to different countries, and by their being inured to changes of climate with reasonable limits, we should gladly hail a return to the more extended circle of foreign stations of former days. This view, however, has an obvious qualification; because no one could be so unreasonable as to think that a regiment would be improved by even a mild course of cholera or yellow-fever. Sending a small proportion of our regular troops to Canada and Australia would not necessitate augmented establishments or increased expenditure. Both those countries are willing, and would soon be ready, to contribute a fair share towards Imperial defence. Every regiment or battalion raised there for general service might be sent in its turn to India and to Great (or may we yet venture to call it Smaller?) Britain, its place in the land of its origin being taken by one of the home-raised regiments or battalions. The tendency towards unification of interests and feelings, which is excited by the occasional migrations of parties of volunteers, and even of teams of cricketers, would be intensified by the presence of Highlanders in Toronto, of "Royals" in Sydney, or of Irish Fusiliers in Melbourne; and the advent of stalwart Australians or hardy Canadian soldiers in the land of their ancestry would be cordially welcomed. But a real unification of our naval and military forces,—not merely an alteration of names and titles, and the subversion of nearly all that had been proved valuable, such as exhibited in the late army reforms,—would meet with much open opposition and more indirect antagonism, because it would be incompatible with the system of excessive centralisation which strives to keep all the executive work of the Army and Navy under the absolute control of incompetent civilian officials.

The Earl of Northbrook, who has been suffering from a sharp attack of the gout, was sufficiently recovered on Thursday to leave the Admiralty for Stratton Hall, Hants, where his lordship will spend Christmas.

We understand that, on an inspection being made, it was discovered that the *Minotaur's* boilers are in such a condition that repairs, which will occupy two or three months, must be immediately taken in hand. We wonder how many more of our armourclads in commission would, on investigation, be found to be in a similar state? This intelligence will probably cause an alteration of the programme of the Squadron, which will break up next week for the Christmas holidays. It is many years since the crews of the Channel Squadron spent Christmas at home.

Mr. Caine, M.P., the new Civil Lord of the Admiralty, commenced his official inspection of the Naval ports this week by visiting Chatham under the guidance of Colonel Smith, R.E., the Director of Admiralty Works.

A committee has, we understand, been nominated to inquire into the cause of the explosion of the gun on board the *Active*. Vice-Admiral Luard, C.B., President; Colonel Fox-Strangways, R.A., Commandant and Superintendent of Experiments at Shoeburyness; Colonel J. F. Owen, R.A., half-pay, late Assistant-Superintendent Royal Gun Factories; Captain A. R. Wilson, R.N., and Sir F. Bramwell, F.R.S. The Secretary is Commander C. R. Arbuthnot, R.N. The instructions given to the committee are in general accordance with those which were issued on the occasion of the bursting of the *Thunderer* 38-ton gun at Malta. Three members of the *Thunderer* committee are upon the *Active* committee—namely, Admiral Luard, Colonel Owen, and Sir F. Bramwell.

Attended by Captain Durrant, R.N., his Royal Highness Prince George of Wales visited Windsor last week, returning to town on Monday.

It was to be expected that Sir John Elphinstone's letter last week, advocating the abandonment of land defences in favour of a fleet of 10 small coast-defence vessels, with heavy guns and a speed of 10 knots, as advised by the late Sir Howard Douglas, would not fail to call forth a rejoinder, and a "Colonel, R.E.," now replies to him. He says:—

> "It may at once be admitted that the appearance of 10 heavily-armed vessels at any point of the coast where an enemy desired to effect a landing would create a serious diversion in our favour, and that it is desirable to possess some vessels heavily armed, and specially adapted and retained for this particular service; but is it wise to assert, or imply, that the possession of 100 such floating batteries would be a valid excuse for neglecting such land defences as are necessary for the protection of important harbours, such as those of Portsmouth, Plymouth, the Mersey, or the Thames? Such harbours must be protected at any cost or sacrifice, and if we can oblige an enemy to shun them, so much the better. No one has a desire to copy the Wall of China or to erect castles all round the coast in imitation of those of Italy, constructed to check the inroads of pirates; but it is by all means advisable to induce the enemy to carefully shun our strongly-defended harbours and land elsewhere. This is exactly what we desire that he should do, if he is anxious to test our strength, and it will be found that, when this occurs, the War Office possesses a cut-and-dried plan carefully prepared already, in accordance with which the strategical points necessary to check his further advance will be at once occupied and strongly entrenched."

We are rejoiced to hear that such a plan is in existence, and only hope it is not of such an obsolete nature as some other plans we have heard about lately.

The building-slip from which the *Rodney* was recently launched at Chatham is being prepared for laying down of one of the new armour-plated vessels referred to in the official statement on the Navy in the House of Commons. From the plans, the vessel will be one of the most powerful yet built. She is to be commenced as soon as the materials can be prepared.

In connection with our remarks last week on the case of Thomas Lander, a seaman in the *Shannon*, a correspondent, Mr. Ramsay, of New Barnet, Herts, writes:—"When a lad, in 1811, I joined the Coast-guard ship *Elizabeth*, then lying off Leith, and was shortly afterwards transferred to the *Shannon*. After cruising about for two years on board of her, there took place that never-to-be-forgotten fight of which I was a spectator. One reason, I always think, for our victory on that day was partly due to the admirable way in which an A.B., by name Jim Coule—a Kincardineshire man, who had served under Nelson—steered our ship, dexterously managing to entangle the enemy's anchor-chains with the *Shannon's* anchor, the result being that the American ship swung round side by side with us. Another thing I well recollect was how a great many of our opponents showed the 'white feather,' slinking away from us, evidently ashamed of meeting the mates who perhaps they had drilled with; for it was a well-known fact that a number of the *Chesapeake's* crew were men who had received their training in the English Navy, but had deserted from us, owing to the scurvy treatment then in vogue in the Royal Navy. The last time I had the pleasure of seeing one of our old officers was when visiting in the North, some twenty years ago, I called on Lieutenant Young, who was then living in Berwickshire. I understand that the only officer living is Sir Provo Williams, G.C.B., who was our 2nd Lieutenant on that eventful day. In conclusion, I heartily wish that Lander's case may be treated in no mean spirit by the Admiralty."

The *Garnet*, six guns, 2,120 tons, and 2,000 horse-power, at present refitting at Sheerness, is ordered to be ready for foreign service by the end of January.

We have constantly pointed out the folly of attempting to combine in the same vessel the special qualifications for a surveying-vessel and a man-of-war. The *Rambler* is a case in point. We now hear that she will be obliged to leave two, if not more, of her guns behind; and, as to her being intended to strengthen the Squadron in China, as so many of our contemporaries have stated, it is simply nonsense to the initiated. Considering the great importance to our mercantile trade of having correct charts of recent date, it seems strange that the Admiralty cannot build a suitable surveying craft. We should suggest a paddler of shallow draught, great accommodation, and at least 10-knot speed, as a type of vessel much more adapted for the work, and more economical in the long-run than vessels neither one thing nor the other. We understand that the *Alert*, when repaired at Sheerness in 1878, cost £28,000, and she only lasted one short commission; and the *Sylvia*, in 1881, cost about £27,000, and yet we constantly hear complaints of her unsuitability. It is high time that the Hydrographical Office pressed this matter on the attention of the powers that be.

The construction of a new type of composite gun-vessel, the *Swallow*, was commenced at Sheerness on Monday. She will be 1,040 tons and 1,000 horse-power, and will carry eight 5-inch, one 7-pounder, and several machine-guns, and is to be fitted with electric search-lights. Altogether, the *Swallow* is the most powerful and fastest gun-vessel at present laid down for the Navy.

The *Reindeer*, which was commissioned last week by Commander George L. Atkinson, with a complement of 110 officers and men, for service on the East Indies station, is the first vessel of her class to go to sea, her sister-ships, the *Racer* and *Mariner*, being still in the dockyard hands. She is decidedly an improvement on the *Fantôme* class of sloop, of heavier armament and greater speed, with very good accommodation for ship's company. She carries six 5-in. breech-loading and eight machine-guns, two of which can be used from the tops, and as her outboard boats are at the quarter davits, and astern she possesses immense advantages in being able to fight all her guns without lowering a boat; she has also sufficient men to fight all her guns at once, not by any means a usual occurrence in vessels of her class. The bow and stern guns are fitted as traversing guns on Vavasseur carriages, and she is fitted with an electric search-light on the poop and spar torpedo arrangement for the steam-cutter. Her best speed is 11½ knots, which she can probably steam for four and a half days, or seven days at eight knots. Protection is afforded the engines and boilers by the position of her coal bunkers, and her numerous compartments will minimise the risk from torpedo attack or collision. From her build, and as she is able to feather her screw, she should sail fairly well, and altogether she appears to be a handy, well-armed, and comparatively fast vessel, a great advance on the old craft of a similar class, and a much better ship than most commander's commands. Captain Atkinson, who, if we recollect rightly, served as commander with Admiral Sir George Ommanney Willes, one of our most able and energetic flag-officers, cannot fail to have profited in so good a school. We congratulate him on his command; and Sir William Hewett may well be contented with the latest accession to his squadron.

"R.N. (retired)" complains, with much reason, in the *Standard*, of the standing disgrace to the Navy presented by our existing types of small unarmoured vessels. Few of them can steam, even in smooth water and under favourable circumstances, more than seven to nine knots per hour (except during their official trials on the measured mile, when, with picked coal, forced draught, &c., they may try to attain a respectable speed for a few hours), and their sailing powers are equally bad, while in the event of war they would either have to remain in port or fall an easy prey to the existing foreign vessels of a similar class. He considers that:—"This state of things could be easily rectified if in the future, instead of tinkering up and building from the obsolete Admiralty models and patterns, the authorities at the Admiralty would take a new departure, and when the class of ship required is decided upon, let them say what the speed (sea-going), draught of water, coal-carrying capacity, armament, crew, equipment, &c., is to be, and then get some one of our great shipbuilding firms to design as well as build that ship. I venture to say that the taxpayers will then have the worth of their money, and the Navy an efficient vessel, one which would not be a source of shame and humiliation to the officers who command and serve in her when lying alongside a foreign vessel of the same class."

Intelligence from Zanzibar is to hand that the *Osprey*, Commander Dowding, has captured a slave-dhow. As soon as the slave-dealers saw the man-of-war chasing them, they threw a number of the slaves overboard, of whom six were drowned. The slave trade is reported very brisk on the coast at the present time.

The *Vossiche Zeitung* says:—"British supremacy at sea, after existing for a long time, has ceased with the establishment of Italian and German unity, and no Naval Power will now recognise English claims to Naval supremacy. England will certainly continue to remain the first Naval Power of the world for a long time to come, but can never again attain supremacy at sea, which she possesses no longer." It appears to us that this will depend in a great measure upon Great Britain herself. We have only to take the necessary steps to ensure our Naval supremacy in the future, as we did in the past, and there will be no question about recognition. In the meantime, it is one thing to cry stinking fish, and another to get a slap in the face with it. Foreign nations may rely upon this fact, that, although her teeth are considerably in want of repair, there is plenty of bite left yet in the British Lion.

We understand that Captain A. Buller, C.B., A.D.C,, has been selected to succeed Lord Walter Kerr in command of the Medway Steam Reserve, and that Captain H. F. Stevenson, C.B., will probably be appointed to the *Achilles* in his place.

The French cruiser *Neilly*, 2,300 tons, 15 guns, Captain Dorlodov des Mark, arrived in Hong Kong harbour on November 3, from Saigon and Europe. After coaling and taking in stores, she left to join Admiral Courbet's fleet in the blockade of Formosa. The cruiser *D'Estaing*, Commander Colombeaud, arrived at Hong Kong in the first week of November from the blockade of Tamsui, and having coaled rejoined the squadron under the command of Admiral Lespés.

Major Gritton, R.M.L.I., reported himself last night at Spring Gardens, invalided from the Soudan.

We are glad to hear that some practical effect, however minute, has been given to recent arguments in favour of despatch, by the adoption of an arrangement for expediting the completion of the armour-clad ships under construction and preparing for sea at Portsmouth Dockyard. The hours of labour in the yard are now at their shortest, and in order to advance the work without lengthening the day or resorting to lighting-up, the usual time allowed for dinner has been reduced from an hour and a half to an hour, amounting to one-eighth of a day overtime. This arrangement does not apply to the hands employed upon the *Polyphemus*, *Devastation*, and *Triumph*, or on the unarmoured ships or vessels under repair, but to the *Colossus*, *Camperdown*, *Collingwood*, *Edinburgh*, and *Impérieuse*. The number of men affected is about 2,000, and the extra sum to be expended in wages up to the end of the year (when the arrangement will cease) will amount to £5,000. At Chatham Dockyard also, with the view of expediting the progress of the work on the steel armour-plated ships and the fast cruisers of the Mersey class, similar orders have been given by the Admiralty. The other workmen in the dockyard, whose services are required for work on the armoured ships, are also to be employed extra time daily.

The French Chamber of Deputies have adopted the Bill for making a port at Point de Galeta, in the Island Réunion, the necessity for which has been prominently enforced by the needs of the Squadron employed on the coast of Madagascar.

With characteristic promptitude worthy of a better cause, the London Council for Promoting International Arbitration have passed the following resolution:—"That this Council enters its strongest protest against the proposed increase of national expenditure on the Navy by a Government pledged to peace and retrenchment, and which contains many members who have hitherto advocated the wiser and more humane principles of international arbitration, and trusts that those Members of the House of Commons favourable to the peace cause will use their best efforts to prevent these warlike preparations." These gentlemen should take heart, and remember that the surest way to preserve peace is to be sufficiently prepared against aggression. "The strong man armed keepeth his goods in safety."

A correspondent of the *Morning Post*, who conceals his identity under the signature "R.N.," offers for the counsel and advice of the heads of the Admiralty the following quotation from "A Discourse on the Royal Navy and Sea Service," by Sir Walter Raleigh:—"I say, then, if a vanguard of these hoyes, who will easily recover the wind of any other ships with a bataille of 400 other warlike ships, and a rear of 30 of her Majesty's ships to sustain, relieve, and countenance the rest (if God beat them not), I know not what strength can be gathered in all Europe that can beat them." And he adds:—"There spoke the sailor of 1650; the requirements of 1650 are the requirements of 1884; only immensely increased. Let them read that discourse with understanding and honesty. Let them leave 'Be just, and fear not' to the pulpit, and 'Force is no remedy' to the Friends' meeting-house, and set about at once the important duty entrusted to them by a country now fully alive to the peril, that, by almost criminal shortcomings, she has been allowed to drift into."

The *Mallard*, Lieutenant-Commander W. H. L. Browne, was paid off at Bermuda on the 14th ult., and was recommissioned the following day.

The *Pall Mall Gazette* remarks that M. Paul Bert's speech at Lyons affords an instructive commentary on the observations which Lord Rosebery was making at the same time at Glasgow. While Lord Rosebery was disclaiming any wish for further annexation on the part of England, M. Paul Bert was asserting that France must persevere in a policy of colonial extension or perish. Without colonies, he said, "the Navy and the mercantile marine" would become useless—a curious contrast to the doctrine of Cobden, but one which unquestionably reflects the prevailing opinion alike of Republican France and Imperial Germany.

A new French cruiser, the *Dubourdieu*, which has been launched at Cherbourg, is built of wood. Her dimensions are 253 ft. long by 47 ft. broad, with a draught of 25 ft., and a burden of 3,354 tons. She is to carry in her battery 26 6-in. guns and several tubes for projecting torpedoes, together with several revolver guns on the upper deck and four 7-in. guns. The engines, made at Le Creusôt, are of the compound system with three cylinders, and they are to be of 3,300 horse-power and to give the vessel a speed of 14⅛ knots an hour. It is calculated that the vessel will have cost before she is completed a sum of £150,720, distributed as follows:—Hull, £92,000; driving gear, £30,720; armament, £28,000. She was laid down in August, 1880, but being of wood, without water-tight compartments, is not in any way protected from the effects of a torpedo explosion, and has not sufficient speed for a cruiser of the first class. She is intended for service in Asiatic and African waters.

It is stated that the Italian war ship *Messagiero*, Captain Gualterio, which left Venice last week for the Red Sea, has orders to prepare for the occupation of a harbour with the adjoining territory, at some point north of Assab Bay, and therefore nearer to Massowah and Abyssinia, which the Italians consider important for their trade. All Italian Red Sea possessions will then be united in one colony, and placed under a common administration.

It will be remembered that two days after Admiral Courbet's bombardment of Foochow the Kinpai forts in the Min River fired by mistake on the English gunboat *Zephyr* and wounded an officer, Lieutenant Hubbard, who subsequently died of his injuries. Ample and satisfactory apologies were made at the time, as well by the local authorities as by the Government at Pekin, to the English Minister and to Admiral Dowell. The Chinese have gone further, and by Imperial decree have degraded the commander, Yan Chin-pao, for ever. He is prohibited from being employed, even as a volunteer, in any capacity in any Chinese military force whatever; he is stripped of his official rank, and is sentenced to perpetual degradation. It is believed that this severe punishment has been spontaneously inflicted by the Chinese Government.

Considering the very slight and rapidly decreasing superiority we possess over the French in first-class armour-clads, and the probable direction in which that nation might look for allies in the unhappy event of a war with ourselves, it is advisable to note that the *St. Petersburgh Gazette* states "the construction of a new Russian ironclad, on the model of the *Duilio*, will be commenced next year. Her capacity will be 11,000 tons, and her armour-plating 12 inches thick. The registered horse-power will be 8,000, and speed 17 knots. The new ironclad, the cost of which is estimated at 5,000,000 roubles, will be the largest in the Russian Navy, and will be armed with 16-inch guns."

Answering Sir William Armstrong's complaint that he had been incorrectly described as converted to Sir Edward Reed's views on the necessity for increasing the area of protective armour on the sides or its thickness on the decks of future vessels, Sir Edward points out that he did not intend to convey any such claim, but that he was naturally led to the conclusion that they concurred on the subject by some remarks made by Mr. White at the United Service Institution, and he agrees that the difference between them is more in degree than in principle. Sir Edward considers that the Admiralty deserve great praise for the prompt effect which they have given to the judgment of the Navy and of the public, and declares that in the laying-down of four efficiently-armoured first-class ironclads and five armour-belted ships of great speed may be seen the vindication of those principles which he has so long and so strenuously maintained. We can quite understand Sir Edward's delight at the acceptance by the Government of his demands for more armour, but feel sure that will not prevent his continuing to urge the necessity of still further carrying out the programme he so deftly put into shape for the Naval service. He concludes:—

> "It may not be amiss if I add a word or two by way of allaying those apprehensions which were expressed in the House of Commons touching the delay in commencing these armour-clads by contract, to which the absence of an actual Parliamentary grant of money seemed to point. It is to be remembered that the triumph of armour involves the preparation of new designs. It is not possible, I feel sure, to prepare those designs, with their specifications, and to arrange the tendering of contractors before Parliament reassembles. No time will, therefore, be lost from the cause suggested. Long before the contractors could have earned their first instalment, even before the ships could be ordered, the Estimates of 1885-86 will be before the House of Commons."

Addressing a meeting at Portsmouth on Thursday night, the Hon. Thomas C. Bruce, M.P., said that the proposals of the Admiralty were insufficient without money being taken for more men. He argued that steady progress should have been made in years past, and not in such a sudden leap. Sir H. Drummond Wolff said it was singular that the Admiralty had now come to their decision, because only a month or two ago 200 men were discharged from Portsmouth Dockyard. On Thursday, Sir Thomas Brassey, at Hastings, when asked what new circumstances had arisen to induce the Government to change their minds since March last about the requirements of the Navy, is reported to have answered:—"Three—first, they had to look at what was being done by other Powers besides France, and during the last year or two a very large development of expenditure in shipbuilding had taken place in Russia; secondly, in the matter of torpedo vessels, they had felt they could not longer afford to neglect this important weapon of naval warfare; and the third circumstance which had arisen wiithin the last twelve months had been the condition of the shipbuilding industry of the country, and looking at the great necessity of protecting our commerce, they thought they ought not to allow such an opportunity to pass by without availing themselves of it." Now, all you gentlemen who have been crowing so loudly had better step out and down—take a back-seat—for your efforts, and advice, and revelations had nothing whatever to do with it. After this explanation, there can no longer be any doubt as to who was the well-informed writer of the "Truth about the Navy."

Captain Alington has been appointed to the *Satellite*, now on the Pacific station, vice Captain Theobald, invalided. He served in the Baltic and Black Seas during the Russian War; was present at the night attacks on the sea fortifications of Sebastopol, at the capture of Kertch and Kinburn, and at the fall of Sebastopol (Baltic, Crimean, and Turkish medals, Sebastopol clasp); senior Lieutenant of the *Rinaldo*, stationed on the coast of North America during the United States Civil War; Lieutenant-Commander of the *Britomart* on Lake Erie during the Fenian riots, 1866-68—passed two winters in the ice; Commander of the *Boxer* on West Coast of Africa, May 12, 1877; took an active part in the destruction of various piratical villages during the Niger Expedition, August 14 to 28, 1877 (mentioned in despatches). He also holds the silver medal of the Royal Humane Society, for having jumped overboard, with all his clothes on, and swam with a life-buoy to Private J. Browne, who attempted suicide by throwing himself overboard in the Bay of Biscay.

In an article on the French Navy, published by the *Débats*, M. Gabriel Charmes thus writes:—"The Committee on the Budget states, without appending any reflections, that we are going to finish, God alone knows at what price, seven first-class armour-clads, and that we are laying down only three torpedo-boats. During this time the Austro-Hungarian Delegation has voted the construction of a new fleet of 64 torpedo-boats; and Germany, which has only one armour-clad on the stocks, is building 120 torpedo-boats! Why does not the Chamber, in presence of the necessity of acting with economy, ask the Minister of Marine if the present organisation of our Naval forces is the best, and if it ought not to be modified? We, in conjunction with England, upon which country routine and tradition weigh nearly as heavily as on France, the only nation which maintains a squadron in commission the whole year long, nine or ten months of which are wasted in port. This squadron, which is composed at the present moment of the most varied types, and in which figures a number of coast-defence vessels, is incapable of navigating and of fighting 'in squadron,' and costs a large sum of money." We see by the French Naval Estimates that France has 191 ships in commission and 110 in reserve, and 32,935 sailors afloat; that the Minister of Marine proposes to spend next year 38 million francs in building, and 10 million francs on guns and hydraulic works.

We understand that the Secretary of State for War has been pleased to approve of substantive promotions being made in the place of the regimental serjeant-majors, colour-serjeants, serjeants, corporals, and regimental artificers detached from their own corps for duty with the Egyptian and Bechuanaland Expeditionary Forces. Those non-commissioned officers will remain as supernumeraries on the establishment of their corps, and on their rejoining they will be absorbed in the first vacancies which occur. In the meantime, they will take their turn for regimental promotion, but will not receive the pay of the higher rank to which promoted until they are either absorbed in the authorised proportion of non-commissioned officers of such higher rank serving with the corps to which they are attached, or return to their regiments.

Lieutenant H. McL. Young, 27th Inniskilling Fusiliers, succeeds Lieutenant Dalison, Scot Guards, as a Lieutenant-Instructor at the School of Musketry, Hythe.

According to present arrangements, the expedition to Bechuanaland will consist exclusively of three regiments of irregulars and English volunteers, and of 1,000 colonials under the command of Lieutenant-Colonels the Hon. Paul Methuen, Carrington, and Gough. In the event of the co-operation of regulars being found necessary, the whole force would be under the direction of Lieutenant-General the Hon. Sir Leicester Smyth, commander of the forces in South Africa.

Major H. D. A. Cutbill, 86th Royal Irish Rifles, has been appointed Brigade-Major at Halifax, N.S.

A special committee, with the Assistant-Quartermaster-General as president, assembled at Aldershot on Tuesday, to consider and report upon the subject of an "iron ration" for troops in the field. The following officers are members:—Lieutenant-Colonel H. Helsham-Jones, R.E.; Lieutenant-Colonel C. G. Slade, 2nd Rifle Brigade; Assistant-Commissary-General F. E. Stevens, Commissariat and Transport Staff; and Surgeon-Major P. W. Stafford, Medical Staff.

We learn from India that Captain O'Gorman, 10th Lincolnshire Regiment, succeeds Lieutenant-Colonel Stockley, 9th Regiment, as Brigade-Major at Meean Meer.

A correspondent, signing himself "F. O.," writes to an Indian contemporary on the subject of the rules regarding the payment of Indian officers while on furlough, enclosing a copy of Lord Kimberley's answer to Lord ———'s demi-official on the subject. Lord Kimberley, after stating the facts of the case, says:—"The matter is one which the Secretary of State cannot deal with officially unless the officers who complain of the rules as to furlough-pay transmit a memorial through the Indian military authorities and the Government of their respective Presidencies." "F. O.'s" friend, Lord ———, explains this to mean, "that unless the matter is referred by the Governments of the Presidencies, on the application of officers, to the India Office, no change can be made. The only course open is, as far as I see, for officers to apply to the Governments of the Presidencies, and make their requests in that quarter." And "F. O." himself adds that "the matter now rests with those officers who complain of the rules as to furlough-pay, and they have only themselves to blame if they do not now exert themselves and individually forward a memorial." From this it will be seen that the Secretary of State for India is willing to re-open the vexed subject of furlough-pay, if officers will only memorialise in the manner authorised by the regulations.

The troops with the "Bounderers," as the Boundary Commission are called, appear to be getting over their long and difficult march in a most satisfactory way; and so far, we only hear most eulogistic accounts of the arrangements—both those made by Government and those undertaken by the Ameer.

Major-General Fraser has addressed a letter to the *Times*. That journal stated that a Committee on Cavalry Equipment, of which the General was said to have been President, has made a recommendation by which, if carried out, "the trooper of the future will be practically a mounted infantryman, and, like the foot soldier, his weapon will be the rifle, the *arme blanche* occupying a secondary place." General Fraser points out that he has never served on any such Committee, and that (though fully recognising the great value of Mounted Infantry as a distinct service, under many circumstances), he could never make a recommendation so totally at variance with the opinion of Marshal von Moltke and the most eminent soldiers of Europe—namely, that the *arme blanche* will continue to hold for Cavalry the primary place on the battle-field.

It would be instructive, probably, to know why Major English, R.E., has been permitted to attain that rank without passing the examination for Major, while the promotion of other less favoured officers has been stopped because they have not so qualified.

The appointment of Colonel Bushman, 9th Lancers, to succeed Colonel Boyce Combe as Assistant-Adjutant-General at Head-quarters in India, was a great surprise; and it is said the gallant officer was at first unwilling to give up the regimental command before he was obliged to. Eventually, however, he yielded.

It is sad that "the oldest evening paper," our respected and respectable contemporary the *Globe*, should lose its editorial temper so consumedly as it did this day week with us. And all because of a little correction, meant for its good, as correction generally is meant when administered by good-natured people. There was a pretty story about the escape of Madame Belbeuf from the mob of Toulon in the *Globe* last week, in which it was asserted that her saviour "was none other than General Bonaparte, then in command of the artillery of the Italian Army, who happened to be in Toulon arranging for the defence of the arsenal." Whereupon we mildly remonstrated with such readings of history, "By the Way," by observing that there was "no General Bonaparte" then or there, and there was no "Italian Army." And our evening luminary flies into a rage, and explodes in two dynamitic paragraphs against us, within which it perverts what we did say, and repeats its original sin. The *Globe* says:—"We are also told that the *Globe* is wrong in supposing General Bonaparte was at Toulon, and commanded the Southern or Italian Army." The *Globe* would be very wrong if it supposed Bonaparte was *not* at Toulon during the siege. We never said he was not. But assuredly he was not "General" at the time mentioned by the *Globe* in its original paragraph, and just as certainly he did not "command the artillery of the Italian Army." By way of getting out of the scrape, our contemporary rides off on "the Southern or Italian Army." We presume the writer meant the "Army of Italy," of which Bonaparte did *not* "command the artillery" at the siege of Toulon or at any time. That will not do. He commanded "l'Armée d'Italie," which our contemporary may translate Italian Army if it pleases, and, on the whole, comprehends the part in that sense. Bonaparte commanded the artillery of the French forces in Italy which were not designated "the Italian or Southern Army" by any one, and which were not in Italy till after the siege of Toulon. But so much the worse for the facts, says the *Globe*. "As a matter of fact, he was and did." Bravo! There's nothing like sticking to it! If our contemporary would send "By the Way" out to Benares, he would learn that the "ring-tailed, rat-faced deities" which he says are worshipped there, are remarkably like "bulls," and very fine ones at that, and that they are alive and kicking. The *Globe* accuses us of quoting its paragraphs, a practice which it characterises quaintly as "a nobler, higher aim" than "providing Army and Navy news," which we have, it seems, "abandoned because newer rivals do it better." Is that not unkind? Instead of encouraging us in our endeavours to find in the *Globe* anything worth quoting, and thus attain our nobler aim which is as yet unaccomplished in that connection, though we do discover plenty to criticise and contradict, there is a beautiful confusion of metaphors in the advice about the diamonds of the *Globe*, which, it appears, we cut and polish for our own use, and a working jeweller is recommended. We suspect he would find the diamonds were "*paste* and scissors." As to the "newer rivals," we wonder if the *Globe* means the *Pall Mall Gazette*, from which we certainly have quoted in common with all the Press? Or is it the *St. James's Gazette?*

The next examination of officers of Auxiliary Forces in tactics will take place at the various stations in the United Kingdom on January 5 next.

"The only scare connected with India," says Sir Lepel Griffin, in writing to a contemporary, "that has a solid foundation concerns the unprotected condition of the seaports, and especially Bombay. The city, the second in the Empire, is practically as undefended as Brighton against the attack of a powerful ironclad. I must not, however, unfairly omit to mention that Bombay does possess one heavy gun—a 35-ton, if I remember rightly. Unfortunately, owing to some simple arithmetical miscalculation, for which a school-boy would have been flogged, the gun, on being transferred from the ship, asserted its destructive energy by going through the barge to the bottom of the harbour. It was conscientiously followed by divers, but was seen no more, and has, doubtless, been long ago converted into vapour in the centre of the earth, which some hold to be hotter than the Soudan. As the officer in charge of the debarkation was not cashiered, I presume that this gun will figure in the forthcoming Blue-book among the existing defences of Bombay."

The *Pall Mall Gazette* says that the employment of General Smyth would be suicidal folly, and ought to be stopped instantly. If there is any fighting to be done in Bechuanaland, and risk of fighting there certainly is, the whole force should be under the direction and command of Sir Charles Warren. It would, in the opinion of the *Pall Mall Gazette*, "be pushing the doctrine of seniority to the verge of criminality to supersede the supremely capable man selected for this special purpose by Lieutenant-General the Hon. Sir Anybody whatever." The writer of this wonderful paragraph can certainly know little or nothing of the subject he is commenting upon. General Smyth will not be employed unless the troops under his command at the Cape are sent to the front. If they are, he certainly has a right to accompany them, and there is only one capacity in which he could very well do so. When it is borne in mind that Sir Charles Warren is only a Major in the Royal Engineers, though locally a Major-General at the Cape, it must be admitted that General Smyth has some claim to command should the troops he is now commanding in South Africa proceed "to the front."

The number wanting to complete the establishment in some Militia battalions is still very large, notwithstanding the impetus given to recruiting for the Militia by the depression of trade.

The Commander-in-Chief has approved of officers of Militia battalions of territorial regiments being attached to Line battalions for duty, in place of those officers who have proceeded to Egypt and Bechuanaland, of whom the number is probably 50. As it is impossible to guess when these officers may return to their regiments from active service, we cannot but think that it would be more advisable to second them, and to gazette in their places a similar number of Militia Lieutenants who have qualified for commissions in the Army, than to accept the services of other Militia officers as a temporary measure, and who have not so great a claim for consideration. According to the Report of the Military Competitive Examination of Lieutenants of Militia for Commissions in the Line, held last March, it appears that 155 Lieutenants obtained over 1,200 marks, the qualifying number to gain a commission in the Line, of whom 80 were subsequently gazetted, leaving 75 unprovided for. No doubt several of these latter had another chance, and probably were fortunate enough to gain their commissions at the examination in September last, as the marks were much lower on that occasion; but some of them had not this chance, and these would, doubtless, be only too pleased to accept Line commissions.

There seems something very unreal in the official whim for the new invisible uniform for the British Army. We hear of the scarlet of the Guards detachments of the Camel Corps much impressing the natives in Egypt. If this, the national colour, is, however, so dangerous and inefficient in war, why, we wonder, have her Majesty's Guards been obliged to wear it on active service?

The French papers have been discussing the following bit of red-tapeism. The 111th, lying at Toulon, received orders to sail for Tonquin. The Colonel reported to his Brigadier, who was at Nice, that his men required a second pair of shoes; the Brigadier forwarded the report to the General of Division at Toulon; who forwarded it to the Commander-in-Chief of the 15th Army Corps at Marseilles; who forwarded it to the War Minister in Paris. The reply passed through the same channels, and by the time it got back to Toulon to the address of the Colonel, the 111th had already sailed, and now the shoes must sail after it. It is asked if the telegraph might not be employed in cases of emergency.

The War Office, not content, it appears, with the disastrous failure of the invisible grey uniform for the Infantry, have now invented a new dress for the Royal Artillery,—a Norfolk jacket and breeches, with brown leggings. It seems a pity the energies of the authorities cannot be diverted into more useful channels.

At the close of the twenty-fifth year of the Volunteer organisation, it is a matter of much congratulation to learn, on the authority of Major-General Elkington, C.B., that the strength of the whole force on October 31 last exceeded by some thousands the totals of all previous years, the number of all ranks present at inspection was larger, more officers passed in tactics, and there was a considerable decrease in the number of non-efficients. The statistics for the year have not yet been issued. Those for 1883 showed 209,365; efficients, 202,428; proficients, 17,928; officers passed in tactics, 485; and present at inspection, 179,739.

It would be desirable for the War Office to make every effort to induce the whole of the Volunteers at Portsmouth, Plymouth, Chatham, and Dover to become Artillery. It is impossible the Royal Artillery will, on an outbreak of war, ever be of sufficient strength to man a third of the guns at these places.

In the *Armée Française* we find some remarks on the subject of the Kropatschek repeating-rifle. Some of the French sailors in Tonquin were armed with this weapon, which is said to have done wonders, like the Chassepôt at Mentana, and there is a report that Kropatscheks are to be served out to the reinforcements now being despatched to General Brière de l'Isle. The French Government seem to have adopted this weapon for the Naval Fusiliers,—sailors drilled to act on shore,—in 1878, and the manufactories of St. Etienne and Châtellerault have turned out a certain number. There are 60,000 of these rifles at present in store. The Kropatschek has a magazine containing nine rounds, and it can be loaded in from 12 to 15 seconds; the cartridge is the same as that of the Gras, but it has not the range of that rifle.

A Royal Warrant issued on the 1st inst. provides that an officer who shall not have been promoted (*a*) in consequence of not having passed the examination prescribed by Article 32, or (*b*) in consequence of having been unfavourably reported upon, shall be retired from the Army, receiving any retired pay or gratuity to which his service may entitle him, unless in case (*a*) the notification of his having subsequently qualified, or (*b*) a satisfactory report as to his fitness for promotion shall have reached the Commander-in-Chief within 18 months from the date of his supersession. A Lieutenant who shall not have received an increase of pay after three years' service, in consequence of not having passed the required examination shall be retired from the Army, unless he passes the prescribed examination within 18 months from the date of completion of the period of three years' service.

It seems as if our Field Artillery will go into the next great war with four different kinds of guns and ammunition, owing to the authorities being apparently unable to decide on the best type to be adopted. It is, however, probable, even if this was decided on, the Treasury would refuse to grant the money for superseding our obsolete ordnance.

According to the *Temps*, the casualties among the French officers in Tonquin have been very heavy. Two reasons are given for this,—the fact that the commanders of companies are obliged to remain on horseback during the engagement, thus furnishing an excellent mark for the enemy; again, it is asserted that there are a good many Germans and Americans among the Celestials, but the presence of no English officers has as yet been officially recognised. The same paper adds that the greatest indignation prevails (among the French) in consequence of the large amount of English and American arms and ammunition which continues to enter China. The writer opines that a declaration of war would put an end to this state of affairs. Now that the English mediation appears to have ended in failure, and that more blood must be shed before the belligerents can come to terms, it is supposed that France will at last declare war. The feeling among our neighbours seems to be decidedly in favour of sending out large reinforcements, and striking a blow at Pekin. This matter has been discussed in the lobbies of the Chamber, and such an attempt would meet with the support of Parliament.

We hope in the framing of the new Army Estimates attention will be directed to the 35 Infantry battalions at home on a peace establishment of 520 rank and file. It is impossible any battalion so constituted, sending away large drafts yearly to the foreign service battalion, can be fitted for even ordinary garrison duty, and we hope the minimum establishment will be fixed at 600 rank and file.

Some seven weeks since we called attention to the fact that a vacancy in one of the higher ranks of the Commissariat and Transport Staff, caused by the retirement in August last of Deputy-Commissary-General Pigott, had not then been filled up. The appointment still remains vacant. It is difficult to understand what reason there can be for such delay, as it is presumed that the ordinary routine has been followed in this case, viz., that the responsible head of the Department, the Commissary-General at Head-quarters, has indicated to the Commander-in-Chief the name of the officer whom he considers should, under the provisions of the Royal Warrant, be selected to fill the vacancy; and that his Royal Highness has, in due course, endorsed the recommendation, and submitted it for the approval of the Secretary of State for War. Where, then, is the hitch? If with Lord Hartington, we would ask him to consider that a four months' vacancy in the rank of Deputy-Commissary-General means a reduction of the authorised establishment for that period, and renders it necessary that an important Staff appointment, which should be filled by an officer of that rank, should in the interim be held by one of a lower grade. We would also remind his lordship that so extraordinary a block in promotion, and the suspense and anxiety consequent thereupon, can hardly fail to have a depressing effect, not only upon the officers immediately concerned, but upon the whole Department, as indicating an apparent want of sympathy with their interests on the part of those to whom these officers naturally look for support and encouragement. It is to be hoped in the interests of the service that steps may now be taken to fill up the vacancy without further delay.

Some interesting experiments in fire tactics have been carried out at Aldershot by the Infantry Brigades during the past month, in accordance with instructions received from the Horse Guards. The object of the experiments by the 1st Brigade was to try the effect of long-range firing on a column of troops, and for this purpose 80 picked shots were selected, who fired volleys at screens representing six companies of 40 files in quarter-column, at ranges of 1,400, 1,200, and 1,000 yards, five rounds at each distance, with the following result:—Number of rounds fired at the three distances, 1,200; hits, 1,290; per-centage of hits, 107·5. This was a very good result. Some shots passed through more than one screen, which accounts for the number of hits being greater than the number of rounds fired. The objects of the exercises carried out by the 3rd Brigade were (1), to observe the results obtained by a systematic arrangement of the men, according to their proficiency as shots; (2), to compare the value of independent firing with that of volley firing, at distances above 350 yards; (3), to observe the effect of continuous automatic reinforcement by small organised bodies, which do not necessitate so marked a "closing-in" movement in the fighting-line as is usually observable. The force employed consisted of two companies of 60 files each, attacking from company columns of sections—marksmen, first-class shots, second-class shots, &c., arranged in that order from front to rear of each company column. The targets used in the first stage were 50 dummies, extended over 100 paces; six 6-ft. screens, as supports; twelve 6-ft. screens, as main body; and in the second stage 100 dummies extended over 100 paces, and six 6-ft. screens as supports. The fire was independent, instead of by volleys, at all ranges above 550 yards. The following were the results:—Total number of rounds fired, 2,131; number of hits, 537; per-centage of hits, 25·19. The state of the targets and screens used on this occasion was, unfortunately (owing to a mistake in the issuing), not such as enabled a perfectly reliable record of hits to be obtained. The last series of experiments were carried out by the 2nd Brigade, the object aimed at being the same as in the case of the 3rd Brigade, with the exception of (3); the force employed was the same, but the attack was made in the normal formation, the best shots being in the half company first extended. The targets were also the same as those used by the 3rd Brigade (except that the screens representing supports were only 2 ft. high instead of 6 ft.), and the firing was at the same distances. The following were the results:—Number of rounds fired, 2,400; number of hits, 183; per-centage of hits, 7·62. The weather was most unfavourable during the time the experiments were being carried out by this brigade, which may account for the poor results on this occasion.

A Reappropriation Board—Colonel C. W. Robinson, A.Q.M.G., president—assembled at Aldershot yesterday, to consider and report upon a proposed reappropriation of the South Camp for three battalions instead of four.

A Calcutta telegram conveys the disconcerting intelligence that a sudden advance to important strategical points beyond Sarakhs has been made by the Russian outposts. Such a manœuvre in the face of the work which the Boundary Commission have now in hand is a piece of duplicity which can hardly do otherwise than loosen what little faith yet remains in the sincerity of Russian professions. It is reported that the British Government have requested Russia to withdraw her troops beyond Sarakhs, pending the decision of the Boundary Commission, but the sudden advance which is chronicled in the same telegram is uncomfortably suggestive of a determination to take time by the forelock, let the decision be what it may.

It is authoritatively announced that Russia has at last obtained from the Porte the privilege of transporting 1,800 soldiers per annum through the Dardanelles, *en route* to Saghalien and Vladivostock. As it is not said whether their transport will be effected by one or more men-of-war, in virtue of this arrangement the whole Russian Fleet is now at liberty to pass the Straits, and there would be difficulty in controlling the number of troops on board. It is quite contrary to the stipulation in the Treaty of Paris, 1856, and we hardly suppose that our Government will allow it to pass without comment.

An Egyptian paper, *El-Ahram*, says that the Government of his Highness had resolved to fix the salary of Colonel Chermside, Governor of the Red Sea littoral, at the sum of E.£1,200 a year, and that this officer, on account of the difficulties of the Egyptian treasury, had refused to accept more than the simple salary attached to his rank (miralaï). *El-Ahram* adds the reflection, "May others go and do likewise!"—a reflection very sensible, but one which it must have given *El-Ahram* some pain to make.

It is a significant fact that the minimum height of (recruits) artificers and tailors for the Royal Artillery, has, under a general order, been reduced from 5 ft. 5 in. to 5 ft. 4 in.

Aldershot is about to lose its popular stationmaster, Mr. W. G. Adkins, who has been promoted to the position of superintendent of the central district of the London and South-Western Railway. During the last twenty years Mr. Adkins has had frequent opportunities of showing his courtesy and energy to the principal officers connected with or visiting the Camp, and by whom he has always been regarded as one of the best educated and most intelligent of the officers in the railway service, while he has been specially noticed and commended for his valuable aid and advice in the conducting of experiments in connection with military railway transport. The present opportunity would be a fitting one for the numerous members of the military service to band together and present Mr. Adkins with a testimonial, as an expression of their admiration for his many excellent qualities.

The Soudan just now is a land of sensations. The announcement that the Mahdi has lost three thousand men in an attempt to "dry up the Nile" will probably excite more vigorous scepticism than secure unhesitating belief. The astounding character of the news assuredly goes a long way towards atoning for the almost unbroken silence which prevailed for a week concerning General Gordon and his adversary.

A telegram from Paris states that General Emile Felix Fleury died on Thursday in that city. He had nearly completed his 69th year, having been born December 23, 1815, in Paris. He was educated at the College Rollin, and having shortly afterwards lost his fortune, he, on November 16, 1837, entered the Corps of Spahis, then but just raised for service in Algeria. He served through eleven campaigns, in which he received three gunshot wounds, and was three times commended in the orders of the day. His bravery procured him rapid promotion; he become a Sub-Lieutenant in 1840, Captain in 1844, and rose to the command of a squadron in July, 1848. In 1851 he again went to Algeria, where he took part in the expedition against the Kabyles. He soon after returned to Paris, where he was again attached to the Staff of the Prince President. On the establishment of the Empire he was appointed Colonel of the Regiment of Guides and Aide-de-Camp to the Emperor, and in 1856 he became a General of Brigade. In 1862 he was appointed First Equerry to the Emperor, and in August, 1863, was promoted to the rank of general of division. In 1865 he was appointed a Senator, and at the end of 1866 he was sent as Ambassador to King Victor Emanuel. In 1869 he was appointed Ambassador to St. Petersburg, a post which he resigned immediately after the Revolution of Paris in September, 1870. He remained on the disposable list of the French Army till 1879, when he retired.

A writer in a Madras paper give a most deplorable account of the senility that exists in the Madras Native Army; and the *Army List* of that Presidency fully bears out out his assertions as facts. He says, "If we look at the rolls of officers serving with our 32 Madras Infantry regiments, we shall find that there are no less than 48 full colonels employed with the colours, or drawing their pay at home, while others do their work for them. Our wing-commanders are all well up on the roll of field rank; and no less than 43 of our wing-subalterns are also field-officers. In other words, out of the 224 Europeans required to officer our regiments, we have no less than 155 of field rank." He proceeds to show the utter hollowness of the argument that the native officers can fill the places of those captains and lieutenants who ought to be with every regiment, by quoting the average service of the subadars and jemadars, which generally exceeds that of their own commandant, though he may be of over five-and-thirty years' army service himself. In truth, the senility of the Madras Native Army is something almost beyond belief. Regiments have often four colonels on their rolls, and the remainder are majors and young lieutenants. Captains are conspicuous by their absence. The native officers are so old and untrustworthy, that, as this writer puts it, "they cannot be entrusted with the superintendence of a squad at musketry." The full burden and responsibility of company work falls upon the shoulders of colonels whose army rank and years are manifestly incompatible with the proper performance of duties of such a very subaltern character.

The following statement of the Torpedo, Gunnery, Hydraulic, and Pilotage Courses, 1885 and 1886, is to be substituted for those previously issued:—1. Special full-pay torpedo course on the Vernon, July 15 to Oct. 14, including Whitehead, commences third Wednesday in July, and lasts 66 working days, *i.e.*, 43 for torpedo, 21 for Whitehead, and two for examination, for gunnery and torpedo lieutenants, and lieutenants R.M.A. A few other officers will, at their Lordships' discretion, be allowed to follow this course. A list of applicants will be kept at the Admiralty, from which selections will be made. 2. Special half-pay torpedo and gunnery courses for senior officers, on the Vernon, April 13 to June 5, and on the Excellent, June 8 to July 3. Torpedo course commences second Monday in April, and lasts 40 working days, and is followed by a gunnery course for commanders and upwards, lasting 20 working days. Similar gunnery courses will take place at other times, if five officers are ready to join. 3. Lieutenants' short courses, viz., eight weeks torpedo and three months gunnery. Vernon, Jan. 10 to March 6, April 11 to June 5, and Oct. 3 to Nov. 27. Excellent or Cambridge, March 7 to June 6, June 6 to Sept. 5, and Nov. 28 to March 6. 4. Engineer officers, exclusive of acting assistant-engineers.—Four courses each, to last about nine weeks, viz., seven weeks torpedo and two weeks hydraulic. Vernon, Jan. 31 to March 20, April 11 to May 29, June 6 to July 24, and Oct. 3 to Nov. 20. Excellent, March 21 to April 4, May 30 to June 13, July 25 to Aug. 8, and Nov. 21 to Dec. 5. 5. Acting Assistant-Engineers.—A special course, viz., five weeks torpedo and two weeks hydraulic. Vernon, Aug. 1 to Sept. 4. Excellent, Sept. 5 to Sept. 19. 6. Acting Sub-Lieutenants.—Torpedo course in Vernon, for one month. To be on board by 8.45 a.m., ready for instruction:—1885—Jan. 5, March 9, April 13, June 22, Sept. 28, and Nov. 23; 1886—Feb. 22, April 19, and June 21. Gunnery course in Excellent, for three months. To be on board by 8.30 a.m., ready for drill:—1885—Feb. 2, April 8, May 11, July 20, Oct. 26, and Dec. 21; 1886—March 22, May 21, and July 19. Pilotage course, two months. 1885—Jan. 30, Feb. 27, March 27, May 2, July 11, Aug. 8, and Oct. 17; 1886—Feb. 4, April 3, June 26, Aug. 24, and Oct. 18.

THE RESERVE OF OFFICERS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—When the so-called "Reserve of Officers" was formed, I and many others joined it on the implied assurance that it would give some chance of seeing active service. In this we have all been grievously disappointed, as it seems that interest is the only stepping-stone to be relied upon. Although I, a Militia officer, at that time of over 15 years' service, applied to serve as a volunteer in the South African campaign, and was shelved with the notice that my application would have due consideration, yet in Egypt I know a gentleman of my acquaintance served as an officer of the Mounted Infantry, although he had previously only served her Majesty with a pen. Many Reserve officers wished to serve in the Expedition which has just started for Bechuanaland; but those in the Militia were told that in order to do so they must resign their present commissions and enlist as troopers—in direct opposition to the encouragement given them to join the "Reserve." I have served at the present moment over 17 years in the Militia, and on my retirement was informed that I could remain in the Reserve if I consented to serve every year for a month with a Line regiment at my own expense. I should be glad to know whether, after 20 years' total service, a Reserve officer will be granted a step of honorary rank? Otherwise, I can see no inducement to remain in a service where active employment is only granted to those who have a friend at Court, or rather in the War Office.—I am, &c., A QUONDAM NORFOLK.

INDUSTRIAL TRAINING-SCHOOLS FOR THE ARMY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—May I request the favour of a small space in your valuable paper, to ask those who view with satisfaction the establishment of industrial training-schools for the Army, of which this institution is the pioneer, to assist us this Christmas in providing a new set of uniforms? We only require about £30 to do this, and I assure you they are very badly wanted. It may, perhaps, be of interest to many of your readers if I mention that the official report of the annual inspection last August is of a most favourable character, and that an official requisition has already been made for boys trained in the Homes. A new Home, more adapted for the purpose, will shortly be erected at a cost of £2,000, which will, I hope, be followed by many others in different parts of the kingdom. I shall be very glad to receive communications from officers interested in this movement, and to supply papers, plans, &c., of the proposed extension of the work. Contributions to the new clothing fund will be gladly acknowedged.—I am, &c.,

ALFRED V. FORDYCE, Founder and Hon. Sec.

Birmingham Homes for Destitute Boys, Bradford
Street, Birmingham, Dec. 8.

THE "ILLUSTRATED NAVAL AND MILITARY MAGAZINE."

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—As a constant reader of the above new magazine, I think it is a great pity that the editor does not supervise every portion of it prior to going to press. I presume he does not do so, or he could not possibly have permitted the appearance month after month of an appendix purporting to give the stations, &c., of the whole British Army, which in one particular is not only misleading, but totally inaccurate. In the Territorial regiments, Volunteer battalions are not given their proper title, but are numbered consecutively after the Militia battalions. For instance, the 1st Volunteer Battalion of the W—— Regt. is recorded as the 5th Battalion of the W—— Regt. Where is the authority for it? Until such a change is promulgated by the Horse Guards, the battalion in question is no more the 5th Battalion than the Metropolitan Police or Fire Brigade are; and as one of the officers who still cling to the old order of things, I seriously trust it may never become so. I am told as a fact, but I cannot vouch for it, that in a recent official communication to the War Office the 2nd Volunteer Batn. of a Territorial regiment was designated by the writer as the 7th Batn. of the regiment in question. The writer received a polite letter from the War Office asking to which corps he alluded, as no such regiment or battalion as the one named existed in the British Army. I write this letter from no ill-feeling. On the contrary, I have been a Volunteer, and am a well-wisher to the *Illustrated Naval and Military Magazine*, and I think it a pity that the editor should risk the reputation of his work for accuracy on account of some fad on the part of one of his staff, which is not only likely to cause serious and uncomfortable mistakes, but totally at variance with facts.—I am, &c., LONG SERVICE.

The French war-vessels Beautemps, Beaupré, and Allier left Tamatave on Nov. 23 with troops for Diego Suarez Bay, with the object, it is supposed, of occupying that place.

Messrs. Kendal and Dent have published a compendious chart by which at a momentary glance the difference may be found between the mean time at Greenwich Observatory and the local time at any of the principal towns in the world.

James Brown, painter, 1st-class, of the Repulse; S. H. Cruch, sick-berth attendant, of the Victor Emanuel; Benjamin Fuller, engine-room artificer, of the Asia; William Tippett, armourer, of the Vernon; Edward Warner, bandsman, of the Monarch; John Whyte, engine-room artificer, of the Cockatrice; William Lamerston, leading stoker, of the Rapid; Benjamin Webber, caulker (late), of the Rifleman; Alexander Quin, gunsmith, of the Cambridge; William John Hector, private, 17th Company, R.M.L.I.; Charles Hicks, commissioned boatman, Edward Price, Thomas W. Hill, and Charles James Greer, boatmen, of the Coastguard, have been awarded the medal for long-service and good-conduct.

The Queensland Government propose to offer their new gunboat Gayundah to the Admiralty, for service in Australian waters. The New South Wales Government have ordered two gunboats on the same pattern as the Protector.

Indian Notes.

Lieut.-Gen. Sir F. Roberts, Commander-in-Chief at Madras, has issued the following Order:—"No recruit enlisted after Jan. 1, 1885, will be permitted to marry; or, if already married when he enlists, to have his wife to reside in the regimental lines for three years after his enlistment."

Lord Dufferin arrived in Bombay on Monday. He landed in the afternoon, and was received with great enthusiasm, an immense number of Europeans assembling to greet him. On Jan. 1, Lord Dufferin will hold a Chapter of the Order of the Star of India at Calcutta. The Duke of Connaught and the Nizam will both be present and will receive the Grand Cross of the Order.

The *Times of India* hears that "the troops who will take part in the forthcoming Camp of Exercise in the neighbourhood of Poona will be, in addition to the artillery, two British regiments, the 61st (Gloucestershire) and the 4th (King's Own), and four native regiments, the 3rd, 12th, 25th, and 28th. A siege-train will also be formed. The troops will be formed into two brigades, which are to march out to Digree on Jan. 10. They will encamp two miles from each other. We understand that Col. Stokes, commandant of the King's Own, will command one brigade, and it is possible that Col. Singleton, of the 28th N.I., may command the other, if there is no senior officer present."

Rear-Admiral Salmon was at Simon's Bay on Nov. 19.

In 1860, says a contemporary, Herr Krupp's factory at Essen employed 1,764 hands; in 1870 the number of workmen had risen to 7,084, and the present number is about 20,000. Including the wives and children of the employed, there are 65,381 souls depending for their subsistence on Krupp's works, 20,000 of these inhabiting houses belonging to Herr Krupp. The whole establishment comprises altogether eight sections—(1), the factories at Essen; (2), three coal mines at Essen and Bochum; (3), 547 iron mines in Germany; (4), several iron mines in the North of Spain, in the environs of Bilbao; (5), the blast furnaces; (6), a range at Meppin, 17 kilomètres in length, for gunnery experiments; (7), other smaller ranges (8), four steamers for marine transport. The number of blast furnaces in use is 11, of other furnaces 1,542. There are 439 steam boilers, 82 steam hammers, and 450 steam-engines, of 185,000 horse-power altogether. At Essen alone the works are fitted with 59 kilomètres of rails, 28 locomotives, 883 waggons, 69 horses, 191 carts, 65 kilomètres of telegraph-lines, 35 stations, and 55 Morse apparatuses. At present the Krupp works are engaged in manufacturing for the Italian Government a monster gun, which will weigh 130,000 kilogrammes (say, 130 tons), and for the transport of which two waggons have been constructed each able to bear a weight of 75,000 kilogrammes.

In consequence of the excellent results obtained in Tonquin with the Kropachek repeating rifle, the French War Minister, it is stated, has ordered all the troops sent out as reinforcements to be armed with that weapon. They will receive the new rifles on their arrival at Haiphong and Kelung respectively. According to the *Progrès Militaire*, the initiative to this change in arming the expeditionary corps was taken by the Ministry of Marine. At the same time, comparative trials have been ordered in four corps of the French army with the Gras, Votterli, and other systems of repeating and magazine rifles. France possesses at the present time 60,000 Kropachek rifles, either imported from Austria or manufactured at Saint Etienne and Châtellerault. The only objection to the new weapon is said to be its large calibre (11 millimètres), and it is thought that the French will ultimately adopt an arm of a calibre of nine or even 8·4 millimtères when the Gras rifles are finally dispensed with. At any rate, an actual trial in the field of the Kropachek rifle will be far more conclusive than experiments on a range.

The following is from the December *Navy List*:—Obituary: Chaplain the Rev. J. S. Knight, M.A.; Surg. J. H. Penberthy, M.D. Removals from the Active List:—Sub-Lieut. E. G. W. Digby, resigned; Midshipman W. H. Ryder, resigned; Engineers (for temporary service) H. R. Marsden and S. H. Berry, both resigned.

The *Standard* understands that on the occasion of the visit of Col. Chermside, Governor-General of the Red Sea Littoral, to Cairo, Sir Evelyn Baring last week took the opportunity of ascertaining that officer's views on the future of the Eastern Soudan and the question of the re-organisation of the Native Army. At the meeting subsequently held at Sir Evelyn's residence, there were present, in addition to Nubar Pacha and his colleagues, Gen. Sir F. Stephenson, Mr. Edgar Vincent, Baker Pasha, Col. Watson, Acting Sirdar of the Egyptian Army (in the absence of Sir Evelyn Wood in Upper Egypt), and Col. Chermside.

"Old Campaigner" writes:—"One of our civilian medicos, as 'Inspector-General,' has just been 'relieved from active duties with the Militia Force, and his name placed on the Unattached List of officers.' You may, perhaps, inquire what are the duties of Guernsey Militia medical officers, and how they come with the designation and uniform of a General officer?"

A telegram from Paris says:—"It is announced this evening that both Gen. Brière de Lisle, commanding the troops in Tonquin, and Admiral Courbet have received instructions to avoid engaging the enemy until further orders, and to remain strictly on the defensive."

The *Pall Mall Gazette* states that the War Office authorities are about to send out several Military staff clerks to Cairo to check the accounts relating to the expenditure attaching to the Nile Expedition.

Lord Dufferin arrived at Bombay on Monday, and is expected to be in Calcutta to-day. On Jan. 1 he is to hold a Chapter of the Order of India. The Duke of Connaught and the Nizam will both be present and will receive the Grand Cross of the Order.

Messrs. Percy M. Roberts, 961 marks; Francis A. W. Denman, 949; William J. L. Scriven, 933; Ernest A. Bremner, 932; and Frederick W. Hammond, 927, were the successful candidates for assistant-clerkships in the Royal Navy at the November examinations.

THE CONDITION OF THE NAVY.

In the *Pall Mall Gazette* of Monday a further article appears, entitled "The Admiralty Apology Examined," from the pen of "One Who Knows the Facts," a writer whose able and startling exposition of "The Truth About the Navy," some time ago, excited such well-merited attention, and conduced in no small degree to bring about a more satisfactory condition of affairs. Setting forth the inadequacy of the new programme, he urges that the vital question underlying the whole controversy should be treated by a Royal Commission, including representatives from the Colonies, which would be charged with the duty of reporting as to what proportion the British Navy should bear to the Navies of other Powers, and the duties it should be called upon to perform. With painstaking detail he again compares the Fleets of England and France, and shows by the official figures that, while Cobden held we ought to be more than 80 per cent. stronger than the French at sea, Lord Northbrook is content with 70 per cent. to-day, with 40 per cent. in 1887, and 16 per cent. in 1889. Under the heads of guns, powder and shot, swift cruisers, the torpedo fleet, coaling-stations, home ports, and manning, he compares the Admiralty proposals with what is, he maintains, urgently needed, and he sums up his unanswerable and logical statement. "The Admiralty declare that they are determined to maintain the Naval supremacy of this country, and this is the way in which they think it ought to be done:—As in 1889, France, omitting all doubtful ships, will have 31 modern ironclads against 27 English (reckoning as modern all launched in 1872 and after), they propose to build one additional ironclad, to be ready for sea in 1890, besides three others to be laid down some time next year, and finished some time in 1890 or 1891. As the Elswick firm has built for foreign Governments two swift cruisers, and is building two others carrying 25-ton guns and maintaining a speed of 18½ knots an hour, the Admiralty propose to build five ships carrying 18-ton guns and steaming 17 knots an hour as an adequate protection for commerce afloat valued at £1,000,000,000, scattered over the seas of the two hemispheres. As France is building eight torpedo ships and 18 improved first-class torpedo boats, the Admiralty propose to build seven torpedo ships and 10 improved first-class torpedo boats next year, besides raising the number of their torpedo rams to three. As the protection of coaling-stations is of all measures of defence the most urgent, and as a Royal Commission recommended the expenditure of £2,000,000 upon this three years ago, the Government propose to spend about half that amount, and complete the work in five years. As it is impossible to decide as to what is the necessary strength of the Navy until it is known whether its bases at home are secured from attack, the Government has arrived at no decision on that subject. It is for the nation to say whether this kind of administration is not self-condemned by a simple statement of the case and the remedies which, under pressure, the Admiralty prescribe. What, then, should be done? This. At the earliest possible moment next Session an address should be moved to the Crown praying for the appointment of a Royal Commission to report upon the Naval strength of the Empire, and the proportion which that strength should bear (1) to the Navies of other Powers, and (2) to the wealth, commerce, and colonial possessions of England. On that Commission all the self-governing Colonies should be represented. Its inquiries should be conducted privately, and its report should be regarded as confidential. But it would formulate for the information of the Government of the Empire the opinion of the best experts and the most sagacious statesmen as to what excess of Naval strength it is necessary for England to have above that of France and her possible allies, and as to what measures should be taken in order to give us that Naval ascendency which we have almost lost, and which in five years will be altogether sacrificed. That, it seems to me, is the object upon which all patriotic Englishmen should concentrate their attention."

The Government has sanctioned an extra grant for the purpose of pushing forward the armament of the Navy with new breech-loaders. This does not apply to the prospective orders now being prepared for the defence of the coaling-stations.

An evening contemporary says:—"The re-armament of the Navy is just now the cause of more anxiety to the Government than even that of ships. Some time ago an agent was sent to Essen to endeavour to arrange with Krupp for the supply of heavy guns, but that firm declined to take an order for less than £1,000,000. This the authorities did not see their way to give, and it was then decided that the necessary plant for the construction of heavy steel guns should be sent up to Woolwich. As soon as this became known to the 'trade' in England, so vigorous was the protest on their behalf, accompanied by a hint that certain elections might be influenced adversely to the Administration, that the idea was given up. The 'trade,' however (or so we are told), is unable to furnish ingots of the magnitude requisite for the size of guns demanded for the Navy owing to the inferiority of hammer-power; and, consequently, the authorities are again looking abroad for the necessary material. This time they are negotiating with Schneider at Creuzot both for ingots for the guns and for armour-piercing shot. The bursting of so many guns lately is said to be directly due to the inferior quality of steel furnished by the English makers.

Rear-Admiral Whyte left the Channel Squadron on leave on Wednesday, Capt. Buller, of the Achilles, carrying out the duties during his absence.

Capitaine de vaisseau Dupuis has been appointed to the command of the French armourclad la Dévastation at Brest.

ITS WEIGHT IN GOLD.—The aggregate production of gold, in the United States of America, up to June, 1883, we have just been told on the authority of the *Times*, was 78,965,572 troy ounces. When we saw this particular weight of gold given as the accumulation of all preceding years, we were at once struck with the remarkable approximation of the weight given to what had just come to our knowledge was the output of Cocoa in this country by one firm (James Epps and Co.) for one year only, the last twelve months, it being 86,403,333 troy ounces, or 2,645 avoirdupois tons, and, on the moment we could not withstand recalling to mind the old adage—"Worth its Weight in Gold."

The Army.

Royal Horse Guards. A telegram from Wady Halfa says Col. Burnaby has been appointed Inspecting Staff Officer between Ambukol and Dal.

1st, or Royal Dragoons. Capt. Tomkinson is about to be retired under the age-clause.

9th Lancers. Major the Hon. H. Legge, who for the past four months has officiated in the appointment of Military Secretary to the Viceroy, has made over charge of the duties to Lord William Beresford, and returned to regimental duty.

10th Hussars. The Prince of Wales has presented to the officers a large picture illustrating the part taken by the regiment in the battle of Tamai. It is well executed, and the different officers may be easily recognised. The picture is now hung in the mess-hut at Shorncliffe.

11th Hussars. Writing from Dongola on Nov. 20, the special correspondent of the *Morning Post* says :—"Gen. Gordon laments bitterly the death of Col. Stewart, whom he was sending down in charge of valuable papers, including his diary and the Foreign-Office cipher, which he seems to have feared might by some accident of treachery or of adverse fortune have fallen into the enemy's hands. He reports that at Khartoum it was universally believed to be safe to send the steamer down the river at that time, and he apparently was anxious that Lord Wolseley should have the advantage of hearing fully from Col. Stewart concerning the immediate condition of affairs around Khartoum, and the almost equally pressing question of the future settlement and pacification of the country."

13th Hussars. The following officers have arrived at the Cape from India in H.M.S. Serapis, viz. :—Col. Sir B. C. Russell, Lieut.-Col. Gifford, Majors Spilling, Knox, and Stevenson, Capts. Doyne and Baden-Powell (adjt.), Lieuts. Dimond, MacDougall, Noble, MacLaren, Ogilvy, Grant, and Phillips, Major and Pymr. Shields, Capt. and Qrmr. Lewis, and Rdgmr. Wood.

19th Hussars. A telegram from Dongola, dated Tuesday, says :—"The remainder of the 19th Hussars arrived here to-day." They proceeded on to Handek on Thursday to join the squadron there. Writing from Wady Halfa on the 18th ult., the correspondent of the *Western Morning News*, says : —"A squadron of the 19th Hussars, under the command of Major Trench, after being inspected by Gen. Wood, started for Dongola this morning at 9 o'clock. They would hardly be recognised as Hussars, dressed as they were in grey; but, nevertheless, they looked well and seemed in high spirits. The horses appear small for the men, and are hardly able to carry the average weight of 18 stone ; but they are hardy, compact animals, and will in this climate prove better than heavier horses. I saw them on Sunday morning as they were paraded before going down to the river to be watered, and heard various criticisms made by the men who bestrode them about their size. One stalwart fellow said, 'I believe I could put my legs round my fellow,' and so he did. The journey to Dongola for the Hussars has been divided into 16 marches, and as their route keeps near the river it will count up 249 miles, or nearly 45 miles more than the route, which at several points leaves the river for the desert. The baggage of the squadron was carried by 48 camels, which preceded them."

ROYAL ARTILLERY.

Major J. W. Inge has been selected for a Horse Artillery jacket, and assumes command of C Baty. B Brig., at Aldershot.

Capt. H. P. Willoughby and Lieuts. S. W. Lane and G. D. Baker are *en route* from India in H.M.S. Serapis, *viâ* the Cape.

The *Times* states that,—"The Duke of Cambridge has inspected and approved a dress for the Royal Artillery similar to that worn by the elephant batteries in India, and proposed to be substituted for the uniform of the batteries at home. A loose-fitting Norfolk jacket will replace the present tunic, and breeches with brown leggings will be worn in place of the regimental trousers. The full-dress and fatigue uniforms are similar in pattern, but of different material, the former being of rather finer cloth than is customary. In India, where a similar uniform has been worn for a number of years, it has given satisfaction."

ROYAL ENGINEERS.

The Lahore paper says :—"It is now definitely settled that Major J. H. Western will act as chief engineer and joint Secretary for Irrigation, Punjab, on Col. Home taking up the officiating appointment of Inspector-Gen. of Irrigation under the Government of India. Major Western, comparatively speaking, is a junior officer; but it would have been decidedly inconvenient to bring in anyone from another province."

Scots Guards. A telegram from the Nile says "Lieut. Baden-Powell is returning, owing to ill-health."

Northumberland Fusiliers (5th). The Government of India, on the recommendation of the Commander-in-Chief, have sanctioned the conveyance of the 2nd Batn. from Saharunpore to Umballa by rail.

Royal Fusiliers (7th). Major T. R. Baker, formerly of the regiment, died at Redland Green House, Bristol, on the 7th inst., aged 83 years. Capt. Mostyn, 2nd Batn., is on passage home from India *viâ* the Cape, in H.M.S. Serapis. The 1st Batn. embarks to-day at Portsmouth in H.M.S. Crocodile, *en route* to Gibraltar.

King's Liverpool Regiment (8th). The command of the 2nd Batn. is about to fall vacant by the retirement of Col. Cochrane.

West Yorkshire Regiment (14th). Lieut. Yale, 2nd Batn., is *en route* from India, *viâ* the Cape, in H.M.S. Serapis. Lieut. Swaine, 1st Batn., relieves Lieut. Heigham at the depôt, York, the latter taking up the duties of adjutant. Lieut. Mills, 2nd Batn., is about to join the Commissariat and Transport Staff on probation.

East Yorkshire Regiment (15th). Major Cary, 2nd Batn., has leave from India for 12 months, on private affairs. A memorial slab has been erected in Beverley Minster to the memory of the non-commissioned officers and men who died on service in South Afghanistan, in 1880, by the officers, non-commissioned officers, and men of the regiment.

Yorkshire Regiment (19th). Capt. Franklyn, 2nd Batn., is a candidate for the Staff College, and will compete at the next entrance examination. The serjeant-major and serjeants of the 2nd Batn. gave their annual ball in the Gymnasium at the Curragh, on the 5th inst.

Lancashire Fusiliers (20th). Capt. Wright and Lieut. Gideon, 2nd Batn., are on passage home from India *viâ* the Cape in H.M.S. Serapis.

Royal Scots Fusiliers (21st). Lieut. Northcott, 2nd Batn., has leave to England for 12 months, on medical certificate. "Claymore" writes :—"May I be allowed, through the columns of the *Army and Navy Gaztlee*, to state a grievance that I feel sure I am justified in saying is felt by all the officers of the Royal Scots Fusiliers, whether of the Line or Militia battalions—namely, that the claymore, by the present dress regulations, has to be worn by the officers of that regiment in a most uncomfortable and, what is more important, unsoldierlike manner,—*i.e.*, it is attached to slings depending from the waist-belt ? The shoulder-belt, or 'baldric,' has been the claymore's belt ever since the claymore has been a weapon. The weight of an ordinary regulation officer's claymore is 3 lb. 11 oz. This weight is at present carried entirely by a hook sewn into the side of the officer's doublet. It is extremely uncomfortable, tends to damage the doublet, and in the event of campaigning, or even of peace manœuvres in a bushy country, would be utterly unserviceable. I also wish to draw attention to the anomalous appearance of the uniform the Scots Fusiliers are at present condemned to wear. A cross-belt would give it some semblance of being a Scotch dress in reality, and, as I have said, greatly add to the comfort of the wearers. Those who have the honour of wearing her Majesty's uniform feel more pleasure and pride in a really military dress than in one in the wearing of which they cannot but feel themselves much on the level of the man in brass at the Lord Mayor's Show."

Gloucestershire Regiment (28th). Capt. Pilkington, who has been appointed to the Pay Department, has been ordered to take over the duties of paymaster of the 1st Batn. West Yorkshire Regt. (14th), at Galway.

East Lancashire Regiment (30th) was to have marched from Meean Meer on Monday for Ferozepore.

East Surrey Regiment (31st). The head-quarters and service companies will embark at Gibraltar on the 21st inst., in H.M.S. Crocodile, *en route* to India.

West Riding Regiment (33rd). Major Booth has been detailed for depôt duty.

Royal Sussex Regiment (35th). The special correspondent of the *Daily Telegraph* writes from the Nile :—"With the whale-boats much is to be feared from the inexperience in boating of the soldiers, for the one Canadian told off for each craft will not be able to do more than direct. That there will be some loss of life is most likely, for a tumble into a river like the Nile is almost certain death. This has already been painfully verified by the expedition. When the Royal Sussex sailed up in nuggars guided by experienced skippers and crews, one of their boats was capsized, the reis (captain) and two soldiers were drowned, and the stores lost. Fortunately, the accident occurred near the land, or the loss of life must have been greater."

Sherwood Foresters (Derbyshire Regiment) (45th). Major G. H. Cobbold died on the 11th ult., whilst on the voyage to Melbourne, aged 35 years. He joined the Army Nov. 9, 1867; became lieut., May 5, 1869; capt., Dec. 19, 1877; and major, Oct. 29, 1881.

Border Regiment (55th). Lieut. Caird has been appointed to the depôt at Carlisle.

Essex Regiment (56th). Col. R. Anderson, major on the Retired Full-pay List, died at East Dulwich on the 4th inst., aged 63 years. The deceased entered the Army Jan. 8, 1881; became lieut., April 7, 1843; capt., Dec. 29, 1846; major, Dec. 26, 1856; lieut.-col., April 9, 1868; and retired Jan. 25, 1871. He served in the regiment in the Crimea from Aug. 25, 1855, including the siege and fall of Sebastopol (medal with clasp and K.G., Knight of the Legion of Honour, and Turkish medal). Served also with the Bombay column in North Carrara against the Dessai rebels in Feb. 1858 (medal).

East Lancashire Regiment (59th). *The 5 and 9, Lilywhites' Gazette* for December contains the following notice : —"After something of a struggle, sufficient subscribers have come forward to justify us in continuing the publication of the *Lilywhites' Gazette* in 1885. Some changes are necessary. First, the 'free list' must be knocked pretty much on the head. Of course, we shall continue to forward copies (one) to the service papers, and also (three copies, one for officers' mess, one for serjeants' mess, and one for the reading-room) to our contemporaries *The XXX*, *Our Journal* (14th Regt.), *Our Chronicle* (67th Regt.), &c. But for the rest we must draw the line much tighter. Again, we must make a rule, and stick to it, that subscribers must pay in advance. And lastly, as in its present shape the paper allows it, we propose to make the monthly issue eight or 12 pages according to convenience and the amount of 'copy' available."

King's Royal Rifle Corps (60th). Capt. E. H. Stewart, formerly of the regiment, died at Coventry on the 3rd inst., aged 55 years.

North Staffordshire Regiment (64th). Lieut. Bradwood has been appointed Fort Adjt. at Trinidad.

Welsh Regiment (69th). Lieut. Swayne, a candidate for the Indian S.C., has been appointed to the 16th Bengal N.I., on probation.

Highland Light Infantry (71st). Capt. Gillon has been appointed Superintendent of Gymnasia in the Western District.

Middlesex Regiment (77th). Lieut. and Adjt. Barnardiston has leave from India for nine months, on private affairs. Lieut. Bodé is on passage home from India, *viâ* the Cape, in the Serapis.

Cameronians, Scottish Rifles (90th). Capt. Vivian embarks next week at Queenstown for conveyance to India.

Wiltshire Regiment (99th) arrived at Nowshera, from Peshawur, on the 7th ult.

Leinster Regiment, Royal Canadians (100th). Lieut. Shakespear is *en route* from India in H.M.S. Serapis, *viâ* the Cape.

Royal Munster Fusiliers (104th). Lieut. Blackden is *en route* from India, *viâ* the Cape, in H.M.S. Serapis.

King's Own Light Infantry, South Yorkshire Regiment (105th). The head-quarters and service companies will embark at Portsmouth on the 27th inst. in H.M.S. Jumna, for conveyance to Malta.

Leinster Regiment, Royal Canadians (109th). Capt. St. Ledger has been granted an extension of his period of appointment as adjutant for two years, from the 6th inst.

Rifle Brigade. Capt. Pemberton, 1st. Batn., is *en route* from India, *viâ* the Cape, in the Serapis.

1st West India Regiment. Lieut. Gray has been appointed Garrison Adjt. at Jamaica, vice Lieut. Barkworth.

Pay Department. During November the following changes of station, promotions, retirements, and appointments have taken place in the Pay Department :—Changes of station : Chief Pymr. and Lieut.-Col. Rippon, on promotion, to Edinburgh District ; Pymrs. and Majors Burge, from 23rd Regtl. District to Dover District ; Barnes, R.A., Woolwich, to the Cape ; Hemans, 18th Hussars, Woolwich, to the Cape ; Simpson, Dover District, to 23rd Regtl. District ; Wood, York, to 72nd Highlanders ; Pymrs and Capts. Ternan, 50th Regt., to Unattached List ; Owen, 5th Lancers, to 50th Regt. ; Cooper, Devonport District, to Malta ; Reid, Home District, to Cape ; Rathbone, 20th Hussars, to Cape ; Cowell, Cork District, to Cape ; Lysaght, to Devonport District ; King, to Cape ; Robinson, to Cape ; Christie, 13th Hussars, to Unattached List ; Long, Egypt, to Home District ; Addis, to 1st Batn. 13th Regt. ; Harrison, Home District, to Egypt ; Wellesley, Dublin District, to Cape ; Pinkney, to 2nd Batn. 5th Regt. ; Ashburner, to 2nd Dragoons ; Couran, to 39th Regt. ; Herapath, to Dublin District; Gillon, to 73rd Regt. ; Amedroz, to 105th Regt. Retirement : Major McNair, Staff pymr. with rank of lieut.-col. (Nov. 11). Promotion : Capt. S. Churchill, pymr., to rank of major (Oct. 31). Appointments : Capt. L. E. Amedroz, 105th Regt., from Aug. 18, and Capt. P. Montagu, 12th Lancashire Regt., from June 11. Ten officers on the Retired List of the Department are still employed in various district offices. Five officers have been added to the list of acting pymrs. on probation. There are 42 officers required to fill the following vacancies :—In the Cavalry—1st Royal Dragoons, 4th Hussars, 5th Lancers, and 13th, 18th, and 20th Hussars. Infantry Regiments—2nd Batn. Royal Scots, 1st Batn. Queen's, 1st Batn. Buffs, 1st Batn. 4th Regt., 1st Batn. 5th Regt., 1st Batn. 10th Regt., 2nd Batn. 10th Regt., 1st Batn. 11th Regt., 2nd Batn. 12th Regt., 1st Batn. 14th Regt., 1st Batn. 16th Regt., 2nd Batn. 19th Regt., 1st Batn. 20th Regt., 26th Regt., 44th Regt., 55th Regt., 57th Regt., 68th Regt., 76th Regt., 80th Regt., 87th Regt., 101st Regt., 108th Regt., 109th Regt., 2nd and 3rd Batns. Rifle Brigade, and 10 district offices of various kinds. Lieut.-Col. Nowlan, Chief Paymaster in Ireland, is about to retire.

The Auxiliary Forces.

MILITIA.

2nd Brigade, Southern Division, R.A. The annual dinner of past and present officers of this brigade (late the Hampshire Artillery Militia) took place at the Army and Navy Hotel, Westminster, on Thursday, the 11th inst., when the following were present :—Cols. Hughes-Hallett and Inglefield ; Lieut.-Col. Campbell ; Majors Tillotson (late adjutant) and Garrett ; Capts. Mills, Portal, Hunt, Herrick, Warde (adjutant) ; Lieuts. Hulse, Goodson, McCaul, Ashby, Johnson, Kempe, Cavendish, Lyon (1st Life Guards), and Mr. Sydney Smith.

3rd and 4th Battalions, Worcestershire Regiment. Capt. Everard, 3rd Batn., is engaged in compiling a history of the 1st Batn. (29th Foot). The records of the 2nd Batn. (36th Foot) have already appeared, and we hear that a history of the 3rd and 4th Batns. will appear next year, so that before long the records of the whole four battalions will have been published. Capt. Vale and Lieut. Beale, 4th Batn., and Lieuts. G. A. Bramwell and C. Norbury, of the 3rd Batn., have left England for service with "Methuen's Horse" in Bechuanaland.

YEOMANRY CAVALRY.

Middlesex. The members of B Troop dined together at the Holborn Restaurant on Thursday. The company numbered between 60 and 70. The chair was occupied by Capt. Bickersteth.

The *Morning Post* says :—"The order to raise 50 volunteers from the West Somerset Yeomanry for service at the Cape has been countermanded. The men were much disappointed, as many of them had relinquished situations to enable them to join."

THE VOLUNTEERS.

20th Middlesex (Artists) Rifles. The B Company will hold their annual regimental dinner at the Covent Garden Hotel, Southampton Street, on Monday evening, the 15th inst.

A war-game was played on Thursday at the Horse Guards, Whitehall, Lieut.-Col. Alt, Central London Rangers, commanding red army, and Major Ford, 4th Volunteer Batn. Essex Regt., commanding blue army. The game began at 5 p.m., in the presence of the General Officer commanding the Home District, and it was not concluded at midnight.

"Old Soldier" writes :—"In your issue of the 6th inst., you remark that the silly phrase, 'the battles of England are won in the playing-fields of Eton,' should be knocked on the head at once. I understand the saying to mean, 'the playground turns out better officers than the schoolroom,' and I, for one, believe it."

IMPORTANT to NAVAL and MILITARY MEN.

THE MUTUAL LIFE ASSURANCE SOCIETY.
(*Established* 1834.)

No EXTRA PREMIUM for Climate or War Risk is Charged after the Policy has been Five Years in force, and the Life Assured is aged Thirty.

For Prospectus, Form of Proposal, Accounts, &c., apply to
THE ACTUARY,
39 KING STREET, CHEAPSIDE, LONDON.

NORDENFELT PUNT GUN,

Army & Navy Gazette.
LONDON, SATURDAY, DECEMBER 13, 1884.

THE retention of Khartoum and of the Soudan is a question which belongs to "politics," but it involves military problems of considerable interest for the Power which holds Egypt and for Egypt itself. Sir S. Baker indicates the dangers and disasters which would follow the abandonment of the vast regions of Equatorial Africa won for the world by the Khedive's ancestors; but we do not agree with him in the discouraging view he takes of the possible progress of the Expedition under Lord Wolseley, in the execution of the mission to relieve Gordon, nor do we at all concur with him in the preference he indicates for the Suakim-Berber route under its present conditions, whatever advantages it would possess were a railway in existence from the Red Sea to the Nile. We have not the smallest doubt that the Nile route, which we advocated from the first, long before the Expedition was in formation, is so infinitely superior to a route over desert and sand mountains in an enemy's country for 240 miles, that there is literally no sort of comparison. But it is not at all inconsistent with that view to admit that Sir S. and Lady Baker, with a small caval- or camel-cade, could travel from Suakim to Berber very pleasantly in peaceful times, before the Arabs were up and the blood-feud with Christian and Turk began. Ten thousand Sir Samuels would find it no easy matter to carry their proviant and water, their beasts and themselves, there now. Why not make a railway? Certainly it would be desirable, and it will be done anon. But now, how is it to be made? Given money, rails, and all, who is to go out and put down the line, and protect the workmen in making it? It would need an expedition to accomplish that work all to itself, and the progress of such a task would be slow. Osman Digna, despite the bloody tribute he has paid us, is not disheartened; and until he is disposed of by the advance of Wolseley to Khartoum, which will very probably make him think of his position, a railroad cannot be made. But for the return, the route to Suakim from Berber will offer immense facilities, and it will then, we hope, be open. There appears to us no reason why Lord Wolseley should not be in Khartoum long before March, and we hope and believe he will be there by the end of January. In four months the climate and heat of the Upper Nile will be deadly.

Colonel G. B. Wolseley, C.B., A.D.C., who served in the campaign of 1882, has vacated his appointment as Assistant-Adjutant-General in India, in order to join his brother's Staff on the Nile, where he will doubtless have arrived ere this.

The Infantry Sub-Committee of the Permanent Valise Equipment Committee assembled at the head-quarters of the Aldershot Division on Tuesday last to inspect and report upon an Infantry Valise Equipment, the invention of an officer of the Bengal Staff Corps. Since the departure of Colonel Harrison, R.E., who was the able president of this Committee for several years, but little progress can be reported. The members of the Committee are now so frequently changed, that the important matters laid before them, from time to time, for decision, can scarcely receive the attention they deserve. The only thing really permanent about the Committee is its designation, and this is palpably a misnomer.

We understand that officers commanding Militia battalions are, with few exceptions, in favour of recruits being called up as formerly for preliminary drill immediately before the annual training of their regiments, instead of their performing the 56 days' drill on enlistment.

The proposal to concentrate the signallers of each regiment in one troop or company does not meet with the approval of commanding officers. At home, the proposed arrangement would certainly be a convenient one; but on active service, for obvious reasons, it would be most undesirable that the visual telegraphers of a regiment should be so concentrated.

Major-General M. F. Downes, R.A., whose retirement on full-pay was gazetted in October, has resigned his position as Commandant of the South-Australian permanent and volunteer forces, the resignation to take place at the end of the year. No successor has yet been appointed. The South-Australian Government propose spending a large sum of money on defences during the coming year.

It has at length been ordered that a selection from recent issues of weapons, swords and bayonets, to Cavalry and Infantry regiments shall be thoroughly tested by specially appointed experts, and a number of these weapons have been sent to the Tower for this purpose. Numerous complaints as to the bad quality of the material used in the manufacture of steel weapons have reached the authorities recently, particularly as regards the new pattern sword, which is made at Birmingham, and which is about 1 lb. 6 ozs. lighter than the old pattern. In several instances, the regimental armourer-serjeants, who are quite capable of forming a just estimate of the value of the weapons, have, on trial, found them wanting. But this procedure of the regimental authorities is said to be irregular, hence the present examination.

The appointment of President of the Ordnance Select Committee will not be vacated by General Sir Collingwood Dickson, R.A., notwithstanding his retirement, until April 1 next. Possibly before that time, material changes in the duties of that Committee may take place.

As we stated last week, Colonel Chapman, Sir Donald Stewart's Military Secretary, vacates that appointment and proceeds to England for regimental duty. Report has it that he will be recommended by the Commander-in-Chief for the post of Quartermaster-General in India, on its being vacated by Sir Charles Macgregor next year. The rules laid down regarding the appointment of officers to the head of the Adjutant-General's Department having only recently been over-ridden, possibly there will be no difficulty in arranging matters as regards the appointment of Quartermaster-General. It has, however, always been, and it certainly always should be, the rule that the Indian service should have its share of the good things of the country in which the lines of the officers composing it are cast; consequently, the ruling, which has been in force for so many years, and which has worked well, that when the British service gives the Adjutant-General the sister service should fill the Quartermaster-General-ship, should be rigidly followed. Of recent years, with one exception, the former service has reckoned the Adjutant-General amongst its members, the Indian service giving the Quartermaster-General. When Sir P. S. Lumsden was Adjutant-General, Sir F. Roberts, although one of the old Indian Artillery, was Quartermaster-General, reckoning as of the British service. It is to be hoped that this ruling will be adhered to, and that as the Adjutant-General for the next five years comes from England, the Quartermaster-Generalship will go to the Indian services. Colonel Chapman belongs to the Royal Artillery—the British service—and although fully qualified for the appointment, there are Colonels Collett and Lockhart, of the Indian service, equally qualified. Both have served for some years in the Department, both are good men and true, and both thoroughly fit for the appointment, the difficulty being in choosing. Both certainly are at present holding Staff appointments, and Colonel Collett, as Deputy-Adjutant-General, will not complete his term till October, 1887; whilst Colonel Lockhart vacates his on the same day as Sir Charles Macgregor; but the ruling requiring officers to perform a couple of years' regimental duty between appointments on the Staff cannot possibly hold good as regards such a high position as that of Quartermaster-General.

Colonel Chapman has been very active during the last few months in promoting in India his scheme for regimental assistance to men of the Army Reserve, and he may be congratulated on the success of his efforts. Most of the regiments in Bengal have adopted his proposals, and though there have been some signs of opposition, they have come to nothing. As the Commander-in-Chief passed through Umballa, a meeting was held to discuss Colonel Chapman's proposals, at which Colonel Bushman, C.B., presided, and at which both his Excellency and Colonel Chapman spoke. The meeting was well attended by officers and men.

The adoption, in February last, of a new rate of exchange for the conversion of the British pay of troops serving in India, is gradually working a change in the rates of exchange which have hitherto prevailed for the conversion of other items fixed in sterling. One of these items is the British pay of officers serving in India who are promoted to a higher rank under conditions which do not entitle them to increased Indian allowances. Hitherto officers thus promoted have been paid the difference between the British pay of the rank from and to which they are promoted, at the exchange of two shillings and sixpence the rupee, in accordance with an ancient Indian rule, which lays down that British or English pay, when drawn with Indian allowances, is convertible into Indian currency at the abovementioned rate of exchange. There is also a rule to the effect that when British pay is issuable without Indian allowances, such pay is converted at the rate of exchange fixed annually by her Majesty's Government for the payment of British troops serving in the Colonies. It is only natural to suppose that an officer whose promotion necessitated his removal from the Indian to the Home establishment, would, if possible, leave the difference of British pay of his old and new rank undrawn until his arrival in England, where he would then receive it in sterling, and thus avoid a considerable loss in exchange by drawing such difference of pay in India, coupled with the Indian allowances of his old rank, at the exchange of two shillings and sixpence the rupee. In order to remove this anomaly, and to place officers who draw the difference of pay referred to in England and in India, respectively, the Secretary of State for India in Council has decided that an officer of the British service promoted from a battalion or battery in India to a battalion or battery serving elsewhere, shall be paid the difference between the British rates of pay for the two ranks, which may accrue to him while in India, at the rate of exchange fixed for the issue of the pay of British troops in India, instead of at the rate of two shillings and sixpence the rupee.

It is unlikely that the views gathered from Commanding Officers of regiments by the Commander-in-Chief of India, concerning the retention of ammunition in barracks by British soldiers, will be revealed to the public—the Military Department being highly conservative of what it deems to be "confidential documents." It may, however, be fairly assumed, judging from subsequent inaction, that the majority have given it as their opinion that the present system should be retained.

The command of the 2nd Infantry Brigade at Aldershot becomes vacant on April 1 next, when Quartermaster-General Luard vacates.

There is not much good in objecting to accomplished facts, such as the appointment of Sir E. Johnson to the post vacated by Sir B. Walker; but it is not easy for outsiders to understand how or why a very amiable, brave, and kindly Indian Artilleryman—whose excellent qualities in the field and in the bureau are unquestionable—should be selected for the conduct of the Department of Military Education, when there are soldiers of equal service and far greater accomplishments at hand, whose acquaintance with the British Army, with the requirements of the office, and with the standard of education in foreign Armies, as well as their literary skill and performances, appear to ordinary observers to give especial fitness. It may be that the authorities consider the officer in St. James's Square a dummy, who has only to register the decrees of the Civil Service Commissioners, and who is placed at his desk that he may draw pay and allowances, escape extinction, or be compensated for some run of ill-luck or severe misfortune. Certainly Sir B. Walker did so well that the gentlemen who fill up these places may be pardoned for supposing that high professional education and literary attainments are not so useful or necessary at the offices of the Department of Military Education, as tact and temper and general acceptance with those whom it is desirable to please.

We understand that Colonel Sir Herbert Stewart will be appointed Brigadier-General to command the cavalry and four camel regiments on service with the Nile Expedition.

It is not improbable that one of the surprises of the future will be the abolition of the infantry valise. In all our recent campaigns the valise, it is said, has been discarded, and it is argued that, if it can be dispensed with in time of war, there is no necessity for this encumbrance in time of peace. The ammunition, "iron rations," and various small but necessary articles of kit will be stowed away in several cunningly-contrived pockets in the new-fangled garment, or tied-up in a cotton handkerchief and slung over the end of the rifle. Such a "measure of reform" would be a most popular one with the British soldier of the day, whose greatest enemies are his valise equipment, rifle, and bayonet.

The opinion prevails pretty generally in Egypt that Sir Evelyn Wood, on the termination of the Nile Campaign will leave the Khedive's service and return to military employment.

A number of rifles fitted with the "thumb-trigger" have now been supplied to several Infantry battalions for trial and report. The object of the trial is to ascertain whether for correct aiming a thumb-trigger is preferable to the ordinary finger-trigger. Commanding officers have been ordered to report on the following points:—(1), If they find that the men to whom they have issued rifles fitted with the thumb-trigger fire more accurately with them than with the finger-trigger; (2), if they have any objection to the thumb-trigger, either on the score of convenience or of safety. In order to give the new system a fair trial, half the rifles will be issued to recruits and half to old soldiers, and no trial for accuracy will be made until the men are thoroughly acquainted with the new form of trigger. Reports will be rendered to the Horse Guards not later than a month after date of issue of rifles.

It is officially announced that Major-General J. I. Murray will be transferred to the Lahore Division from Lucknow, where Lieutenant-General Hume vacates on November 30. This will leave Lucknow for Major-General Dillon.

Deputy-Surgeon-General H. B. Hassard, C.B., has been appointed Principal Medical Officer in Ireland.

The staff of the instructional kitchen at Aldershot have been carrying out a series of experimental trials during the week with Scherrer's patent portable cooking apparatus, a German invention. This cooking kitchen is on wheels, and can easily be drawn by one horse or mule. It will cook rations of any kind in the field for a regiment, and will bake, boil, or stew while on the line of march. On Tuesday last it was drawn by mules through the camp while the dinners of the Leicestershire Regiment were being cooked in it. The experiments have been carried out under the immediate direction of Lieutenant-Colonel Sartorius, superintending officer of the cooking kitchen, and have given great satisfaction to the Camp authorities, who will doubtless report favourably on it.

The Navy.

ADMIRALTY, Dec. 6, 1884.

Boatswain W. Freathy has been promoted to the rank of Chief Boatswain in her Majesty's Fleet (Dec. 6).

ADMIRALTY, Dec. 11, 1884.

Chaplain the Rev. R. Egan, B.A., has been appointed Naval Instructor in her Majesty's Fleet (Dec. 5).

APPOINTMENTS.

Captain—Arthur A. Alington, to the Satellite.

Commanders—Charles J. Norcock, to the Defiance; Charles J. Kennedy Purvis, to the Penelope, additional, for Coastguard duties.

Lieutenants—Arthur H. Smith-Dorrien, to the Invincible, additional; Charles T. Gimlette and George S. Shuckburgh, to the Alexandra, additional; Francis H. Davies, to the Superb, additional; Frederick B. Warren, to the March, additional; Walter V. Anson, to the Iris, additional; Charles G. Dickin and Algernon H. Anson, to the Defiance.

Sub-Lieutenants—Arthur Hayes Saddler, to the Banterer; Henry Ashwin, to the Hector, for the Avon; William C. M. Nicholson, to the Hecla; Algernon J. Hotham, to the Audacious, additional.

Chaplains—Rev. John Cavanagh, B.A., to the Flora, additional; Rev. John Brabazon, M.A., to the Diamond; Rev. Robert Egan, to the Cleopatra; Rev. John A. Dougherty, to the Sultan, as Naval Instructor; Rev. Arthur P. Hill, to the Repulse.

Paymasters—Isaac B. Moorman, to the Hercules, for Coastguard duties on shore; Francis B. Baverstock, to the Durham; Arthur Le B. Corrie, to the Lion.

Engineers—Charles Dawe, to the Excellent, additional; Joseph H. Pill, to the Asia, for the Collosus; Benjamin J. Lewis, to the Asia.

Assistant-Engineer—Edward J. Rutter, to the Hector.

Clerks—A. R. G. Beal, to the Crocodile; E. H. Innes, to the Minotaur.

Gunners—John H. Beatty, to the Excellent, additional; Thomas Davidson, Daniel G. O'Connell, William Brockman, Edwin Irwin, and James G. Ott, to the Defiance.

Boatswain—James Boyle, to the Penelope.

Carpenters—John W. Kelly, to the Crocodile; Henry Gay, to the Indus, additional, for the Black Prince.

COASTGUARD.

Surgeon and Agent—A. Saunders, to Croil and Fifeness.

Chief Boatman—Peter Kinley, Dingle, to be chief boatman-in-charge, Seafield.

Commissioned Boatmen—Levi Edwards, Strangford, to be chief boatman, Ballycotton, vice O. Ahern, removed; Charles Sullivan, Aberporth Detachment, to be chief boatman, Angle, vice D. Warlow, promoted; Henry Lang, Rhosneiger, to be chief boatman, Newquay, vice Murphy, pensioned.

Achilles, Capt. Buller, after the cruise, will return to Plymouth on Dec. 18, for Christmas.

Albacore, Lieut.-Com. Smythies, was at Port Said on Dec. 3.

Alecto, Lieut.-Com. Harston, left Elmina on Nov. 14 on a cruise to various ports in the Bights of Biafra, visiting the islands of Anno Bom and Fernando Po, to recruit the health of all on board after the severe outbreak of fever which has occurred consequent on her recent expedition up the Niger. Having completed this duty, she would return to Cape Coast Castle.

Alexandra, Capt. Rawson, was at Malta on Dec. 3.

Amethyst, Capt. Brent, left Bermuda on Nov. 18 for the River Plate.

Amphion, twin-screw steel second-class cruiser of the Mercury and Iris type, went out in charge of Com. Fortescue, on Tuesday and Wednesday, for trials of her machinery. She is specially designed for a high rate of speed, and is fitted with two sets of horizontal compound direct-acting engines, each set having one high-pressure and one low-pressure cylinder, with a surface condenser. The vessel was built at Pembroke, and launched in November of last year. Her length is 300 ft., her breadth 46 ft., and her displacement of tonnage 3,750 tons. Her engines are fitted with patent reversing gear, and are contracted to indicate 5,000 horse-power. The results obtained as a mean of the six hours' run were:—Steam pressure in boilers, 88 lb.; vacuum in the condensers, starboard, 26 in., port, 25 in.; revolutions per minute, starboard, 95·2, port, 95·1; indicated horse-power, starboard, 2,867, port, 2,794. Experiments made with jet injection gave the following mean results:—Steam, 75 revolutions per minute; starboard, 74·8; port, 75·9; mean pressure, high, starboard, 34·9; port, 31·1; low, starboard, 6·9; port, 7·8; vacuum, starboard, 19·5; port, 20·5; indicated horse-power, starboard, 1,447; port, 1,449; total, 2,896. The mean speed attained was 17·2 knots, with 5,661 indicated horse-power. The trials are regarded as highly satisfactory. The Amphion is to be brought forward at once for commission.

Arab, Com. Stopford, was at Berbera on Nov. 22, and expected to arrive at Aden on Dec. 6.

Ariel, Lieut.-Com. Festing, arrived at Sheerness on Dec. 6.

Assistance, Capt. St. Clair, is still at Skye.

Banterer, Lieut.-Com. Haigh, is about to be relieved by the Seahorse.

Bittern, Com. Mann, was at Suez on Dec. 3.

Boadicea, Capt. Church, was at Simon's Bay on Nov. 19.

Briton, Capt. Lloyd, was to proceed to the Persian Gulf about Nov. 27.

Bullfrog, Lieut.-Com. Papillon, was at Jamaica on Oct. 25.

Canada, Capt. Curtis, was at Bermuda, and will accompany the flagship for cruise in the West Indies.

Carysfort, Capt. Stewart, was at Alexandria on Dec. 3.

Cockatrice, Com. Hayes, was at Constantinople on Dec. 3.

Condor, Com. Domville, was at Suakim on Dec. 3.

Constance, Capt. Doughty, left Honolulu for the Hervey Islands, Tahiti, and Coquimbo on Sept. 22.

Coquette, Lieut.-Com. Crowe, was at Suakim on Dec. 3.

Crocodile, Capt. Carr, leaves Portsmouth to-morrow with 1st Batn. Royal Fusiliers from Colchester for Gibraltar, where she will embark the 1st Batn. East Surrey Regt. for conveyance to Bombay.

Cruiser, Com. Hughes-Hallett, was at Malta on Dec. 3.

Cygnet, Lieut.-Com. Gardiner, was at Suakim on Dec. 3.

Dart, Lieut.-Com. Moore, which recently arrived at Sydney from a cruise among the South Sea Islands, has been taken up to Fitzroy Dock for an overhaul.

Decoy, Lieut.-Com. Hay, was at Berbera on Nov. 22, and ordered to Aden shortly.

Diamond, Capt. Dale, was at Sidney on Oct. 22.

Dido, Capt. Vander-Meulen, was at Barbadoes on Oct. 10.

Dolphin, Com. Wilmot, was at Suakim on Dec. 3.

Dragon, Com. Anson, was at Busreh on Nov. 6.

Dreadnought, Capt. Fremantle, was at Malta on Dec 3.

Euryalus, Capt. Hastings, was at Bombay on Nov. 21.

Express, Lieut.-Com. Knox, was at Jamaica on Oct. 25.

Falcon, Com. Pringle, was at Suakim on Dec. 3.

Fantôme, Com. Osborne, was at Bermuda on Nov. 22, and will accompany the flagship on her cruise to the West Indies.

Forester, Lieut.-Com. Hodgkinson, is still at Skye.

Forward, Lieut.-Com. Furlonger, visited the various parts of the coast in and about the Cameroons recently annexed by the Germans, afterwards calling at the Portuguese ports and the River Congo, and then proceeding to St. Helena and Ascension to give leave to her crew and obtain stores, returning to Cape Coast Castle when this programme has been completed.

Frolic, Com. Parr, has gone to the Oil Rivers with her Majesty's Consul, and then returns to Cape Coast Castle.

Garnet, Capt. Hand, was at Newfoundland on Nov. 4, and on being relieved by the Tenedos, about Nov. 23, would proceed to Bermuda, and accompany the flagship to the West Indies.

Grappler, Lieut.-Com. Cochran, was at Gibraltar on Dec. 6.

Harrier, Lieut.-Com. Pike, was at New Guinea by last advices.

Helicon. Lieut.-Com. Winsloe, was at Alexandria on Dec. 3.

Heroine, Capt. Blackburne, remained as senior officer's ship on the coast of Chili and Peru on Nov. 17; she is ordered to meet the flagship at Payta, Jan. 15.

Himalaya, Capt. Palliser, left Port Said on Dec. 8, outward bound.

Humber, Com. Errington, was at Suakim on Dec. 3.

Imogene, Lieut.-Com. Gough, was at Constantinople on Dec. 3.

Inflexible, Capt. Seymour, was at Malta on Dec. 3.

Invincible, Capt. Buckle, was at Malta on Dec. 3.

Iris, Capt. Rice, was at Malta on Dec. 3.

Jumna, Capt. Singleton, left Malta on Dec. 9, homeward bound.

Kingfisher, Com. Rainier, under orders for the East Indies, has been refitted with great despatch, as the vessel only returned from the Pacific station in September last. She has had her armament increased for this commission by an equipment of machine-guns. She will probably leave to-day, and will take the place of the Dryad, recently condemned as unfit for active service.

Malabar, Capt. Harris, left Port Said on Dec. 10, outward bound.

Mallard, Lieut.-Com. Browne, was at Bermuda refitting; she was paid off on Nov. 14, and recommissioned on Nov. 15.

Minotaur, Capt. Britten. The boilers of this ship requiring repair, she will be in the dockyard hands at Portsmouth for some time to come.

Miranda, Com. Acland, arrived in Sydney Harbour on Oct. 18 from a cruise amongst the islands, extending over five months. While on the way to Apia, the Miranda slightly grounded on a coral patch, but suffered no injury. Affairs on the islands were found to be comparatively quiet. While at Havannah Harbour, information was received from the schooner John Hunt that her captain, John Leahy, had been murdered by the natives of Bushman's Bay, Mallicolo. Accordingly, the Miranda proceeded thither to investigate, and was shortly afterwards joined by the Undine, Lieut.-Com. Cross. The natives were defiant, and refused to give up the murderers. They were allowed one day's grace, but mustered in strong force next morning, brandishing their spears and showing fight. On the Miranda opening fire, however, they speedily retreated to the bush. An armed force was then landed from both ships with the intention of destroying the village, which, however, was too far inland, and the country being extremely difficult to travel, the plan was abandoned. The Miranda then proceeded to Apia, when a force of 105 men was landed, who destroyed the village of Marrachee for the murder of a trader by the natives. On reaching Noumea, several French men-of-war were found in harbour, including the line-of-battle ship Navarine, which had just landed a large body of convicts from France.

Monarch, Capt. Bedford, was at Alexandria on Dec. 3.

Mutine, Com. Edwards, was at Esquimault on Nov. 17; on return of the Satellite was to join the flagship.

Myrmidon, Com. Hoskyn, was in the Red Sea on Dec. 3.

Nelson, Comdre. Erskine. At a meeting of the Geographical Society of Australasia, Sir Edward Strickland was requested to communicate with Comdre. Erskine, with a view of sending a representative of the Society in the Nelson to New Guinea, to attend the ceremony of proclaiming a British protectorate over a portion of that island. The commodore having given a favourable reply, Mr. J. F. Mann, L.S., accepted the council's nomination to represent the Society, and accordingly joined the Nelson before her departure; she was at Sydney by last advices.

Neptune, Capt. Maxwell, will return after the cruise to Portsmouth on Dec. 18, for Christmas.

Northampton, Capt. Digby, left Halifax on Nov. 6, and arrived at Bermuda on Nov. 11, and will leave for cruise in the West Indies the beginning of January next.

Northumberland, Capt. Robinson, after the cruise, will return to Plymouth on Dec. 18, for Christmas.

Opal, Capt. Brooke, left Cape Coast Castle for Elmina, distant eight miles, under sail on Nov. 12, but being unable to fetch the latter anchorage, anchored again off Cape Coast Castle the same evening. She proceeded to Elmina under steam the following morning, and returned to Cape Coast Castle on Nov. 15, where she would await the arrival of her relief, the Rapid.

Orontes, Capt. Andoe, was at the Cape last Saturday.

Osprey, Com. Dowding, had arrived at Zanzibar from Madagascar on Nov. 21.

Paluma, Lieut.-Com. Richards, will probably leave for the Australian station in about eight days. She will, after completing her surveying work, be turned over to her owners, the Queensland Government.

Pelican, Com. Hope, was at Panama on Nov. 17, waiting orders; she is ordered to meet the flagship at Payta on Jan. 15.

Philomel, Com. Lang, was at Zeila on Nov. 22, and ordered to proceed to Berbera on Dec. 4.

Rambler, Com. Vereker, arrived at Sheerness from Chatham and went out on trial on Dec. 8. She will probably leave Plymouth for surveying service in the East Indies and China in about eight days. She will convoy the Paluma across the Bay.

Raven, Lieut.-Com. Ross, was at New Guinea by last advices.

Sappho, Com. Castle, was on the coast of Chili and Peru on Nov. 17; she is ordered to meet the flagship at Payta on Jan. 15.

Satellite, Capt. Theobald, will remain as senior officer's ship on the Vancouver division on return from Metlahkatlah. She was at Esquimault on Dec. 8. Capt. Alington succeeds Capt. Theobald, invalided.

Seahorse, Staff Com. Hosken, left Portsmouth for Portree, Isle of Skye, on Dec. 9, with provisions for the Assistance, Forester, and Banterer.

Serapis, Capt. Douglas, left Simon's Town on Dec. 6.

Sphinx, Comdre. Molyneux, was at Suakim on Dec. 3.

Starling, Lieut.-Com. Sanders, has left Malta for Suakim.

Sultan, Capt. Tracey, will return after the cruise to Portsmouth on Dec. 18, for Christmas.

Superb, Capt. Cleveland, was at the Piræus on Dec. 3.

Swiftsure, Capt. Brand, was at San Francisco up to Nov. 22, and would leave about the 27th for Acapulco and Panama.

Swinger, Lieut.-Com. Marx, was at New Guinea by last advices.

Tamar, Capt. Warren, arrived at the Cape last Saturday, and was to leave to-day.

Temeraire, Capt. Domville, was at Suda Bay on Dec. 3.

Tenedos, Capt. Drummond, was at Halifax on Nov. 6, and would leave about Nov. 20 for Newfoundland.

Triumph will be commissioned on January 1 by Capt. Rose, as flagship in the Pacific, with a ship's complement of 450.

Turquoise, Capt. Woodward, left Zanzibar for Mauritius and Madagascar about Nov. 24.

Tyne, Com. Cochrane, left Malta on Dec. 11 on her way home.

Watchful, Lieut.-Com. Goodrich, left Elmina for Accra on Nov. 13, where, if required, she would embark the Governor of the Gold Coast Colony, convey him to Lagos, and return with him to Accra. After completing this duty, or if not required by the Governor, she would return to Cape Coast Castle for further orders.

Woodlark, Com. Clutterbuck, was on Nov. 21 to proceed to Zanzibar to relieve the Osprey, ordered to Bombay to make good defects.

Wye, Staff Com. Miller, arrived at Sheerness on Dec. 11, and proceeded up the Thames. She brought home the paid-off crew of the Mallard and other time-expired men and invalids from the West Indies.

BOOKS, Etc., RECEIVED FOR REVIEW.

Christmas Gleams (Glasgow: David Bryce and Son)—At the Fall of the Year, hunting song, by Capt, Clark Kennedy (Chappell and Co.)—Zigzag Journeys in the Western States of America, by Hezekiah Butterworth; The Adventures of Six Young Men in the Wilds of Maine and Canada, by C. A. Stephens (Dean and Son)—Paris and the Parisians, edited by Major-General Norgate (Literary Society)—The Atlantic Ocean, December (Macfarlane and Co.)—Cherry Pie, designed by W. Claudius: a variety of Babes-in-the-Wood in picture and story, by T. H. Collins; All in the Sun, by Mrs. Christopher Goddard; Lady Tabitha's Morning Concert; The Little Birds who Went Out to See the World; The Stolen Nails; Sailor Jim (Dean and Son)—A Primer of Bible Geography, by C. R. Conder, R.E. (Sunday School Union)—Cavalry in Modern War, by Col. F. Chenevix-Trench (Kegan Paul, Trench, and Co.)—Christmas Cards and Calendars (Eyre and Spottiswoode)—Harding's Special Originalities, Christmas and New Year Cards (Harding)—Reconnaissance and Scouting, by Capt. R. S. S. Baden-Powell (W. Clowes and Sons, Limited)—One Hundred and Fifty Culinary Dainties, by S. Hobbs; Cheap and Choice Cookery for Small Families, by Mrs. H. P. Whitcombe (Dean and Son)—The Egyptian Soudan and the Congo, by Gen. Sir A. Cotton, R.E., Madras (Dorking: R. J. Clarke)—Our Noble and Gentle Families of Royal Descent, by Joseph Foster (Hatchards)—Journey from Heraut to Khiva, Moscow, and St. Petersburgh, by Capt. James Abbott, Bengal Artillery, 2 vols. (W. H. Allen and Co.)—Class-Book of Commercial Correspondence, French and English, by A. E. Ragon; The German Theatre, Nos, 1, 2, 3, by Rev. A. C. Clapin, M.A. (Hachette and Co.)—A Round Dozen, by Robert Overton (Dean and Son).

NOTICES TO CORRESPONDENTS.

Volunteer.—The pay is 5s 3d per diem, and expenses of outfit about £60. Training 27 days, and examinations as prescribed in Militia Regulations.

C. A.—You would have a fair chance in Cavalry.

Many interesting communications, reviews and letters, &c., are unavoidably omitted, owing to want of space, this week.

The Army and Navy Gazette exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional per odicals and journals.

A SUITABLE UNIFORM FOR TROPICAL STATIONS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Your correspondent "Queen's Regulations" is wrong as to the helmet worn by the Commander-in-Chief and Naval officers in East Indies. I have served there for two years lately, and have constantly been in company with the flag. No such dress has been worn; but your correspondent may refer to a former period, when, I believe, something of the kind was worn,—no doubt, owing to the need of some distinguishing mark when naval and military officers were serving together on shore, as in Egypt. I quite agree as to the need for a definite rule as to white (tropical) uniform. Can it be wondered that there should be vagaries occasionally, when there is no regulation dress established?—I am, &c.,

R. H. B.

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. LAURANCE, F.S.S., Oculist Optician, 1A Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

The *Daily News* says:—"Letters from the Cape state that no difficulty is being experienced in the formation of a local irregular force for service under Sir Charles Warren. Offers to join such a force were being continually received by Major Lowe, and many candidates were applying direct to Government House at Cape Town."

The *Vedette* says that there is now at Kiel the model of a submarine boat, invented by Frederick Zchiegner, of Potsdam, which it is expected will be able to travel under water at a high rate of speed, some 200 revolutions per minute being imparted to the screw.

DEATH.

ANDERSON.—On the 4th inst., at East Dulwich, Colonel Richard Anderson, late 56th Regiment, aged 63.

WANTED.—SERJEANT-MAJOR for the 17th Lancs. R.V., Salford.—Apply, to the O.C., Cheadle, Cheshire, forwarding testimonials at the same time and also certificates in possession.

A. J. Windebank, Esq., Chanda House, Fratton Street, Portsmouth, December 22, 1883:—"Watch, chain, and ring to hand. I am very much pleased with their appearance, the watch especially looking a very strong, handsome one, and equal to many I have seen at double the money."

Mr. H. A. Illingworth, 82 Queen Street, Batley, March 7, 1884:—"After four years' trial of one of your 25s. watches, I now desire to express my thanks for the same. During all the time I have had it I have not paid one halfpenny for repairs. It is as good to-day as ever. When I have shown it to my friends, they have valued it at double and frequently at treble the money. To those who wish to possess a cheap, good, everyday watch, I especially recommend the above."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

LIST of PRICES to be obtained of all the Principal Dealers.

HOLLOWAY'S PILLS.—HEALTH OR WEALTH.—No sane person would hesitate an instant in the choice between these two conditions. Now is the season to secure the former, either by restoring or confirming it. These Pills expel all impurities from the system which fogs, foul vapours, and variable temperatures engender during winter; this medicine also acts most wholesomely upon the skin by disgorging the liver of its accumulated bile, and by exciting the kidneys to more energetic action; it increases the appetite for food, and strengthens the digestive process. The stomach and liver, with which most disorders originate, are fully under the control of these regenerative Pills, which act very kindly yet most efficiently on the tenderest bowels.

MILITIA COMPETITIVE. — Major LENDY, assisted by a Field Officer, Graduate of the Staff College, PREPARES a limited number of Candidates. Two hundred and thirty-one of his Pupils have passed for the Staff College and Militia.—Sunbury-on-Thames.

SANDHURST & WOOLWICH.—Assisted by Four Resident Tutors (Cambridge Wrangler, Oxford Honoursman, French and German Diplomés), Major LENDY RECEIVES a limited number of Candidates. Of the last 22 Pupils sent up to compete, 19 were successful. Last July four only went up, and passed 4th, 7th, 10th, and 77th.—Sunbury-on-Thames.

ARMY EXAMINATIONS.—Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

Candidates also prepared for Woolwich and Sandhurst, and for the Militia Literary Examinations.

MILITARY COMPETITIVE EXAMINATION,
September, 1884.

Of four Lieutenants of Militia sent up, the following passed:—

Place.	Name.	Marks.
12.	...*Lieut. C. F. Pinney.........	1794
14.	...*Lieut. J. F. Newton-King	1766
40.	... Lieut. A. B. Fox............	1659

* First trial.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

FINAL MILITARY COMPETITIVE EXAMINATION.

MILITIA OFFICERS prepared for the above at THE ABBEY, ABINGDON, BERKS.

SPECIAL COURSE for March Examination, under Colonel COLVILE, Author of "Military Tribunals," late Brigade-Major; Major F. H. DYKE, Author of "Lectures on Tactics," &c., late Garrison-Instructor, Colchester; and Captain STEWART, late R.A., will COMMENCE on JANUARY 5th, 1885.

Particulars on application to Captain PRESTON.

N.B.—ONE-THIRD of those sent up in 1881, 1882, 1883, and 1884 obtained commissions.

MILITARY COLLEGE, NORTHCOURT, ABINGDON, BERKS.

Northcourt is a hamlet near Abingdon, well adapted for quiet reading.

SANDHURST and MILITIA.—Preliminary and Further (only). Number of Students limited to ten. NEXT TERM will begin JANUARY 5, 1885.

Officers' and Clergymen's sons taken on special terms.—For particulars, references, &c., apply to J. L. HASLEHAM, Esq.

NAVAL CADETSHIPS.

NEWTON COLLEGE, S. DEVON.

This School has just opened out in this new branch of work, with marked success.

ARMY EXAMINATIONS.—PREPARATION in GERMANY.–Mr. R. H. ALLPRESS, M.A. (Cambridge Mathematical Tripos, 1878), has a few Vacancies.—Address, Mönchhof, Neuenheim, Heidelberg.

MEMORY and SUCCESS.—What contributes to success? A good memory.—What causes failure in life? A poor memory.—What can all obtain from Prof. Loisette's Discoveries? A good memory—the PHYSIOLOGICAL ART of NEVER FORGETTING—using none of the "Links," "Pegs," "Localities," or "Associations" of Mnemonics. Lost memories restored—the worst made good, and the best better. *Any book learned in one reading.* Prospectus post-free, giving opinions of Mr. RICHARD A. PROCTOR, Dr. ANDREW WILSON, and others who have studied the System. A Day Class in Never Forgetting and for Cure of Mind-Wandering commences every Monday at 3 p.m. An Evening Class every Tuesday at 8 p.m. Lectures in Families of the Nobility; also taught thoroughly by POST.—Prof. LOISETTE, 37 New Oxford Street (opposite Mudie's), W.C.

CIVIL SERVICE and ARMY EXAMINATIONS.

Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and Major E. J. LYNCH, late Garrison-Instructor, London, 19 Lexham Gardens, Cromwell Road, W., PREPARE Gentlemen for all CIVIL SERVICE Examinations, and for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA; special Classes for the STAFF COLLEGE and Promotion Examinations. EIGHTY-THREE successes in 1882. ONE HUNDRED and FIFTY-ONE in 1883. ONE HUNDRED and FIFTY-FOUR in 1884, viz.:—

MILITIA COMPETITIVE, March.— THIRTY-SIX, viz.: —3rd, 5th, 6th, 9th, 10th, 15th, 16th, 18th, 19th, 22nd, 27th, 28th, 34th, 35th, 36th, 39th, 41st, 42nd, 43rd, 45th, 47th, 48th, 52nd, 55th, 57th, 58th, 59th, 60th, 61st, 65th, 66th, 69th, 71st; and Cavalry, 2nd, 4th, and 9th.

September.—THIRTY-ONE, viz.:—First, 7th, 9th, 13th, 14th, 15th, 16th, 19th (two), 23rd, 24th, 25th, 26th, 28th, 29th, 35th, 37th, 38th, 44th, 46th, 48th, 51st, 53rd, 59th, 62nd, 64th; and Cavalry, 3rd, 6th, 7th, 8th, 9th.

One other failed by only 4 marks, and three more were within 39 marks of success.

95 out of 117 Candidates have passed at the last Three Examinations.

At the Eight Examinations held under the present regulations, the FIRST PLACE has been taken FIVE TIMES.

MILITIA LITERARY, April:—FIRST, 3rd, 4th, 22nd, 29th, 32nd. October:—FIRST, 3rd, 6th, 7th.

Being all sent up on both occasions. There has been no failure in the last SEVEN Examinations.

SANDHURST, July, TEN, viz.:—5th, 13th, 15th, 32nd, 43rd, 53rd, 79th, 83rd, one Hon. Cadet, one R.M.L.I.

WOOLWICH, July, Two:—20th, 53rd. December, all have qualified; final result not known.

STAFF COLLEGE, TWELVE, viz.:—2nd, 4th, 9th, 16th, 19th, 21st, 22nd, 23rd, 24th, 25th, 33rd, 35th, and four others qualified.

PROMOTION.—Twenty-five Officers have passed this year.

PRELIMINARY.—Twenty-eight have passed this year.

INDIAN CIVIL SERVICE.—A Special Class, limited to eight.

FOREIGN OFFICE and DIPLOMATIC. — A Special Class, limited to six.

Courses for all Examinations now proceeding.

NEXT TERM COMMENCES JANUARY 13.

The Preliminary Examination work will be under Mr. J. A. GRATTAN, late Royal Artillery, whose success in this line during the past ten years has been very great.

ARMY EXAMINATIONS. — LIEUTENANTS of MILITIA PREPARING for the MILITARY COMPETITIVE EXAMINATION can be RECEIVED by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath, whose pupils for some years past have continuously maintained a steady average of success, second to none. This year fifteen have been sent up, seven of whom have passed; four in March (one taking first place on the list), and three at the recent Examination. Very few pupils are taken, and there are two resident Military Instructors of high qualifications constantly at work, with a third in reserve in case of pressure. Thus very great individual attention is guaranteed, and the system of lecturing classes entirely avoided. Batcombe is a country village, near no town, but affording opportunity for shooting and other healthy amusements in moderation. References are permitted to the Earl of Harewood, Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of successful pupils.

JERSEY HIGH SCHOOL for GIRLS (Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.

His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

DOVER COLLEGE.

President.—Earl GRANVILLE, K G.

There will be an EXAMINATION for SEVEN SCHOLARSHIPS, tenable in the College at Easter, 1885. There are also valuable Scholarships tenable at the Universities, Woolwich, &c.

The Boarding arrangements are such that each Boarder has a separate bedroom.

For particulars, apply to the Rev. W. BELL, M.A., the Head Master, or W. KNOCKER, Esq., the Hon. Sec.

MILITIA COMPETITIVE EXAMINATION.

The undersigned PREPARES a LIMITED NUMBER of PUPILS (Five) for the above. Successes in March, 1883,—two, one taking the second place (first try); in September, 1883—two, Fowle, 25 (first try); Moir, 27. At the March Examination, 1884, one pupil competed, A. H. Robinson, passing 1st for Cavalry, with 2,018 marks, after four months' work.

Officers prepared for the Promotion Examination. Terms moderate.—Apply, Captain H. C. KING, 13 Blomfield Street, Westbourne Terrace, W.

NAVAL CADETSHIPS.

Special Preparation of Limited Numbers by Mr. J. DALLIN PAUL, for seven years Naval Instructor, H.M.S. 'BRITANNIA.'

For particulars, address Southfield Mount, Paignton.

HINDUSTANEE TAUGHT by a RETIRED OFFICER, Bengal Staff Corps. Has passed High Proficiency Examinations in both Hindi and Urdu at Calcutta.—Address, Captain HAYES, Junior Army and Navy Club, St. James's Street, S.W.

MILITARY EDUCATION, GERMANY and ENGLAND.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the seven MILITIA COMPETITIONS which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils SIXTY COMMISSIONS, although they have only prepared and sent up from Darmstadt an extremely limited number of Candidates on each occasion. For example, out of 32 sent up in 1884, 21 have gained commissions. The names have been repeatedly published, and a complete list will be furnished on application, whereby it may be seen that 42 out of 60 passed first trial, and that very high places have been taken at each Examination.

A number of Students have also, during the same period, passed the MILITIA LITERARY Examination.

At the recent WOOLWICH and SANDHURST Examinations NINE PUPILS competed, and EIGHT CADETSHIPS were obtained (one Woolwich, seven Sandhurst); Mr. H. D. Radcliffe taking SIXTH PLACE on the Infantry list for Sandhurst, with 7,308 marks, and making the highest score of any candidate in German—1,855 marks out of 2,000.

For the Staff College, Captains G. F. C. Mackenzie and C. E. de la P. Beresford have been successful; no other candidates sent up.

The general score now amounts to ONE HUNDRED AND SIXTEEN SUCCESSES, obtained by Pupils since September 1, 1881.

SPECIAL NOTICE.

Colonels WILKINSON and SHAW, having determined to move their Establishment to England (retaining a branch for junior students at Darmstadt), beg to announce that they will form classes at ALDERSHOT on April 1 next for Militia Competitive, Line Promotions, and Staff College. The Head-quarters of the Establishment will be transferred during the summer vacation to HEATH END, near FARNHAM, and Resident Students for Sandhurst and Woolwich will be received as heretofore. Students at the Darmstadt branch will be limited to those studying Preliminary subjects, and no objection will be made to their being young. Good grounding in German colloquial will be secured by special arrangements.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS

HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A.,
Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

WOOLWICH, SANDHURST, and the MILITIA.—(*Candidates for the Further Examinations preferred.*)—Resident and Visiting Pupils prepared by a FRENCH and ENGLISH UNIVERSITY MAN, formerly on the French Staff, and late Modern Language Master in Haileybury, Wellington, and Winchester Colleges. *FRENCH and GERMAN MASTERS reside in the House.* Local references to Colonel H. P. Montgomery, late commanding Rifle Depôt; or to Lieutenant-Colonel C. T. Bunbury, late Rifle Brigade. Passed:— Lieut. C. C. Daniel (the Royal Scots); Lieut. E. P. Webber (the Royal Sussex); Mr. E. H. Somerset (passed his Preliminary in March, and qualified for Queen's Cadetship in July, 1884).

NEXT TERM COMMENCES JANUARY, 1885.
WELLINGTON HOUSE, Winchester.

SPECIAL CLASSES FOR ENTRANCE TO THE STAFF COLLEGE AND MILITIA COMPETITIVE EXAMINATION.

SANDHURST, WOOLWICH, and MILITIA EXAMINATIONS.—Preparation by JOHN GIBSON, M.A., and large Resident Staff, at Bromley, Kent, and Coblenz-on-Rhine.

N.B.—GIBSON'S SANDHURST "FURTHER" GUIDE (No. 3), containing Papers set in November and December, 1884, and Solutions, will be published on Wednesday after the Examination.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Under the patronage of her most Gracious Majesty the QUEEN.

CHAIRMAN—Major-General J. T. BOILEAU, R.E., F.R.S.

Applications from Candidates for admission to this School, either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

The Daughters of all Officers on the Active and Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible; but the Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

Office, 20 Charing Cross, corner of Craig's Court, London. By Order,
G. W. FORSTER, Secretary.

SANDHURST, WOOLWICH, CIVIL SERVICE, UNIVERSITIES, &c.—Hill Lands, Wargrave, Berks.—The NEXT TERM commences January 3, 1885. 37 Successes during past 12 months, with an average of 40 Pupils. For printed lists giving names, positions in order of merit, total marks, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

ARMY.—LINE and MILITIA

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, 16 Nevern Square, Earl's Court, S.W.

MILITARY EXAMINATIONS.

Lieutenant-Colonel G. M. CARDEW (passed second from Staff College) PREPARES SIX PUPILS for MILITARY COMPETITIVE EXAMINATION. Also Officers for Promotion, &c. —14 Observatory Avenue, Kensington. In July, five passed out of six; in September, three passed out of four.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES. —A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c. — Address, HEAD MASTER.

MILITIA CANDIDATES for the LINE. —TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above. Careful individual attention. A Class now at work for the March Examination. References permitted to Colonel Aylmer, S. Cameron V.C., Assist.-Qrmr.-Gen. (Intelligence Branch), War Office; and Colonel C. W. Robinson, Rifle Brigade, Assist.-Qrmr.-Gen., Aldershot.

For prospectus, containing terms, testimonials, and references, address, East Bergholt, Colchester.

MILITIA COMPETITIVE EXAMINATIONS.—MILITIA OFFICERS are prepared in all the subjects for the above Examinations by Lieut.-Colonel N. STEEVENS (late 20th and 88th Regiments and Staff), and Colonel F. J. HUTCHISON (late 64th Regiment, seven years Garrison Instructor at Devonport, and for several months Acting Professor of Fortification at the Staff College).—For further particulars, apply to Lieut.-Colonel STEEVENS, 1 Wolseley Terrace, Cheltenham.

ARMY (PRELIMINARY, FURTHER, and COMPETITIVE) LITERARY EXAMINATIONS.—The Rev. WALTER BAKER, M.A. (Cantab.), late Scholar of his College, &c., offers an unusual combination of advantages. A few Pupils only received. All work is done by individual teaching. No lectures to Classes, but a resident Tutor to every three Pupils, and each Tutor first-rate in his own subjects. For fourteen years, up to and including the last Sandhurst Competition, a steady average of successes, second to none, has been maintained. No town is near, but there are plenty of country amusements, and a liberal establishment is kept. The highest references can be given to noblemen, officers high in the service, and other parents of successful Pupils.—Address, Batcombe Rectory, Evercreech, Bath.

ROYAL INDIAN ENGINEERING COLLEGE, COOPER'S HILL, STAINES. —The Course of Study is arranged to fit an Engineer for employment in Europe, India, or the Colonies. Sixty Students will be admitted in September, 1885. For competition the Secretary of State will offer Fifteen Appointments in the Indian Public Works Department, and Two in the Indian Telegraph Department.—For particulars, apply to the SECRETARY, at the College.

ARMY and UNIVERSITY EXAMINATIONS.—J. WEST, Edinburgh University (two First Classes), F.R.Hist.S., F.A.S., and F. G. BRABANT, M.A. Oxford (three First Classes), RECEIVE a LIMITED NUMBER of RESIDENT PUPILS, to whom they offer special individual attention and a pleasant country home. Long and varied experience, especially in Sandhurst Preliminary and Sandhurst and Woolwich Competitive. Highest references. List and terms on application. —Address, Heathview, Storrington, Sussex.

MILITIA MILITARY COMPETITIVE. MAJOR de THOREN'S very remarkable success with Classes of Militia Officers, strictly limited in number, and to whom he gives his individual and sole attention, continues as usual. The fees at this establishment are extremely low.—For particulars, address Bellefield, St. Helier's.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Officers prepared for Examinations. Correct Idiom guaranteed.—PUNDIT, 7 Beechholme Road, Clapton.

CONNAUGHT MILITARY COLLEGE, WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

THE ECONOMIC LIFE ASSURANCE SOCIETY (Established 1823),

6 New Bridge Street, Blackfriars, London, E.C.,

affords Mutual Assurance with Perfect Security without Individual Liability.

The Funds now amount to £3,619,661, and Annual Income to £377,000.

The Directors having carefully revised their rates for non-participating assurances, Policies may now be effected at proportionately low rates of premium, Without Profits.

The attention of those who desire to effect Policies, at the lowest present cost, is invited to the Society's New Prospectus.

BONUS POLICIES.

Rates of Premium.—From 9 to 26 per cent. less than those charged by other Life Offices.

Results of Economical Management.—Large Bonuses have been declared. Instances are on record of Policies having been trebled by Bonuses.

Division of Profits.—By the mode of dividing the profits, Policies are not only valuable as a provision in case of early death, but become increasingly valuable as an investment in old age.

SPECIMENS of POLICIES in FORCE at VALUATION, 1883 :—

Policy effect'd in the Year	Age at Entry	Sum originally Assured.	Bonus to 1883, inclusive.	Total Sum Assured.	Per-centage of Bonus on Premiums Paid.			Surrender Value of Policy and Bonus.			Equivalent Free Policy, inc. Bonus to Dec. 31, 1883.

SECRETARY (*pro tem.*)

Colonel SHEARMAN, 12 Haymarket, S.W.

REGISTERED OFFICE.

12 HAYMARKET, LONDON, S.W.

Prospectus.

THIS Company has been formed for the purpose of acquiring, developing, and carrying on the business of that well-known and old-established firm of Wine Merchants, Messrs. Allan and Norris, of the Haymarket, and more especially to carry on a Naval, Military, and General Wine and Spirit Trade, and to more fully develop the Naval branch of the business, which has already been carried on for many years with very great success. This business was originally established in Mark Lane by Mr. Allan about the year 1630. It is believed the Haymarket business was established about the end of the last century by the late Mr. George Newman, who was appointed Purveyor of Liqueurs to his late Majesty King George IV., on June 11, 1829, the appointment being signed by the Marquis of Conyngham, then Lord Chamberlain. On October 27, 1830, this appointment was again signed by the Duke of Buckingham and Chandos, then Lord Chamberlain. The late Mr. Samuel Snell, as successor to the above, was appointed Purveyor of Liqueurs to her Most Gracious Majesty the Queen, February 6, 1845, the appointment being signed by Lord Liverpool, then Lord Chamberlain. The Haymarket business was purchased from the executors of the late Mr. Samuel Snell. It is doubtful if any other firm of wine merchants in the United Kingdom can boast of such a pedigree.

ADVANTAGES OF THE COMPANY.

1st. Shareholders are only liable to the amount for the time being unpaid upon their Shares.

2nd. The Company acquires an old-established business in working order, and of high standing and repute.

3rd. No promotion money has been or will be paid.

4th. The business being an old-established one, only such a sum will be allowed for preliminary expenses as the Committee of Directors may approve, with every regard to strict economy.

5th. The supplying of Naval and Military Messes is one of the safest, and at the same time most remunerative class of business in the wine and spirit trade, and is one in which the Company will practically be protected against any loss from bad debts. It is with every confidence expected that the business of the Company will enable a dividend of at least 10 per cent. per annum to be declared and paid.

6th. Till recently a great part of the Naval business has been done by the provincial Wine Merchants at the several Ports, but there is a growing tendency on the part of all Officers to draw their supplies from a London firm, which, from its central position, is placed in direct communication with all parts of the world. And it is confidently expected that, by acting with liberality and promptness in the despatching of supplies when Ships are on Foreign Stations, the Company will be favoured with a very large share of the future business.

7th. London being the Market of the World, enables the Company to offer immense advantages over all Provincial Firms doing a similar kind of trade.

8th. The Company's Offices being within a few minutes' walk of the Admiralty, a messenger will be sent daily, to copy the Appointments, Promotions, &c., and all Officers being Members of the Company will have the privilege of being informed (by telegram if in the United Kingdom) of their Appointment, Promotion, &c., free of cost.

9th. One-half of the amount, to be paid for the purchase of the Lease, Goodwill, Furniture, and Fixtures of the old business, has been agreed to be taken by the Vendor in fully paid-up Shares, thus showing the great confidence which he has in the undertaking.

10th. None of the book debts of the business will be taken over by the Company, nor will they undertake any of the liabilities of the Vendor.

The only contract entered into is one dated December 9, 1884, between Edward Norris of the one part, and the Company of the other part, which can be seen, together with the Memorandum and Articles of Association, at the Office of the Company, and a copy thereof can also be seen at the Offices of the Company's Solicitor.

In the event of an applicant not receiving an allotment, his application money will be returned in full without any deduction whatever.

Prospectuses and forms of application may be obtained from the Solicitor and Bankers, and at the Offices of the Company, No. 12 Haymarket, S.W.

THE KHARTOUM EXPEDITION.

The baggage of the Head-quarters Staff left Dongola on Thursday for Korti. Lord Wolseley and staff, with Sir Charles Wilson and staff, start for Korti to-day in the Mudir's dahabeeah, which will be towed by the Mudir's steam-pinnace. The Mudir will remain at Dongola.

Gen. Herbert Stewart, with the mounted troops, will move from his camp near Handek to-day, to rendezvous at Korti, it is stated, in order to bring up stores.

Some of the whalers with the Essex and Duke of Cornwall's Regiments will be required to make a return trip between the Cataracts. The stores are carried round the Cataracts by camels at Handek, owing to the rush of water. The whalers may also have to be carried across the worst places.

The special correspondent of the *Morning Post* writes from Dongola on Nov. 20 :—" The Staffordshire Regt., who, it was hoped, would have been now at Dongola, or not far off, are making a slow journey in the whalers, and the delay in their arrival has postponed the advance of the force to Debbeh and Ambukol."

It is becoming more and more apparent that the difficulties of the advance up the Nile were somewhat underrated by Lord Wolseley. Before leaving England Lord Wolseley allowed himself to express the anticipation that by Nov. 7 he would have his force concentrated at Dongola, in readiness for a further advance, and the expectation that he would eat his Christmas dinner with Gordon in Khartoum. Not only Nov. 7 but Dec. 7 is past and gone, and but a mere handful of troops have reached Dongola. The force is straggled out along the Nile from Assouan upwards. If Lord Wolseley waits for the mustering about Dongola of his whole command, he cannot commence his march across the Bayuda Desert until the end of January, at the earliest. So far as he is concerned, Gordon's Christmas dinner must be a lonely meal.

The general impression at Dongola is that the main body of the Expedition can hardly arrive at Khartoum before the end of March. The mounted troops will, however, advance at once to Ambukol, and by the end of the month the entire Camel Corps, the Hussars, and two regiments of Infantry will be concentrated at that place. These will be prepared to stretch a hand across the desert to Shendy, to assist Gen. Gordon, should he call urgently for aid, even if the main body has not arrived at the general rendezvous. It is true that such a movement would involve considerable risks. There are two stretches, each of fifty miles, without water; the difficulty of supplying men and camels with provisions enabling them to hold out until the main body of the Expedition arrives would be most serious ; and it is still an unsolved question as to what are the fighting capabilities of the unwieldy Camel Corps, and whether they will be able, unsupported, to withstand the attacks of clouds of active and fanatically courageous Arabs.

The Naval officers do not, it is said, take the same sanguine view of the Nile Valley Expedition and the capabilities of the whale-boats which prevails at military head-quarters. The very last of the expedition should have left Wady Halfa, they say, not later than Aug. 20, for then the Nile was in a condition to be navigated with comparative ease. At any rate, many steamers and launches could have been got over the cataracts, and sent through without much delay to Barkal en Nurri. On a falling river the steamer Nasf Kheir—and subsequently two picket-boats, both of which draw as much water as the paddle steamer—got through the great "Bab" (gate) at Wady Halfa and passed on to Dal. One of these picket-boats, that belonging to the Inflexible and commanded by Lieut. Montgomerie, R.N., has, like the Nassif-el-Kheir, arrived at Dongola, and is now employed in service between here and Handek. Although burning wood instead of coal, she steams very fast, making ten knots an hour against the Nile current. The other picket-boat belongs to the Monarch. She was to have been at Dongola on Nov. 13, but an order was sent to stop her below Handek Cataract. The order was taken down by the little steam launch No. 8, which was brought up the Nile to this place on a nuggar. It is intended to be used as Lord Wolseley's despatch-boat. On Nov. 13 the meaning of the order was made plain, for the Commander-in-Chief left for Handek on board the Inflexible's picket-boat. There he will go aboard the Monarch's picket-boat and proceed down the Nile on a tour of inspection of the posts and stations, and at the same time see how the whale-boats are getting on. It is understood he will go back as far as Dal. He is accompanied by two of his staff, Major Wardrope and Zoreb Bey.

Osman Digna is said still to retain a considerable fanatical influence over the tribes in the neighbournood of Suakim, although he is most cordially detested by them. He has, however, succeeded in collecting a force which is variously estimated at from 2,000 to 3,000. Continual desertions are taking place, as the men are wearied of fighting. He only keeps his followers together by a system of terrorising over them. He treats them with the utmost severity, and kills offenders and deserters with an utter disregard of human life.

The following is the position occupied by the various component parts of the Expedition according to last accounts :—At Debbeh there are three companies of the Sussex Regt. (35th) ; at Handek, 40 miles in advance of Dongola, are the Mounted Infantry, the Guards Camel Corps, and one squadron of Hussars—in all, 800 mounted men. At Dongola are five companies of the Sussex Regt., who are preparing to move forward very shortly. On the line between Dongola and Sarras are six sections of the heavy Camel Corps, six sections of the light Camel Corps, a battery of Artillery, and two squadrons of Hussars. At Wady Halfa there are three sections of light and four of the heavy Camel Corps. The Marine Camel Corps is also at Wady Halfa. The Infantry below Dongola are at present at the following stations :—The Cameron Highlanders (79th) are at Korosko; the West Kent (50th) and the Royal Irish (18th) are at Wady Halfa; the Black Watch (42nd), the Essex Regt. (56th), the Gordon Highlanders (75th), and the Duke of Cornwall's Regt. (46th) are all in boats toiling up the long reaches of cataracts between Sarras and Dal; while, also in boats between Dal and Dongola, are seven companies of the South Staffordshire Regt. (38th).

The reports collected by Lieut. Poore, of the Nassif-el-Kheir, from the native boatmen, are very favourable for the future of the Expedition, for these men assert positively that there is always water sufficient for boats of shallow draught in the higher reaches, and that once above the Batn-el-Hagar Cataracts there is nothing to prevent the boats of the Expedition from proceeding to Khartoum at any season of the year.

Several letters from special correspondents of the morning papers with the Khartoum Expedition were published on Thursday. They contain detailed accounts of the progress of the expedition, graphic descriptions of the difficulties of the route, and are unanimous in declaring that much of the difficulty encountered arises from the delay which took place in despatching Lord Wolseley and his force.

Writing from Dongola on Nov. 20, the *Daily Chronicle's* correspondent says :—" I find nobody here in good spirits, and the fact is one hardly to be wondered at. Nothing is going well. As things now look we shall not make a move from here as a force before Dec. 13 or Dec. 15. But that implies a very great deal which was by no means in accordance with the original design of the campaign. I am driven to the conclusion, much against my will, that, recognising the absolute necessity of having the troops back at Wady Halfa at least at the beginning of April, we are not only some months or so too late, but that a portion of the plan of rescue and retire will have to be given up. All that remains is to do the best under the circumstances; and I am far from saying that the best thing would not be to throw up the sponge. Still, that is an almost inconceivable course, and the one thing to be done is to make sure that no more time is lost." The same correspondent describes Lord Wolseley's activity in the work of the campaign :—"It is marvellous to see him. Up at 5 o'clock or before he is out and about actively till near noon. All the afternoon he works in his room, making work for others and making others work ; he may take an hour's exercise at 5 o'clock, then returns to work till dinner-time. To bed, after perhaps a couple of hours' more intellectual labour, about midnight, and up again before 5. He is never tired, or never shows it. He can ride horse or camel from early morning till late at night without showing punishment, and his personal equanimity and amiability are never upset. But he makes his influence felt, and already there is discernible a decided quickening up all along the line, which may yet save the campaign, which was in danger of being wrecked through delays that at best were due to obstinacy where they were not due to wilfulness."

A telegram from Teheran on Dec. 7 says :—" The united English and Indian portions of the Afghan Boundary Commission had arrived, all well, on the 25th of last month, at Asiab-i-Deew, which is 36 miles north-east of Kuhsan. They then expected to reach Cheharshambeh, near Maimena, about a fortnight later, and there to take up their quarters for the winter."

The *Morning Post* says :—" Recruiting for the Brigade of Guards is now going on in various parts of the country. The vacancies caused by the detachments which left London to form part of the Camel Corps in Egypt have been filled up, but there are still vacancies, owing to a number of men having been transferred to the Reserve."

Col. Scott Moncrieff, who has been in England during the last two months on leave of absence, sailed from Plymouth on Thursday, on his return to Cairo.

INDIAN ARMY NOTES.

[FROM OUR CORRESPONDENT.]

The troopship Crocodile, carrying the 1st Battalion, South Lancashire Regiment, to Aden, had to take fourteen days on the voyage, on account of the quarantine.

Brigadier-General Hogg, Quartermaster-General of the Bombay Army, will, when he vacates his appointment shortly, be succeeded, it is said, by Brigadier-General R. R. Gillespie, C.B., now commanding at Nusseerabad.

Captain V. R. Rae, 2nd Battalion, West Yorkshire Regiment, has joined the Pay Examiner's Office at Calcutta, previous to appointment to the A.P.D.

The late Major P. Walker, who died at sea, is succeeded as D.A.A.G. for Musketry by Captain J. W. M. Macartney, 2nd Battalion, Dorset Regiment, as a temporary measure. The latter goes to Rawul Pindee. Major Barlow, 2nd Battalion, Manchester Regiment, is posted in a like capacity to the Lahore Division.

The Paymasters for England this year are Majors Bampfield, Royal Welsh Fusiliers; Franklin, 2nd Battalion, West Yorkshire Regiment; Wade, 2nd Battalion, Northumberland Fusiliers; and Haldare, 2nd Battalion, Middlesex Regiment.

It is a well-known fact that the Bengal Army, as a rule, shoot better than those of Madras or Bombay. It is, however, curious that the difference in Bengal between first and last of the sixty regiments is as much as 60 points,—a drop of one point per regiment.

As an instance of the importance now attached to the lately despised Hurnai road or railway, Colonel T. Brown, C.B., has been given the local and temporary rank of Brigadier-General whilst employed as superintending engineer of the Libi-Quetta Railway.

Lord Ripon, amidst a hail of parting addresses from native communities of all sorts and the respectful coolness of the European community, is making his way to Calcutta. It is curious that, just as he goes out and Lord Dufferin comes in, there should be signs on every hand that Government really means strengthening our defences, and, above all, pressing the construction of the strategic railways.

The 23rd Pioneers in the Hurnai Valley, engaged at present on the railroad, have had several cases of cholera.

The Zhob Valley Expedition claims to have discovered among the hills a brand-new route to Candahar, which, in point of suitableness, puts the present road quite into the shade.

FRANCE AND CHINA.

From Shanghai we hear that active preparations are being made by the Chinese to get their fleet ready for sea. The ostensible object of the expedition is the relief of Tamsui and the recapture of Keelung. There are many, however, who think that this is only a blind, and that the Chinese fleet are really intended for an attack on Saigon, or for some other operation against the French. Nothing, however, is definitely known, and the disbelief in an expedition against Formosa is founded rather upon the opinion that the Chinese would hardly risk the loss of their fleet in a naval engagement with the French than upon any absolute facts. The pay of the Germans who take part in the expedition includes a bonus of four thousand taels to their relations in case they are killed.

Commenting on the report telegraphed from Hong Kong that the Chinese are about to undertake active naval operations against the French fleet blockading Formosa, the *Temps* remarks that the arrival of a Chinese fleet off Formosa would be an agreeable break in the monotony of the blockade, which the sailors of Admiral Courbet's fleet would hail with delight.

With reference to the rumour to the effect that munitions of war were, under the guise of ordinary merchandise, being shipped on board vessels now loading in the London docks for China, we understand that the only vessels at present being loaded for China at docks in the Thames are six in number,—the Peninsular and Oriental Company's Bokhara, which sails Dec. 10; the same Company's Surat, Dec. 24; Messrs. Macgregor, Gow, and Company's Glenfinlas, Dec. 13; the China Merchants' Mutual Shipping Company's Oopack, Dec. 15; the Bengloe, belonging to Mr. Thomson, of Leith, sailing Dec. 8; and Messrs. D. J. Jenkins and Company's Radnorshire, due to sail also on the 8th. It may be mentioned that the Peninsular and Oriental Company were recently asked to convey fifty thousand stand of small arms to China, but, for obvious reasons, at once declined.

ROYAL MILITARY ACADEMY.

The Duke of Cambridge officiated on Monday at the presentation of commissions in the Royal Artillery and Engineers to 49 of the Gentlemen Cadets who have just passed their examinations. The Duke was accompanied by Gen. Sir C. G. Arbuthnot, Inspector-General of Artillery; Col. Hay, Director-General of Artillery; Col. Battersby, Assistant-Director of Military Education, and other officers of the staff. Gen. Browne, Governor of the Academy, was unable to be present owing to illness, and he was represented by Col. Harness, the secretary and treasurer of the institution. The report of the Director-General of Military Education was presented. On the whole, the Director-General summed up the result of the examination as very good. Col. Harness then read the Governor's report, which was also satisfactory as to conduct and efficiency of the cadets, and their fitness to become officers in the Royal Artillery and Royal Engineers. The average age of the forty-nine was 19 years, and they had all joined the Academy in March, 1883, except ten, whose promotion had been accelerated to meet the demand for officers. The successful cadets were then called out in their order of merit, as follows:—

FOR ROYAL ENGINEERS.

	Marks.
Senior Officer E. A. Edgell	43,863
Under Officer T. H. Powell	42,532
Under Officer O. H. Stoehr	38,816
Corpl. G. H. Harrison	38,748
Corpl. W. Ewbank	36,407
Under Officer H. A. Livingstone	36,320
Corpl. C. R. Stevens	36,103
Corpl. L. P. Chapman	35,693
Corpl. H. J. Crofton	35,671
Corpl. W. A. Liddell	35,593
Corpl. A. L. Schreiber	35,481
Corpl. A. W. !Medley	35,385
Corpl. J. A. S. Tulloch	34,766
Corpl. V. W. Evans	34,484
Corpl. E. H. Bland	34,237
Corpl. H. O. Blackall	33,793
Corpl. W. C. Hedley	33,692
Corpl. E. R. B. Stokes-Roberts	33,599

FOR ROYAL ARTILLERY.

Corpl. R. G. Merriman	32,339
Corpl. W. K. Hardy	31,159
Corpl. G. F. White	30,400
Corpl. P. Foster	30,121
Corpl. F. de B. Young	29,769
Corpl. P. T. Cooper	27,332
Corpl. T. B. Wood	27,100
Corpl. E. E. Norris	26,858
Corpl. F. N. Friend	26,612
Corpl. St. J. Du Plat-Taylor	26,501
Corpl. E. P. Lambert	26,098
Corpl. C. Battiscombe	24,910
Corpl. J. F. Browne	24,889
Corpl. E. S. Cleeve	24,065
Corpl. M. H. B. Raby	24,000
Corpl. T. E. W. Bidgood	23,767
Corpl. C. G. Watson	23,702
Corpl. E. Hudleston	23,494
Corpl. F. H. E. Brouncker	23,416
Corpl. W. M. Grover	23,140
Corpl. G. W. H. Iago	23,058
Corpl. C. Lyon	22,767
Corpl. E. C. Cameron	22,504
Corpl. E. A. Campbell	22,239
Corpl. H. M. Birley	21,823
Corpl. F. E. Freeth	21,022
Corpl. E. F. Hall	20,872
Corpl. A. E. Harrison	20,825
Corpl. M. Peake	19,726
Corpl. H. D. White-Thompson	
Corpl. G. T. Forestier-Walker	17,232

The following prizes were then presented by the Duke of Cambridge:—To Mr. E. A. Edgell, the Pollock gold medal for distinguished proficiency, the regulation sword for exemplary conduct, and prizes for fortification, artillery, and drills and exercises; to Mr. T. H. Powell, prizes for mathematics and mechanics, and classics; to Mr. C. R. Stevens, prizes for chemistry and landscape drawing; to Mr. W. C. Hedley, the Tombs Memorial Scholarship, given to the senior cadet for the Royal Artillery; to Mr. V. W. Evans, prize for French; to Mr. H. O. Blackall, for German; to Mr. W. K. Hardy, for military history; to Mr. E. E. Norris, for military topography; and to Mr. F. L. Sharp, for gymnastics.

The Duke of Cambridge, addressing the cadets, said he was much pleased at hearing such admirable reports both from the Director of Military Education and from the Governor of the Academy. He was always glad to hear well of the Academy, and he was happy to know that the same creditable state of affairs had prevailed for a good while past. He believed that the cadets as a body were actuated by a determination to apply themselves diligently to their studies, so that they might become efficient officers when they joined the service, and he was sure they would never repent the pains which they bestowed upon the outset of their career. Circumstances at present showed them what would be required of them in the future. The nation was not at war, but a portion of the Army was in the field, and had much the same duties to perform as if they were at war, and it was easy to see how occasions might arise for every officer to exert himself in order to meet exceptional cases. The service now being carried on in Egypt was of great importance and peculiar interest, and would require tact and talent not only on the part of the leaders, but on the part of all engaged; and the officers, trained and educated as officers were at the Royal Military Academy, would find the knowledge they possessed of the greatest possible advantage to them in such a campaign as that. The youngest officer might find himself in difficulties and dependent upon his own resources, and not one of them could afford to neglect any branch of his military studies, nor fail in the capacity, which could be also acquired by training, of keeping his head in an emergency. In former days there was less dependance upon individuals in the Army than now; but science had changed many things, and now each one in the Army had something to think about as well as something to do. Study and hard work were requisite to maintain the reputation of the distinguished regiments which they were about to join, and he exhorted them not to work so hard as they had, but to keep up a sufficient study to meet the growing progress of scientific knowledge, and not to fall behind in the race. And of no less importance were the soldier-like qualities of discipline and efficiency in all the varied duties of a military life. Each officer must thoroughly learn obedience, both that he might practise it himself and exact it from those under his command. Without discipline the every-day duties of a soldier would be distasteful and difficult; with discipline the most irksome and troublesome labours would be easy and pleasant. It was arduous, no doubt, to combine a high scientific knowledge with a careful attention to small details, but it would have to be done if they were to become competent officers. The cadets at this Academy were well prepared for the development of all the good qualities which they possessed, and he was especially proud of their moral character, as testified to in the official reports. The officers and professors performed their duties to his entire satisfaction, and to their excellent example he traced the great excellence of the whole institution.

His Royal Highness then dismissed the cadets, and wished them a pleasant holiday. The next term will commence on Jan. 7.

NAVAL OFFICERS' OPINIONS ON THE ADMIRALTY PROPOSALS.

The *Portsmouth Times*, having addressed to upwards of 100 Naval Executive officers the following questions:—"Are the additions to the Navy proposed by the Admiralty in your opinion adequate to our necessities?" "Have you any suggestions to make as to the best method of strengthening the Navy?" publishes some interesting extracts from the replies. With two exceptions, all answered the first question in the negative, and those exceptions wrote:—"I think they are, provided that they are *bonâ-fide* additions, and always excepting the torpedo-boats, the proposed addition of which is childish and absurd;" and —"If Lord Northbrook's programme, as proposed by him in the House of Lords, is carried out without delay, it would make the Navy efficient as regards ships. More attention should, however, be devoted to armament, which at present seems to me to be behindhand, and cannot be supplied quickly enough to meet requirements." A third gave a qualified approval, but demanded an immediate increase of *personnel*. All the remainder answered emphatically, "No;" and in some of the quoted cases suggested improvements and additions which were more properly answers to the second query. Coming to that, the *Portsmouth Times* remarks that the correspondents advocate such reinforcement of the Fleet as would render our maritime supremacy an undoubted fact, instead of being as at present a tradition justified by history, but regarded as a fit subject for controversial speculation. Upon several points they are virtually agreed. For instance, as to the necessity of completing the ships in hand without delay, of increasing the force of officers and men, and largely adding to our torpedo flotilla. Again, there is a consensus of opinion as to the importance of providing our commercial ports with torpedo boats, while many officers regard our submarine defences as incomplete. It is also essential, in the estimation of a considerable section, to build another arsenal and a torpedo factory, and even more lay stress upon the advantage of training our fishermen so that their fighting services may be available on a national emergency. At the same time, it is a circumstance which cannot be ignored that there is a remarkable harmony of sentiment as to Sir Thomas Brassey taking,—well, too optimistic a view of the state of our Navy. About 25 selections are then given, some of them very lengthy and elaborate discussions of the question. We quote a few extracts:—"The number of blue-jackets is far below our requirements. They should be increased by 5,000 men, and the stokers by about 1,000 in time to man the ships now ordered."—"Sails and masts are little good in a modern first-class fighting ship, excepting a spread of canvas in cruisers as an auxiliary to steam. The expense and stowage room attached to these useless fittings in many of our ironclads now in commission could be well applied to increase the coal and ammunition-carrying power of the same ships."—"As regards torpedo-boats, 30 should be bought at once, and an annual increase of 20 made till the number is sufficient to allow of a complete cordon of these boats being drawn round our coasts, say five to each of the great commercial ports, and a number corresponding with their importance to the remainder. Men now are not trained as necessity demands. Some spend all their time in turret-ships, others in obsolete tubs. In fact, it is left altogether to chance as to where an officer or man finds himself placed."—"Utilise our immense fishing and coast seamen as a sort of Naval Volunteers, so that they may be drilled to free all (or nearly all) Royal Naval seamen proper for ships in squadron, &c., in the event of war. Face the expense like practical people, for the money to do this would be voted in five minutes after a great naval disaster, but then it would be 'too late.'"—"I was serving in the Pacific and China from 1880 to 1884, and on neither stations were the proper complements of men in any ship except the flagship."—"A torpedo squadron ought to be organised at once, and exercised at full speed, manœuvres as often as possible with different officers in charge of the boats."—"More officers and men are required. At present over nine-tenths of the lieutenants alone are employed, and in war time, roughly, 400 more would be required. With regard to seamen, I believe the Triumph is at present waiting to be commissioned, but there are no men at present available to man her, as the Nelson and Diamond have absorbed them all. What would be the case if war was at once declared?"—"Our great source of weakness at present is the protection of our Mercantile Navy, on which we are largely dependent, even for food, let alone the pecuniary loss which would result from the destruction of ships in the case of war, and from our commercial enterprise passing into other hands in case of a protracted war."—"Perhaps the most pressing need is stokers. Many of our large ships do not carry sufficient to enable them to steam full-speed without assistance from some of the remainder of the ship's company as coal-trimmers. This assistance could not be given in action."—"Whitehead torpedoes are very deficient in quantity. We have not now enough to put into all the ships now fitted to carry them, and the plant at Woolwich is not sufficient to turn out any very large number, so this want cannot be very rapidly made up. I should recommend that the Government encourage the establishment of a private manufactory for these weapons, which would not only give us the means of procuring a greater number, but would probably improve the torpedoes by creating a competition with Woolwich."—"The present and proposed ships will undoubtedly form a magnificent Navy, but where we should fail in case of war would be in men. No doubt much may be done in the way of increasing the *personnel* available by reducing the number of non-combatants borne in ships. At present they reach a ridiculously large number compared with the combatants. The waste in our dockyards, owing to changes in design while a ship is in course of construction, is enormous. If ships were taken in hand and finished with all despatch possible, much of this would be avoided."—"The Channel Squadron should consist of fighting-ships, instead of useless obsolete ironclads, used simply for the sake of their masts as gymnasia."—"Increase the pay and responsibility of the backbone of her Majesty's Navy, viz., lieutenants."—"More ships, more men (especially stokers), are wanted to enable our Fleet, on the declaration of war, to at once assume the aggressive, and close the enemy's ports." —"By far the most important thing is that the ships building and to be laid down should be got ready for sea with the utmost despatch possible. I hope that the strengthening of the Navy may go on steadily, and that the necessities of neither party may leave the pendulum to rebound from the cry of an efficient Navy to that of 'bloated armaments.'"

THE AUSTRALASIAN NAVY.

The following are the vessels of war possessed by or being prepared for the Australian Colonies:—VICTORIA.—Cerberus, turret armoured-ship, four 18-ton M.L.R. guns, used for harbour defence only; Nelson, receiving-ship, old two-decker (this vessel was not accounted as available in case of war for even port defence); Victoria, gunboat, one 8-in. 12-ton gun, one 6-in. 4-ton gun; Albert, gunboat, one 1st-class torpedo-boat, two 2nd-class torpedo-boats. The guns for six hopper barges (one 6-in. 4-ton gun for each) were about to be sent out to Melbourne, and by next year these barges would be available for port defence. They were well-built and well sub-divided. NEW SOUTH WALES.—The sloop Wolverene, proposed to be armed with two medium guns. This vessel was used by the Naval Volunteers. It formerly belonged to her Majesty's Navy, and was presented to the colony by her Majesty's Government. The New South Wales Government had under consideration the purchasing of two fast gunboats and two torpedo-boats and steam launches for the defence of Port Jackson and Newcastle. SOUTH AUSTRALIA.—The cruiser Protector, 700 tons, armament one 8-in. 12-ton gun, and five 6-in. 4-ton guns. No torpedo-boats yet obtained. QUEENSLAND.—Now at Brisbane, sloop Mavis, believed to have two 6-pounder guns. About to leave for Brisbane the sloop Paluma, one 8-in. 12-ton and one 6-in. 4-ton gun, to be used as a surveying-vessel; expenses shared by Colonies and by her Majesty's Government. Also about to leave the Tyne for the colony, the Gayundah, sister-ship to above, and armed in the same way. Now in the colony, the second-class torpedo-boat Wasp. No Whiteheads yet supplied for it. TASMANIA.—It was believed that no armed vessel yet belonged to this Government. There was in Hobart a second-class torpedo-vessel, but it was without Whiteheads or a machine-gun, and depended for power of attack on its spar torpedo. NEW ZEALAND.—Four torpedo-boats (second-class), built in 1883 by Thornycroft. No torpedoes yet supplied. One of the boats armed with a (1 in. two barrels) Nordenfelt gun.

A NAVAL RESERVE.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The most valuable reserve force at the disposal of the country seems to me actually lost sight of. I mean the 10 years' men. Does it not seem somewhat strange that the men you enter as boys "when 15 years old," on whose education at least £200 has been spent, should be lost to the Admiralty, when they are 28 or 30, and at the very finish of their professional knowledge as seamen and gunners? Are they not far more valuable even than the Royal Naval Reserve? If so, why not let them, "on discharge," occupy a similar position to the first-class Army Reserve until they are, say, 45 years of age, giving them a month's pay per annum, when they should join one of the Reserve ships for training. In the event of war, no doubt 50 per cent. would volunteer, more "probably" if a bounty were offered. In the Russian War we had ships, but few available seamen. I should like some one who knows to inform me how many of these 10 years' men (or 12 years' men, as they will be after January next), are annually lost to the service? Should war be declared to-morrow, there are thousands of good seamen wanted, not only to man our men-of-war, but to fight the provision-carrying fleet, which would probably consist of those magnificent steamers which run across to New York in six or seven days. Is there an ironclad built that can swim 10 minutes after being struck by one of the Cunard Line steamers with a 16-knot speed—supposing, say, the unfortunate ironclad could only steam under favourable circumstances 14 knots.—I am, &c.,

HENRY E. CROZIER, Captain, R.N.

Letters have been received from Admiral Lord John Hay, at Malta, Dec. 3; Vice-Admiral Sir W. Hewett, V.C., at Bombay, Nov. 21; Vice-Admiral Sir J. Commerell, V.C., at Bermuda, Nov. 22; Rear-Admiral Baird, at San Francisco, Nov. 22.

Vice-Admiral Dowell has returned from Amoy and Shanghai to Hong Kong.

Vice-Admiral de Horsey has transferred his flag from the Minotaur to the Duke of Wellington as senior officer at Portsmouth during the absence of the Commander-in-Chief.

The Channel Squadron, now at Portland, will shortly put to sea for a few days and return to their respective ports on the 18th inst. for the Christmas holidays.

ACTIVE SERVICE cannot wear out the teeth that are brushed night and morning with ROWLAND'S ODONTO, the purest and most fragrant dentifrice ever made. All dentists allow that neither washes nor pastes are as efficacious for polishing the teeth and keeping them sound and white as a pure and non-gritty tooth-powder; such ROWLAND'S ODONTO has always proved itself. Ask any dealer in perfumery for ROWLAND'S ODONTO, and avoid spurious imitations, theirs being the only original and genuine Odonto.

The Letters and Correspondence of Napoleon the Great. By Capt. the Hon. D. A. Bingham. 3 vols. (Chapman and Hall.)

Captain Bingham has devoted himself with wonderful industry and success to the study of the strange and eventful history of what has been curiously and infelicitously styled "The Napoleonic Legend." In the present work he has boiled down the contents of the 29 volumes compiled by the Committee, under the presidency of Prince Napoleon, which was ordered by Napoleon III. to raise an imperishable monument to the chief of his dynasty, from the despatches and letters of the first Emperor. It cannot be said that in these digests of the enormous mass of literature at his disposal, Captain Bingham has contributed to clear the reputation of the great Corsican from the serious charges made against him by Lanfrey and the other anti-Napoleonic historians, including Madame de Remusat, who have taken infinite pains to paint in the blackest colours the moral character of the man who, in spite of his ambition, his meanness, his indifference to truth and to human suffering, will be in all time regarded as far away the greatest genius these latter days have produced. Captain Bingham has gone beyond and below the official *opus magnum* of the committee, and has unearthed, in the State Paper Department, documents which the friends of the Dynasty would have probably consigned to oblivion. Perhaps few English readers have any accurate idea of the early part of Napoleon's career, when he breathed fire and slaughter against French oppressors, and was in league with the patriots who desired above all things to liberate the island of his birth from Republican invaders. There are still fewer who are aware that the great soldier was cashiered, or suspended from duty, no less than five times for insubordination and desertion in the early part of his career; that he was continually absent without leave, and rarely did regimental duty; that he was admitted to the Military Academy of Brienne under false pretences; and that he ran a narrow escape of the guillotine, when his friends, the Robespierres, had felt the sharp edge of the executioner's knife. But through the struggles, intrigues, and vicissitudes of the first years of his military life, there crop up instances of the energy, vividness of idea, audacity, and self-confidence of the patriot who sought to seize on the citadel of Bastia in order to oust the French from Corsica, and who, not very long after, was to be found in the advanced ranks of the Jacobins. Take, for example, the letter to his father when a schoolboy of fifteen years of age. He protests against the meanness of his allowance, and consequent exposure to ridicule and contempt, and demands imperiously to be taken from school. Then see the extraordinary designs he develops, his projects of voluminous histories, his essays upon abstract questions of politics, his feverish and exalted communications to his friends at a time when he was a mere boy, and when most English lads of the same age would be concentrating their energies on boating, cricket, or preparing for their little go at college. The astonishing details of the successes of the Army of Italy can scarcely be followed without the aid of maps and plans; but the letters of Napoleon describe clearly his wonderful combinations, and give an account of singular successes and conceptions with vehemence and clearness. The work is one to be read by the student of history rather than one to be criticised in a newspaper notice. It is a valuable compilation of existing material, with additional stores contributed by the individual research and industry of the author. An interesting article might be formed out of the extracts relating to Napoleon's courtships, his early designs on an heiress, his passionate wooing of Josephine, and the like. With all his fierce energy, he was often baffled in his operations and irritated beyond endurance by the corruption and incapacity of contractors and by transport and commissariat deficiencies. His rage against all excesses, which he stigmatised on the part of his troops during his first great campaign, is often in ludicrous contrast with the calm account he gives of exactions, of the robbery of public property and merciless executions; and there is not, throughout his early Italian despatches, one gleam of an intelligent comprehension of the fact that there was south of the Alps the materials for forming a homogeneous people, such as were hammered into one by the sword of his nephew at Solferino, and finally consolidated by Victor Emmanuel and Garibaldi. We cannot too highly recommend this compilation of Captain Bingham's. He has divested himself of partialities and prepossessions, and has not failed to point out to the reader from time to time the striking inconsistencies and the greater faults which accompany the rise of the Emperor throughout his great career. The work is a handy book of reference, and more,—it is a compendium and a mine of knowledge. In most cases Captain Bingham has permitted the letters and correspondence of Napoleon to be the records of the events to which they relate; and it might, perhaps, have been better had he strung them together now and then by a thread of narrative, no matter how slender.

The Admiralty have approved of a tablet being placed in the Dockyard Chapel, Devonport, to the memory of the late Lieut. Houston Stewart, R.N., of the Dryad.

GIFT BOOKS, HOLIDAY CARDS, AND NOVELTIES.

From Messrs. Dean and Co. we have received some capital Christmas books, chiefly suited for grown-up children, but at the same time wonderfully amusing. Who can decline to smile, if not to pour forth their laughter at "Lady Tabitha's Morning Concert"? This amusing tale forms one of "Dean's Embossed Painting Toy Books," and the design of the painted wrapper is excellent. "The Little Birds that went out to see the World" tells of some curious adventures, and can also boast a capital frontispiece. Another of "Dean's," but one of a much higher order of merit, is a little work which deserves much more than a passing word of commendation. The illustrations, designed by W. Claudius, with verses by Mrs. Whitechurch, form a book which no doubt will be appreciated. "All in the Sun," still another of Dean's, is a charming little book—the handiwork of Mrs. Christopher Goddard—so far, at least, as the happy design on the cover is concerned. Surely it is "high art!" Two attractive volumes, from the same firm, tell of the adventures of six young men in the wilds of Maine and Canada, and of zigzag journeys in the Western States of America. As far as we can judge at present, it would be found somewhat difficult to name a pair of books so thoroughly certain to win the affection of boys, or indeed of "manly youths," as those above-mentioned.

Continuing our notice of the "Christmas and New-Year Cards" which have been submitted to our inspection, it becomes desirable to refer to them more in detail than was done in our last issue. Messrs. Raphael Tuck and Son have been recognised for several years as second to none of the fine-art publishers. Their work is to be found in every direction. Birth-days, wedding-days, and valentine-days, also Easter cards, oleographs, chromos, and reliefs have, through the agency of this enterprising firm, become familiar to readers and admirers of art literature.

To Messrs. Eyre and Spottiswoode the public is much indebted. We have been accustomed to see a fine class of work proceeding from this firm, but certainly are of opinion that their issue for Christmas and New-Year Days is superior to any of its predecessors. At all events, it can boast of one gem which should prove sufficient to enlighten any of darkness that may possibly be apparent on other parts of their work. Among other samples sent by Messrs. Eyre and Spottiswoode are two pretty calendars, designed with taste, one of which represents a painter's palette, with floral decorations, and the other a fac-simile of an "olde plate." Among a group of cards, in which several miscellaneous subjects are treated, we would direct attention to two particularly, representing "Christmas" and "A New Year Greeting;" and also to a number of subjects as specimens of hand-painting, most particularly to an exquisite little gem, as examples of that branch of art work. Our next subject is a grand military display of "Cosaques," which are introduced in various forms. First comes "Judy's Own Particular Cosaques," with Mr. Sloper in attendance. This charming little box contains bottles of perfume and such-like trifles as snaps and mottoes. We next meet with a Foot Guardsman, quite on the alert, and evidently placed where he is to guard Messrs. Sparagnapane's treasures. There are several more boxes of cosaques, including one which represents the *Times*, in wonderfully clear type, and about two inches square in size. If the reader searches closely he may find, under guard of numerous cosaques, a copy of the celebrated journal and also a real watch. The great wonder, however, as is always the case in shows and exhibitions, are reserved for the close. One, entitled "The Menu and Guest Name Cosaques," the other, "The New Cotillion Cosaque." In the former, the upright fan menu cosaque forms a pretty addition to the table, as well as affording amusement to the assembled guests. In the latter, will be found abundance of chocolate snaps, mottoes, &c. Without going into further particulars regarding Messrs. Eyre and Spottiswoode's contributions of Christmas and New-Year Cards for 1885, it will be sufficient to repeat what we have said more than once before, namely, that the work of this firm always exhibits remarkable skill in the selection of subjects, and remarkable power in delineating those conceptions. Messrs. Hildesheimer and Foulker have done some highly agreeable work, and have forwarded to us some delightful miniature landscapes, which are, without exception, most remarkable for the high-class finish that is imparted to them.

Messrs. Harding, of Piccadilly, have just published a list of their unique art productions for the present season, 1884-5. The following are its contents:—"Incidents of Hunting," by Alfred Roberson, from a set of six original drawings, printed in monochrome; "Military Series," by Alfred Roberson, from a set of 12 original drawings, printed in monochrome; "Comic and Hunting Series," by Miss Georgina Bowers, from a set of six drawings; "Our Advanced Girls," by George Lambert, from a set of six entirely original drawings, printed in monochrome; "Phantasms of the Chase," by "Audax," from a set of six original and highly-humorous drawings, in monochrome. Each of the packets is headed "Harding's Special Originalities."

Messrs. W. A. Mansell's specimens of Christmas and New Year cards are varied and interesting without creating any striking effect.

PURCHASE SUBALTERNS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—On Oct. 31, 1871, when Purchase ceased, there were many Line lieutenants serving who possessed commissions valued at £700 regulation-money. Side by side were many captains possessing commissions valued at £1,800 (and under) regulation-money. I pass by the intermediate Warrants, adverse and otherwise, as having no real bearing on the point at issue, and I arrive at the year 1884 and the current Warrant of that date. Many of the Line lieutenants are now majors, and their comrades, the captains, are many of them majors also, though of course much senior on the list, which numbers some 1,700. These latter will inevitably become lieutenant-colonels, for although being already a good deal nearer promotion, they are accorded the advantage of remaining for two years longer in the rank of major, *i.e.*, until 50, while the others will be turned out at 48. Now, if this was the whole case, I for one should unquestionably feel that the most even-handed justice had been meted out to the two classes, and should recognise the actuarial genius that had evolved the value of the difference between £1,800 and £700 to be a time allowance of two years. But a fact steps in to mar the calculation. The Warrant (Article 100·1) fixes, as before stated, 50 for the retirement of the officer with the most valuable commissions (£1,800), and Article 100 names 48 as the age for the holder of no saleable commissions whatever! But the old Line lieutenants belong to neither class, having a vested £700. Could not, then, actuarial genius find an intermediate period between 50 and 48 for his retirement? To the ordinarily constituted mind I venture to say it is inexplicable this has not been done, whereby satisfaction to a numerous and deserving body of Purchase officers would be given.—I am, &c., C.

THE MEDICAL EXAMINATION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I trust you will excuse my troubling you, and that you will grant me space for a few remarks relative to the recently introduced examinations for promotion in the Medical Staff. It is evident, from the tone of the medical papers, that they have been inspired from Whitehall Yard, and, with your kind permission, I would like to make a few comments on an article that appeared in the *British Medical Journal* of Oct. 11. The article, amongst other things, states, "We believe that the examination [to the rank of surgeon-major] was a mere bugbear, that it never kept back a single capable candidate, and that its abolition was a mistake." I, with many others, not only passed this examination, but also the examination at the close of the course of instruction at the Army Medical School, without looking upon them in any unfavourable light, regarding them simply as the ordinary consequences of military service; and why the latter examination is not re-established appears a mystery, for surely it is most desirable to ascertain what aptitude the probationer shows, and what progress he has made in the medico-military subjects he has been lectured to on at Netley, foreign to him previously. One would think it more desirable that an officer should show his acquaintance with these subjects at the commencement of his military career, rather than at the close. This examination the Secretary for India had the good sense also to have maintained throughout. By all means re-establish the examinations that were allowed to lapse at a time it was desirable to popularise the service at all costs, and have the examinations for medical officers no way behind those for their combatant brethren; but here, I think, it should stop, and not carry on the examination of medical officers to their declining years (for, as a rule, a medical officer of over 20 years' service is over 43 years of age). The analogy the editor of the *British Medical Journal* draws between combatant and medical officers entering the service is also erroneous; he remarks:—"The acquirements of medical officers have been sufficiently tested prior to entering the service; the same is true of combatant officers, who gain their commissions by open competition." True; but the combatant officer only then begins to learn his profession, whilst the medical officer brings a profession with him, and has only to make himself acquainted with the specialities of the service. The editor of the *British Medical Journal* so far admits it is a mistake to subject officers of the age and standing of surgeons-major of over 20 years' service to an examination in surgery and medicine; and having admitted so far, I trust he will further be convinced that the proper manner of establishing an efficient service is by instructing and examining the juniors, and leaving it to the discretion of the Director-General to select administrative officers from the seniors.—I am, &c., Senex.

The revenue cutter Fly was driven ashore last Saturday night at a place called the Currdun, near Galway. She could not be got off till Sunday morning, and then it was found that a large hole had been made in her side.

The Marine Department of the Board of Trade has granted permission to the officers of the London Brigade of the Royal Naval Volunteers to present themselves for examination in seamanship and navigation.

The *Epoca* (Madrid), referring to the capture of a Spanish revenue cutter by a British steam launch off Gibraltar, for having seized a felucca in British waters, states that an official inquiry has been instituted, in order to ascertain whether the capture took place in British waters.

The French warship Bruat has been engaged lately in the survey for a submarine cable between New Caledonia and Queensland. The German man-of-war Elizabeth left Sydney for Apia on Nov. 16. The movements of foreign men-of-war excite the greatest interest in Australia just now, owing to the agitation for annexation in the Pacific.

HOGE'S HOREHOUND HONEY.—What is known as the "Bee Belt" of Southern California is one continuous bed of honey-bloom, one sweet bee-garden throughout its entire length; but there is one part of it which the plough has not yet invaded, that is the region where the Horehound plant flourishes in one glorious blaze of purple and gold. The tropical luxuriance of these plants is so profuse that they brush against the feet at every step, and close over them as if you were wading in liquid gold. The air is sweet with its fragrance, and tuneful with the humming wings of the bees gathering this precious panacea: this honey-full horehound is a great favourite with the bees, and is one perpetual feast for them. They revel in its bloom long after the flowers of other countries have withered and gone to seed. A single plant will at times be visited by a whole hive of bees at once; the grand hum of such a multitude of wings impresses the listener with the fact that the winning of more than ordinary honey is going on. The product of a dozen or two of these plants is sufficient for the wants of a whole hive. In this perfect paradise for bees the petals of the continuous sheet of blooms drink in the vital sunbeams, and the bees hug this favourite flower with profound cordiality, and push their blunt polleny faces against them, like babies on their mother's bosom; and fondly, too, with eternal love, does Mother Nature clasp her small bee babies and suckle them, multitudes at once, on her warm Californian breast. The Horehound Honey so gathered by these little almoners of Nature is put up in bottles, and retailed by all Chemists, &c., at 1s 1½d each. W. L. Bright, Esq., son of the Right Hon. John Bright, M.P., says:—"Hoge's Horehound Honey cured his father of a bad cough."

TUESDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, Dec. 6, 1884.

The Queen has been pleased to give orders for the following appointment to the Most Honourable Order of the Bath:—To be an Ordinary Member of the Civil Division of the Third Class, or Companions of the said Most Honourable Order, viz.: Lieut.-Col. D. W. P. Labalmondière, Assist.-Commissioner of Police of the Metropolis.

WAR OFFICE, PALL MALL, Dec. 9, 1884.

10TH HUSSARS.—Rdgmr., with the hon. and relative rank of Capt., J. Perry, from the 17th Lancers, to be Rdgmr., vice H. McGee, who exchanges.

17TH LANCERS.—Rdgmr., with the hon. and relative rank of Capt., H. McGee, from the 10th Hussars, to be Rdgmr., vice J. Perry, who exchanges.

COLDSTREAM GUARDS.—Major and Lieut.-Col. and Col. FitzR. W. Fremantle has been placed on half-pay (Dec. 8).

LINE BATTALIONS.

THE ROYAL SCOTS (LOTHIAN REGIMENT).—Lieut. H. W. Broadley has been seconded for service with the Army Pay Department (Dec. 2).

THE KING'S (LIVERPOOL REGIMENT).—Lieut. E. H. Molyneux-Seel to be Capt., vice H. M. Wade, promoted.

THE NORFOLK REGIMENT.—Capt. J. H. Sewell has resigned the appointment of Adjt. (Oct. 27).

THE PRINCE OF WALES'S OWN WEST YORKSHIRE REGIMENT.—Lieut. C. Cheyne has been appointed a probationer for the Indian S.C. (Sept. 23).

THE BEDFORDSHIRE REGIMENT.—Lieut. J. S. Lightfoot has been seconded for service with the Army Pay Department (Dec. 4).

THE ROYAL IRISH REGIMENT.—Capt. and Brevet Major H. J. Daubeny has been seconded for service as an Adjt. of Auxiliary Forces (Dec. 3).

THE ROYAL WELSH FUSILIERS.—Serjt.-Major Henry White to be Qrmr., in succession to P. McCormick, deceased.

THE ROYAL SUSSEX REGIMENT.—Serjt.-Major Patrick McEvoy to be Qrmr. vice H. Imbusch, retired.

THE ESSEX REGIMENT.—Lieut. H. H. W. Nason to be Capt., vice G. R. Ellis, seconded.

THE SHERWOOD FORESTERS (DERBYSHIRE REGIMENT).—Major J. G. Sparkes has been seconded for service as an Adjt. of Auxiliary Forces (Dec. 1).

PRINCESS CHARLOTTE OF WALES'S (BERKSHIRE REGIMENT).—Lieut. E. Burney to be Adjt., vice Lieut. F. A. Deare, who resigns that appointment.

THE QUEEN'S OWN (ROYAL WEST KENT REGIMENT)—Capt. F. A. M. Arnold has been seconded for service with the Army Pay Department (Dec. 2).

THE DUKE OF CAMBRIDGE'S OWN (MIDDLESEX REGIMENT).—The surname of Lieut. H. H. Woollright is as now, and not as hitherto described.

THE YORK AND LANCASTER REGIMENT.—Major R. W. Peckitt retires on retired pay, with the hon. rank of Lieut.-Col.

THE DURHAM LIGHT INFANTRY.—Qrmr., with the hon. and relative rank of Capt., P. Connell is placed on retired pay, with the hon. rank of Major (Dec. 9).

THE RIFLE BRIGADE (THE PRINCE CONSORT'S OWN).—Lieut. C. R. Hunter is seconded for service on the Staff.

STAFF.

Gen. Sir E. B. Johnson, K.C.B., R.A., to be Director-General of Military Education, vice Lieut.-Gen. Sir C. P. B. Walker, K.C.B., retired.

Major-Gen. Sir D. C. Drury-Lowe, K.C.B., to be a Major-Gen. on the Staff (Inspector-General of Cavalry in Great Britain), to command the Cavalry Brigade at Aldershot, vice Major-Gen. C. C. Fraser, V.C., C.B., whose period of service in that appointment is about to expire (Jan. 1, 1885).

Lieut.-Col. and Col. J. H. Hall, commanding the 22nd Regtl. District (the Cheshire Regt.), to be an Assist.-Adjt. and Qrmr.-Gen., vice Col. the Hon. P. S. Methuen, C.B., Scots Guards, who has vacated that appointment (Dec. 1).

Lieut.-Col. E. R. Cottingham, R.A., to be an Assist.-Adjt. and Qrmr.-Gen. on the Staff in South Africa (Nov. 14). Majors P. J. Hughes, the Cameronians (Scottish Rifles), to be a Brigade-Major, vice Capt. and Brevet Lieut.-Col. W. C. F. Molyneux, the Cheshire Regt., who has vacated that appointment; H. D. A. Cutbill, the Royal Irish Rifles, to be a Brigade-Major, vice Lieut.-Col. W. F. M. Hutchinson, half-pay, R.A., who has vacated that appointment (Nov. 14).

MEDICAL STAFF.

Surg.-Gen. R. Gilborne has been placed upon retired pay (Nov. 20); Deputy-Surg.-Gen. A. G. Young is granted retired pay, with the hon. rank of Surg.-Gen.; Surgs.-Major W. Jobson, M.D., is granted retired pay, with the hon. rank of Brig.-Surg.; R. Turner, M.D., is granted retired pay, with the hon. rank of Brig.-Surg.; J. Murray, M.B., is granted retired pay, with the hon. rank of Brig.-Surg.

ARMY PAY DEPARTMENT.—Staff Pymr. and Hon. Major H. O. Currie retires on retired pay, with the hon. rank of Lieut.-Col.; Capts. J. E. M. Pilkington, the Gloucestershire Regt., to be Pymr. (May 23); R. J. B. Parkinson, the Gloucestershire Regt., to be Pymr. (May 30).

VETERINARY DEPARTMENT.—The under-mentioned gentlemen to be Vet.-Surgs. on probation:—Patrick William Dundon, George Curran Orr Fowler, and John Alfred Meredith.

HALF-PAY.—Capt. F. W. S. Grant, from the Duke of Cornwall's Light Infantry, to be Major (Dec. 13).

MEMORANDA.

The following promotions to take place in succession to Gen. J. A. Ewart, C.B., Col., 2nd Batn. the Gordon Highlanders, placed upon the Retired List (Dec. 1):—Lieut.-Gen. C. L. B. Maitland, C.B., Col., 1st Batn. the Duke of Edinburgh's (Wiltshire Regt.), to be Gen.; Major-Gen. R. G. A. Luard, Brigdr.-Gen., Aldershot, to be Lieut.-Gen. (both dated Dec. 1).

The under-mentioned officers to be Colonels:—Lieut.-Cols. F. H. A. Seymour, the Rifle Brigade (the Prince Consort's Own), and C. P. Forbes, the Prince of Wales's Leinster Regt. (Royal Canadians) (both dated Dec. 1).

Deputy-Comy.-Gen. of Ordnance M. J. T. Ingram to have the local and temporary rank of Comy.-Gen. of Ordnance whilst acting as Senior Ordnance Store Officer in Egypt (Nov. 26).

RESERVE OF OFFICERS.

Capt. H. Freyberg, 4th Volunteer Batn. the Essex Regt., to be Capt.; Lieuts. A. J. Galsworthy, 3rd Batn. the Essex Regt., to be Lieut.; A. St. H. Gibbons, 3rd Batn. the East Yorkshire Regt., to be Lieut.

INDIA OFFICE, Dec. 9, 1884.

The Queen has approved of the retirement from the service of the under-mentioned officers of her Majesty's Indian Military Forces:—

Lieut.-Cols. and Brevet Cols. H. Tyndall, C.B., of the Bengal S.C. (Nov. 8); S. H. Williams, of the Madras S.C. (Sept. 16); E. F. H. Armstrong, of the Madras S.C. (Oct. 26); and C. M. Ducat, of the Bombay S.C. (Sept. 10).

Surg.-Major W. E. Allen, of the Bengal Army (Dec. 5).

The Queen has approved of the transfer to the Retired List of the under-mentioned officer:—Lieut. H. G. Way, of the Madras S.C. (Nov. 20).

The under-mentioned officers are granted a step of honorary rank on retirement:—

To be Major-Generals:—Lieut.-Cols. and Brevet Cols. H. Tyndall, C.B., of the Bengal S.C. (Nov. 8); S. H. Williams, of the Madras S.C. (Sept. 16); E. F. H. Armstrong, of the Madras S.C. (Oct. 26); C. M. Ducat, of the Bombay S.C. (Sept. 10).

To be Deputy-Surgeon-General:—Brig.-Surg. G. V. Currie, of the Bengal Army (April 10).

To be Brigade-Surgeon:—Surg.-Major H. W. Graham, of the Bengal Army (June 6).

MEMORANDUM.

Major T. Dawes, of the Bengal S.C., whose retirement from the service and promotion to the hon. rank of Lieut.-Col. thereon was notified in the *London Gazette* of Oct. 3, having been promoted to the substantive rank of Lieut.-Col., with effect from Sept. 2, is granted the hon. rank of Col., with effect from Sept. 3.

[Where not otherwise stated, the foregoing commissions and announcements bear date Dec. 10, and the current year must be understood.]

FRIDAY EVENING.

ARMY.

WHITEHALL, Sept. 29, 1884.

The Queen has been pleased to grant unto Arthur Lyttelton Annesley, Esq., Col. in the Army, Adjt.-Gen. to the Forces in Bombay, and sometime Lieut.-Col. of the 11th (the Prince Albert's Own) Regt. of Hussars, eldest son and heir of Arthur Lyttelton Annesley (formerly Arthur Lyttelton MacLeod), of Arley Castle, in the county of Stafford, Esq., late a Capt. in the Army, and grandson of Norman MacLeod, of MacLeod, in the Isle of Skye, Esq., Companion of the Most Honourable Order of the Bath, Major-Gen. in the Army and Col. of the First Royal Regt. of Foot, both deceased, her Royal licence and authority that he and his issue may take and henceforth use the surname of Lyttelton in addition to and before that of Annesley, and that he and they may bear the arms of Lyttelton quarterly with those of Annesley and MacLeod; such arms being first duly exemplified according to the laws of arms, and recorded in the College of Arms, otherwise the said Royal licence and permission to be void and of none effect. And to command that the said Royal concession and declaration be recorded in her Majesty's said College of Arms.

MILITIA.

WAR OFFICE, PALL MALL, Dec. 12, 1884.

ROYAL ARTILLERY.

2ND BRIGADE, CINQUE PORTS DIVISION.—Lieut. J. A. Tapley, from the 1st Kent A.V.C., to be Lieut.

3RD BRIGADE, SCOTTISH DIVISION.—Capt. D. B. MacDougall resigns his commission.

6TH BRIGADE, SCOTTISH DIVISION.—W. J. Scarlett, Esq., late Capt. 5th Dragoon Guards, to be Lieut.-Col. (Oct. 22).

INFANTRY.

3RD BATTALION, THE ROYAL SCOTS (LOTHIAN REGIMENT).—Capt. the Hon. C. D. Home (retired) to be Capt.

4TH BATTALION, THE ROYAL FUSILIERS (CITY OF LONDON REGIMENT).—Capt. H. A. Anderson, retired pay, to be Capt. (Nov. 26).

3RD BATTALION, THE PRINCE OF WALES'S OWN (WEST YORKSHIRE REGIMENT.—Percy Seymour Stanhope, gent., to be Lieut.

4TH BATTALION, THE BEDFORDSHIRE REGIMENT.—Henry Jenney, gent., to be Lieut.

4TH BATTALION, THE PRINCESS OF WALES'S OWN (YORKSHIRE REGIMENT).—Charles Thomas Young Robson, gent., to be Lieut.

3RD BATTALION, THE ROYAL SCOTS FUSILIERS.—William Frederick Carruthers, gent., to be Lieut.

4TH BATTALION, THE ROYAL WELSH FUSILIERS.—Capt. and Hon. Major H. Wayne to be Major.

3RD BATTALION, THE ROYAL INNISKILLING FUSILIERS.—Arthur Percival Tod Collum, gent., to be Lieut.

3RD BATTALION, THE BORDER REGIMENT.—Capt. T. A. Irwin is granted the hon. rank of Major.

4TH BATTALION, THE DUKE OF CAMBRIDGE'S OWN (MIDDLESEX REGIMENT).—Capt. D. F. D. Maclean resigns his commission.

3RD BATTALION, THE DURHAM LIGHT INFANTRY.—Henry Powys Greenwood, gent., to be Lieut.

4TH BATTALION, THE PRINCE OF WALES'S LEINSTER REGIMENT (ROYAL CANADIANS).—Lieut.-Col. W. J. Borrowes is granted the hon. rank of Col.; Major the Hon. R. Flower is granted the hon. rank of Lieut.-Col.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, Dec. 12, 1884.

LEICESTERSHIRE.—Surg. and Hon. Surg.-Major C. M. Sidley resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement.

NOTTINGHAMSHIRE (SHERWOOD RANGERS).—Capt. F. H. Blacker, 4th Hussars, to be Adjt., in succession to Capt. F. H. D. B. Bellwood, who has retired from the service (Dec. 1).

VOLUNTEERS.

WAR OFFICE, PALL MALL, Dec. 12, 1884.

ARTILLERY.

1ST CUMBERLAND—John Little, gent., to be Qrmr.

1ST FORFARSHIRE.—Lieut. W. E. Bett, from the 3rd Surrey R.V.C., to be Lieut.

1ST GLOUCESTERSHIRE.—Capt. and Hon. Major M. F. Carter resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1ST LONDON (THE CITY OF LONDON).—Frank Adolphus Nott, gent., to be Lieut.

2ND MIDDLESEX.—Lieut. F. Bardo resigns his commission. The under-mentioned gentlemen to be Lieuts. (supernumerary):—William Thatcher and Charles Mortimer Hodgson.

ENGINEER.

1ST GLOUCESTERSHIRE.—The Rev. Albert Spencer, M.A., to be Acting Chaplain.

RIFLE.

1ST VOLUNTEER BATTALION, THE GORDON HIGHLANDERS.—David Brown Douglas Stewart, gent., M.A., to be Lieut.

1ST BEDFORDSHIRE.—The under-mentioned gentlemen to be Lieuts.:—Herbert Trustram Eve and Charles John Newbery.

2ND CAMBRIDGESHIRE (CAMBRIDGE UNIVERSITY).—The under-mentioned officers resign their commissions:—Capt. H. C. A. Bingley and Lieut. E. M. Moors. Lieut. J. T. W. Perowne to be Capt.

1ST CHESHIRE.—Capt. A. Atkinson resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement. Lieut. D. Anderson to be Capt.

CADET CORPS (DERBY), ATTACHED TO 1ST DERBYSHIRE.—George Moss, Esq., to be Hon. Capt.

2ND DERBYSHIRE.—Capt. J. Court resigns his commission.

2ND DEVONSHIRE (PRINCE OF WALES'S).—The Rev. Daniel Pring Alford, M.A., to be Acting Chaplain.

2ND VOLUNTEER BATTALION, THE GLOUCESTERSHIRE REGIMENT.—Edward Francis, gent., to be Lieut.

1ST HERTFORDSHIRE.—Herbert Spence Hawks, gent., to be Lieut.

2ND HERTFORDSHIRE.—Lieut. S. M. White resigns his commission.

1ST INVERNESS-SHIRE (INVERNESS HIGHLAND).—R. A. Fraser, Esq., late Lieut., Seaforth Highlanders (Ross-shire Buffs, the Duke of Albany's), to be Capt.

1ST LANARKSHIRE.—Capt. J. T. Duncombe resigns his commission; Lieut. A. Hart to be Capt.

2ND LANARKSHIRE.—Lieut. J. A. Potter resigns his commission.

5TH LANARKSHIRE (GLASGOW 2ND NORTHERN).—The under-mentioned Lieuts. to be Capts.:—F. L. Morrison, W. Wallace, jun., and J. Cameron. Lieut. J. Wylie, jun., resigns his commission; John David Outram, gent., to be Lieut.

10TH LANARKSHIRE (GLASGOW HIGHLAND).—John Arthur Robb, gent., to be Lieut.

3RD LANCASHIRE.—Lieut. J. Barrowclough resigns his commission.

7TH LANCASHIRE.—Capt. G. Burrows to be Major; Lieut. H. H. Andrew to be Capt.

1ST MIDDLESEX (VICTORIA).—Stewart Aikin Pixley, gent., to be Lieut. (supernumerary).

7TH MIDDLESEX (LONDON SCOTTISH).—Lieut. J. B. Hamilton resigns his commission.

1ST VOLUNTEER BATTALION, THE ROYAL FUSILIERS (CITY OF LONDON REGIMENT).—Lieut. E. Whiskard resigns his commission.

22ND MIDDLESEX (CENTRAL LONDON RANGERS).—Lieut. W. E. Boultbee resigns his commission.

1ST MONMOUTHSHIRE.—Thomas Clarkson Wakeling, gent., to be Lieut.

2ND MONMOUTHSHIRE.—Lieut. W. A. A. Farr resigns his commission.

3RD MONMOUTHSHIRE.—Samuel Hopkins Steel, gent., M.B., to be Acting Surg.

2ND NOTTINGHAMSEIRE.—Lieut. H. E. Harcourt-Vernon resigns his commission.

1ST OXFORDSHIRE (OXFORD UNIVERSITY).—The under-mentioned officers resign their commissions:—Capt. T. F. Fremantle, jun., and Lieut. F. L. Ames. The under-mentioned Lieuts. to be Capts.:—C. E. Russel-Rendle and R. B. Thompson.

2ND VOLUNTEER BATTALION, THE PRINCE ALBERT'S (SOMERSETSHIRE LIGHT INFANTRY).—Lieut. C. E. St. J. Balguy resigns his commission.

1ST SUFFOLK.—The resignation of the commission held by Lieut. R. M. Miller, notified in the *London Gazette* of Oct. 17, is cancelled.

3RD SURREY.—Lieut. A. W. B. Perceval resigns his commission.

2ND VOLUNTEER BATTALION, THE EAST YORKSHIRE REGIMENT.—Lieut. W. A. Holmes resigns his commission; Acting Surg. A. H. Boissier resigns his appointment.

[Where not otherwise stated, the foregoing commissions and announcements bear date Dec. 13, and the current year must be understood.]

At the PRINCESS'S, on Wednesday night, "Hamlet" reached its fiftieth representation, and there is no sign of any diminution of popular interest in the revival.

Mr. and Mrs. German Reed's entertainment at ST. GEORGE'S HALL was provided on Monday evening with a lively little sketch, entitled "A Peculiar Case," written by Mr. Arthur Law, and illustrated with appropriate music by Mr. George Grossmith, whose brisk tunes are always sure of catching the popular ear. The "musical triplet," as it is designated, has excellent support from Mr. Alfred Reed, Mr. North Home, and Miss Fanny Holland. "Old Knockles" forms a highly diverting afterpiece, and the interval is agreeably filled up by the mimetic sketch of "A Water Picnic," by Mr. Eric Lewis, who made the welcome announcement that Mr. Corney Grain had so far recovered from his severe indisposition that his reappearance might be looked forward to on Boxing Day.

When the comedy of "As You Like It" is revived at the ST. JAMES'S early in the ensuing year, Mrs. Kendal will play Rosalind, Mr. Hermann Vezin Jacques, Mr. Kendal Orlando, Mr. Hare Adam, and Mr. Young Touchstone.

COVENT GARDEN THEATRE is now being prepared for the circus which, under the management of Mr. William Holland, is to be opened on Boxing Day. An equestrian pantomime, called "St. George and the Dragon," performed entirely by children, will form a prominent feature of the entertainment.

Obituary.

◆

Lieut.-Col. E. G. G. Hastings, C.B., Judicial Commissioner in India, died on the 1st inst. at Peshawur. The deceased was the eldest son of the late Capt. the Hon. E. P. Hastings. He was born in 1842, entered the Army in 1859, and was formerly capt. in the 21st Hussars. He afterwards entered the Bengal Army, and served in the Hazara campaign of 1868. He was also engaged in the Afghan War in 1879-80, serving as Political Officer with the South Afghanistan Force, and was present at the battle of Charasiab in Oct. 1879, and in the operations around Cabul in the following December, including the investment of Sherpore. He accompanied Sir F. Roberts in the march to Candahar, and was present at the battle which took place there (mentioned in despatches, brevet of lieut.-col.). He was subsequently employed as Deputy-Commissioner of the 2nd Class in the Punjab.

Mr. Daniel John Duigan, M.D., C.B., Deputy-Inspector-General of Hospitals and Fleets, R.N., died on the 2nd inst., at his residence in West Kensington, in his 63rd year. He became a licentiate of the Royal College of Surgeons, Ireland, in 1844, and a Fellow in the following year, M.D. of Aberdeen University in 1857, and a member of the Royal College of Physicians, London, in 1860. In 1844 he was appointed surg. in the Royal Navy; he became staff surg. in 1854, fleet-surg. in 1867, and was appointed Deputy-Inspector-General of Hospitals in 1876, when he retired. Dr. Duigan served in the Baltic during the Russian War in 1854, with the Naval Brigade in the Crimea in the following year, and subsequently in the allied expedition to Mexico. He was nominated a Companion of the Order of the Bath in 1881.

Summary of Events.

DECEMBER 8.—Inspection of cadets at Royal Military Academy by H.R.H. the Duke of Cambridge.

DECEMBER 9.—Gen. Sir E. B. Johnson appointed Director of Military Education.

The under-mentioned gentlemen are the successful candidates for naval cadetships at the examination held on Nov. 26 and following days:—

	Marks.
Harry B. Heygate	1428
Guy Montagu Marston	1411
C. G. de Beauvoir Tupper	1410
C. M. de Bartolomé	1401
Lionel Halsey	1391
C. P. Beaty-Pownall	1382
John Douglas Edwards	1377
Godfrey Marshall Paine	1360
Henry Lake Cochrane	1355
Ernest Sausmarez Carey	1333
John Collings T. Glossop	1325
Arthur William Craig	1324
John Roderick Segrave	1315
William F. Benwell	1309
Charles Samuel Wills	1306
Philip James Stopford	1291
George C. Quayle	1276
George Henry Baird	1275
Herbert W. Richmond	1274
Meilor L. O. O. Johnes	1272
Gerald Frederic Trotter	1264
Wilmot S. Nicholson	1241
Godfrey G. E. Webster	1239
Harry Grey Jenkinson	1230
William A. S. Dodds	1229
Charles John Wintour	1228
Reginald Francis Parker	1221
Sidney R. Drury-Lowe	1220
Frank Brandt	1213
Ernest M. Williams	1201
Henry Luxmore	1200
James R. P. Hawksley	1199
M. McGregor Lockhart	1195
Reginald W. Kiddle	1180
Richard Ford Heath	1171
Langton W. Browell	1163
Edmund J. Prendergast	1127
Charles B. Vyvyan	1125

HOW TO AVOID THE INJURIOUS EFFECTS OF STIMULANTS.—The present system of living—partaking of too rich foods, as pastry, saccharine and fatty substances, alcoholic drinks, and an insufficient amount of exercise—frequently deranges the liver. I would advise all bilious people, unless they are careful to keep the liver acting freely, to exercise great care in the use of alcoholic drinks, avoid sugar, and always dilute largely with water. Experience shows that porter, mild ales, port wine, dark sherries, sweet champagne, liqueurs, and brandies, are all very apt to disagree; while light white wines, and gin or old whisky largely diluted with soda water, will be found the least objectionable. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver; it possesses the powers of reparation when digestion has been disturbed or lost, and places the invalid on the right track to health. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT, therefore no family should ever be without it. CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists. Directions, in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S Fruit Salt Works, Hatcham, London, S.E., by J. C. ENO'S Patent.

Printed and Published for the Proprietors, at the Office, No. 6 Wellington Street, Strand, London.—SATURDAY, Dec. 13, 1884. Letters on Business and Remittances should be sent to Mr. RICHARD JAMES WOOD.

*** *NOTICE.—The* Editor *of the* Army and Navy Gazette *is*

MR. WILLIAM HOWARD RUSSELL.

All communications and correspondence not connected with the advertising, commercial, and financial business of the paper, should be addressed to the Editor *only.*

☞ *Advertisements, applications for copies of the paper, remittances, and communications on business, should be addressed to*

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* not *to the* Editor *of the* Army and Navy Gazette.

The subscription to the paper is 7s. per quarter, or 28s. per annum, payable in advance, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

"IT is easy to be wise after the event." So say the apologists of failure. But an apology is not an exculpation. The same line of country is taken by the opportunists who allege that action should be deferred to the last moment,—that it should be the servant of necessity. Again, there are officialists who meet every demonstration of neglect and delay on the part of those in power with the remark, "There is no use in harking-back on what might have been; the question is what are we to do now?" In other words, it is held to be a complete answer to charges of culpable maladministration, that those who point out the evils and dangers which have arisen from it are unable to remedy them at the moment. On December 22, 1883, just one twelvemonth ago, the *Army and Navy Gazette* contained an article on the situation in Egypt, and the duty of the Government in respect to it in connection with the appearance of a contradiction "on authority" from the War Office of the report that reinforcements were to be sent to the Egyptian garrisons:—

> "In the present instance, matters are assuming such a serious aspect in Egypt, that, try as it may, the Government cannot close its eyes to facts, but will be compelled, by the voice of reason, shortly to take vigorous action for the protection of British interests. It is all well and good for us to raise our hands, turn our heads, and say, 'It is your affair.' We have voluntarily undertaken a responsibility, and we cannot now withdraw from our position. These things should have been thought of before the decision was arrived at to occupy Egypt. We took the decisive step, and we shall be obliged to abide by the consequences of our acts. Notwithstanding the War Office contradiction, it is obvious that the Army of Occupation must be reinforced; in fact, nowhere is the necessity for an augmentation of the force at General Stephenson's command more fully recognised than within the walls of the War Office itself, where the utmost is being done to ascertain how many men we could spare, and in what space of time we could have them ready. In Ministerial circles, attempts are being made to under-rate the difficulties which the disaster to Hicks Pasha's army has created. Every thinking soldier sees how hopeless the task is which Baker Pasha is undertaking. And yet, if the Egyptian forces meet with further reverses, there will be nothing for it but for the British Government to send out not a few battalions only, but something very like an army corps to Egypt. It is simply a case now of the stitch in time. The despatch of a few battalions to Cairo at this juncture would save endless trouble and expense hereafter. . . . . . The evil day is bound to come, and when it does, the difficulties of our task will be increased tenfold by vacillation and want of proper forethought. . . . . . . Then surely the wisest plan would be for those in authority manfully to face the exigency, and push on their preparations, in case the emergency should suddenly arise, not to do as they, apparently, wish to do,—lead people to suppose that matters will right themselves, when it is only too evident that each day adds to the complexity of affairs."

Well, Baker Pasha's task *did* prove hopeless, as was anticipated; and then too late to save one garrison of a post the fall of which, with its heroic commandant and his troops, was a disgrace to us; and to destroy the prestige which Osman Digna gained by his victory, the expedition of Graham was despatched to Suakim for the purpose apparently of slaying some thousands of Arabs, and rendering the route to Berber impracticable for Christians or Europeans. Gordon's mission, self-suggested as it was, revealed the ignorance or impolicy of those who had the management of affairs, and of the Government advisers who, without one thought of the consequences of the failure which any experienced councillor would have told them to be inevitable, despatched the generous, chivalrous enthusiast, with a carpet-bag and a companion, to Khartoum, to effect that which would have needed Generals and armies. The ruin and waste of life, the profuse expenditure which will make the bed of the Nile as that of Pactolus, save that there will be none to gather the golden sands which have followed on the march of our ascendancy in Egyptian affairs, are without parallel. The expedition to Abyssinia was the long-deferred result of the indifference and neglect of Lord John Russell; but it was not in our power to refuse to rescue Cameron, Rassam, &c., from captivity! The expedition to Coomassie was forced upon us in vindication of our position on the West Coast of Africa, and as the needed means of punishing a ferocious and intolerable aggressor on our rights. The invasion of Zululand, a consequence of the luckless annexation of the Transvaal, may be regarded as a premature development of Imperialism in South Africa, or as a local measure of self-defence. The invasion of Afghanistan was the outcome of a specific settled policy. These and other acts of war were the results of proceedings which we could not control, or were resolved upon in pursuance of preconceived plans and with definite objects. But the whole of this unhappy Egyptian business has been characterised from beginning to end by absolute vacuity of purpose and by systematic bungling. And the end is not yet. We bombarded Alexandria because Arabi was mounting guns on the works which menaced the ships, and Arabi mounted guns on the works because the ships menaced the city. Then, when that was done, and Arabi did not throw up the sponge, we sent Lord Wolseley with an army to beat him; and when Lord Wolseley had done so, we sent Lord Dufferin to draw up a scheme of government for the oldest and most conservative people in the world. And so on—step after step of utterly purposeless wandering in the wilderness, till we are brought face to face with Europe demanding payment of the indemnity for the Alexandria which we, believing we were Europe's mandatories, allowed to be burned,—an inglorious, but costly and dangerous enterprise to save our once saviour of the Soudan—and chaos! And this is the result of "statesmanship!"

THE country has now pronounced judgment upon the official proposals for increasing the strength of the Navy; and while recognising the value of the contemplated additions, almost without a dissentient voice condemns them as inadequate. It also adds,—"If it were done, when 'tis done, then 'twere well it were done quickly." This was to be expected, and is only natural under the circumstances. The Government, having admitted by their altered tone that reason exists for alarm, can hardly cry "Avast!" until our first line of defence shall have again risen to the level of the national needs. Considering, however, the probable amount required to effect that object, our rulers are, doubtless, in the right to await the sanction of a Committee possessing the confidence of the nation. On the other point, criticism, both inside the House and out, is unanimous. The expenditure of time is not only wasteful, but fraught with peril to the country. Mr. W. H. Smith's pertinent complaint, "that no provision for accelerating shipbuilding was propounded," is re-echoed throughout the length and breadth of the land. That Ministers should acknowledge, as they do by their deeds, an actual danger, and yet be content to allow that it cannot be met in less than from four to five years, seems the height of folly, and makes us hesitate whether the proposals are the outcome of an earnest desire to render the Navy adequate, or merely a shuffling method of escape from a pending dilemma. Much may be learnt in this connection by a comparison of the Government proposals and those put forward by "One who Knows" in the *Pall Mall Gazette*, and by Sir Edward Reed, on behalf of the Navy:—

Government.

3 armoured battle-ships (in dockyards).
1 " " (by contract).
5 " cruisers "
2 torpedo-rams (Polyphemus class) "
10 auxiliaries unarmoured (Scout class) "
30 seagoing torpedo-boats (10 annually) "
Cost, £3,100,000; time, 5 years.
(Government, in addition, spend £1,600,000 on Naval ordnance, and £825,000 on coaling-stations.)

Sir E. J. Reed.

4 armoured battle-ships (in dockyards).
1 " " (by contract).
5 " cruisers "
6 unarmoured " "
15 auxiliaries unarmoured "
50 seagoing torpedo-boats "
Cost, £6,355,000; time, 2 to 3 years.

The "Pall Mall Gazette."

5 armoured battle-ships (by contract).
10 swift cruisers, improved Esmeraldas "
10 to 15 auxiliaries "
100 seagoing 70-ton torpedo-boats "
30 300-ton torpedo-rams "
Cost, £6,500,000; time, 3 years for armour-clads, 1 year for the remainder.
(In addition, £1,000,000 on Naval ordnance; £2,000,000 on coaling-stations; £500,000 on fittings for improved cruisers, and making vessels in commission thoroughly efficient.)

It is here shown that the margin of time proposed by Government for the completion of their additions is nearly double that of the unofficial writers'. And the contention of Sir Edward Reed and other competent judges is backed by the indisputable evidence of the actual performances of private shipbuilders for foreign Governments. The people are certainly entitled to ask,—Why should the prompt completion of the vessels already in hand be delayed, or the construction of the additional ships be prolonged over nearly twice the necessary time? That this dilatoriness is due in great measure to the out-of-date and unwise arrangements of our Constructive Department—bound hand and foot in routine and red-tape—should the more easily admit of its early remedy. And seeing that—as was well pointed out at the United Service Institution the other day—every additional year a vessel is building adds enormously to the expense, we shall hope before long to be able to report noteworthy alteration in our present slow and costly process. Looking at the above proposals, there is also great divergence in the conclusions arrived at as to the number of torpedo craft required. And this did not escape the notice of the critics in the House. Sir Thomas Brassey's estimated ten boats a year seems ridiculously small alongside the fifty of Sir Edward Reed, and the demand for double that number made by the writer of the "Truth about the Navy." Naturally, the Admiralty lay great stress on the fact that torpedo warfare is yet in its infancy; that boats suitable for such operations can be built with great rapidity; and that as yet the best existing type of boat remains a questionable success. But, considering the numbers already possessed by foreign Powers with nothing like the length of coastline or harbours of such value as ours to defend, and that without boats the absolutely needful experience to manœuvre them must be lacking, none of these reasons are sufficiently weighty to excuse our delaying for a moment the purchase of a sufficient number to give our officers a chance of becoming acquainted with their use, and as a provision against attack upon our undefended littoral. Mr. Brand's apologetic denial that the present Government is responsible for the tardiness with which the system of breech-loading ordnance has been adopted goes no way to dispose of the fact that we have hardly any big guns either for the Navy or the coaling-stations, and that the private establishments are so overburdened with work as to be unable to supply our needs quick enough; while there is surely ground for concern in the rumours that we have been unavailingly endeavouring to procure our armaments from Krupp and Schneider. Whether it may be considered advisable to establish another arsenal and torpedo factory in the North, or to facilitate the output of sufficient and better material privately by some such means as have met with success in Germany and in France, the coming Committee will probably decide. But, after the recent admissions, it can hardly be denied that a thorough overhaul of our Naval Administration is desirable, coupled with the rapid expenditure of a large sum and increased annual grants. That there is any doubt about the wish and feeling of the nation, we do not admit. The British taxpayer is never parsimonious in such matters. Recognising these measures as a vital necessity of our national existence, the country will never refuse to pay whatever is shown needful to maintain the integrity of our Ocean Empire.

WE gave lately an account of the vast sums which France has laid out since 1871 in repairing the ravages of war,—over £100,000,000, in addition to a heavily increased ordinary expenditure. The lesson was a severe one. Better for France had she listened to the warning voice of her Military Attaché at Berlin, Baron Stoffel, or to that of General Ducrot, who commanded at Strasburg. Both of these officers warned their Government of the storm which was brewing. Liberal ideas, however, and economy, reduction of the war estimates, &c., were in the ascendant in Paris, and Napoleon III. was endeavouring to "crown the edifice" which was destined to topple over a few months later. When, as the vulgar saying goes, all the fat was in the fire, there was wailing and gnashing of teeth. Sennacherib had come down like a wolf on the fold, and it was *væ victis* with a vengeance. No sooner was peace concluded, than France set to work with energy to set her military house in order; every one dreamed of revenge and recovering Alsace and Lorraine. Marshal Canrobert said the other day that the Frenchman who spoke of revenge was an idiot, and that the Frenchman who did not mentally desire it ought to be kicked. With the whole nation in this frame of mind, no one can wonder at the pecuniary sacrifices made by France with the view of ultimately recovering her lost territory and her lost prestige. This is what she has done with the large sums voted by Parliament. The Army has been thoroughly reorganised. The Active Army is thus composed:—18 army corps, each consisting of two divisions, each division of two brigades, each brigade of two regiments; in addition, a battalion of *chasseurs-à-pied*, a brigade of cavalry, a brigade of artillery, a squadron of military train, a battalion of engineers, &c. Not comprised in the Army Corps, but forming independent corps, are 41 regiments of cavalry, which comprise five divisions, each division of three brigades, a brigade of cuirassiers, a brigade of hussars, a brigade of horse artillery, two squadrons of military train, five battalions of *chasseurs-à-pied*, eight sections of railway men. There is a 19th Army Corps, which lies in Algeria. Service in the French Army has been rendered compulsory since the fall of the Empire; but the period of active service has been reduced from seven to five years, and it will shortly be reduced to three years. Every Frenchman now, after his five years in the Active Army, has to pass four years in the Reserve, then five years in the Territorial Army and six years in the Reserve of that force. Every able-bodied Frenchman, with a few exceptions, has therefore to serve his country for 20 years. This reorganisation has naturally cost vast sums of money, especially in the way of clothing and arming. The 144 regiments of Infantry of the Line, with the 30 battalions of Chasseurs, four regiments of Zouaves, and other Algerian troops, show a strength of 283,563 men and 3,275 horses. The Cavalry, with its 32 regiments of Chasseurs and Hussars, 26 regiments of Dragoons, 12 regiments of Cuirassiers, &c., show a strength of 68,722 men and 61,692 horses. The Artillery is composed of 533 batteries,—the total force amounts to 70,370 men and 31,059 horses. The Engineers count 11,000 men and 945 horses, and the Military Train about the same. The total strength of the French Army is set down at 502,786 men, and 124,977 horses. The Territorial Army is composed of 145 regiments of Infantry. These regiments, from No. 1 to 8, are attached to the 1st Army Corps; from No. 9 to 16, to the 2nd Army Corps, and so on. There are also 144 squadrons of Cavalry at home, and four in Algeria; 364 batteries of Artillery, 56 companies of Military Train, and 18 squadrons, with 52 companies of Engineers, &c. In addition to the above, it is calculated that the wood-rangers and custom-house men, who have received a military organisation, can turn out 20,000 men. If France were now attacked, she could set in the field no less than 24 Army Corps, the men of five of which exist, though the Corps are not yet organised, together with the independent corps above-mentioned, and she would still, in case of necessity, have men enough to form eight more Army Corps. This, then, is the total strength of the French Army:—Five classes of the Active Army, 704,714 men; four classes of the Reserve, 510,294; five classes of the Territorial Army, 582,523; six classes of Territorial Reserve, 625,633. Total, 2,434,164 men. And, if necessary, the War Minister could call up 20 classes of men dispensed from service, which, with men attached to the auxiliary services, would make more than a million additional men. Arms could not perhaps be supplied to this mighty host, or at least not improved arms. Since 1871, the Chassepôt has been replaced by the Gras with a metal cartridge, while steel breechloading guns have been served out to the field artillery. We may add, that since the Franco-German War every horse and cart has been registered, so that they may be instantly available for military service. Throughout the country, too, rifle-clubs have been formed, as well as gymnastic societies, on highly patriotic principles. In a great many places the playground has been turned into a parade-ground, where scholastic battalions manœuvre under the eye of the drill-serjeant; and, in fact, the military feeling has become exceedingly intense since the war of 1870 and 1871. In this brief sketch we must not omit the fortified places constructed to replace Metz, Strasburg, Peronne la Pucelle, and the other French places which, with the exception of Belfort, had to open their gates to the enemy. In 1874 the National Assembly voted a law to this effect:—"Article 1.—New works shall be constructed round the places of Verdun, Toul, and Epinal, in the valley of the Moselle; round Belfort, Besançon; at Dijon, Chagny, Rheims, Epernay, Nogent-sur-Seine; round Langres, Lyons, and Grenoble, in the valley of the Isère; at Albertville and at Chamousette, and round Briançon. It was estimated that these works would cost 85,000,000 fr. It was also decided that the old fortresses should "be placed on a level with the progress of modern artillery." A list appended to this law shows that in France, Algeria, and Corsica there are 143 strong places. As for the 85½ millions voted in 1874, that sum has been greatly exceeded. In addition to the new works along the Eastern frontier, it was determined in 1874 to surround Paris with a new girdle of detached forts, for the Germans, while investing the capital, had been able to fire over the old forts into the heart of the city, and up to the walls of the Louvre. A number of new forts, some of the first order, have since been constructed at a greater distance from the enceinte, and it is hoped that these works, together with permanent batteries, will foil any further attempts on the part of the Germans. It was estimated, and the estimate was far too low, that these works would not cost more than 60 million francs. It may be added that the expense of arming these forts has been very heavy, and also that a special corps of fortress artillerymen has been organised, so that the fortifications may be turned to the best account in the event of an attack. So much has been recently said and written about the sums laid out on the French Fleet, that we may terminate our remarks here for the present.

WHILE it has required considerable effort to arouse the British public to a sense of the insufficiency of our insurance against disaster, our Australasian cousins have long been alive to the necessity for placing themselves in an effective position to resist foreign aggression. Not that, we trust, it is even contingently possible an expedition could be fitted out and despatched for the purpose of subjugation and annexation without ample time and notice for a sufficient British force to be concentrated to oppose it; but that, if practically defenceless, the temptation would be irresistible for a few fast cruisers to swoop down upon the wealthy cities and commerce of the Australias, levying rich contributions and doing incalculable damage right and left, should a war break out between this country and any maritime Power. A Russian fleet of swift vessels, such as are now at Vladivostock, could, with little chance of interception, be thrown upon the Australian shores, so that the first intimation would be the burning merchant craft in their track, and their simultaneous appearance off the coast. The colonists, although justly relying to some extent upon the aid they are entitled to receive from the Imperial Navy, fully realise that the British Squadron in their waters has other duties to perform beside that of guarding their ports; in fact, that those ports must be fortified and garrisoned to assist in sustaining the Fleet, if any adequate provision for protection is to be maintained. For if not so defended, they would, during the absence of the British vessels, simply afford opportunity to the enemy's ships for requisitioning supplies, without which the career of a steamer in foreign waters must soon come to an end. With this knowledge, all the Australasian Colonies have originated defence schemes, which are being carried out with more or less vigour. Naval and Military Militia and Volunteers have been organised, and in some instances small permanent bodies are in existence, round which the defensive forces would rally in times of danger. And although it is obviously impossible to protect by land defences all the harbours, many of which are almost uninhabited, measures have been devised, and in some cases proceeded with, for fortifying those most likely to be the objects of a hostile attack. Nearly all the Colonies, in addition to these preparations, now possess a few men-of-war, for the most part gun-vessels and torpedo-boats, with larger ships for drill purposes. Nevertheless, a great deal remains to be done before they can consider themselves approximately safe. Modern artillery, torpedoes, and machine-guns, with the necessary ammunition, are lacking; and we hear a great deal of unsatisfactory regulations for the training and instruction of both land and sea forces. It is evident, therefore, that the will is not wanting to render themselves secure against external attack, though there may be some doubt as to the best way to go about it. Almost all the positions that would be required as ports of shelter and sustenance by the British and Colonial ships, or must be prevented at all hazards from falling into the enemy's hands, are easily capable of defence. As the hostile cruisers would probably be furnished with steel belts or decks, a few long-range armour-piercing guns, mounted behind earthworks, combined with a well-worked out system of submarine mine defence, would probably be effective in most cases against all probable emergencies; while protection for the comparatively minor places must be provided for by local Naval forces acting as auxiliaries to the British squadron. These independent plans, which each Colony is, as it seemeth best to them, developing for its own security, require, however, to be supplemented by the combined action of all. Now that Australasian federation is within appreciable distance, one of the most urgent measures calling for settlement will be a scheme of mutual maritime defence. Such a plan, in which each Colony should bear its own proportion of expense, is indubitably necessary. The possession by an enemy's force of King George's Sound, an anchorage in Torres Straits, some one of the western New Zealand ports, or such a central position as could be easily found in Tasmania, would be a standing menace, and become the base for attacks, not upon one section only, but upon all, and must be dealt with conjointly. Meanwhile, the Home Government has also, although not to an extent which is desirable, rendered some assistance in men and material. We are strongly of opinion that concerted measures for naval protection should be arranged under Imperial auspices, and include a programme of defensive action for all the Colonies and dependencies in case of war.

The *Comus*, steel corvette, 14 guns, 2,380 tons, and 2,450 horse-power, has been ordered to be immediately repaired at Sheerness for foreign service. It is estimated that her refit will cost about £30,000. Several gangs of mechanics who had just completed the repair of the *Kingfisher* were at once transferred to the *Comus*.

The Admiralty will have some difficulty in finding reliefs for the armour-clads *Invincible* and *Monarch* early next year. As the *Black Prince* is being refitted, possibly the authorities will turn their attention to the *Warrior* and *Resistance*, iron ships of 25 years of age, and dispatch them in relief to the Mediterranean The *Bellerophon* seems still waiting for her guns at Devonport, as she has been for two years.

As an earnest of the intention of the Admiralty to pay more attention to the part that torpedoes will undoubtedly play in any future warfare, and the necessity for further facilities to enable both officers and men to make themselves acquainted with the subject, we are glad to note that instead of making the *Defiance* a tender to the *Cambridge*, she was independently commissioned last week by Commander Norcock as a Naval Torpedo School, to take the same place at Devonport as that of the *Vernon* at Portsmouth. Classes for instruction in electric lighting will also be held on board of her.

The important letters in Wednesday's *Times* from Sir Edward Reed and "Another M.P.," who we are assured is an equally competent authority, are very disquieting. Moreover, they only give expression to a very widespread feeling of dissatisfaction and doubt engendered by the ambiguous manner in which the Government is treating the question of increasing our Naval strength. That there should be discrepancies in the official statements was perhaps, under the circumstances, unavoidable. But taken all together, the Ministerial programme seemed not to fall far short of Sir Edward's minimum requirements, while a hint was given that possibly it might require extension. Our difficulty and the difficulty of a good many people now lies in hardly knowing whether the contemplated additions are in excess of those which the country would, sooner or later, have possessed had the public outcry never arisen, or if they are simply the ships that in any event would have been laid down in the next few years. Sir Edward proves very conclusively that the country has no effective guarantee that any real addition will be made to our Naval power within a reasonable time; and, as he says, should it turn out that the larger part of the programme is only a statement of the construction which would any way have been taken in hand, the battle for the national security has yet to be fought out.

A correspondent writes:—"It does not appear to me that the new ironclads promised by the Extraordinary Vote will be, after all, anything beyond the normal expenditure of the year. The *Rodney* has recently been launched, the *Camperdown*, *Howe*, and *Imperieuse* will, doubtless, be so during next year, when four ships to take their places on the vacant slips or docks would in any case have been laid down. I fail to see, therefore, the extra increase on armour-clads for the extra outlay."

Referring to the recent statements that this country is endeavouring to procure steel guns and projectiles from private firms in France and Germany, we commend the following remarks of a distinguished American to the notice of Government:—"The United States can build and equip a Navy as well as provide proper coast defence, without sending abroad for a single piece of material. There are plenty of material and skilled labour here. *All that is necessary is to give sufficiently large and remunerative contracts to make it worth while for shipbuilders and manufacturers to go to the expense of doing the work.*" Read "Great Britain and her Colonies" for "United States," and the conditions hold equally good, while there are a hundred and one more reasons for this country being independent of foreign manufacturers.

The *Times*, referring to the letters on the Navy which appear in its Wednesday's issue, remarks:—

> "Our correspondents of this morning are convinced that the Government proposals are not 'up to the mark.' That has been our own conviction from the first, and we are glad to be able to quote in support of our view not only the two highly competent authorities who address us this morning, but also Sir Thomas Brassey himself. At St. Leonards he admitted that the proposals of which he is the official defender would become inadequate if other nations increased their shipbuilding, or if the Admiralty relaxed their efforts to carry out the programme, thanked the public for compelling the Admiralty to begin to do its duty, and hoped they will 'continue their interest in naval matters and keep the Government up to the mark.' At present there is great need for that keeping of the Government up to the mark which Sir Thomas Brassey desires. Our Navy is admittedly below its proper strength, and as it is ships afloat that we want, surely the business-like method is to finish these off with all possible speed. It is time for the public to interfere, and to state very forcibly and sternly its belief that a ship of to-day, with the guns of to-day, actually under steam is worth more than any number of the ships of to-morrow, with the guns of the future standing half-built and unarmed."

A German Squadron of four large corvettes is now on its way to the West Coast of Africa to show the national flag, and protect German interests in that part of the world. The time would, therefore, seem to be an auspicious one for directing some attention to the squadron we maintain in those waters. On the Cape of Good Hope and West Coast of Africa station, there is at present, besides the flagship—which appears to have gradually become a guard-ship at Simon's Bay, where the Admiral's house is—one corvette, the *Rapid*, formerly classified as a sloop, two gun-vessels, a paddle-vessel, and three gunboats. These vessels have to guard a coast-line stretching from the Gambia colony on the north to the Cape of Good Hope on the south, a distance of about 3,500 miles, as well as maintain order, and perform the police generally of the numerous African rivers which flow into the sea thereon. When our interest, to say nothing of our possessions, are brought into comparison with those of Germany, it will be seen how diminutive is the squadron we maintain compared with that she has determined to station in that part of the world; and when we further state that both gun-vessels and two out of the three gunboats are antiquated vessels, which can neither steam nor sail, and do not possess modern or machine-guns, it will be seen that on another station as well as in China we are content to be placed in a position of inferiority in regard to our Navy to a European Power.

Captain William E. Gordon is now named to succeed Captain Carter in the *Royal Adelaide*, and as his seniority is 1868, he will, like his predecessor, be the senior captain at Devonport. He served as lieutenant of the *Duke of Wellington*, flagship, during the Russian war in the Baltic 1854-55; was present at the bombardment of Sveaborg in 1855 (Baltic medal); was first lieutenant of the *Sampson*, and was present during the China war of 1858, receiving the China medal and clasp. Captain Gordon at one time commanded the torpedo-ship *Vernon* at Portsmouth, and is also in possession of a Good-service Pension of £150 per annum. He will probably take command of the *Royal Adelaide* on the 26th inst.

We wonder if the Government will pay any attention to the recommendation of Lord Ravensworth's Committee on Shipbuilding and Repairs, which is to this effect:—"Your Committee are informed the Navy now takes annually a vote of money specially for gun-mountings, and is about to form a staff of designers of its own at the Admiralty. Your Committee are of opinion that this is a step in the right direction, and that the policy involved might with advantage be carried still further; nor can they see any good reason why the Department which is responsible to the country for the ships and the maintenance of the Fleet should not undertake the entire responsibility of procuring the guns which the ships are to carry."

Last summer the Russian Minister of Marine commenced the construction at the new Admiralty, on the Neva, of a sea-going torpedo-boat of the largest and most powerful type. This vessel will not be launched before the spring, but the Minister is so satisfied with the design, that he has ordered another to be commenced on the same lines at once.

We understand that as the crews recently furnished for the *Rambler*, *Kingfisher*, and *Paluma* have so denuded the Sheerness Barracks of petty officers and seamen, that there are not sufficient men available to perform the ordinary routine duties of the establishment. Application was made for a draft of 50 men from the *Duke of Wellington*, but as all the available seamen there are required to make up a crew for the *Triumph*, none could be spared. In the Steam Reserve at Chatham there are eight vessels, either ready for the pennant or almost completed for sea, including the *Ajax*, *Conqueror*, *Leander*, *Arethusa*, and *Rover*, but where sufficient men available to man even one of them are to be found without reducing the crews of the vessels employed on the home stations, nobody seems able to answer.

The sailing of the Chinese cruisers, with American and European adventurers on board, has created a slight flutter in France, and it is supposed that Admiral Courbet will have his force increased. The Admiral, by the way, is said to be in bad health, like General Millot.

Professor E. F. Ritchie, of Bridgeport, Conn., the *Army and Navy Register* states, is in correspondence with Admiral Jones, of the British Navy, with reference to the introduction here of a poisonous air-bomb he has invented, and which he claims will revolutionise all modern warfare. The gases before being introduced into the bomb are several times compressed and impregnated with poisons which make them quickly fatal to any living creature breathing them. When exploded the gas lies close to the ground. Thrown into an army, the inventor thus describes the effects of what he calls his humane system of warfare:—"The bomb explodes and the air within a radius of 100 feet becomes charged with silent death. You cannot fight it, you cannot destroy this silent life-destroying enemy. What is the result? Why, the men can stay and asphyxiate, but you will find they won't. They will run away in a beaten and demoralised condition, and this is one of the best points about the device."

The *Pall Mall Gazette* remarks:—"We hear that some uneasiness is felt in Paris in consequence of the report that two Chinese cruisers have left Shanghai for an unknown destination. The two vessels are supposed to be sister-ships of modern build with an average speed of 16 knots and two 26-ton guns each. It is not surprising that the French should be alarmed, for such assailants might do incalculable damage to their commerce. But the thought cannot help forcing itself on the mind—what if we were in the position of the French? We have no cruiser at present which could catch these Chinese vessels, and even when our new *Merseys* are finished they will not, according to the present programme, carry an armament equal to that of these ships. It is not a pleasant reflection that the greatest commerce in the world might, under conceivable circumstances, be at the mercy even of a Power ordinarily so weak, for offensive purposes, as China."

A "Naval Officer" writes:—"I see that Rear-Admiral Jouett, commanding the United States North Atlantic Squadron, has issued an order to his fleet, in which he calls attention to the fact that no custom has hitherto prevailed of giving recognition, by salute or otherwise to the flag,—'the emblem not only of the national authority at home, but of liberty and progress throughout the world,' and expressed a wish that all officers or men who may be on deck at colours will raise their caps. This very right and proper practice, and the ceremony of saluting on arrival upon the quarter-deck were universally followed at one time in our own Navy, but I am sorry to say a feeling seems now spreading that these customs are more honoured in the breach than the observance. I trust it is not a sign of our decadence that such should be the case."

A new corvette is being built by the Swedish Government at Malmö, called the *Freya*. The vessel is 250 ft. long, 41 ft. broad, and 27 ft. deep; it is built of steel, covered with teak, and has engines of 1,800 horse-power. The armament will comprise nine guns mounted in two casemates, one at the bow and the other at the stern. The cost of the vessel is fixed at 1,480,000 crowns.

The Dockyard authorities at Portsmouth were on Monday informed that an extraordinary subsidy of £9,000 would be granted to be exclusively devoted to the advancement of the armoured ships building and completing for the pennant. Two thousand four hundred hands will accordingly be kept working upon the ships an extra hour per day until the end of March. The number of workmen is the same as had been previously employed upon them, for though it was possible to increase the gangs, the plant of the yard is insufficient to provide more material than is at present being used. Five thousand pounds additional to the ordinary wages vote for the yard has also been granted, to dispense with the necessity of discharging men at the close of the year.

We regret to hear that by the bursting of a gun on board the *Canada* one man was killed and at least four others most dangerously wounded, with but slight hope of recovery. The pebble powder embedded itself during combustion in their bodies, thereby adding immensely to their sufferings. If we remember aright, the armament of this vessel was not satisfactory when she left England.

Mr. Henry Richard, in a long and rambling letter to the *Daily News*, seeks to let the light in on what he terms the other side of the Naval scare, so that those who may have become agitated, owing to the efforts of the *Pall Mall Gazette*—certain Admirals and others—may be reassured. He quotes from a French writer, who, to say the least of it, treats Sir W. Symonds with scant courtesy, to prove that the French possess a great number of war-vessels quite as useless as many of our own; but we fail to find any real answer to the contention that the navies of European Powers have gradually so grown in strength lately, while we have been standing still, that an effort is needed to regain that supremacy which even Mr. Cobden admitted was necessary. If Mr. Richard proves anything, it is that even men of known integrity and honesty of purpose, like himself, may become so blinded by their fondness for a fad, as to jeopardise and imperil their country's interests by putting difficulties in the way of those who seek to show the country wherein its true danger lies.

Some time ago a commission was appointed, under the control of Admiral Jaudre, to report upon the reorganisation of the Staff of the Russian Navy. We now learn that the commission has recommended that the *personnel* should consist of 20 vice-admirals, 35 rear-admirals, 86 captains of the first rank, 194 captains of the second rank, and 529 lieutenants. The question of midshipmen has been left open for the moment.

Most of the island batteries protecting Cronstadt are built of granite, and those of the Crimean War epoch are several storeys high. In 1874 the Russian Admiralty commenced the construction of a new one, consisting of revolving iron turrets on a granite basis, embedded in a huge mound of earth. This was finished at the close of the Turkish War, and called "Fort Miliutine." Recently a commission was appointed to report upon the whole question of the defences of Cronstadt, and has recommended that as far as circumstances will allow, several of the other island batteries should be rebuilt on the same principle. As the expense will be admittedly heavy, the commission recommends that it should be spread over a term of years.

As the preparation of the specification of the new ships for the Navy is to be hurried on, Lord Northbrook will return to the Admiralty immediately after Christmas. We hear that his lordship is considerably better in health.

If there still exists any doubt in the mind of the Government as to the feeling of the public with respect to the Navy and willingness to pay for its efficiency, they should attend some of the crowded Liberal meetings, and hear the applause which greets such speeches as Sir Arthur Otway's, for example, at Rochester last Monday, when he urged the national importance of placing the Navy on such a footing as to be able to meet more than one of the Great Powers should the occasion arise.

In a discussion in the French Chamber on Wednesday, Admiral Peyron stated that five points on the coast of Madagascar were now occupied by their troops, but that a complete blockade of the island was impossible.

The Marquis of Hartington, Secretary of State for War, accompanied by Mr. Brand, M.P., Surveyor-General of Ordnance; Colonel Alderson, Director-General of Artillery; Rear-Admiral the Hon. F. Egerton, M.P., and other gentlemen, visited the gun manufactory of Sir Joseph Whitworth and Co. (Limited), at Openshaw, near Manchester, on Wednesday for the purpose of ascertaining the capabilities of the works for supplying large guns and other war material required for the Navy. Several interesting processes connected with the forging and casting of steel, including that of forging hoops for guns by hydraulic machinery, were performed in their presence, and they spent about two hours visiting the establishment.

Mr. James Cox, Paymaster R.N., late secretary to Rear-Admiral Lethbridge, in the *Revenge*, at Queenstown, has been appointed in a similar capacity to Admiral Phillimore, at Devonport.

The Irish very naturally want to have their share of the money which will be voted next session for the construction of naval vessels. Mr. Deasey, M.P., intends to press upon the Government the desirability of finishing the works at Haulbowline Island, Queenstown, and for which the sum of £120,000 is required, in a year and a half, instead of by March, 1888, as at present proposed. As, however, no provision in that sum is made for the erection of buildings and plant, unless something more is done when the docks are finished, they will not be ready for use for a considerable time longer.

The *Inflexible*, Captain S. H. Seymour, which was commissioned at Portsmouth in July, 1881, will leave Malta for England on Monday next to be paid off, she having been relieved by the *Dreadnought*, Captain the Hon. E. R. Fremantle, C.B.

We think that the statement of Mr. E. Birkbeck, M.P., at the meeting on Monday of the National Sea Fisheries Protection Association, should not be allowed to pass without explanation or contradiction. He is reported to have said that the cruisers that had been sent to protect the drift fishermen were not only inefficient, "but the commanders were too often found in harbour, instead of being out on the fishing-ground." While agreeing with Mr. Birkbeck that the vessels employed —such as the *Cherub*, for instance—are utterly unfitted for the work, and that in consequence they have frequently to run for shelter when perhaps their services are required with the fishing fleet, we have no hesitation in saying there is no ground for—and Mr. Birkbeck when it is pointed out to him will be the first to withdraw—the unjust imputation he has the appearance of casting upon the naval officers in command, and the manner in which they perform their duties.

The Admiralty have approved of Lieutenant D. J. Kysh, R.M.L.I., H.M.S. *Alexandra*, being appointed signal officer at Suakim.

Much gratification was expressed by the members of the Dudley Chamber of Commerce when, on Tuesday morning, Mr. John Collett, the Admiralty Director of Contracts, intimated to that body that a determination had been arrived at to extend the contracts for iron work more widely, and that he would be glad to receive information concerning the manufacture of cables, anchors, nails, and other material.

Lieutenant-Commander Chadwick, Naval Attaché at the United States Legation, has left for America, and will probably be away from his post until the middle of February next. He has the best wishes for a pleasant holiday from the large circle of friends that he has made during his sojourn here.

The Paris correspondent of the *Times* tells the following anecdote of Admiral Lynch, of the Chilian Navy, who was at one time in our naval service, and bears a medal for the expedition of 1844 to China:— "On my asking him if he desired the post he holds as Minister to Spain for the sake of seeing Europe again, he replied, 'No; but during the war I lost the use of my left eye and my right hand. I wished to consult Dr. Galezowski, who has a great reputation as an oculist in our country, and a surgeon who could cure my hand. Not being rich enough to afford the voyage, I accepted this post, which enabled me to come over for advice.' Considering that Admiral Lynch was for four years Dictator of Peru, at the head of one of the most corrupt administrations in the world, that during that time the revenues of Peru were greater than before the war, that he created surpluses, and that he has had the control of upwards of $60,000,000, the way in which the Chilians would best honour this heroic and honest sailor would be to carve on the pedestal of his statue, or on his tombstone, the sentences of his which are here quoted."

Captain E. O. de B. Nepean, R.M.L.I., has embarked in H.M.S. *Valiant* on completion of a course of gunnery instruction in H.M.S. *Excellent*.

Should his Royal Highness the Duke of Edinburgh take command of the Mediterranean Squadron next year, Lieutenant C. T. Gimlette, who was his flag-lieutenant in the *Minotaur*, will accompany him to the *Alexandra*.

The Channel Squadron have now separated to their respective ports, and the ship's companies will be enabled to spend Christmas or New Year's Day at home. This is a boon which the men naturally think a great deal of, and might be oftener granted than it is. It is reported that all the ships of the Squadron, with one exception, will reassemble at Portland about the 7th of next month, preparatory to a cruise off the Spanish coast. The *Minotaur* will not be ready for sea until about the middle of February.

Governor Sir John Glover opened the great Simpson Dry Dock at St. John's, Newfoundland, with great ceremony, last week, by the admission thereto of the *Tenedos*, Captain Drummond. This dock is believed to be the largest in America.

Orders have been received for a further reinforcement of the Marines in Egypt, and men will be drawn from the guardships who have seen active service, and be despatched immediately. On inquiry, we find there is no truth at present in the rumour that the strength of this corps is to be increased. We are much disappointed, for the all-round training of the Marine fits him to cope with and overcome obstacles insurmountable to others; and, if we are not mistaken, there is undoubtedly a want, both afloat and ashore, of such men as helped to turn the tide of defeat at Tamai.

Lieutenants W. S. S. Harvest and H. A. Coward, R.M.L.I., H.M.S. *Northumberland*, and Lieutenant E. S. D. Crowther, H.M.S. *Agincourt*, will be relieved on the 22nd inst. on completion of two years' service afloat, by Lieutenants T. L. Aplin, P. E. F. Hobbs, and C. Henderson, R.M.L.I.

The repair of the boilers of the *Minotaur*, for an additional service of eighteen months, is estimated to cost £2,000, and is to be completed, and the flagship ready for sea, before March.

The appointment of Captain of the Chatham Steam Reserve will, it is understood, be held until February 20 by Captain Lord Walter T. Kerr, and then be conferred on Captain A. Buller, C.B., Aide-de-Camp to the Queen, now of the *Achilles*, in the Channel Squadron. Captain Lord Walter Kerr is named as being the officer selected to command the new armour-plated turret-ship *Conqueror*, on that vessel being commissioned at Chatham, where she is now nearly ready for the pennant.

We are authorised to state that there is no truth in the rumours that have lately prevailed to the effect that Rear-Admiral Howard has been offered or is likely to get the command at Queenstown in succession to Rear-Admiral Lethbridge.

Commander G. R. Bromley, who has been appointed to succeed Commander O. P. Tudor in the *Urgent* at Jamaica, will not leave England until early in February.

It is stated that the *Bacchante*, 14, unarmoured corvette, which is to be commissioned at Portsmouth shortly, is to take the place of the *Boadicea* on the Cape station, and that the *Bellerophon* is to be brought forward and prepared for service on the North American and West Indies station.

An extra number of hands have been put upon the *Warspite*, a new steel barbette ship, at Chatham, to complete her, if possible, for commissioning early next year.

Although Mr. Rendel is on an unofficial visit to Admiral Curme at Devonport, it is an open secret that he is making inquiries with a view to introducing certain much-wanted alterations in the present roundabout manner in which business is conducted in the Naval yards.

Over the signature of "H. W. Gordon" a very sensible letter appears in the *Times* on the manufacture of warlike material, in which the writer claims that in 1880 he pointed out that it would be for the benefit of the empire if at least one-third of all guns, carriages, projectile, and other war material were obtained under contract, since, in the event of a big war, we could not meet the demands from India and the Colonies unless we had the assistance of the manufacturing firms of this country, and this aid we could not command unless we employed them in time of peace; and that now, as then, while Woolwich Arsenal and Elswick combined cannot meet the necessary requirements of peace time, we are not, by encouraging contractors with current orders to acquire the necessary knowledge and plant, taking steps to insure supplies of these articles in the event of war.

The rumour that the French Government had purchased, or was going to purchase, some English transports, which were to be rechristened, created a nice patriotic hubbub the other day among our neighbours, equal to that when the Jordan was preferred to the rivers of Damascus. The French Government had to yield to the popular outcry as it did a short while back, when it proposed to buy some light-draught gunboats from Messrs. Yarrow and Co., of Poplar. The War Minister, too, has been obliged to give assurances that in future horses for the French cavalry shall be purchased in France, and not abroad. To take another view of this matter, suppose France, in urgent want of war material as she was in 1870 and 1871, and patriotic Englishmen objecting to powder and shot being allowed out of the country! What would the French think of such a course?

At the Kensington Parliament on Monday night, the following resolution, moved by Captain J. C. R. Colomb, R.M.A., was carried unanimously:—"That it is expedient to establish British concert, by assembling a British Conference, composed of representatives selected by the various Governments of our empire, to report to her Majesty by what system and by what means the resources of the empire can be combined for purposes of united action and the organised and sufficient defence of common interests in war."

On Monday evening, at a dinner of the International Arbitration and Peace Promotion Association, attention was called by the chairman to the fact that the usual toast of "The Army, Navy, and Reserve Forces" was purposely omitted from the list. Putting on one side the studied insult to the services upon whose protection these gentlemen in common with the rest of the nation will be only too glad to rely against foreign aggression, is it not rather going against than towards the end they so ostentatiously—but with, unfortunately, such little success—endeavour to promote, if they exhibit such littleness in their treatment of the country's servants, who, for all they knew, would be as delighted as themselves to turn their weapons into ploughshares and see the lamb lie down alongside, instead of inside the lion?

Part I. of an article on "The Short-service System and the Employment of Discharged Soldiers," by Captain C. W. White, will appear in the forthcoming number of the *Illustrated Naval and Military Magazine*.

Instructions have been issued that "whenever troops parade for inspection by the Commander-in-Chief in any dress other than 'review order,' the Staff connected with the troops will appear in the dress laid down for 'marching order,' with the exception that they will wear tunics instead of frock coats."

The war game, the practice in which was so zealously promoted in the Home District by Colonel Methuen, promises to flourish in his absence, as on Thursday evening four Colonels of the Guards were the combatants—Colonels Sterling, Digby, Trefusis, and Gascoigne. Watching the game, and listening to the lively discussions which accompany its progress, is by no means a waste of time, even for those who believe that practical work is the sole avenue to the tree of military knowledge.

Some rather unpleasant stories are being told as to the internal arrangements of a certain Metropolitan Volunteer regiment. It seems that the regiment, being without range accommodation, the officers, with the view of getting over the difficulty, assembled in their individual capacity and agreed to form themselves into a limited-liability company, for the purpose of acquiring a property at Harrow, which would enable them to supply the want, and thus promote the efficiency of the corps. The commanding officer was applied to to take shares, which he declined to do. Subsequently a resolution was passed by the officers, as shareholders of the company, expressing their regret that their "chief" had not joined them in their undertaking. This was done in no insubordinate spirit, but in order to explain to him the awkward position which the shareholders would occupy as a result of his decision. Thereupon the Colonel called for explanations, and a whole series of misunderstandings ensued, the upshot of which has been that eight officers have had it intimated to them that they must not leave town without their commanding officer's permission. Of course, the whole matter will have to be referred to the military authorities for decision. The most extraordinary facts that have come to light in connection with the dispute are that the commanding officer is eight years over the age when, by War-Office regulations, he should have been retired, has scarcely been near his regiment at parade for years, and subscribes nothing to the corps funds. The services of such a "chief" might very fairly be dispensed with, we should think.

If a commanding officer habitually absents himself from parade, he cannot very well complain if in his absence things go wrong. And if the War Office lays down a rule of compulsory retirement for age, on no possible grounds can it be defended if it sets that rule aside in favour of an officer, unless he be one of exceptional activity. The Volunteer organisation is, in some respects, so constituted, that to command a regiment properly a man should be constantly on the spot, and in the full vigour of manhood. It is not fair to a regiment or the service to allow commanding officers to be "figure-heads" only, as the Lieutenant-Colonel has clearly been for years past in the present instance; and if, under such circumstances, complications arise, the Military Authorities, and the Military Authorities only, are to blame for not enforcing the Regulations. In the Army, a General or Lieutenant-General, whatever his service, whatever his reputation may be, *must* go to the Retired List on attaining the age of 67; a Major-General at 62; and a Colonel at 55 (according to new rule). But a Volunteer commanding officer who has scarcely been near his regiment for years is allowed to hold on, regardless of all rules and regulations. The thing is too absurd!

Colonel J. P. Carr-Glyn, half-pay, late Rifle Brigade, has been appointed to command the 22nd Regimental District, at Chester.

We are able to confirm the report that the appointment of Assistant-Adjutant and Quartermaster-General of the Dublin District, about to be vacated by Colonel Montgomery-Moore, on promotion to Major-General, has been offered to Colonel T. Gonne, half-pay, 17th Lancers.

We see that the German War Minister was asked a few days ago if it were true that the sons of artisans were not admitted into the Military School. The reply was that there is no absolute rule on this subject; but that the military authorities enjoyed a discretionary power, owing to the peculiar character of the profession of officer. This reminds us of a conversation which General Bouillé had with Frederick the Great just 100 years ago, and which is to be found in Carlyle's life of the philosopher and soldier-King:—"At the reviews, the King," wrote Bouillé, "inspects one regiment after another; it is he that selects the very corporals and serjeants, much more the superior officers; nominating for vacancies what cadets are to fill them, all of whom are nobles." And Carlyle adds,—"Yes, with rare exceptions, all. Frederick, democratic as his temper was, is very strict on this point; because, says he repeatedly, nobles have honour; a noble who misbehaves or who flinches in the moment of crisis can find no refuge in his own class; whereas a man of lower birth always can in his."

The *Temps* publishes some interesting news from China, from which it appears that some of the Celestial commanders showed very little stomach for the fight. The General charged with the defence of the arsenal of Foutcheou fled, bare-footed, at the first shot, and a reward had to be offered for him. He was at last discovered in a convent about fifteen miles from the scene of action. It appears, however, that the Commander-in-Chief of the Army of Yunam, who means business, has formed forty battalions, each 600 strong, with which he intends fighting.

Surgeon-Major Sir Samuel Rowe, K.C.M.G., who was in 1881 Governor and Commander-in-Chief of the Gold Coast, has been appointed Governor and Commander-in-Chief of the West African Settlement at Sierra Leone, vice Colonel Sir A. E. Havelock, C.M.G., who proceeds to Trinidad as Governor, vice Sir S. Freeling.

The Anglo-Indian Mission for the delimitation of the Russo-Afghan Frontier will pass the next three months at Maimene, a town which the last European to visit was General Grodekoff, at present Assistant-Governor-General of Turkestan. In view of the interest in the region which the presence of the Lumsden Mission will provoke, Messrs. W. H. Allen and Co. have decided to issue at once a second edition of Mr. Charles Marvin's popular work, "Grodekoff's Ride to Herat." Maimene, by the way, is a very important Afghan town, and although it has suffered in the wars between the Ameer and the native Uzbeg inhabitants, still it is a powerful point, and contains most of the necessaries of life. One thing is very satisfactory about the place. It lies in a country peopled by Uzbegs, who possess scarcely any of the fanatic and savage spirit of the Afghans, and who, further, have been so thoroughly crushed, that no fear need be entertained of the Mission being immersed in a popular rising. Formerly, Maimene boasted of a population of 60,000 people, but the highest estimate at present is 35,000. It is surrounded by a wall six yards thick, and provided with a moat. The citadel is situated inside the city, and is erected on an artificial eminence. Its walls are 24 ft. high. A huge tower, covered with blue glaze, serves as the *reduite* of the citadel, When the Afghans first occupied the Khanate of Maimene in 1874, it took an army of 10,000 men and 20 cannon six months to reduce the city. During this siege, 18,000 of the inhabitants were slain.

The terse and crushing commentary of "R. B. B." in Monday's *Times*, on the gloomy "outlook on the Nile," of the "Military Correspondent" of our contemporary last week, relieves us from the necessity of exposing the errors into which the obvious prejudices of the critic led him. "R. B. B." put in a nutshell the arguments which the *Army and Navy Gazette* used week after week, and month after month, to demonstrate the truth of a proposition obvious to any one who knew the country, that there was no route from the Mediterranean to Khartoum practicable for a military expedition, save that which has been taken after full consideration by the military advisers of the Government. In the selection of that Nile route, the arguments set forth in this journal were not without influence. But still there were, as there are, men who went about in clubs and elsewhere shaking their heads and uttering prophecies of woe because the expedition was not sent by Suakim to Berber, and talking vaguely about "laying down a railway." "Herbert Stewart declares he could have made a dash at Berber with his cavalry, if he had been let go on after Tamai." "Graham could have moved on the Nile after he had routed Osman Digna." And so forth. The truth is that the route was, if not impracticable, in all respects dangerous at the time the Government decided on sending a force to relieve Gordon,—that is, in the second week of August. As we said last week, Sir S. and Lady Baker might travel with ease from Suakim to Berber if the tribes were not hostile; but 10,000 Sir Samuels could not do it in peace time without great delays and vast preparations, and in war time they could not do it without severe fighting and immense risks. "The dreams of a visionary Royal Engineer," which Moltke, we infer, declared the advance by railway to be, was dreamed by many others, and it is to be regretted that the *Times* has given its authority to the fantastic scheme, for it will perpetuate the delusion. By all means let the railway be made as soon as the coast is clear, if any one is willing to find money for it, and should it be found necessary to detain the Soudan garrisons and emigrants on account of the heat or for other reasons, as some say it will till late next year, the route from Berber to Suakim may be selected for the return, as the desert ought then to be safe. Gordon, who knows the country thoroughly, and who is an engineer as well as a General, never gave a thought to Suakim, the vaunted base of the "Military Correspondent."

In accordance with a recent ruling at Head-quarters, all military prisoners confined under Class "A," par. 162, Sec. VI., Queen's Regulations, have been removed from military to public prisons.

L'Armée Française remarks that the war estimates were voted by the Chamber in two half-sittings. In that short space of time Deputies got through forty-one "chapters," and disposed of no less than £24,000,000. It appears that next year some serious reductions are to be effected in the French Army, especially in the number of cavalry officers. The Artillery and Engineers are also to be reorganised, and their Staffs cut down. *L'Armée Française* is in no way charmed with the cheese-paring policy thus foreshadowed, and says that it never heard any more hollow and senseless phrases than those uttered the other day in the tribune by General Campenon, who made this declaration:—"As long as I have the honour to be War Minister, the objects of all my efforts shall be to conciliate the principles of strict economy with the continual development of the military forces of the country." These sentiments were loudly cheered by the Chamber, which, of course, imagines that it is to have a more powerful military establishment than at present, and for a less price.

THE FIELD OF HONOUR.

Messrs. Fords, Howard, and Hulbert have published a volume by Major Ben C. Truman, entitled "The Field of Honour: being a complete and comprehensive History of Duelling in all Countries, including the Judicial Duel of Europe, the Private Duel of the Civilised World, and specific descriptions of all the noted hostile meetings in Europe and America." It is an interesting memorial of a custom which is passing into oblivion, and will be of special interest to many of our readers whose memories go back to the days when the practice of calling-out your man was still in vogue. To Gen. James Wilkinson, U.S.A., is given the credit of originating the custom of "posting," his victim being the equally well-known John Randolph of Roanoke, who declined a challenge on the plea that he could not descend to the General's level. In reply Wilkinson asked Randolph, among other things, to "ascend to the level of a gentleman, if possible; act like a man, if you can, and spare me the pain of publishing you to the world for an insolent, slanderous, prevaricating poltroon." Randolph having neglected to avail himself of this eligible opportunity, his antagonist posted his notice on all the taverns and street corners of the national capital:—

> HECTOR UNMASKED.—In justice to my character I denounce to the world John Randolph, a Member of Congress, as a prevaricating, base, calumniating scoundrel, poltroon, and coward.

In 1850 Zachariah F. Johnston, an officer of the Navy, who undertook the same exploit at the expense of Fabius Stanley, who had declined his challenge, was tried by court-martial and dismissed.

California, it appears, takes the palm for the number of fatal duels fought within its limits. Illinois, on the contrary, boasts that but one duel has ever been fought upon her soil—in which the challenged party (Alphonso Stewart) was killed and the survivor (William Bennett) hanged. Thus was carried out on our soil the stern decree which both Frederick the Great and Gustavus Adolphus threatened, but did not enforce; the duellists, at the sight of the gallows waiting for the survivor, concluding that they had other and more important business than that of winging each other. During the war with Tripoli many fatal collisions took place between American Naval officers and officers of the British garrison at Gibraltar. During the Civil War in the United States there were, Major Truman tells us, few or no hostile meetings among Federal officers. Perhaps he should except the encounter in Louisville between Jefferson C. Davis and Gen. Nelson, and the encounter at the War Department, in which Henry M. Naglee threatened to pull Mr. Stanton's nose. The first, at least, comes within the scope of his volume, which records many similar encounters. Among the Confederates there were a number of fatal duels, the most conspicuous being that between Gen. Marmaduke, of Missouri, and Gen. Walker, of Georgia, in which the latter was slain.

"Affairs of honour" between officers of the United States' Army and Navy were quite frequent up to 1850, after which time they ceased almost altogether. A great many valuable lives were sacrificed while they lasted, among them Capt. Ferdinand Louis Ameluńg, U.S.A., killed in Louisiana in 1820; Midshipman John Banister, U.S.N., in Virginia in 1835; Lieut. Samuel H. Bryant, U.S.A., in North Carolina in 1814; Midshipman Samuel B. Cocke, U.S.N., near Washington in 1822; Capt. Joshua W. Collet, U.S.A., in Mexico in 1848; Surgeon Willis H. Bassett, U.S.N., in South America in 1830; also Stephen Decatur, whose encounter with Barron at Bladensburg on March 20, 1820, is placed second on the list of noted American duels, that between Hamilton and Burr holding the first place.

Among the fatal Army and Navy duels mentioned by Major Truman are the following:—Midshipman Connor, U.S.N., killed by Midshipman Pierson, near Havana, in 1819; Ensign Hopkins, U.S.A., near Bladensburg in 1814, and Samuel C. Bloomfield, U.S.A., near Weehawken, N.J., in the same year; Lieut. Jas. J. Bowie, U.S.A., near Lake Pontchartrain in 1809; Pymr. James, U.S.A., near Savannah in 1815; Lieut. F. B. White, U.S.M.C., by Lieut. W. B. Finch, U.S.N., at Boston Harbour in 1819. Lieut. Huston and Ensign Bradshaw killed each other in 1794. In Mississippi in 1812 Capt. John Stewart, U.S.A., was killed by Henry Mason, and in the some State in 1810 Lieut. Stephen Rose, U.S.A., was killed. In 1809, near Carlisle, Pa., Cornet Huxton Milton, U.S.A., was mortally wounded, and in 1814 Capt. Macomb, U.S.A., was killed by a brother officer. Lieut. Lawson, U.S.N., in 1802, at Leghorn, killed Capt. Jas. McKnight, U.S.M.C., and in 1803 Lieut. Buck killed Thos. Moore at Natchez, Miss. Joseph Bainbridge, then a midshipman, killed a bullying Englishman at Malta in 1803, distance four paces. At Gibraltar in 1820 Lieut. Downing, U.S.N., killed Lieut. Smith of the British Army.

Among those wounded in duels were Gen. Gadsden, by Gen. Howe in 1778, and in the same year Gen. Chas. Lee, A.D.C. to Washington, was wounded by his fellow aide, John Laurens; Gen. Conway by Gen. Cadwalader, and Capt. William Cottineau, U.S.N., by Capt. Landais. Lieut. Osborn, U.S.M.C., and Lieut. Van Dyke, U.S.N., wounded each other in the Mediterranean in 1803. Midshipman Chas. Crillon Barton was wounded in 1839 at Port Mahon by a brother officer; Capt. Archer of the Voltigeurs in Mexico in 1847 by Capt. Andrew Porter, and about the same time Lieut. David Bell, U.S.A., by Lieut. Robert Williams, U.S.A., near Washington. Midshipman Wm. Caney was wounded in the first duel fought in California in 1849. Lieut. Richard Summers, U.S.N., who was killed in the Intrepid fire-ketch, fought three duels in one day, and was wounded in the first two. Probably the last duel fought in California was that between James R. Smedburg and F. W. Gardiner in August, 1869, Stuart M. Taylor and Howard Crittenden being the seconds.

Gen. Nathaniel Greene has the honour of having declined a challenge in 1785 from Capt. Gunn of Georgia, with the approval of Washington, who himself declined to fight a duel, as did Gens. Marion, Adair, and Houston. Gen. Harney declined a challenge from Gen. Sumner, and had him court-martialled. Harney was also once challenged by Lieut. Ihrie, U.S.A. When Robert Toombs was told that he must challenge Ben Wade of Ohio for attacking him in a speech in the Senate, Toombs replied: "Oh, no, I mustn't, for that same old wretch is the deadest shot in the district. Wade and I have been practising many times together, and he can hit a ten-cent. piece at thirty paces every time; and—and—to tell you the truth gentlemen, I *can't*."

In his duel with Benedict Arnold, Lord Balcarras received his antagonist's fire without injury; and when Arnold exclaimed, "My Lord, are you not going to fire?" Balcarras threw his weapon away and replied, "No, sir; I leave traitors to the public executioner." Marshal Ney, who was remarkably fond of duelling in his youth, never lost an opportunity of meeting friend or foe. Ignatius Loyola, the founder of the Society of Jesus, in spite of his cloth, was a famous duellist, and once called a man out for denying the divinity of our Saviour, and ran him through; but then Loyola was a fiery Spanish soldier in his youth, and was covered with scars of combat when he took orders. —*The Army and Navy Journal*, New York.

Under the auspices of the officers of the Brigade of Guards, a series of Saturday evening musical entertainments has been arranged at the hall attached to the Guardsman Coffee Tavern, in the Buckingham Palace Road. The tavern is the property of the officers, and has, in addition to the refreshment-rooms, a library and conversation-room, where soldiers may meet their relatives and friends; and though the house has been established for some time, the idea of the Saturday evening amusement is new. All soldiers are admitted free, and friends are charged but a small sum, 6d. being the highest price. Smoking is allowed, and tea, coffee, mineral waters, &c., are to be had by all, so that interchange of hospitality between soldiers and their friends is a consideration for which provision is made.

FRANCE AND CHINA.

The French forces in Tonquin are strongly entrenched at Lang Kep, and the Chinese are in force at Bac-lé, about four miles distant. Operations at Formosa are at a standstill. The officers of the Chinese ship Feihoo have been released on parole.

The ironclad Triomphante, now refitting at Saigon, has been ordered to convoy the transports Cholon, Cheridon, and Chandernagore from Singapore to Formosa. The transport Canton is expected in Chinese waters at the end of this month. She will be convoyed by another ironclad.

A telegram has been received from General Brière de l'Isle announcing that a body of Chinese troops of from two to three thousand men had descended from the mountains with the object of attacking a village situated about eight kilomètres to the north-east of Chu. A portion of the French garrison of that place, composed of Tonquin sharpshooters and troops of the Foreign Legion, were sent to repulse the attack, and succeeded in dispersing the Chinese and inflicting heavy losses on them.

The transport Tarn, from Tonquin, has arrived at Toulon. She had on board the remains of the ill-fated Capt. Rivière and Major Berthe de Villers.

For their services in Tonquin and China Coms. La Guerre and De Mingret are promoted to captain, and Lieut. Manceron, for his brilliant services in command of the Hoche, is promoted to commander.

THE FRENCH NAVAL ESTIMATES.

On Saturday last the French Naval Estimates came on for discussion in the Chamber of Deputies. In the course of the debate Vice-Admiral Peyron, the Minister of Marine, said:—"Our adversaries are not even agreed as to the new navy which they demand, except on one point—the suppression of ironclads. They pretend that these ships are unable to resist the new engines of war, and that we must even abandon the idea of finishing those on the stocks, devoting all our efforts to the construction of rapid cruisers and torpedo boats. This theory is based on the idea that an ironclad, when struck by a torpedo-boat, is bound to sink. Nothing, however, proves the correctness of this assertion. Owing to the water-tight partitions which isolate the compartments of the ironclads, the damage inflicted will not be greater than that sustained by an unarmoured ship struck by a shell in her inner works. Besides, the chief danger from torpedo-boats is run when vessels are lying at anchor. It is far less when they are in the open sea, and when the state of the weather and of the water renders the firing from the torpedo-boats uncertain, and diminishes their speed. It has also been said that cruising tactics will in the future be alone effective. I do not deny the value of the cruisers, and I should be glad if you would allow us to build a number of them. But I consider them insufficient in many cases. Moreover, if we were the first to destroy our ironclads we should place ourselves in a position of inferiority towards our neighbours. England, Russia, and Italy—powers which devote so much attention to their navies—are continuing the construction of ironclads. . . . . . I am not defending myself personally. I am ready to resign my post to another worthier than I. I have spent my life on the sea, and I have not trained myself for the struggles of the tribune. But I am anxious to defend a body of men with whom I am intimately acquainted. I should like to be able to convince the Chamber that, as our seamen are prepared for everything that the country may ask them to do, money alone is needed to complete an armament which may boldly be compared to that of any other nation." M. Menard-Dorian urged that the Committee had really made abatements altogether of only 4,500,000f., and that of this amount but 1,500,000f. applied to armaments. This left the Naval Estimates at 196,000,000f., which the Committee considered ought to be ample for the maintenance of the Navy. France expended on naval construction 90,000,000f., while even England, with her larger Fleet, did not lay out more than from 96,000,000f. to 97,000,000f. It could not, therefore, be said that the French Chambers dealt out their Naval supplies in a niggardly spirit. The Committee also recommended a larger number of cruisers and torpedo-vessels, and greater expedition in the building of war-vessels, the rate at which they were at present completed leaving much to be desired. The Estimates were subsequently passed by the House.

PAY DEPARTMENT.

"Fusilier" writes;—"Can you or any of your numerous readers kindly inform me whether a regimental major (who finally joins the A.P.D., and resigns his combatant commission) is entitled to the departmental allowances of a major on joining, although he is only a paymaster, with the honorary rank of captain, according to the *Gazette* and the *Army List?* Does a major derive the slightest advantage over a captain or subaltern on joining the A.P.D.? In the Dress Regulations (p. 103, foot-note), it is laid down, 'Brevet majors appointed from regiments wear the uniform laid down for staff paymasters;' which, I presume, implies that a regimental major, on joining the A.P.D., is entitled to the rank as well as the uniform of a major. I want to know,—Does a major draw one penny in pay and allowances more than any subaltern or captain that is gazetted to the A.P.D.? Is he entitled to the rank of major on his card and under his signature? I should really feel greatly obliged if any one will take the trouble to answer these questions. I am now in the A.P.D. under the new rules. Shall I gain anything by passing for my majority, and getting regimental promotion, if I intend to stick to the A.P.D. all the same?"

Indian Notes.

The Queen has been pleased to approve the appointment of Lord Reay as Governor of Bombay, in succession to Sir James Fergusson, Bart., K.C.M.G., C.I.E., whose term of office will expire next April.

ROYAL MILITARY COLLEGE.

H.R.H. the Field-Marshal Commanding-in-Chief visited Sandhurst on Monday, and made his annual inspection of the cadets. His Royal Highness, accompanied by Gen. Johnson, Director-General of Military Education, Major-Gen. Harman, D.A.G., Col. A. G. Hamilton, R.E., and Col. FitzGeorge, A.D.C., arrived at the College at half-past 10, and was received with a royal salute. He at once proceeded to make a minute inspection of the cadets. At the conclusion of the inspection, the Duke, in a short address, complimented the cadets on the manner in which they had gone through the exercises. He said that he had never seen them carried out better; he was gratified with the account given by their governor of their conduct, which had been most exemplary. He trusted that on returning from their vacation they would start work with renewed vigour. He concluded by saying that their future career depended entirely upon their conduct and whilst preparing for their entry into the Army. His Royal Highness then inspected the plans and drawings, and visited the dining halls, dormitories, and gymnasium, and afterwards proceeded to the Staff College, where he inspected the work done during the last term, and after lunching with the governor, Gen. Sir R. C. H. Taylor, his Royal Highness and staff returned to London, leaving Sandhurst at 2.40 p.m.

THE DEFENCES OF THE UNITED KINGDOM.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In your issue of the 13th inst., I notice that a "Colonel, R.E.," states that the War Office have plans, ready drawn-up, for the occupation of important strategical positions in the event of an invasion. It is very satisfactory to be granted even this amount of information. As a resident in the West of England, may I ask if the War Office consider the fortifications at Falmouth to be complete? There is not a heavy gun there; the few guns of medium power that are there are sacred to the Royal Naval Reserve, who in the event of war would be wanted at sea, not on land. The forts at Plymouth are notoriously incomplete; the guns for them may exist somewhere, but not in the forts. I refer to Staddon, Stamford, and those from Saltash to the Laira. May I ask how long it would take to arm and store these forts? The Artillery will be occupied at Bovisand, Picklecombe, &c. Where is the skilled labour to be found? Can Whiteley or Pickford supply it? Plymouth is said to require a garrison of 24,000 men; 3,000 of these should be Artillery. Where are they? Certainly not in the West. How many rifles ought to be in store? How much ammunition? Perhaps "Colonel, R.E." will let us know how much is there. The nation has spent large sums on fortifications; if these are to be of any use, they must be armed, stored, and manned. The advantage in war is now obtained by the nation which is ready. The money annually wasted in moving troops uselessly and aimlessly about the kingdom would go a considerable way to strengthen the nation if it were properly applied. Let our authorities endeavour next year to arm and man the Plymouth forts just for a little practice; and instead of providing a new dress, either for the Line or for the Royal Artillery, let them try and provide a few men to wear the present uniform.—I am, &c., LINE MAJOR.

According to the *Morning Post*, the well-known German ammunition manufactory of Lorenz, of Karlsruhe, Baden, is reported to have succeeded, after many expensive and tedious experiments, in constructing a novel projectile for the infantry rifle. All projectiles used up to the present time, even the so-called "hard-lead" balls, owing to their liability to splinter or to change their shape when striking a bone, produce very dangerous wounds, which involve frequently amputation of the shattered or torn limb, or cause death. The first who tried to mend matters in this respect was Lieut.-Col. von Bode, of the Prussian War Ministry; but he failed in his humane efforts, although some degree of success attended his endeavours to benefit suffering and maimed humanity. Mr. Lorenz has been trying for a long time to effect an improvement, but without succeeding. He has, however, not allowed himself to be discouraged by his ill-success in solving the problem, and he has at last overcome the difficulty. The result of his perseverance is the invention of a steel compound projectile, which, according to a competent authority, is destined to take the place of those now in use. The Lorenz projectile consists of two parts—the mantle and core. The mantle, or casing, was at first made of copper. But as this metal did not answer the purpose, the inventor chose, finally, steel. In the experiments made with the compound projectile it penetrated at a distance of 30 paces from the muzzle of the rifle three millimètres of iron, 27 centimètres of beech-wood, and 40 centimètres of fir-wood, or a total of 26¼ in. The projectile was unchanged in shape, and the lead core had remained firm. Other experiments, carried on for some time against living animals, were equally successful. The only objection to the new projectile is greater expense in its manufacture as compared with ordinary lead balls. But when it it considered how greatly the cause of humanity would be advanced by its use, the extra cost should not be grudged, it may be expected, however, that if the manufacture is carried on on a large scale the cost of production will probably be reduced to that of the infantry projectiles at present in use.

The Secretary to the Admiralty, in reply to Mr. Palmer, M.P., states that in recent years, since the improvements in the manufacture of electro-plate, commanding officers have preferred to draw for their personal use electro-plate, rather than silver, and that the silver, which is marked with the foul anchor and broad arrow, being no longer required, the stocks were collected, and about 31,000 ounces were sold. Sir T. Brassey adds that the sale is perfectly legal, and that the value received has been credited to Vote 10 in the Navy Estimates.

The officers and crew of the Foam have been informed by the Admiralty that their claims for salvage services rendered to the Royal Mail steamship Nile in January last will shortly be paid.

The Army.

2ND LIFE GUARDS. The death is announced of Gen. J. P. Roche, formerly of the regiment, which occurred at his residence, 17 Stafford Terrace, Kensington, on the 9th inst., at the age of 78.

5TH DRAGOON GUARDS. Capt. Hegan vacates his appointment as Commandant of the Cavalry School of Auxiliary Forces at Aldershot from the 31st inst. Capt. Scarlett, late of the regiment, has been appointed as Lieut.-Col. commanding the 6th Brigade, Scottish Division, Royal Artillery. Regtl. Serjt.-Major Bullock is recommneded for a commission as lieut.

6TH DRAGOON GUARDS (CARABINIERS). Lieut. Fleming is *en route* from India in the Jumna.

3RD HUSSARS. Capt. H. Fawcett, late of the regiment, died at Warnford, Lymington, on the 16th inst., aged 46 years. Orderly-room Serjt. Woodhead has been appointed a military staff clerk, on probation, at the War Office (Surveyor-General's Department).

5TH LANCERS. Capt. Fletcher has been appointed Commandant of the School of Instruction for Officers of Auxiliary Cavalry at Aldershot, and will take up his duty there on the 1st prox.

6TH INNISKILLING DRAGOONS. The *Natal Mercury* says the Inniskilling Dragoons are under orders for Cape Town, and will probably accompany Col. Warren on his mission to Bechuanaland.

10TH HUSSARS. Major Spottiswoode is on passage from India in the Jumna.

17TH LANCERS. Lieut. and Adjt. the Hon. L. H. D. Fortescue is on passage from India in the Jumna.

19TH HUSSARS. We regret to learn from Egypt that Lieut.-Col. Taylor is down with fever on the Nile.

20TH HUSSARS. Capt. Richmond has accepted the adjutancy of the Montgomeryshire Yeomanry.

ROYAL ARTILLERY.

Major O. F. T. Annesley has been appointed Acting Superintendent of Prisons in the Straits Settlements.

The following officers are *en route* from India in the Jumna:—Majors R. F. Williams, A. G. Lane, and C. H. Atchison; Capts. W. Riddell, J. A. C. Wedderburn, H. B. Jeffreys, and E. A. Smith, and Lieuts. C. E. Callwell, H. Chanes, A. R. Stuart, and G. J. L. de Berry.

Col. F. E. Hadow has been appointed to command the artillery in the British Burmah Division.

Lieut.-Col. E. B. Cottingham has been appointed Assist.-Adjt. and Qrmr.-Gen. on the Staff in South Africa.

The following officers of the Royal Artillery have undergone examination at Gibraltar, and have qualified for the St. John Ambulance Association certificates:—Lieut.-Col. W. Ward; Major R. de Marylski; Capts. W. A. Smith, R. P. Leach, G. D. Fanshawe, H. S. Darkins, and Lieut. H. J. Clutton. Certificates have also been awarded to nine non-commissioned officers and men.

ROYAL ENGINEERS.

Capt. H. R. Rich was killed whilst playing polo at Rawul Pindee on the 17th ult. The deceased was son of Col. F. H. Rich, R.E., 17 Queen's Gate Terrace, S.W. He joined the Army Jan. 8, 1870, and became capt. Jan. 8, 1880. Served with the expedition against the Malays in Perak in 1875 (mentioned in despatches, medal); also in Zulu campaign of 1879 (medal with clasp). Capt. Rich collided with another player, and was picked up insensible; and, though he lingered for some hours, never recovered consciousness.

THE BUFFS, EAST KENT REGIMENT (3RD). Capt. Spens, 1st Batn., has accepted the offer of a Volunteer adjutancy.

KING'S OWN, ROYAL LANCASTER REGIMENT (4TH). Lieut. Dolphin, 2nd Batn., is *en route* from India in the Jumna.

NORTHUMBERLAND FUSILIERS (5TH). Capt. Pearse-Hobbs returns to regimental duty from the adjutancy of the Ayrshire R.V.

ROYAL FUSILIERS (7TH). The head-quarters and service companies of the 1st Batn., under command of Lieut.-Col. Butler, consisting of 16 officers and 769 non-commissioned officers and men, left England on Sunday last for Gibraltar. Lieut. Hon. C. J. White, 2nd Batn., is ordered home to join the depôt.

KING'S, LIVERPOOL REGIMENT (8TH). Col. Mesurier succeeds to the command of the 2nd Batn. by the retirement of Col. Cochrane, Major Crawley becoming Lieut.-Col. Capt. Richardson, 2nd Batn., is on passage from India in the Jumna.

NORFOLK REGIMENT (9TH). Lieut.-Col. Stockley is *en route* from India in the Jumna, to join the 1st Batn.

LINCOLNSHIRE REGIMENT (10TH). Capt. Meyrick, 2nd Batn., is *en route* from India in the Jumna.

SUFFOLK REGIMENT (12TH). Capt. Cave, 1st Batn., has been appointed a Deputy-Assist.-Adjt.-Gen. for Musketry on the Bengal establishment, vice Major Walker, 34th Regt., deceased, and has been posted to the Rawul Pindee Circle. Capt. Watson, 2nd Batn., has left the Staff College, and proceeded to Bechuanaland on special service.

SOMERSETSHIRE LIGHT INFANTRY (13TH). Lieut. Cox, 2nd Batn., is *en route* from India in the Jumna.

EAST YORKSHIRE REGIMENT (15TH). In consequence of the death of Mrs.-Layard, wife of Lieut.-Col. Layard, 1st Batn., at Sheffield, on Dec. 3, 1884, the serjeants have decided not to hold their annual ball on New Year's Eve.

BEDFORDSHIRE REGIMENT (16TH). Lieut. Campbell, 2nd Batn., is *en route* from India in the Jumna.

LEICESTERSHIRE REGIMENT (17TH). Capt. Hyslop, a probationer for the Pay Department, has been appointed to the 1st Royal Dragoons. Lieut. Sandwith has leave from India for 15 months, on private affairs.

ROYAL SCOTS FUSILIERS (21ST). Lieut. Northcott, 2nd Batn., has leave from India to England. Capt. Abercrombie, 1st Batn., has accepted the adjutancy of the Ayrshire R.V. "Borderer" writes:—"I have read 'Claymore's' letter in your last week's edition on the inconvenient way the Scots Fusiliers are obliged to wear that weapon, and while, as a humble member of that corps, I heartily sympathise with him, I would take advantage of this opportunity to ask why we wear a claymore at all. Why, since the introduction of the Territorial system, have the Scots Fusiliers, a Border regiment, been arrayed in a Highland dress?—at least, I presume it is a Highland dress; it certainly is not a Lowland one. Can it, indeed, be that the authorities, with that wonderful ignorance of national and territorial peculiarities which they take every opportunity of displaying, imagine that tartan trews and doublet form the national costume of the Borderers? or do they think that Lowlanders consider it any honour to be dressed like 'would-be' Highlanders?"

Cheshire Regiment (22nd). Major Kirby, 2nd Batn., has leave from India for six months, on medical certificate.

King's Own Borderers (25th). Capt. Barns has been presented with a regulation claymore by the officers of the 7th Surrey R.V., on his vacating the adjutancy.

Gloucestershire Regiment (28th). On the departure of the 105th Regt. for Malta, the 28th will move into the Militia Barracks at York. It has been accommodated, since its arrival from Portsmouth, partly in the Cavalry and Depôt Barracks.

Worcestershire Regiment (29th). Lieut. Edwards has been permitted to resign his probationary appointment for the Indian S.C.

East Surrey Regiment (31st). The head-quarters and service companies, under command of Lieut.-Col. Bayley, consisting of 22 officers and 736 non-commissioned officers and men, will embark to-day at Gibraltar in H.M.S. Crocodile for conveyance to India.

West Riding Regiment (33rd). Brevet Major Booth and Lieut. Gore are *en route* from India in the Jumna.

Royal Sussex Regiment (35th). Major M. M. Pohle, formerly of the regiment, and Adjt. 2nd Volunteer Batn. Gordon Highlanders, died at 18 Bon Accord Street, Aberdeen, on the 16th inst., aged 48 years.

Oxfordshire Light Infantry (43rd). Capt. Eccles is *en route* to India in H.M.S. Crocodile.

Essex Regiment (44th). The *Essex Telegraph* gives an account of the reception of the regiment at Colchester, and goes on to say:—"It was in the middle of the eighteenth century that the regiment was raised in Colchester. Before leaving Colchester in the year 1857 the officers determined to erect a tablet to the memory of their comrades who fell in the Crimean War. They desired also to place over the tablet the old Crimean colours, which were in a most tattered condition, as they had lately been specially presented with new colours. The Rev. Henry Caddell, vicar of St. Peter's, gave his consent to the depositing of the colours in St. Peter's Church. The following is the inscription:—'Sacred to the memory of Capt. Fenwick, Hon. C. Agar, W. H. Mansfield, and F. W. Caulfield, who were killed June 18, 1855; Lieuts. R. Eyre, died at Balaklava, Oct. 15, 1854; M. Bradford, died 1856; Assist.-Surg. Thomson, died at Balaklava, Oct. 5, 1854; and 18 serjeants, 12 drummers, and 420 rank and file, who were killed, or died of wounds or disease, during the war in the Crimea, doing their duty under the colours which hang over this stone.' Emblazoned on the colours is a representation of the Sphinx, with Egyptian hieroglyphics, 'XLIV. East Essex,' surrounded with the rose, shamrock, and thistle. And now, after 14 years of foreign service, chiefly in India, but for the past few months at Aden, the regiment has again returned to Colchester."

Northamptonshire Regiment (48th). Capt, Ellis has vacated his appointment as Brigade-Major at the Curragh, and proceeded to Manchester, to join head-quarters.

King's Own Light Infantry, South Yorkshire Regiment (51st). Lieut. Money is *en route* from India in the Jumna.

Border Regiment (55th). Major Cargill reverts to regimental duty from the adjutancy of the Westmoreland R.V.

Middlesex Regiment (57th). Capt. Foley has accepted a Volunteer adjutancy, that of the 1st Glamorgan Rifles.

East Lancashire Regiment (59th). The *5 and 9 Lilywhites' Gazette* says:—"Now that the draft is gone we find the strength of the battalion is,—Field officers, 5; captains, 5; subalterns, 8; staff, 2; warrant officers, 2; staff serjeants, 6; serjeants, 32; corporals, 40; drummers, 16; privates, 257. Our establishment is 480 privates. We want, to complete establishment, subalterns, 4; staff serjeant, 1; privates, 223."

King's Royal Rifle Corps (60th). Lieut. St. Leger, 4th Batn., is *en route* from India in the Jumna.

Durham Light Infantry (68th). Capt. Cartwright is *en route* from India in the Jumna.

East Surrey Regiment (70th). Major Tibbs, captain on the Retired List, has proceeded on special service to Bechuanaland.

Highland Light Infantry (74th). Brevet Lieut.-Col. Leigh and Capt. Maxwell are *en route* to India in the Crocodile.

Middlesex Regiment (77th). Lieut. Le Bailly died at Secunderabad on the 3rd inst., aged 22 years. He joined the Army Sept. 9, 1882.

Seaforth Highlanders (78th). Lieut. Hatton has leave from India for 15 months, on private affairs.

Loyal North Lancashire (81st). Capt. Crosbie has accepted a Volunteer adjutancy.

Royal Irish Rifles (83rd). The following appeared in the Metropolitan Police orders of Dec. 1:—"Lieut.-Col. Labalmondière has this day retired on a pension granted to him by the Secretary of State in full appreciation of a service extending over 34 years in the Metropolitan Police. Col. Labalmondière has merited and received the respect and esteem of the members of the Metropolitan Police Force during the whole of his long and meritorious service, and the Commissioner feels satisfied that he has the cordial good wishes of all ranks on his retirement from his onerous duties." Col. Labalmondière was educated first at Eton, and afterwards at Sandhurst. He joined the 83rd Foot in 1833, served in the Canadian Rebellion, and as a young ensign was thrice selected to carry despatches.

Royal Irish Fusiliers (87th). Col. Stevenson, C.B., and Lieut. the Hon. E. B. Stopford are *en route* from India in the Jumna.

Connaught Rangers (88th). Lieut. Freckleton is *en route* from India in the Jumna.

Cameronians, Scottish Rifles (90th). Lieut.-Col. Ward succeeds to the command, vice Col. Rogers. Capt. Vivian is *en route* to India in the Crocodile.

North Staffordshire Regiment (98th). Capt. Watkins is *en route* to India in the Crocodile.

Leinster Regiment, Royal Canadians (100th). Lieut. Whittall, a probationer, officiating wing-officer, 2nd Hyderabad Infantry, is about to be admitted to the Bengal S.C. from Aug. 1, 1883.

Durham Light Infantry (106th). Lieut.-Col. Lee is on passage from India in the Jumna.

Rifle Brigade. Lieut. King-Salter, 4th Batn., is *en route* from India in the Jumna. On vacating command of the Darjeeling Depôt next month, Lieut.-Col. Percival will, it it said, return to England, on leave for nine months. Capt. Thornton, 2nd Batn., has proceeded on special service to the Cape from the Staff College.

2nd West India Regiment. Lieut. G. T. Hamilton died at Torquay on the 18th inst., aged 24 years. He joined the service Feb. 22, 1882.

Commissariat and Transport Staff. "Outsider" writes:—"Your recent remarks upon the unaccountable delay in filling up the vacancy in the rank of deputy-commissary-general, caused by the retirement of Deputy-Comy.-Gen. Pigott, of the Commissariat and Transport Staff, are most opportune, and are much appreciated by the officers of the Department. The system of jobbery and favouritism that obtains at the head-quarters of the Department under the present directorate is responsible for the unwarrantable delay in filling-up this vacancy. Unless an officer happens to belong to the 'Mutual Admiration Society' recently formed in the Department (a spurious imitation of the parent society), his chances of preferment are absolutely nil. To their honour be it said, the military authorities at the Horse Guards are fully alive and opposed to this iniquitous attempt to foist a junior officer (whose age compels him to retire in a few months unless he is promoted meanwhile) over the heads of older and equally capable officers. The whole Department is watching the result of this struggle between the opposing forces of 'favouritism' and 'merit' with the keenest anxiety."

Pay Department. During the present trooping season, the following officers of the Pay Department are expected to return to England:—Majors Bamfield, pymr., 1st Batn. 23rd Regt., Dum Dum; Franklin, 2nd Batn. 14th Regt., Sealkote; Wade, 2nd Batn. 5th Regt., Chakrata; Stockley, 2nd Batn. 4th Regt., Poona; and Haldane, 77th Regt., Secunderabad. Major J. C. Ross, District pymr., Straits Settlements, will shortly return to England, and will be relieved by Major J. M. Kerr, pymr., 27th Regt. Staff Pymr. and Major T. P. Senior, 48th Regtl. District, Northampton, has been instructed to take over financial charge of the District Pay Office, Devonport, vice Lieut.-Col. Leigh, chief pymr., retiring on a pension. Staff Pymr. and Major W. Hughes, 53rd Regtl. District, Shrewsbury, is under orders to take over the duties of chief pymr. in Ireland, vice Lieut.-Col. J. Nowlan, chief pymr. in Dublin, who is retiring from the service. Major O. M. Johnston, pymr., 85th Regt., relieves Major Hughes, at the 53rd Regtl. District, Shrewsbury. Major T. G. Booth has been appointed Pymr. of the 48th Regtl. District, Northampton.

The Auxiliary Forces.

MILITIA.

Royal Irish Regiment. The Committee of the Royal Humane Society have awarded the silver medal of the society to Serjt. P. Betts, 5th Batn., who saved the life of a man at Kilkenny.

Royal Warwickshire Regiment. Capt. Savage, 3rd Batn., is attached to the 1st Batn. at Devonport, for duty during the absence of Capt. Jones, on service at the Cape.

Bedfordshire Regiment. The 3rd Batn. will train next spring at Colchester, where the 1st Batn. of the regiment is stationed.

Lancashire Fusiliers. Capt. Romer, 3rd Batn., has been attached to the 1st Batn. for duty during the absence of Lieut. Hibbert with the Bechuanaland Expedition.

North Lancashire Regiment. Capt. Da Costa, 4th Batn., has been selected for temporary duty with the 2nd Batn. at Portsmouth, during the absence of Capt. Davidson in Bechuanaland.

Yorkshire Regiment. Col. Gunter, 3rd Batn., has successfully contested the borough of Knaresborough in the Conservative interest.

Connaught Rangers. Lieut. Robertson, 5th Batn., has embarked for South Africa, for service with the Bechuanaland Expedition.

Royal Dublin Fusiliers. The leave of absence granted to Capt. Vereker, 3rd Batn., for the purpose of proceeding to South Africa has been cancelled at his own request, his services in Bechuanaland not being required.

THE VOLUNTEERS.

19th Middlesex (Bloomsbury) Rifles. Lieut.-Col. Richards always has to make a good report of his regiment, and on Saturday evening last when Major-Gen. Gipps, C.B., presented the prizes at the Drill Hall in Chenies Street, a most satisfactory account was given of the past year's work. Col. Richards and his officers are deserving of the utmost credit for their indefatigable exertions to keep the corps in the front rank of the Volunteer service. To say that no regiment in the Metropolis is better ordered than the Bloomsbury is simply to repeat an ofttold tale. The regiment took up a strong position years ago, and the fact of its having maintained it ever since is the best possible proof that the position was earned not by good-luck, but by systematic good management. The Bloomsbury Rifles are to the fore in everything, and well may Col. Richards feel proud at being at the head of so well disciplined and efficient a regiment.

20th Middlesex (Artists'). The members of the B Compy. held their annual dinner on Monday at the Covent Garden Hotel. The chair was occupied by Capt. A. C. White, supported by Lieut. Brock, A.R.A. Among other officers present were Capt. Hammond, Lieuts. Weiss and Jones, &c. After the usual toasts of the evening had been given, the chairman presented the prizes which had been won at the company's prize meeting, numbering 13 in all.

Attention having for some time past been drawn to the serious dearth of officers in the Volunteer Force, statistics on the subject have been prepared. These show that in the three counties alone which respectively furnish the largest number of men to the organisation, viz., Lancashire, Middlesex, and Yorkshire, the number of officers short of the establishment has now reached the high total of 448. Matters in this respect are not so bad in the Metropolitan as in the two northern counties, Middlesex being only 59 short, whereas Lancashire wants 284 officers and Yorkshire 105.

Obituary.

The late Vice-Admiral Mends, whose sudden death at Dover was announced on Tuesday, was the last surviving son of the late Comdre. Sir Robert Mends, G.C.B. Admiral Mends married a Miss Nisbet, daughter of the late Capt. Josiah Nisbet, R.N., step-son of Admiral Lord Nelson. He entered the Navy in 1821, and served on the coast of Africa, the Cape, the East and West Indies, the Mediterranean, and was afterwards inspecting commander in the Coastguard. He was promoted to the rank of captain in 1858, and retired in 1870, attaining the grades of retired rear-admiral 1875, and retired vice-admiral in 1880.

Major-Gen. C. H. Hearn, C.I.E., late Inspector-Gen. of Police at Madras, died on the 12th inst. at West Brighton, aged 55. He entered the Indian Army in 1846, and in 1848 was employed against the insurgents in the Golcondah Zemindary. He became lieut.-col. in 1872, col. in 1877, and major-gen. in 1881. He served in the second Burmese war, and was present at the capture of Martaban in 1852. He served also with the Turkish Contingent from 1855 till 1866 as assistant-adjutant-general attached to the head-quarters of the force.

Major E. T. Browell, Royal Artillery, writes:—"Would you kindly allow me to inform the subscribers to the Memorial Windows in All Saints, Cairo, and the public that the above stained-glass windows are now erected, and may be described as follows?—Five lancet windows in the apse form the memorial. In the centre light is represented Our Lord in Majesty, and in the others are attendant figures coupled in each division. On the dexter side, thus arranged, the figures referred to are of Old Testament soldiers—viz., Joshua, David, Jonathan, and Gideon. On the sinister side the two lights are occupied by figures of soldier saints—viz., St. Michael, St. George, St. Alban, and St. Martin. Beneath the feet of our Lord are the emblems of the Evangelists, In like position, and also above the figures in the side lights, are demi-figures of angels, armed as those of St. Michael's host. The work throughout is of an extremely rich and elaborate character. An inscription runs along the base of the windows, incorporated in the glass, as follows:—'To the glory of God, and in memory of their comrades who died from wounds or sickness during the autumn and winter of 1882, these windows are erected by some officers of the British Expeditionary Force.' The total sum collected was £171 16s. 2d.; Messrs. Clayton and Bell's bill was £156 15s. No other expenses were incurred, except about £3 for circulars, postage, &c. The balance of £12 will, it is hoped, go towards placing beneath the windows a brass giving the names of those in whose memory they are erected. The thanks of the subscribers are due to Messrs. Clayton and Bell for the high artistic merit of the work, which they have executed at a cost much below their ordinary tariff."

Letters from Admiral Dowell, in the Vigilant, at Shanghai, have been received up to Nov. 5; and from Comdre. Morant, at Hong Kong, up to Nov. 11; from Admiral Hewitt, at Bombay, up to Nov. 28; and from the senior officer in the Gulf of Aden up to Dec. 2.

Doubt appears to exist as to the identity of the body of Lieut. Nichols, commander of the Wasp. The rector of Cloncha states that he buried the remains in Malin Churchyard, and inserted the deceased's name on the parish register. As, however, it is believed on Arranmore Island that he was washed ashore and interred there, the rector intends to try and settle the point.

The final engine trials of the Polyphemus have been deferred at Portsmouth until the middle of January. The difficulties with respect to her boilers and torpedo fittings have been overcome, her estimated speed has been more than realised during a six hours' run, and little doubt is felt that with the slight readjustments which are being made to secure additional ventilation in the stokeholes, the full power of the machinery will be developed. In the new Polyphemuses which are to be laid down next year, it is intended to introduce a few improvements upon the original design of the hull, but in the meantime the Admiralty propose to despatch the present ram upon an experimental cruise for the purpose of testing her sea-going qualities, and supplying the Constructive Department with further *data*.

The Borghese sailed from Portsmouth for the Cape last week with munitions of war and two torpedo boats.

A company has been formed for the purpose of acquiring, developing, and carrying on the business of the well-known and old-established firm of wine merchants, Messrs. Allan and Norris, of the Haymarket, and more especially to carry on a Naval, Military, and general wine and spirit trade, and to more fully develop the Naval branch of the business, which has already been carried on for many years with great success. This business was originally established in Mark Lane by Mr. Allan, about the year 1630. The company ought to offer a good investment for Naval officers, for if properly managed it cannot fail to be successful.

IMPORTANT to NAVAL and MILITARY MEN.

THE MUTUAL LIFE ASSURANCE SOCIETY.
(*Established* 1834.)

No EXTRA PREMIUM for Climate or War Risk is Charged after the Policy has been Five Years in force, and the Life Assured is aged Thirty.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

Army & Navy Gazette.
LONDON, SATURDAY, DECEMBER 20, 1884.

TWENTY years ago, "in the piping times of Purchase," some serious warnings were given to the officers of the Army, then persuaded that the system so often threatened must live long, that it was doomed. They were given, by the *Army and Navy Gazette* at least, timely notice that there was a time coming which was not good for the investors in fancy prices for commissions. There had been Commissions and Committees, which had reported and recommended, but reports and recommendations had been so often made and disregarded, that there was no great alarm caused by these exercitations and abstract proposals. But the tremendous stroke dealt by the arm of Germany to the French giant inside his castle walls afforded an opportunity to the reformers and military iconoclasts for the overthrow of the plutocratic influences of Purchase, which they nimbly turned to account. In 1870, the sentence which we in 1864 had declared to be inevitable was pronounced by the lips of Mr. Cardwell; and Purchase, with all its faults,—and yes! let us say all its virtues, too,—was put to death. It would be unjust and untrue to say that

"R.I.P." was not engraved on the tomb with a kindly hand. It was indeed the same which has to sign cheques, and which will have to go on signing them for some twenty millions sterling, and which has given the taxpayer the privilege of paying a huge annuity to an army of very discontented and profitless pensioners. Never was any measure so arbitrary, and in its unjust enactments so softened in operation by liberal appreciation of the claims of the sufferers, as was the abolition of Purchase by the exercise of the powers of the Army Purchase Commissioners. If any had a right to complain, perhaps it was those who had to pay for the retirements and fancy prices, which latter were recognised in a liberal spirit not to be found in the actual text of the decree. There were, as there must be in all such organic changes, some cases of hardship and some grievances. These, as we always said, should be redressed by the State, for it was said to be in the interests of the State that the wrong was done. But the deed was done. To-day the Army is not a reconstruction of old materials. It is a *novum organon.* Officers and men are natives of these isles, but they serve under different conditions, and have different *raisons d'être.* The old Purchase officer had an investment in the service, and he commanded men whose whole future was in the service. It is true that he could "sell," and that he "sold" where he pleased, unless service considerations or war interfered; but in war the officer of the old Army was certainly not inferior to the officer of the new Army in any military attribute. It is probable that the new officer will be as good as his forebears in any war to come, but as yet he is untried, for since 1854-5 the Army has not been engaged with a European enemy. As for the men, there is less certainty that they will display the qualities of the soldiers of the old Army than there is in respect of the officers doing as well as their predecessors. Those who are mainly responsible for the metamorphose appear to be distrustful of the results of their handiwork. In the days of the old Army, which, with its old Purchase officers and its old soldiers, did some noteworthy things, it would have been impossible for a General to have culled a force of elegant extracts, officered by selection, tempered by favouritism, in which the favouritism and the selection were so similar that it would not be easy to draw the line between them. But the success of this selected Army—and that it may be successful we pray, as that it will be successful we believe—will prove nothing at all in respect to the efficiency of the Army proper for general war purposes. The system is tentative. As to officers, the system of selection is theoretically established for commands, but it is not, it cannot be said to be "regulation," because the Commander-in-Chief, who is the adviser of the Secretary of State, will have none of it. As to men, there is only this solid fact, that the General who had to drive the Nile coach selected as far as he could the old horses and stagers, and left the young ones at grass, so there is no opportunity of judging of the form of the whole stable. It is in this state that the Army of to-day is found, in the face of grave complications which it may be called upon to solve by the application of the *ultima ratio* of kings and peoples.

The Military Secretary will not hold a levée on Tuesday, the 23rd inst.

Details of the Bechuanaland Expedition may be found in the Blue-book (C 4251), December, 1884, on p. 36. It appears that, in addition to the volunteer and irregular forces, there are to be "one battalion of infantry, one regiment of cavalry, and a battery of artillery, besides engineers, departmental corps, &c." These troops are "for the occasion" to "be under the local command of Sir C. Warren," who, "as the field force will be considerable, amounting to about 4,000 men," has been given "the local rank of Major-General." As regards the Lieutenant-General Commanding in South Africa, the expeditionary force will be under his "general direction and command;" but "in view of the circumstances which may arise in other portions of your [Sir L. Smyth's] command, her Majesty's Government think that your presence at Cape Town would be desirable," The independence of Sir C. Warren's command may be noted by the further fact that he is to have "power to convene and confirm general courts-martial" (*vide* War Office Instructions, dated November 6, 1884).

We regret to learn that when the returns are published, it will be found that the target-practice of the Militia for the past year will show no improvement on that of former years. This is, perhaps, not to be wondered at, considering that only twenty-seven days (which includes Sundays) are allowed for the period of annual training, out of which only seven half-days are allowed for a company to complete its preliminary musketry drills and target-practice.

We have reason to believe the authorities in their selection of General Sir E. Johnson, K.C.B., R.A., for the post of Director-General of Military Education, were actuated by the desire to save this distinguished officer from being placed on the Retired List, which would have been the case had he not been employed.

We hear that the officers of the old Commissariat and Transport Staff have renewed their claim for honorary Army rank. There is certainly at the present time a very odd jumble of military and civilian designations in this Department. It is most incongruous that a Commissary-General and a Warrant officer of the Commissariat and Transport Corps should be designated alike as "Mr." This very unmilitary designation, as applied to soldiers, is often most confusing to the military mind, while to "Mister Jones," the forage contractor, the whole business is simply inexplicable. Officers who now join the Department from the combatant branches are permitted to retain their Army rank and titles; yet these military titles have not been restored to the many officers of the late Commissariat Department now serving on the Commissariat and Transport Staff, who formerly held substantive Army rank; while, on the other hand, many officers of the Pay Sub-Branch of the late Control Department who held no Army rank formerly, have been granted honorary rank with military titles. Officers of the Army Pay Department, Quartermasters of all branches, Ridingmasters, and Inspectors of Army Schools are now granted honorary rank.

We understand there is a gradual declining number of candidates presenting themselves for admission into the Academy at Woolwich. At the late examination of 150 candidates for 50 vacancies, not 45 even qualified.

In the General Orders dated December 1, we are informed that a bronze star will be given by the Khedive of Egypt to the troops engaged in the operations near Suakim, under Sir Gerald Graham; that "the star will be of a similar pattern to that granted for the Egypt (1882) Campaign;" and that "individuals" who got the star for 1882 will not be entitled to that for services in 1884. If this new star be given only to those who were engaged in the operations specified *near* Suakim, all the Marines and others who were repeatedly engaged while defending that place must of course be excluded. If the star for the Soudan be of a *similar* pattern to that for 1882, it cannot be of the *same* pattern; what then will be the difference? As correctness of language and clearness are not characteristics of the official productions of Pall Mall, "similar," in this case, is probably intended for the "same." Why are the recipients of this latest asteroid designated by the unmilitary term "individuals"? Is it because the authorities, who find no difficulty in swallowing the camels of official returns, strain at the gnat of calling all our soldiers *men;* or is it rather because the composition of military documents is now entrusted to civilians to whom soldiers are merely "individuals"?

Major A. J. C. Cunningham, R.E., will succeed Lieutenant-Colonel H. C. Seddon as Instructor in Construction and Estimating at the School of Military Engineering, Chatham.

Article 109 of Royal Warrant of June 10, 1884, is cancelled, and a new article is substituted, by which it is ordained that officers superseded for promotion, either because they have not passed the prescribed examination, or because they have been unfavourably reported upon, shall be shelved, unless they pass, or are favourably reported upon before the expiration of 18 months. This important alteration, which enlarges the boundaries and aggravates the effects of favouritism,—we should say selection, of course,—and which will irretrievably ruin the prospects of many officers who are simply unlucky, is treated merely as a question of "Finance."

Major C. H. B. Norcott, Rifle Brigade, is about to be gazetted aide-de-camp to Major-General Martin Dillon, C.B, commanding a division of the Bengal Army.

There are two or three things besides newspaper articles and speeches needful in these days, if any country desires to appropriate exclusively those parts of the world which are occupied by people with black skins —viz., fleets, armies, and big purses,—to which may be added the resolution to use them in case of need. There has been a deal of leek-eating over Angra Pequena and the Congo, and it will be well if the Government and Downing Street have not to swallow more of the vegetable in Egypt.

In former years at Aldershot, when Sir Hope Grant and Sir J. Yorke Scarlett held command, it was the custom during the winter months to substitute for the monotonous route-marching exercises (distasteful to both officers and men), outpost duty, reconnaissance, taking-up positions, &c. Now, nothing of the kind is attempted, for the simple reason that there are no troops to exercise. If the new system is working so marvellously well, where are the men? Aldershot is our largest station, and they clearly are not to be found there.

The "Aldershot Division" grows gradually smaller and beautifully less. Never before has Aldershot been in such a sorry plight, or been so weakly garrisoned as at present. An announcement has been made, it is true, during the week, through the medium of Divisional Orders, that the strength of the Division will be increased by 25 recruits and one boy from the Depôt, Wiltshire Regiment, at Devizes, on January 1 next; but as a set-off to this notable accession of strength, it has also been announced that a draft from the 2nd Battalion, Rifle Brigade, consisting of about 170 of all ranks, will proceed from the Camp on the 27th inst., *en route* to India, to join the 1st Battalion in Bombay. The grass-grown and neglected parade-grounds, the empty and dilapidated huts, and the apathetic and listless appearance of the few soldiers now at the Camp, are painfully suggestive of the very unsatisfactory state of the Army generally, and of which, indeed, Aldershot at the present time is but the reflex.

A Special Committee, with Lord Morley as president, will shortly assemble at the War Office to inquire into and report upon the course of instruction for officers and men now carried out at the School of Military Engineering, Chatham. For some time past reform has been pending in this direction. The Royal Engineer Establishment at Brompton, Chatham, is a most expensive institution, and teems with highly-paid instructors of all ranks. The long and wearisome course of "scientific" training for Sapper recruits, hitherto carried out at this depôt, will probably be shortly considerably curtailed, with advantage, and a brief annual course of field-works, &c., introduced. Many other changes of an equally sweeping nature may be expected.

We understand the Medical authorities have vainly represented for some years past to the Governor of the Royal Military Academy at Woolwich the present unsatisfactory arrangements of diet and hours of study, from which the sickly look of many of the cadets, as testified by the Board of Visitors, is to be attributed.

The question of a reserve (or "iron") ration, and of its carriage in the field, demands prompt and serious attention. That the authorities are alive to its importance is apparent by the appointment of a Special Committee to inquire into and report on the subject. At present, there is no "reserve ration" in the English service corresponding to the so-called "iron ration" carried by the soldier in Continental armies. What is called the reserve ration is simply a 2-lb. tin of preserved meat and 2 lb. weight of biscuits, to which a small tin of pea-soup is sometimes added. There is no authorised system as yet for carrying this ration. It should be borne in mind that this "iron ration" is only intended for use in cases of dire necessity, under special orders, in order to stave off starvation; and that, consequently, it need not be nearly so large as an ordinary ration.

We are informed that no change will be made regarding the preliminary drill of Militia recruits, who will continue to be drilled on enlistment if they so elect. Preliminary drill immediately before training will only affect those Militia battalions whose headquarters are at a distance from that of the regimental district.

The Corea is entering upon the first stage of "civilisation" preparatory to assimilation by Europe. A rebellion, inaugurated by the assassination of the King's son and six of his Ministers at an entertainment given by the King to the British Minister and others, is "certain to have results of interest to several Powers." So says the telegram to the *Times.* The news of the rebellion comes from Nagasaki and Hong Kong, and thence to London. Civilisation under the guise of the traveller and the trader have knocked in vain at the gates of the kingdom of Chaosyen, and commerce has been rigidly shut out by the extraordinary system under which the "Kings of the Thousand Islands" for centuries excluded all foreigners, kept out priests and missionaries, and even the Chinese and Japanese on their borders. To be sure, the trader has been nibbling away at the wall, and has made small lodgments here and there within the *enceinte,* but the massacre of the Roman Catholic missionaries in 1839 was the outcome of the dread, jealousy, and hate of foreigners, which are the permanent and ruling forces of the policy of all Tartar races. That policy yields only to force. For hundreds of years the eyes of a few "pioneers of civilisation" have been directed to the Corea. Stories, probably fabulous, of its wealth have been exciting the imaginations of Europeans, and several attempts have been made from time to time to open up the Peninsula.

The Infantry battalions sentenced to wear the experimental khaki clothing present a very extraordinary appearance just now. The new clothing having in many instances gone to shreds, especially the nether garment, it has been found necessary, for decency sake, to permit the men to wear their reserve black-cloth trousers in conjunction with the grey upper garment, or the grey unmentionables with the scarlet tunic. The constant variations of red, grey, and black have suggested a new title for these unlucky corps, who are now generally known as "The Chameleons."

The Navy.

ADMIRALTY, Dec. 12, 1884.

Acting Chief Engineer H. G. Bourke has been confirmed as Chief Engineer in her Majesty's Fleet (Oct. 16, 1883).

ADMIRALTY, Dec. 16, 1884.

In accordance with the provisions of her Majesty's Order in Council of July 21, 1876, the under-mentioned Commanders, having attained 15 years' seniority as Commander, have been authorised to assume the rank and title of Retired Captain :—Commanders H. Kerr, G. Nevill, and J. Shortt (Dec. 10).

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Navigating-Lieut. H. Baynham has been placed on the Retired List of his rank (Dec. 14).

ADMIRALTY, Dec. 17, 1884.

In accordance with the provisions of her Majesty's Orders in Council of April 30, 1877, and Nov. 27, 1878, Engineer J. Anderson has been placed on the Retired List of his rank (Dec. 17).

ADMIRALTY, Dec. 18, 1884.

Navigating-Lieut. W. Tooker has been promoted to the rank of Staff Com. in her Majesty's Fleet (Dec. 13).

APPOINTMENTS.

Chief Engineers—Joseph Minhinnick, to the Triumph; David Cartmel, to the Triumph, for Esquimault Yard.

Paymaster—James Cox, to be Secretary to Admiral Phillimore, Commander-in-Chief at Devonport.

Assistant-Paymaster—Scarlet de V. Taylor, to the Royal Adelaide.

Engineers—Josiah P. Thomas and Charles M. B. Dyer, to the Triumph.

Assistant-Engineers—George C. Bath and Edward Gallery, to the Triumph.

Clerks—Robert E. Smith and Francis C. Leonard, to the Royal Adelaide, as supernumeraries.

Gunners—George Peavitt, to the Defiance, for the Scourge; W. S. Hobbs, to the Asia, additional, for the Colossus; Edward May, to the Excellent.

Carpenter—George T. Greig, to the Defiance.

COASTGUARD.

Chief Boatman—David Douch, Pevensey, to be chief boatman-in-charge, Winchelsea, vice Little, pensioned.

ACHILLES, Capt. Buller, arrived at Devonport from Portland on Dec. 16; she is to be ready for sea on Jan. 7. It is stated that Com. Clarke will shortly succeed Com. Boys in this ship.

AGINCOURT, Capt. Mead, arrived at Devonport on Thursday; she is to be ready for sea on Jan. 7. Admiral Whyte and staff have gone on leave.

ALBACORE, Lieut.-Com. Smythies, was at Port Said by last advices.

ALBATROSS, Com. Hicks, on Nov. 5 was on passage to Shanghai, calling at Yangtse ports. She will be sent to Ningpo to relieve the Daring shortly. On Oct. 23 her men were paraded on the quarter-deck to witness the presentation of two bronze medals awarded by the Royal Humane Society to two of the petty officers—C. Treville and C. Crocker—for jumping overboard at Ningpo and saving the life of one of their shipmates who had fallen into the water. Capt. Hicks first addressed them, drawing attention to the gallantry they had displayed, and expressing his gratification at its recognition; and Mrs. Alabaster, wife of H.B.M.'s Consul, then presented the medals.

ALBERTA, tender to Victoria and Albert, Capt. Fullerton, conveyed her Majesty and the Royal party from Gosport to Osborne on Wednesday.

ALECTO, Lieut.-Com. Harston, was at Cape Coast Castle by last advices.

ALEXANDRA, Capt. Rawson, was at Malta on Dec. 3.

AMETHYST, Capt. Brent, left Bermuda on Nov. 18 for the River Plate.

ARAB, Com. Stopford, was at Aden by last advices.

ASSISTANCE, Capt. St. Clair, is still at Skye.

AUDACIOUS, Capt. Pearson, was at Amoy on Oct. 27, and would remain until relieved by the Champion, and then proceed to Hong Kong.

BITTERN, Com. Mann, was at Suez on Dec. 3.

BOADICEA, Capt. Church, was at Simon's Bay by last advices.

BRITANNIA, Capt: Bowden-Smith: Admiral Phillimore distributed to the cadets on Thursday the prizes gained in the last half-yearly examination.

BRITON, Capt. Lloyd, is in the Persian Gulf.

BULLFROG, Lieut.-Com. Papillon, was at Jamaica by last advices.

CANADA, Capt. Curtis, was at Bermuda by last advices.

CARYSFORT, Capt. Stewart, was at Alexandria on Dec. 3.

CHAMPION, Capt. Powlett, left Hong Kong on Nov. 11 to relieve the Audacious at Amoy, and has since arrived.

CLEOPATRA, Capt. Hippisley, was at Shanghai on Nov. 5.

COCKATRICE, Com. Hayes, was at Constantinople on Dec. 3.

CONDOR, Com. Domville, was at Suakim on Dec. 4.

CONSTANCE, Capt. Doughty, left Honolulu for Coquimbo last September, and would call *en route* at Tahiti and the Hervey Islands.

COQUETTE, Lieut.-Com. Crowe, was at Suakim on Dec. 4.

CROCODILE, Capt. Carr, arrived at Queenstown on Dec. 16; embarked drafts for India, and sailed the same day for Bombay.

CRUISER, Com. Hughes-Hallett, was at Malta on Dec. 3.

CURACOA, Capt. Hanmer, was at Woosung on Nov. 5. She would proceed shortly to Hong Kong to refit and make good defects, preparatory to relieving the Pegasus as senior officer's ship in the Straits of Malacca.

CYGNET, Lieut.-Com. Gardiner, was at Massowah on Dec. 4.

DARING, Com Ching, was at Ningpo on Oct. 31, expecting to be relieved by the Albatross and come to Shanghai.

DART, Lieut.-Com. Moore, was at Sydney by last advices.

DECOY, Lieut.-Com. Hay, was to leave Berberah for Aden, when last heard from.

DEFIANCE, Com. Norcock, was commissioned at Devonport last Saturday as a torpedo school and depôt ship. On Thursday Capt. Markham, of the Vernon, paid a visit to this ship for the purpose of suggesting such alterations in the fittings as might be thought necessary.

DIAMOND, Capt. Dale, was at Sydney on Oct. 22.

DIDO, Capt. Vander-Meulen, was at Barbadoes on Oct. 10.

DOLPHIN, Com. Wilmot, was at Suakim on Dec. 4.

DRAGON, Com. Anson, was at Busreh on Nov. 6.

DREADNOUGHT, Capt. Fremantle, was at Malta on Dec. 3.

ESK, Lieut.-Com. Cochrane, was at Swatow on Oct. 31. (Commissioned temporarily as tender to Victor Emanuel.)

ESPOIR, Lieut.-Com. Gamble, was at Chemulpo, Corea, on Dec. 13, and, in consequence of the reported rebellion, is ordered to remain in the vicinity of the Seoul River.

EURYALUS, Capt. Hastings, was at Bombay on Nov. 28.

EXPRESS, Lieut.-Com. Knox, was at Jamaica on Oct. 25.

FALCON, Com. Pringle, was at Massowah on Dec. 4.

FANTÔME, Com. Osborne, was at Bermuda by last advices.

FIREBRAND, Lieut.-Com. Dickson, was at Singapore on Oct. 16; ordered to proceed to Hong Kong on return of the Pegasus from cruise.

FLY, Com. Hope, was at Takao, Formosa, on Oct. 31; ordered to proceed to Hong Kong when relieved by the Wanderer, and prepare for passage to England.

FLYING FISH, Capt. Maclear, is ordered to remain on the coast of Corea, in consequence of the reported rebellion there.

FORESTER, Lieut.-Com. Hodgkinson, is still at Skye.

FORWARD, Lieut.-Com. Furlonger, was at Cape Coast Castle by last advices.

FOXHOUND, Lieut.-Com. McQuhae, was at Hoihow on Oct. 26, and will probably be relieved by the Zephyr, when refitted, and proceed to England.

FROLIC, Com. Parr, when last heard from was starting for the Oil Rivers with her Majesty's Consul, and would then return to Cape Coast Castle.

GARNET, Capt. Hand, is on her way to Bermuda.

GRAPPLER, Lieut.-Com. Cochrane, was at Gibraltar on Dec. 6.

GRIFFIN, Com. Davies, was paid off last Saturday at Devonport, and the crew were given the usual leave. The ship goes into the 4th Division of the Steam Reserve.

HARRIER, Lieut.-Com. Pike, was at New Guinea by last advices.

HECTOR, Capt. Arthur, arrived at Cowes from Southampton Water on Wednesday. She will remain as guardship during the Queen's stay at Osborne.

HERCULES, Capt. FitzRoy. A court-martial was held on board this ship on Monday to try C. T. Ryan, acting boatswain, for drunkenness. The prisoner pleaded guilty, and was sentenced to lose all his time as acting boatswain, to be dismissed his ship, and to be severely reprimanded.

HEROINE, Capt. Blackburne, is ordered to meet the flagship at Payta on Jan. 15.

HIMALAYA, Capt. Palliser, passed Aden on Tuesday at noon for Colombo, Ceylon.

HUMBER, Com. Errington, is to remain at Suez for the present.

IMOGENE, Lieut.-Com. Gough, was at Constantinople on Dec. 3.

IMPREGNABLE, Capt. Wilson. The boys of this training-ship have been given Christmas leave until Jan. 6.

INFLEXIBLE, Capt. Seymour, is to leave Malta for home on Dec. 22.

INVINCIBLE, Capt. Buckle, was at Malta on Dec. 3.

IRIS, Capt. Rice, was at Malta by last advices.

JUMNA, Capt. Singleton, arrived at Portsmouth on Thursday from Bombay. She brings altogether 44 officers (naval and military), 1,103 men, 43 women, and 84 children. One death and one birth occurred on the voyage.

KINGFISHER, Com. Rainier, left Sheerness on Thursday to take the place on the East Indies station of the Dryad, returned home and condemned as unfit for further service.

LINNET, Com. Hill, was at Hankow on Nov. 5.

MALLARD, Lieut.-Com. Browne, is at Bermuda.

MERLIN, Lieut. Brenton, left Shanghai on December 19 for Port Hamilton.

MIDGE, Com. Hotham, was at Foochow on Oct. 25.

MINOTAUR, Capt. Britten. In consequence of the extensive repairs to the boilers of the ship, she will not be ready for sea before Feb. 18. In the meantime Admiral de Horsey will hoist his flag in the Northumberland.

MIRANDA, Com. Acland, was at Sydney by last advices.

MONARCH, Capt. Bedford, is at Alexandria.

MUTINE, Com. Edwards, is ordered to join the flagship at Panama.

MYRMIDON, Com. Hoskyn, is still surveying in the southern part of the Red Sea.

NELSON, Comdre. Erskine, was at Sydney on Dec. 15, awaiting the arrival of Admiral Tryon.

NEPTUNE, Capt. Maxwell, arrived at Portsmouth on Thursday; she is to be ready for sea on Jan. 7.

NORTHAMPTON, Capt. Digby, is at Bermuda.

NORTHUMBERLAND, Capt. Robinson, arrived at Devonport on Wednesday. It has been arranged that, pending the temporary repairs to the Minotaur, this ship shall become the senior flagship of the Channel Squadron, and Vice-Admiral de Horsey, who succeeds the Duke of Edinburgh, will hoist his flag on board her as soon as the necessary changes in the cabin accommodation of the ship are carried out. She is to be ready for sea on Jan. 7.

OPAL, Capt. Brooke, was at Cape Coast Castle by last advices.

ORONTES, Capt. Andoe, left Simon's Town on Dec. 18 for England.

OSPREY, Com. Dowding, was at Zanzibar on Nov. 21.

PALUMA, Lieut.-Com. Richards, is still at Sheerness.

PELICAN, Com. Hope, is ordered to meet the flagship at Payta on Jan. 15.

PENELOPE, Capt. Robinson, has been ordered to proceed to Chatham, for the purpose of undergoing a thorough overhaul and repair, and to be fitted with new machine-guns.

PHILOMEL, Com. Lang, is at Berberah.

RACER, gun-vessel, having been out for steam trials, proved herself to be an admirable sea boat. Her draft of water forward was 10 ft. 4 in., aft, 13 ft. 10 in.; steam in boilers, 86 lbs.; revolutions per minute, 92·4; mean pressure in cylinders, high, 25·2, low, 14·9; vacuum, 25·8; indicated horse-power, high, 341, low, 576, total, 917; mean speed of six hours, 11·2 knots. The result was considered highly satisfactory, especially when the state of the weather is taken into consideration. For some time the speed of the ship was twelve knots, during which the indicated horse-power of the engines was nearly 1,030, being over one-fifth greater than the contract power. The engines worked smoothly and with ease in the heavy sea.

RAMBLER, Com. Vereker, was inspected by Admiral Corbett at Sheerness on Thursday.

RAVEN, Lieut.-Com. Ross, was at New Guinea by last advices.

ROYAL ADELAIDE, Capt. Carter. A court-martial was held on board this ship on Monday to try T. Heffer, 2nd-class boy, for having struck Lieut. Oldfield, of the Impregnable. The prisoner pleaded guilty, and was adjudged to receive 24 stripes with the birch, to be imprisoned for 12 months, and to be afterwards dismissed the service.

SAPPHIRE, Capt. Kinahan, was at Foochow on Oct. 25.

SAPPHO, Com. Castle, is ordered to meet the flagship at Payta on Jan. 15.

SATELLITE, Capt. Theobald, remains at Esquimault until the arrival of Capt. Alington.

SEAHORSE, Staff Com. Hoskin, arrived at Portree, Skye, on Dec. 13.

SPHINX, Comdre. Molyneux, was at Suakim on Dec. 4.

STARLING, Lieut.-Com. Sanders, left Alexandria for Suakim on Dec. 18.

SULTAN, Capt. Tracey, arrived at Portsmouth from Portland on Wednesday; she is to be ready for sea on Jan. 7.

SUPERB, Capt. Cleveland, is at the Piræus.

SWIFT, Com. Bromley, was at Canton on Nov. 11.

SWIFTSURE, Capt. Brand, is ordered to return to England when relieved by the Triumph; she is at present on her way to Panama.

SWINGER, Lieut.-Com. Marx, was at New Guinea by last advices.

TAMAR, Capt. Warren, left Simon's Town on Dec. 13 for Australia.

TEMERAIRE, Capt. Domville, was at Suda Bay on Dec. 3.

TENEDOS, Capt. Drummond, is in dock at St. John's, Newfoundland.

TURQUOISE, Capt. Woodward, was on her way to Mauritius from Zanzibar by last advices.

TYNE, Com. Cochrane, is on her way home from Gibraltar.

UNDINE, Lieut.-Com. Cross, is expected shortly at Sydney.

VIGILANT, Lieut.-Com: Maxwell, was at Shanghai on Nov. 5, bearing the flag of the Commander-in-Chief, and would leave Shanghai for Hong Kong on Nov. 12, calling at intermediate ports.

VIVID, Staff Com. Gravener, conveyed Admiral Phillimore from Devonport to Dartmouth on Wednesday.

VOLAGE, corvette, has been out for gunnery and steam trials this week. On Monday, when one of the breech-loaders on the starboard side of the upper deck had been fired with only half the usual charge of powder, viz., 17 lb., and a projectile of 200 lb., a fracture in the rifling of the gun was detected. The experiments are to be resumed. On Thursday she made an unsatisfactory trial of her engines. The boilers could not keep up steam, some of the expansion gear proved defective, and the utmost horse-power developed did not exceed 2,604 horses.

WANDERER, Com. Churchill, left Hong Kong on Nov. 10 for Amoy, Tamsui, and then to relieve Fly at Takao (Formosa).

WATCHFUL, Lieut.-Com. Goodrich, is at Cape Coast Castle.

WOODLARK, Com. Clutterbuck, was on her way from Bombay to Zanzibar by last advices.

ZEPHYR, Lieut.-Com. Hope, was at Wenchow on Oct. 30, and ordered to proceed to Hong Kong for refit when relieved by the Merlin.

PRIZE DAY ON BOARD THE BRITANNIA.

On Thursday a number of visitors assembled on board the Britannia to witness the distribution of prizes to the successful candidates who pass into the service afloat. The recent examination was of a most satisfactory description, the whole of the 33 cadets presenting themselves having passed. Of these, Messrs. A. B. F. Dawson, H. G. Grenfell, and Talbot-Ponsonby have been made midshipmen. All the 33 examined now pass out of the ship and 40 new cadets will join at the beginning of the year. The following is a list of the prize-winners :—

Study Subjects—1, Mr. E. R. Hamilton; 2, Mr. H. G. Grenfell, Seamanship—1, Mr. R. D. Jeffreys; 2, Mr. W. R. Hall. Charts and Instruments—1, Mr. W. R. Hall; 2, Mr. J. Luce. French—1, Mr. G. M. K. Fair; 2, Mr. H. G. Grenfell and Mr. J. L. C. Taylor, bracketed. Essay—1, Mr. Talbot-Ponsonby; 2, Mr. A. B. F. Dawson. Religious Knowledge—1, Mr. A. B. F. Dawson; 2, Mr. A. Halsey. Drawing—1, Mr. J. C. Ley; 2, Mr. W. R. Willis. Physics—1, Mr. P. S. Watson; 2, Mr. A. B. F. Dawson. The chief Captains, Mr. W. H. D. Margesson and Mr. H. L. P. Heard, each received a dirk.

Mr. Carrick and Mr. Shelford, equal firsts for gymnastics, each received a silver pencil-case, and Mr. Watson, of the beagles, a whip.

Mrs. Bowden Smith, wife of the captain, pinned badges on the sleeves of Mr. Nugent and Mr. Watson, the new chief captains for the next term; also on the following captains: Messrs. Tyrwhitt, Olivier, Smith, Child, Luard, and Hickley; and on Messrs. Houseman and Doughty, who will be chief captains in the next term but one.

Admiral Phillimore, who distributed the prizes, afterwards addressed the cadets. Some of the cadets left the Britannia for their homes during the afternoon, and the remainder left on Friday for the Christmas vacation, which extends over five weeks. The new cadets have to be on board on Friday, January 23, and the others on the following day, and the studies will be resumed on Monday, the 26th.

A steamer left Elswick on Wednesday for Spezzia, with a 100-ton gun, ordered by the Italian Government, on board.

Prince Waldemar of Denmark, brother of the King of Greece, arrived at Athens on Thursday in the Fylla.

On Tuesday the annual theatricals at the Royal Naval School were renewed. The plays selected were "The School for Scandal" and "Aladdin." Both pieces were well and efficiently represented.

DELIGHTFUL ODOUR OF VIOLETS—VERY LASTING.—JOHN R. HALL'S WOOD VIOLET ESSENCE, patronised by their Royal Highnesses the Princess of Wales, Princess Christian, her Imperial and Royal Highness the Crown Princess of Germany, the Princess Louise, Princess Beatrice, the Princess William of Prussia, the Countess of Flanders, &c. In bottles at 1s 6d, 2s 6d, 4s 6d, 5s 6d, 7s 6d, 8s 6d, 10s 6d, and 21s each.—Proprietor, EDWIN R. BIGGLESTON, Mercery Lane, Canterbury.

CHRISTMAS FESTIVITIES IN THE ARMY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Permit me, through your columns, to suggest to the authorities the necessity of discouraging the above, which are becoming yearly more riotous. I do not wear the "blue ribbon," nor do I purpose drinking nothing stronger than water at my own Christmas dinner; yet, for the sake of the religion, if not of the discipline of our soldiers, especially of the large number of recruits we are now getting, who often, I believe, fall into permanent evil habits from the bad start made at this season, I venture to hope some steps may be taken to insure moderation. Let me give my experience of what happened last year at the station where I was then serving. The authorities, having countermanded a general route-marching parade, and all other duties, as far as possible, on St. Stephen's day, the following was the result:—Not merely was the afternoon of our greatest Christian festival desecrated by a more than usual amount of drunkenness and gluttony, but the whole of the following day was devoted to every species of debauchery and excess; so much so, that the wives and families of the officers and men were obliged to remain in doors. Two battalions came to blows, and would have used their arms, but that a double cordon of sentries (composed of the few men remaining partially sober) was drawn between the combatants. A soldier's wife had her leg broken; several non-commmissioned officers lost their stripes; some old drunkards, who had long been total abstainers, broke their pledges, and became worse than ever; while the cells and hospitals were crowded for days afterwards. I have reason to know things were no better at some other stations!—I am, &c.,

A SENIOR CHAPLAIN TO THE FORCES.

The standard of heights and chest measurement for boys entering the Royal Naval training ships have been reduced, and are now—boys 15 to 15½ years of age, 5 ft. in height, and 30 in. chest; 15 to 16 years, 5 ft. 1 in. in height, and 30½ in. chest. For boys over 16 the standard remains without alteration.

The Collingwood, turret-ship, will go out of Portsmouth Harbour on Jan. 8, for trial of her machinery.

The Admiralty have directed the Gannet, composite sloop, to be fitted with the new 5 in. breech-loading guns, mounted on the Vavasseur system.

The committee appointed to investigate and report upon the steel guns which have recently burst at Woolwich, commenced their sittings on Tuesday. The inquiry is conducted in private.

HEADACHES AND DISORDERED STOMACH.—"After suffering for nearly two-and-a-half years from severe headache and disordered stomach, and after trying almost everything, and spending much money without finding any benefit, I was recommended to try your Fruit Salt. Before I had finished one bottle, I found it doing me a great deal of good, and now I am restored to my usual health. Others I know that have tried it have not enjoyed such good health for years.—Yours truly, ROBERT HUMPHREYS, Post Office, Barrasford." CAUTION.—Legal rights are protected in every civilised country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed upon by worthless imitations. Sold by all Chemists. Directions in Sixteen Languages,—How to Prevent Disease. Prepared only at ENO'S FRUIT SALT WORKS, Hatcham, London, S.E., by J. C. ENO'S Patent.

BOOKS, Etc., RECEIVED FOR REVIEW.

The Four Flags (Multum in Parvo); Dust of Lebanon (E. Wolff and Sons)—Brass Repoussé Work, by Madame Amélie (Madame Amélie)—The Red Dragon, December (Cardiff: D. Owen and Co.)—Bacon's Map of the New London Boroughs; Bacon's Political Map of the British Isles (G. W. Bacon and Co.)—St. Stephen's Saturnalia (G. E. Parkinson)—With a Show through Southern Africa, by Charles Du Val (Dean and Son)—The Art Journal, January (J. S. Virtue and Co.)—Almanach de l'Armée Française, 1885 (Paris: Henri Charles-Lavauzelle).

Many interesting communications, reviews and letters, &c., are unavoidably omitted, owing to want of space, this week.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

EPPS'S COCOA.—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk. Sold only in packets, labelled—"JAMES EPPS and Co., Homœopathic Chemists, London."—Also makers of Epps's Chocolate Essence.

		Miss M. Webster	106

* Vacancies having occurred after the voting papers were issued, the Committee also admitted Misses L. M. M. Mosse and E. M. McCreery, being the Candidates with the next highest number of votes.

Each donation of £5 5s entitles to one life vote, and each annual subscription of 10s 6d paid in advance, entitles to one vote at all elections during the year.

The NEXT ELECTION will TAKE PLACE in JUNE, 1885.

(By Order) G. W. FORSTER, Secretary.

20 Charing Cross, S.W. (Corner of Craig's Court).
December, 1884.

The BAZAAR is POSTPONED to MAY 4, 5, and 6, 1885, on account of the West End Mission taking place on February 9, 10, and 11, 1885.

CLARENDON HOTEL, GRAVESEND.
TO FAMILIES AND OTHERS GOING TO THE EAST.

Officers, Families, and Gentlemen going to the East will find the CLARENDON HOTEL most convenient and comfortable. The Hotel is opposite the anchorage of the P. and O. and other Companies' Steamers.

Rooms can be secured by letter or telegram addressed to the PROPRIETOR.

GENTLEMEN'S RESIDENCES, at moderate rentals, at West Kensington (opposite the station). Frequent trains to the City and West End. St. Paul's Schools (from St. Paul's Churchyard), erected in the locality, afford the highest educational facilities. The houses contain every modern improvement; fitted bath (hot and cold water); fine gravel soil; first-class sanitary arrangement; admirably suited to requirements of gentlemen's families. Rents £60 to £100.—Apply to GIBBS and FLEW (Limited), Cedars Estate Office, West Kensington Station, W.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the
STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.
Store Warehouses, Baker-Street Bazaar, W.

ARMY and NAVY CO-OPERATIVE SOCIETY, Limited,
117 Victoria Street, Westminster, London, S.W.

NOTICE.

The STORES will be CLOSED from the 25th to the 27th December, inclusive.

The execution before Christmas of Country and Suburban orders received after SATURDAY, the 20th, or of Town orders received after TUESDAY, the 23rd, cannot be guaranteed.

By Order,
H. LAWSON, Secretary.

December 11, 1884.

FLORIDA.—A CLERGYMAN'S SON, who has been three years in Florida, and engaged in Orange Culture, Fruit-farming, &c., will be GLAD to COMMUNICATE with a FEW GENTLEMEN desirous of VISITING FLORIDA. Party sail January 14.—Address, "M. V.," care of Mr. GLEN, 379 Strand, W.C.

MEMORY and SUCCESS.—What contributes to success? A good memory.—What causes failure in life? A poor memory.—What can all obtain from Prof. Loisette's Discoveries? A good memory—the PHYSIOLOGICAL ART of NEVER FORGETTING—using none of the "Links," "Pegs," "Localities," or "Associations" of Mnemonics. Lost memories restored—the worst made good, and the best better. *Any book learned in one reading.* Prospectus post-free, giving opinions of Mr. RICHARD A. PROCTOR, Dr. ANDREW WILSON, and others who have studied the System. A Day Class in Never Forgetting and for Cure of Mind-Wandering commences every Monday at 3 p.m. An Evening Class every Tuesday at 8 p.m. Lectures in Families of the Nobility; also taught thoroughly by POST.—Prof. LOISETTE, 37 New Oxford Street (opposite Mudie's), W.C.

DR. J. COLLIS BROWNE'S CHLORODYNE
ORIGINAL AND ONLY GENUINE.

COUGHS,
COLDS,
ASTHMA,
BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE.
Dr. J. C. BROWNE (late Army Medical Staff) discovered a remedy to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false.*

Vice-Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the *Times*, July 13th, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE is the true Palliative in
NEURALGIA, GOUT, CANCER, TOOTHACHE, RHEUMATISM.

IS THE GREAT SPECIFIC for CHOLERA, DIARRHŒA, DYSENTERY.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

From SYMES and CO., Simla:

Dear Sir,—We congratulate you upon the wide-spread reputation this justly esteemed medicine has earned for itself all over the East. As a remedy of general utility, we much question whether a better is imported, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike.—We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, his Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.

IMPORTANT CAUTION.
The immense sale of this remedy has given rise to many unscrupulous imitations. Of all Chemists, 1s 1½d, 2s 9d, and 4s 6d.

Sole Manufacturer,
J. T. DAVENPORT,
33 Great Russell Street, W.C.

ASK FOR
LIEBIG COMPANY'S
EXTRACT OF MEAT.

HOLLOWAY'S PILLS.—Sleeplessness, flatulency, acidity, nausea, and all dyspeptic indications may be speedily relieved by these famous Pills, of which large quantities are shipped to all parts of the world. The constantly increasing demand for Holloway's medicine proves its power over disease, and its estimation by the public. In weakness of the stomach, in diseases of the liver, and in disorders of the system caused by cold or a sluggish circulation, no medicine is so efficacious, no remedy so rapid, as these Pills, which are altogether incapable of doing mischief. By quickening digestion, they give refreshing sleep, sharpen the appetite, impart tone to the digestive organs, purify and enrich the blood, regulate the secretions, and strengthen the whole physical frame.

MILITIA COMPETITIVE. — Major LENDY, assisted by a Field Officer, Graduate of the Staff College, PREPARES a limited number of Candidates. Two hundred and thirty-one of his Pupils have passed for the Staff College and Militia.—Sunbury-on-Thames.

SANDHURST & WOOLWICH.—Assisted by Four Resident Tutors (Cambridge Wrangler, Oxford Honoursman, French and German Diplomés), Major LENDY RECEIVES a limited number of Candidates. Of the last 22 Pupils sent up to compete, 19 were successful. Last July four only went up, and passed 4th, 7th, 10th, and 77th.—Sunbury-on-Thames.

ARMY EXAMINATIONS.—Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

Candidates also prepared for Woolwich and Sandhurst, and for the Militia Literary Examinations.

MILITARY COMPETITIVE EXAMINATION,
September, 1884.

Of four Lieutenants of Militia sent up, the following passed:—

Place.	Name.	Marks.
12.	...*Lieut. C. F. Pinney.........	1794
14.	...*Lieut. J. F. Newton-King	1766
40.	... Lieut. A. B. Fox	1659

* First trial.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

FINAL MILITARY COMPETITIVE EXAMINATION.

MILITIA OFFICERS prepared for the above at THE ABBEY, ABINGDON, BERKS.

SPECIAL COURSE for March Examination, under Colonel COLVILE, Author of "Military Tribunals," late Brigade-Major; Major F. H. DYKE, Author of "Lectures on Tactics," &c., late Garrison-Instructor, Colchester; and Captain STEWART, late R.A., will COMMENCE on JANUARY 5th, 1885.

Particulars on application to Captain PRESTON.

N.B.—ONE-THIRD of those sent up in 1881, 1882, 1883, and 1884 obtained commissions.

MILITARY COLLEGE, NORTHCOURT, ABINGDON, BERKS.

Northcourt is a hamlet near Abingdon, well adapted for quiet reading.

SANDHURST and MILITIA.—Preliminary and Further (only). Number of Students limited to ten. NEXT TERM will begin JANUARY 5, 1885.

Officers' and Clergymen's sons taken on special terms.—For particulars, references, &c., apply to J. L. HASLEHAM, Esq.

NAVAL CADETSHIPS.

NEWTON COLLEGE, S. DEVON.

This School has just opened out in this new branch of work, with marked success.

HOLIDAYS in PARIS.—MM. F MARTIN and A. BARBEROUSSE, 27 and 31 BOULEVARD HENRI IV., can RECEIVE one or two Young Men wishing to make rapid progress in FRENCH. Great facilities for acquiring it. Lessons in all other subjects if desired. Home life. Terms moderate.—Address as above, or 5 Norland Gardens, W.

NAUTICAL TRAINING COLLEGE.—The THAMES NAUTICAL TRAINING COLLEGE.—H.M.S. Worcester, moored off Greenhithe, Kent, is managed by a committee of London Shipowners, Merchants, and Captains. Chairman, Sir G. CHAMBERS, 4 Mincing Lane, E.C. Youths from 11 to 15½ years of age, intended for sea, are received on board, and specially educated for a seafaring life. The annual terms in the Upper School for Cadets, from 13 to 15½, are fifty guineas, and in the Lower School for Cadets, from 11 to 13, forty-five guineas, with a charge to each of ten guineas for uniforms, medical attendance, washing, &c. The Board of Trade allow that two years passed on board this ship shall count as one year's service. The Admiralty annually give Sea Cadetships in the Royal Naval Reserve. The College will REOPEN JANUARY 27, 1885, after Christmas vacation. Forms and Prospectuses may be obtained on application to W. M. BULLIVANT, Hon. Secretary, 72 Mark Lane, London.

RETIRED OFFICERS.—Wanted, a Staff College Graduate as CHIEF INSTRUCTOR in a Military College.—Address by letter, "J. H.," 114 Beaufort Street, Fulham Road, S.W.

A GENTLEMAN, having some valuable Commissions to execute, yielding very large profit, would like a PARTNER, either silent or otherwise, with small capital.—Address, "R. R., 59," Messrs. Deacon's, Leadenhall Street.

CIVIL SERVICE and ARMY EXAMINATIONS.

Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and Major E. J. LYNCH, late Garrison-Instructor, London, 19 Lexham Gardens, Cromwell Road, W., PREPARE Gentlemen for all CIVIL SERVICE Examinations, and for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA; special Classes for the STAFF COLLEGE and Promotion Examinations. EIGHTY-THREE successes in 1882. ONE HUNDRED and FIFTY-ONE in 1883. ONE HUNDRED and FIFTY-FOUR in 1884, viz.:—

MILITIA COMPETITIVE, March.—THIRTY-SIX, viz.:—3rd, 5th, 6th, 9th, 10th, 15th, 16th, 18th, 19th, 22nd, 27th, 28th, 34th, 35th, 36th, 39th, 41st, 42nd, 43rd, 45th, 47th, 48th, 52nd, 55th, 57th, 58th, 59th, 60th, 61st, 65th, 66th, 69th, 71st; and Cavalry, 2nd, 4th, and 9th.

September.—THIRTY-ONE, viz.:—First, 7th, 9th, 13th, 14th, 15th, 16th, 19th (two), 23rd, 24th, 25th, 26th, 28th, 29th, 35th, 37th, 38th, 44th, 46th, 48th, 51st, 53rd, 59th, 62nd, 64th; and Cavalry, 3rd, 6th, 7th, 8th, 9th.

One other failed by only 4 marks, and three more were within 39 marks of success.

95 out of 117 Candidates have passed at the last Three Examinations.

At the Eight Examinations held under the present regulations, the FIRST PLACE has been taken FIVE TIMES.

MILITIA LITERARY, April:—FIRST, 3rd, 4th, 22nd, 29th, 32nd. October:—FIRST, 3rd, 6th, 7th.

Being all sent up on both occasions. There has been no failure in the last SEVEN Examinations.

SANDHURST, July, TEN, viz.:—5th, 13th, 15th, 32nd, 43rd, 53rd, 79th, 83rd, one Hon. Cadet, one R.M.L.I.

WOOLWICH, July, Two:—20th, 53rd. December, all have qualified; final result not known.

STAFF COLLEGE, TWELVE, viz.:—2nd, 4th, 9th, 16th, 19th, 21st, 22nd, 23rd, 24th, 25th, 33rd, 35th, and four others qualified.

PROMOTION.—Twenty-five Officers have passed this year.

PRELIMINARY.—Twenty-eight have passed this year.

INDIAN CIVIL SERVICE.—A Special Class, limited to eight.

FOREIGN OFFICE and DIPLOMATIC. — A Special Class, limited to six.

Courses for all Examinations now proceeding.

NEXT TERM COMMENCES JANUARY 13.

The Preliminary Examination work will be under Mr. J. A. GRATTAN, late Royal Artillery, whose success in this line during the past ten years has been very great.

ARMY EXAMINATIONS. — LIEUTENANTS of MILITIA PREPARING for the MILITARY COMPETITIVE EXAMINATION can be RECEIVED by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath, whose pupils for some years past have continuously maintained a steady average of success, second to none. This year fifteen have been sent up, seven of whom have passed; four in March (one taking first place on the list), and three at the recent Examination. Very few pupils are taken, and there are two resident Military Instructors of high qualifications constantly at work, with a third in reserve in case of pressure. Thus very great individual attention is guaranteed, and the system of lecturing classes entirely avoided. Batcombe is a country village, near no town, but affording opportunity for shooting and other healthy amusements in moderation. References are permitted to the Earl of Harewood, Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of successful pupils.

JERSEY HIGH SCHOOL for GIRLS (Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.

His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

DOVER COLLEGE.

President.—Earl GRANVILLE, K.G.

There will be an EXAMINATION for SEVEN SCHOLARSHIPS, tenable in the College at Easter, 1885. There are also valuable Scholarships tenable at the Universities, Woolwich, &c.

The Boarding arrangements are such that each Boarder has a separate bedroom.

For particulars, apply to the Rev. W. BELL, M.A., the Head Master, or W. KNOCKER, Esq., the Hon Sec.

SANDHURST and WOOLWICH.

GROSVENOR HOUSE, TUNBRIDGE WELLS.
(Established more than 25 years.)

A limited number of resident and day Pupils rapidly prepared for these Examinations by the Principal and a large Staff.

Individual attention guaranteed.

Six out of seven sent up during past year successful, including 13th, 26th, &c., places for Sandhurst, and a 1st B.A.

Lond. Univ.—A long list of past successes.

The highest references given, including Sir Richard Temple, Bart., Major-General Sir Thomas Pears, and the Head Masters of Clifton, Rossall, and Malvern Colleges, &c.

NEXT TERM BEGINS JANUARY 19,

PRINCIPAL—E. DOUGLAS ARCHIBALD, M.A. (Oxon), F.R. Met. Soc., late of H.M.,s Bengal Educational Service.

JUNIOR ARMY and NAVY STORES. — A FEW SHARES for SALE, at One Guinea, with Dividend.—Apply, "M. M.," care of Harris, 159 Piccadilly.

MILITARY EDUCATION, GERMANY and ENGLAND.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the seven MILITIA COMPETITIONS which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils SIXTY COMMISSIONS, although they have only prepared and sent up from Darmstadt an extremely limited number of Candidates on each occasion. For example, out of 32 sent up in 1884, 21 have gained commissions. The names have been repeatedly published, and a complete list will be furnished on application, whereby it may be seen that 42 out of 60 passed first trial, and that very high places have been taken at each Examination.

A number of Students have also, during the same period, passed the MILITIA LITERARY Examination.

At the recent WOOLWICH and SANDHURST Examinations NINE PUPILS competed, and EIGHT CADETSHIPS were obtained (one Woolwich, seven Sandhurst); Mr. H. D. Radcliffe taking SIXTH PLACE on the Infantry list for Sandhurst, with 7,308 marks, and making the highest score of any candidate in German—1,835 marks out of 2,000.

For the Staff College, Captains G. F. C. Mackenzie and C. E. de la P. Beresford have been successful; no other candidates sent up.

The general score now amounts to ONE HUNDRED AND SIXTEEN SUCCESSES, obtained by Pupils since September 1, 1881.

SPECIAL NOTICE.

Colonels WILKINSON and SHAW, having determined to move their Establishment to England (retaining a branch for junior students at Darmstadt), beg to announce that they will form classes at ALDERSHOT on April 1 next for Militia Competitive, Line Promotions, and Staff College. The Head-quarters of the Establishment will be transferred during the summer vacation to HEATH END, near FARNHAM, and Resident Students for Sandhurst and Woolwich will be received as heretofore. Students at the Darmstadt branch will be limited to those studying Preliminary subjects, and no objection will be made to their being young. Good grounding in German colloquial will be secured by special arrangements.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS

HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A.,
Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

WOOLWICH, SANDHURST, and the MILITIA.—(*Candidates for the Further Examinations preferred.*)—Resident and Visiting Pupils prepared by a FRENCH and ENGLISH UNIVERSITY MAN, formerly on the French Staff, and late Modern Language Master in Haileybury, Wellington, and Winchester Colleges. *FRENCH and GERMAN MASTERS reside in the House.* Local references to Colonel H. P. Montgomery, late commanding Rifle Depôt; or to Lieutenant-Colonel C. T. Bunbury, late Rifle Brigade. Passed:—Lieut. C. C. Daniel (the Royal Scots); Lieut. E. P. Webber (the Royal Sussex); Mr. E. H. Somerset (passed his Preliminary in March, and qualified for Queen's Cadetship in July, 1884).

NEXT TERM COMMENCES JANUARY, 1885.

WELLINGTON HOUSE, Winchester.

SPECIAL CLASSES FOR ENTRANCE TO THE STAFF COLLEGE AND MILITIA COMPETITIVE EXAMINATION.

SANDHURST, WOOLWICH, and MILITIA EXAMINATIONS.—Preparation by JOHN GIBSON, M.A., and large Resident Staff, at Bromley, Kent, and Coblenz-on-Rhine.

N.B.—GIBSON'S SANDHURST "FURTHER" GUIDE (No. 3), containing Papers set in November and December, 1884, and Solutions, will be published on Wednesday after the Examination.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Under the patronage of her most Gracious Majesty the QUEEN.

CHAIRMAN—Major-General J. T. BOILEAU, R.E., F.R.S.

Applications from Candidates for admission to this School, either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

The Daughters of all Officers on the Active and Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible; but the Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

Office, 20 Charing Cross, corner of Craig's Court, London.

By Order,
G. W. FORSTER, Secretary.

SANDHURST, WOOLWICH, CIVIL SERVICE, UNIVERSITIES, &c.—Hill Lands, Wargrave, Berks.—The NEXT TERM commences January 3, 1885. 37 Successes during past 12 months, with an average of 40 Pupils. For printed lists giving names, positions in order of merit, total marks, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, 16 Nevern Square, Earl's Court, S.W.

MILITARY EXAMINATIONS.

Lieutenant-Colonel G. M. CARDEW (passed second from Staff College) PREPARES SIX PUPILS for MILITARY COMPETITIVE EXAMINATION. Also Officers for Promotion, &c.—14 Observatory Avenue, Kensington. In July, five passed out of six; in September, three passed out of four.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.—A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c. — Address, HEAD MASTER.

MILITIA CANDIDATES for the LINE.—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above. Careful individual attention. A Class now at work for the March Examination. References permitted to Colonel Aylmer, S. Cameron V.C., Assist.-Qrmr.-Gen. (Intelligence Branch), War Office; and Colonel C. W. Robinson, Rifle Brigade, Assist.-Qrmr.-Gen., Aldershot.

For prospectus, containing terms, testimonials, and references, address, East Bergholt, Colchester.

ARMY (PRELIMINARY, FURTHER, and COMPETITIVE) LITERARY EXAMINATIONS.—The Rev. WALTER BAKER, M.A. (Cantab.), late Scholar of his College, &c., offers an unusual combination of advantages. A few Pupils only received. All work is done by individual teaching. No lectures to Classes, but a resident Tutor to every three Pupils, and each Tutor first-rate in his own subjects. For fourteen years, up to and including the last Sandhurst Competition, a steady average of successes, second to none, has been maintained. No town is near, but there are plenty of country amusements, and a liberal establishment is kept. The highest references can be given to noblemen, officers high in the service, and other parents of successful Pupils.—Address, Batcombe Rectory, Evercreech, Bath.

ROYAL INDIAN ENGINEERING COLLEGE, COOPER'S HILL, STAINES.—The Course of Study is arranged to fit an Engineer for employment in Europe, India, or the Colonies. Sixty Students will be admitted in September, 1885. For competition the Secretary of State will offer Fifteen Appointments in the Indian Public Works Department, and Two in the Indian Telegraph Department.—For particulars, apply to the SECRETARY, at the College.

ARMY and UNIVERSITY EXAMINATIONS.—J. WEST, Edinburgh University (two First Classes), F.R.Hist.S., F.A.S., and F. G. BRABANT, M.A. Oxford (three First Classes), RECEIVE a LIMITED NUMBER of RESIDENT PUPILS, to whom they offer special individual attention and a pleasant country home. Long and varied experience, especially in Sandhurst Preliminary and Sandhurst and Woolwich Competitive. Highest references. List and terms on application.—Address, Heathview, Storrington, Sussex.

MILITIA MILITARY COMPETITIVE. MAJOR de THOREN'S very remarkable success with Classes of Militia Officers, strictly limited in number, and to whom he gives his individual and sole attention, continues as usual. The fees at this establishment are extremely low.—For particulars, address Bellefield, St. Helier's.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Officers prepared for Examinations. Correct Idiom guaranteed.—PUNDIT, 7 Beechholme Road, Clapton.

CONNAUGHT MILITARY COLLEGE, WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

SCHORNE COLLEGE, near WINSLOW.—Of the 100 Boys, thirty are sons of Army and Navy Officers. Terms for young boys, 30 guineas per annum, with entrance fee of 5 guineas.—Address, Rev. Dr. JAMES.

ARMY EXAMINATIONS.—PREPARATION in GERMANY.—Mr. R. H. ALLPRESS, M.A. (Cambridge Mathematical Tripos 1878), has a few Vacancies.—Address, Mönchhof, Neuenheim, Heidelberg.

IMPERIAL FIRE INSURANCE COMPANY. Established 1803.
1 Old Broad Street, E.C., and 22 Pall Mall, S.W.

Capital, £1,600,000; paid up and invested, £700,000. Total invested funds, over £1,500,000.

THE KHARTOUM EXPEDITION.

[FROM A CAMEL GRENADIER.]

It being a dismally monotonous journey on camelback between Wady Halfa and Dongola, I am trying to enliven the proceedings by scribbling a few remarks about the Camel Corps, which may be of some interest to your readers. Writing is rather a difficult feat on top of my camel, as his action is far from that of an arm-chair; no matter, it effectually prevents drowsiness, and takes my thoughts off brooding on the sore places of my body. Our saddles are the worst part of the business. The officers are supplied with the Mounted Infantry pattern, which are strong enough, the seat frames being made of iron, but they are enormously heavy, weighing some 50 lb. The seat, too, is so broad that my legs (not being overlong) form an angle of about 120° when the full impedimenta of rugs, tent, and saddle-bags are packed on. I may as well fully describe the heavy-marching order. The men's saddles are narrower and lighter than ours, being made of cross-lashed bars of wood, whose chief fault is that they break on the smallest provocation, and, therefore, necessitates being overlashed with wire at the junctures. The camel being made to kneel, and the framework being adjusted so that the padding fits into the hollows fore and aft of the hump, the two girths (of thin, rotten leather) are lashed tight, amidst the expostulations of the steed. Next, the headstall (no part of which enters the mouth) is put on, the rein being composed of an iron curb-chain and rope about 2¼ yards long. Nextly, the man's blanket, rolled in his waterproof sheet, is lashed to the near-side and his *tent d'abri* (one to every two men) to the off. The second blanket is then placed on the top, and the zuleetahs (or big saddle-bags of canvas and leather) being across that. The Namaqua rifle bucket is strapped to the off-side, far back, and the water-skin, big leather water-bottle, and two cornsacks, containing three days' grain, hung to the fore and rear pummels. The saddle-cover, of red leather, covers the zuleetahs, and the man gets on. Generally speaking, the camel gets up just as the man gets his foot in the stirrup, and the results are curious. Woe betide, if you try to throw your right leg over before the beast is up; you will infallibly come a hideous cropper. The only thing is to stand in the stirrup, let him rise with you, and then get into your seat. All our camels are "hygeems," or riding camels, which have been carefully selected and weeded out at Wady Halfa. Thus we walk away from our small transport of "baggagers," which does not turn up for sometimes over an hour after we arrive at our halting-place. The usual day's work begins by reveille at 4.30, sometimes earlier, according to the length of the day's journey, which as yet has never exceeded 11 hours—about 31 miles. Breakfasts are finished and everything is packed and ready by 6, and we start in the cool of the morning by leading our beasts four or five miles before mounting. Formation—sections of 4's or single file, according to ground. Sitting on top of a camel walking straight on end for eight or nine hours, with only a break of half an hour at noon, is a slightly monotonous affair. My own beast, although I love him tenderly, is not blest with swift walking-powers, and my conversation during the day is limited to "Wake up, d—n you!" occasionally varied by "D—n you, wake up!" However, he is in a terrible funk of koorbash, and the swish of it hurries him up considerably. As for the country, my idea of a desert used to be "an illimitable waste of burning sand, broken by neither rock nor tree whereon to rest the weary eye." As yet, we have not come across anything of the sort; the ground has been decidedly mountainous, and in fact sometimes so much so that we have had to dismount and lead our animals. Occasionally we emerge into a "khor," or so-called watercourse, three or four miles broad (*I* should call it a plain); but it is generally hard sand, often gravelly, and always capital walking. We do not see so much of the Nile as you might expect from looking at the map, though, as yet, we have halted every night except one on the banks, from whence the views are excessively pretty. Sometimes the ground is so stony that one really pities the podgy, soft-looking feet of our camels, but they knock their toes against the sharp stones with the greatest unconcern. I have also had practical experience that their feet are not soft, by a violent kick I received from the hind-leg of a camel, who thought himself insulted by my examining his headstall in the dark. A camel's hind-leg will reach anywhere—over his head, round his chest, and on to his hump; even when lying down an evil-disposed animal will sometimes shoot out his leg and bring you to a sitting position. His neck is of the same pliancy; he will chew the root of his tail, nip you in the calf, or lay the top of his head on his hump; altogether, he is an overrated beast. I have been told of journeys made across country from Dongola to Alexandria in eight days (which I do not believe); of his marvellous powers of going for 40 days running; of trotting 200 miles without a halt; of his going 15 days without water, &c., &c. My experience thus far is that he gets a sore back after four days, or less, does not go more than five consecutive days, and as for trotting, it is only by a vigorous application of the koorbash that I can succeed in making mine go more than 250 yards at a time. I trust that my steed is an exception, but I chose him because he was pointed out to me by a connoisseur as an extra good one, but his walking certainly never exceeds two and a half miles per hour.

Experts differ as to the prospects of Lord Wolseley. The leading journal has published a communication from a military authority who takes a gloomy view of the situation, and predicts that his lordship will not reach Khartoum until March. An official apologist, "R. R. B.," easily identified as Mr. Brett, M.P., Lord Hartington's private secretary, comes to the rescue. "R. R. B.'s" letter is so interesting that we give it *in extenso*. He says:—"There is no 'wide discrepancy between its plan and execution;' and any 'sanguine official prognostications' by way of 'defence for the choice of the Nile route' were never put forward by Lord Wolseley or the other officers charged with the consideration of the rival schemes. For, in the first place, Lord Wolseley, before he left England, had no hope of being able to concentrate his force at Ambukol before the end of December, and it yet remains to be seen whether he will not have effected that primary object by New Year's Day. And secondly, the Nile route was selected not as the better of two possible routes—which might have been the case had the decision been taken in March last—but as the only practicable way of relieving Gen. Gordon during the present winter. As obstinate preference for the Suakim-Berber route is so obviously the motive which underlies the criticism of your 'Military Correspondent,' perhaps you will allow me to recall to the memory of your readers the following circumstances:—The Government gave no orders for an advance in the direction of Khartoum till the second week in the month of August. At that time Berber was in the hands of the enemy, and the tribes along the route from Suakim were in open hostility. Lord Hartington explained to the House of Commons on Nov. 13 that no advance from Suakim could take place without severe fighting, and that the operation of sending a force to Berber, then in the hands of the Mahdi,—a force necessarily in small detachments, on account of the scarcity of water—would be one of considerable difficulty and danger. This was in reality an under-statement of the case. No large body of men has ever crossed the 260 miles of desert which your correspondent treats so airily. The Egyptian troops which have used that route have done so in times of peace, and in small parties. But there were certain engineers who advocated strongly the making of a railway along this route. They stated at first that it could be constructed at the rate of 30 miles a day. Upon cross-examination it was speedily discovered that in consequence of the unknown character of the obstacles to be encountered, and especially of the amount of opposition on the part of the tribes, they could not guarantee even the rate of three miles a day. Indeed, competent authorities estimated—after hearing what these engineers had to say—that it would take at least 11 months to complete the railway, and your correspondent may be interested to learn that one of the highest military authorities in Europe—whose opinion was asked upon this plan—declared it to be 'the dream of a visionary Royal Engineer.' In any case, it soon appeared that although the Suakim-Berber route might have been selected with advantage, and a railway constructed, if a decision had been come to in March, it was altogether out of the question in August. It is true that a desert will probably have to be traversed between Ambukol and Shendy, but there is this difference between it and the Suakim-Berber desert. In the first place, very little is accurately known about the latter, whereas I have lying before me as I write an accurate survey, taken, I believe, under the auspices of Mr. Fowler, the well-known engineer, of every yard of the road between Ambukol and Shendy. And, secondly, Berber is even now in the hands of the enemy, whereas at Shendy there are five of General Gordon's steamers—disingenuously ignored by your correspondent—awaiting the arrival of our troops. Finally, I should like to point out to your readers that, if authority goes for anything, we have not only the clearly-expressed opinions of men who know Egypt and the Nile thoroughly—like the ex-Khedive and Mr. Stanley—that the Nile route was the only one available for a large body of troops; but that we have Gen. Gordon himself writing on July 30—that is, a week earlier than the date when the decision of the Government was taken—to Sir E. Baring, 'As for routes, I have told you that the one from Wady Halfa along the right bank of the Nile to Berber is the best, and had not Berber fallen would have been a picnic. The other route is from Senhit to Kassala, and to Abou Haraz on the Blue Nile, which would be safe up to Kassala, but I fear it is too late.' Not a word about Suakim, either with or without a railway." But Lord Wolseley's progress has been slower than the public expected, and Sir Samuel Baker, writing to the *Pall Mall Gazette*, submits that "a most able General and the best of British troops have been placed in a most unfair position by their own Government. They have been ordered to advance from Cairo by the Nile when that river has commenced its fall, thereby aggravating every natural difficulty, and rendering the passage of the cataracts impossible to steamers which could have ascended with comparative ease had the expedition been prepared to start from Assouan upon July 1." Sir Samuel Baker advances weighty reasons in favour of an expedition from Suakim. "If (he says) Gordon is short of food, and the Mahdi's people (by recent accounts) are suffering from famine prices, Lord Wolseley's army will not arrive in a land flowing with milk and honey. It becomes all-important that the Suakim route should be opened, and that Berber should be provisioned as a central depôt. In case of success, the supplies would be available on demand; in the event of disaster, the line of retreat would not be confined to the non-navigable Nile. Lord Wolseley keeps up a brave heart, and seems to have confidence in the ultimate results of his enterprise. In a telegram to the War Office, dated Dec. 16, he says:—'Just arrived. Brigdr.-Gen. Stewart, with troops from Handek, yesterday. The English boats have up to this point fulfilled all my expectations. The men are in excellent health, and fit for any trial of strength, as the result of manual labour. The work in the boats against currents is very hard, but is borne most cheerfully without a grumble, all thoughts being on the relief of Khartoum and of their gallant comrade who is besieged there.'"

Gen. Wolseley is losing no time. He has pushed on his head-quarters this week from Dongola to Korti. The correspondent of the *Daily Telegraph* telegraphs a conversation between the General and the Mudir of Dongola, which, if it does not throw much light on the prospects of the Expedition, is interesting as showing what the Mudir thinks of them. Mustapha Pasha—that is the Mudir's name—is not an ordinary personage. True or false, loyal or disloyal, he has made his mark during the present rebellion, nor could any man in the Khedive's service give more accurate information as to the rebel strength. If he is to be believed, there will be no fighting this side of Khartoum. The rebels, he says, will not stand against the British troops. Supplies will be plentiful along the line of march both of grain and meat. Lord Wolseley very naturally asked why, if the country was open and the Arabs had taken themselves off, no intelligence had been sent from Khartoum by messengers. The reply to this question was that the country people intercepted them. If this be the case, it is to be feared that the Soudanese have lost their faith in Gordon, and are hostile to the British expedition. However, we may reasonably conclude that he has thrown in his lot with our troops. It would appear that 11 days is now the period during which a messenger may hope to get to Khartoum. For a native has brought intelligence that the General has again beaten the rebels, and commands the river as far as Shendy. This news is so far satisfactory that it shows Gordon's star to be still in the ascendant. But between now and the end of March, the time at which the expedition may expect to reach Khartoum, a great deal may happen."

The Mudir's troops and a guard of honour of the Royal Sussex paraded in front of the Mudirieh on Saturday morning, upon the occasion of Lord Wolseley and his Staff's departure for Korti. All the officers' heavy luggage was stored here for reshipment to Cairo. Everybody went forward in the lightest marching order. Mustapha Pasha wearing neither sword nor decorations, and dressed in a civilian loose overcoat and trousers, a fez and a kafieh, received the General at his doorway. After exchanging salutations with his Excellency, Lord Wolseley and his staff, all wearing scarlet tunics, led by the Mudir, entered the official residence, where sherbet was served. His lordship arrived at Debbeh on Monday morning, in the Mudir's dahabeah, which was towed by a steamer. He was received by Lieut.-Col. Tolson and officers, as well as by the native civil and military authorities. A guard of honour was provided by the Sussex Regt. After inspecting the fort, the stores, and the military hospital, Lord Wolseley proceeded for Korti, where he arrived on Tuesday.

The advanced guard of the Expedition is now fast assembling at Korti. The site is said to have been well chosen for the encampment, and after their long toil over the burning sand and rocks, a rest there will be keenly appreciated by the men in the boats. The tents of the Camel Corps are pitched under widespreading groves of trees extending to the banks of the river, which here winds in broad, quiet reaches. The scene is very picturesque; the heat is tempered by the shade, and all are delighted with the spot. At this place the fleet of whale boats will shortly be concentrated. The Head-quarter authorities estimate that the duration of the voyage from Sarras to this point will average 34 days, 14 of which will be occupied in getting up the Cataracts of Batn-el-Hagar. Canadian *voyageurs* are now stationed at the various difficult points with hawsers and parties of natives to help the boats past.

Two patrols, each consisting of an officer and 40 men, have explored the country for 10 miles in various directions from Korti. They report all perfectly quiet so far as they have penetrated. The provisioning of the British force is proceeding regularly, and there is no lack of quantity. Depôts of supplies have been established between Korti and Debbeh. For 1,000 men there is sufficient wheat and flour for 400 days, biscuits for 90 days, and tinned meat for 100 days, besides the rations in the boats. The remainder of the 19th Hussars left Debbeh yesterday, and will arrive at Korti to-day (Saturday).

Sir Herbert Stewart and Staff, with the Mounted Infantry and the Guards Camel Corps, a thousand strong, arrived at Korti on Monday.

The detachment of the Royal Sussex Regt. at Debbeh, under the command of Lieut.-Col. Tolson, has erected a redoubt 40 yards square.

The Staffordshire and Sussex Regt. have passed Dongola, whilst the Duke of Cornwall's Light Infantry, the Essex Regt., and the Black Watch have passed Dal.

Gen. Buller and Col. Brackenbury left Wady Halfa on Tuesday.

Alarming reports having been repeatedly sent to England to the effect that the Kababish tribes on the immediate right flank of our line of advance have shown signs of latent hostility that might take an active form on the first opportunity, the special correspondent of the *Daily News* at Korti feels bound, from personal experience, to express a totally opposite view. He says:—"I have just ridden on camel back 140 miles alone in the Kababish territory. I slept in the villages frequented by them, and bivouacked within sight of the wandering spearmen of their tribe, between the battle-fields of Debbeh and Korti, with only two Nubian servants as companions. Both in courtesy towards myself, and in more familiar converse with my servants, the Kababish have given every indication of friendly feeling. As a matter of mere military precaution, however, Sir Herbert Stewart has taken every care to protect his camp by cavalry patrols by day and infantry outposts at night."

As the interest in the Nile Expedition heightens, the conflict in the news from Khartoum increases. From one source we learn that the Mahdi's influence is declining, and that the tribes are leaving him, and that he cannot provision his soldiers. From another it is reported that he has drawn a tight cordon round Khartoum, has abundant supplies, and is determined to starve the garrison into surrender. We regret to say that the last report seems by far the more credible of the two. Anybody who knows Oriental nature will understand the desire to make things pleasant in the minds of the Soudanese, whom the sight of British forces and the touch of British gold have rendered amicable. But it is less easy to account for the persistent reports of the Mahdi's investment of Khartoum, unless they are founded on truth. The great fact patent to all is that, although we are within 11 days' distance of Gordon, according to the time occupied by messengers in reaching the British head-quarters, we practically get little or no information as to his position and prospects. This of itself is sufficient to show either that Khartoum is closely invested, or that the country people will not allow a messenger to pass through to the British General. In either case it is clear that Lord Wolseley's task is enormous. For he is advancing through a hostile country, to meet an enemy who, we know, can and will fight, and his only line of retreat is through districts in which one reverse to our arms would raise every native's hand against us. But we have all such faith in Lord Wolseley's dash and forethought, that no difficulties in his path inspire us with anxiety.

The authorities at head-quarters have known for some time of the presence of a Frenchman in the Mahdi's camp. He corresponds whenever he can with certain compatriots in Cairo, and receives from them, for the information of the Mahdi, every matter of interest they can obtain about our movements, numbers, &c. They in their turn spread news purporting to be authentic respecting Khartoum and Gordon, which is always incorrect, and often opposed to all the facts and intended to act to our disadvantage.

From Suez we learn that the sickness prevailing among the Marines and sailors at Suakim is very great. Invalids have been since February last returning to Suez from the front at the rate of about 100 per month. Out of the garrison left in charge, consisting originally of 1,200 Marines and sailors, only about 100 now remain as effectives at Suakim. Most of the invalids who have arrived have been sent home as thoroughly worn out, and the reliefs are now exhausted. The continued holding of Suakim, as may thus be seen, is only at the cost of a very great waste of valuable life. The camp, which has been dignified by the title of sanatorium, is, in fact, a very unhealthy spot, and there is a good deal of fever among both officers and men.

The *Standard* correspondent at Constantinople writes:—"Lord Hartington is negotiating through Major Trotter, the British Military Attaché here, with the American Gen. Berdan, for acquiring the latter's designs for torpedoes, range-finders, and mechanical fuzes for shrapnel. Plans have been forwarded by the British Embassy to Lord Hartington of a new model of Gen. Berdan's mechanical fuzes, constructed for a 6-in. English gun."

THE BECHUANALAND EXPEDITION.

Sir Charles Warren has left Cape Town to inspect the base of operations on the Orange River. A detachment of the Commissariat and Transport Corps, and some Dragoons, have also started. Sir Charles Warren expects to enter Bechuanaland at the beginning of the year with 1,000 Volunteers, and, if wanted, the regular troops will follow.

Letters from the Cape state that no difficulty is being experienced in the formation of a local irregular force. Offers to join such a force were being continually received by Major Lowe, and many candidates were applying direct to the Government House at Cape Town.

The field hospital reserve equipment for the Bechuanaland expedition left Southampton in the mail steamer Athenian on Thursday. The equipment is completely furnished, either for a movable or stationary hospital, and is well supplied with transport waggons, water-carts, and ambulances, besides pannier-baskets for carrying surgical appliances and medicines on mule or horseback.

The Press Association understands that Sir Charles Warren is pressing forward to Bechuanaland with a limited staff. Sir Charles has orders to carry out, if possible, his instructions in relation to Montsioa's territory without the display of force; but it is believed that he will accept of no agreement with the Boer freebooters that does not provide for their entire withdrawal from Montsioa's territory. By the time Sir Charles reaches his destination the Expeditionary Force placed at his disposal will be ready to start from Cape Town to join him if necessary.

The *Times*' correspondent at Durban telegraphs:—"The Imperial reply to the Cape Ministers' terms of settlement of the Bechuanaland question appears to be generally favourable thereto, leaving the final adjustment of the land questions, outside of Montsioa's claims, to the Cape Parliament, and placing the administration of the Protectorate meanwhile in Sir Charles Warren's hands. Two parties exist in Stellaland, one being resolutely hostile to the rule of Mr. Niekerk, while in Goshen a party exists equally hostile to Mr. Gey Van Pittins. The Transvaal Boers have withdrawn entirely inside the Convention line, but agents from Bechuanaland are said to be recruiting both in the Transvaal and in the Orange Free State. At Pretoria the authorities seem incredulous as to the intention to carry out a policy of active Imperial intervention. News has been received from Zululand that the Boers intend to force larger concessions of land from the Usutus. These rumours are possibly exaggerated."

Summary of Events.

◆

DECEMBER 13.—Lord Wolseley and Staff left Dongola.

DECEMBER 14.—H.M.S. Crocodile sailed from Portsmouth with the 1st Batn. 7th Fusiliers for Gibraltar, and drafts for India.

DECEMBER 15.—Sir H. Stewart, with Mounted Infantry and Guards Camel Corps, arrived at Korti. Inspection of cadets at the Royal Military College by the Duke of Cambridge.

DECEMBER 16.—Lord Wolseley arrived at Korti.

The scheme of complement for the Firefly, Inconstant, and Black Prince is as follows:—Black Prince, 709 men, including 89 in the steam department; Inconstant, 614, steam department 37; Firefly, 60, steam department 11.

It is stated that of the force of 900 Marines stationed at Suakim after the Soudan battles, one officer and 27 men have died, 109 have been invalided home, and 206 have been in hospital at Suez.

The children of Coastguardmen and pensioners actually in the service of the Admiralty are to be admitted to the Royal Marine schools when room is available, but this permission is not to apply to the children of pensioners not so employed.

It has not been considered necessary to make special transport arrangements for the conveyance of the Royal Marine reinforcements to Egypt.

Directions have been given that a distinctive badge is to be worn by torpedo and gunnery instructors, seaman gunner instructors, and leading torpedo men, consisting of a Whitehead torpedo, crossed diagonally by a gun, and surmounted by a crown and star.

The French Government have contracted for the laying of a cable from Zanzibar to Mayotte, Nossi Bé, St. Mary's, and Tamatave. It is to be completed in June next. The company will continue the cable to Réunion and Mauritius.

Lloyd's agents at Foochow-foo have forwarded to Lloyd's the following copy of a Consular notice warning steamers entering and leaving the River Min that the Chinese authorities have decided to lay down torpedoes. Lloyd's agents add that notice of this action was at once telegraphed to Hong Kong, Shanghai, and Amoy:—"British Consulate, Foochow, Nov. 1, 1884.—It is hereby notified, on information received from the Chinese authorities by the undersigned, that a channel, measuring about 100 ft. in width, through the torpedo positions at the entrance to the approaches of the White Fort will be marked on either side by black and white iron buoys, and that in the centre of the said channel will be placed bamboo beacons to point the way through. Vessels inward and outward bound should steer for these bamboo beacons in order to avoid danger, while special boats will be in attendance to pilot ships in safety through the channel.—CHARLES A. SINCLAIR, H.B.M. Consul."

It is stated that at some trials made lately at Belgrade of Armstrong, Krupp, and Bange guns, the Armstrong burst one of its rings after a few shots, the Krupp developed gases, so that it could only be closed by force, but the Bange worked without fault.

GENERAL GORDON.—"In a brief period of inactivity which followed the capture of the Mamelon," says the author of a "Life of Chinese Gordon," "he wrote home for a map of the Crimea and a box of Rowland's Odonto." The man who "held his life in his hand" for his country's good, yet knew how to secure one of its greatest blessings—a sound set of teeth; all his admirers should do likewise; give up all useless pastes and washes and use the purest, most fragant, and non-gritty tooth powder ever sold, viz., ROWLAND'S ODONTO. To be had of all chemists and perfumers all over the world.

Cavalry in Modern War. By Colonel F. Chenevix-Trench. (Kegan Paul, Trench, and Co.)

This valuable essay, which has been compiled by our Military Attaché at St. Petersburg, forms the sixth volume of "Military Handbooks for Officers and Non-commissioned Officers," and is edited by Colonel C. B. Brackenbury, R.A. Several volumes uniform with the present have already been compiled, and have attracted eager attention. Colonel Brackenbury, in his preface to this volume, draws attention to the important and much-debated question of dismounted action of cavalry, and at the same time shows how it has been brought into great prominence during our late and present Egyptian campaigns. Colonel Trench's essay opens with some observations on the organisation of Continental cavalry, and draws masterly sketches of the organisation, strength, and armaments of the German cavalry, as well as those of other nations. He then proceeds to point out the most prominent defects which exist in the present organisation of cavalry, one of the most important being the want of a fifth or depôt squadron in addition to four field squadrons. One of the numerous advantages of those outline sketches of the cavalry of Continental armies is that the reader may, without burdening his memory too much with figures and details, or without having to consult various standing works, be able to make himself, in some degree, acquainted with the composition, organisation, and strength of those forces. With reference to the Russian cavalry, it is to be observed that the account given is more full as regards it than that of the others, in consequence of its late reorganisation; the effect of which has been that it differs now in armament and training from cavalry of the established European type. It may, however, be observed that the details of its last reorganisation—that of 1882—are not to be found in any standard English military work. The clear and independent mode in which the first chapter of this essay has been treated can scarcely be too highly praised. The author's style is incisive, his facts are marshalled with clearness, and the conclusions he arrives at are natural and consistent with common-sense. Merely touching on the subject of "The Cossack Cavalry," Colonel Trench transcribes verbatim the sketch of the present organisation and training of the Cossacks which is embodied in Colonel Sir Lumley Graham's copious account of the Russian Army, a document already referred to. The question of "The British Cavalry" occupies the author's attention in the second chapter of this work, the main object being to point out the existing defects in its organisation. "This is no question of mere ordinary importance, for it is only too well known that there are certain grave defects in the present organisation of our cavalry which could hardly fail to cripple its efficiency on active service, especially if the campaign in which it was engaged happened to be of a long duration." The author proposes to put aside minor shortcomings, and consider the three main defects which should be removed at once. The first is the very small effective numerical strength both of men and horses of the regiment. The disadvantages of this small established strength are still further aggravated by the operation of the short-service system which has within the last three years or so begun to come fully into play in this branch of the service. We should strongly recommend the officer or student to read carefully the author's observations and experiences of the operation of the short-service system which he will find in this chapter. Defect number two is the retention of the troop as the administrative, and the squadron as the tactical unit. Number three defect is the want of a depôt-troop or squadron on the Continental model, in addition to and apart from the fighting effective strength of each regiment. To do more than give a mere cursory notice of the important questions connected with "Cavalry in Modern War" is quite impossible, but it is open to us to call attention to the importance of that subject, as well as to the able treatment it has already received from Colonel Trench.

A Round Dozen. By Robert Overton. (Dean and Son.)—Some of the articles contained in this little book are special reprints, others are not so, but one and all they are well worth the attention of those who at this season of the year love to reach and perhaps alleviate scenes of deeply touching misery. The reader cannot do better than open the first story, called "Caged," reprinted from a Christmas annual of 1883. It is merely a "gaol-bird's" story, but a story of sufficient pathos to stir the feelings of the most obdurate. Fun, moreover, is not excluded from this brochure. Turn, for instance, to page 46, and read a touching appeal from a potato-seller who has given credit for 13s. to "Lady Clary Were der Were," and *cannot get his money*:—

"Lady Clary Were der Were,
  I've left pertatoes at your door,
Likewise green peas and cabbages,
  But I ont do so nary more.
And so I tells you very plain,
  If I should meet you, Clary dear;
You'll find I ain't got that repose
  Wot stamps the cast of Were der Were."

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. LAURANCE, F.S.S., Oculist Optician, 1A Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

THE STATE OF THE NAVY.

The *Times* publishes two letters on the Government proposals for the reinforcement of the Navy. One is signed by Sir Edward Reed, and the other signed "M.P." is stated to be "from the pen of one having ample knowledge of the question and carrying a corresponding weight of responsibility." The general conclusion enforced by both letters is that the proposals of the Government, although indicating a certain disposition to yield to the pressure of public opinion, are not only inadequate as they stand, but fail to carry with them any guarantee that they will be actually put in execution in such a way, and within such a time, as to make a real addition to our Naval power. Sir E. J. Reed says that the Government proposals divide themselves under two heads—1. The description of ships which are to be built. 2. The number of them promised. As to the description of ships to be built, he expresses a very considerable amount of satisfaction in one important respect—viz., the recognition of the value of side armour. As to the number of additional ships to be built, while he entirely approves of the Admiralty programme so far as it goes, he cannot for a moment regard it as a sufficient one. What the Admiralty really proposes, however, seems to Sir Edward to be in some doubt:—

"In the first place, they did not suggest to Parliament any additional expenditure in the Royal Dockyards, although some remarks upon a proposed increase of the armoured tonnage there to be produced fell from Sir Thomas Brassey. If no steps be taken to largely increase the dockyard output of ships, the Admiralty programme will, of course, shrink to the single item of contract ships. What these are to be is more than I can tell. In one part of Sir Thomas Brassey's speech in the House of Commons, he implied that the five belted cruisers would be all laid down by contract; in another part he spoke of three only of these vessels being put out to contract. Two armoured line-of-battle ships were, according to Sir Thomas, to be contracted for; but in another part of his speech only one of these ships was included in his suggested additional sum to be expended. Again, Sir Thomas stated that only about £800,000 was to be expended additionally in the next financial year, and yet he also stated at the time, and has repeated since, that the private builders would be under no restriction in pressing forward the new ships. I profess myself at a loss to understand how the Admiralty can shortly order two first-class ironclads (or even one), five belted cruisers (or even three), nine vessels of the Scout class, and ten torpedo boats, and leave the contractors free to proceed with them as fast as they please, and yet spend only something over £800,000 extra in the next financial year. . . . . . It appears to me that the Admiralty programme could have been but imperfectly considered before its announcement, and I cannot help hoping that it will be brought into a clearer and much more promising form before Parliament meets."

"M.P.," in his letter, maintains that Lord Northbrook's proposals are "only a colourable compliance with the demands which have been made for an immediate increase in our defensive forces, We are promised four more first-class ships in five years from the day they are laid down. Will that promise be kept? The Edinburgh was laid down in March, 1879, and at the end of this year she will have been six years in hand. She is not near completion. The Conqueror and the Colossus may yet be ready in six years from their commencement. If the expectations held out by Mr. Shaw-Lefevre in 1880 had been realised, the Edinburgh, the Colossus, and the Conqueror would all have been at sea a year ago, and the Collingwood would now be complete. We are told by Lord Northbrook it is not correct to suppose that ships were waiting for guns, or that they would have to wait for them; but what are the facts?

"The Rodney, Howe, and Camperdown, laid down in 1882, and the Anson in April, 1883, are to have 63-ton guns. Up to the 2nd inst., on the testimony of Mr. Brand in the House of Commons, the guns for the Rodney only had been ordered; three of them are in course of construction, and will be ready on Oct. 31, 1885,—about a year hence; the others will be some time longer. But no orders had then been given for the guns for the Howe, the Camperdown, and the Anson, and no orders had been given for the hydraulic carriages or mountings, which usually take two and a half years in making. We shall probably be told in 1887 or 1888, when we are complaining that these ships are not ready, that the order for the guns was given 'rather late.' And there is to be no change in this policy!"

The resolve to spread the building of 30 first-class torpedo-boats over three or five years is ("M.P." says) like the rest of the programme as regards time, perfectly incomprehensible, only a little more so. He urges that all the contract vessels should be finished as soon as they can be. And as regards the dockyards that we should finish the ships now fitting and building out of hand. These ought all to be ready next year, and every ship which has been relied upon in the Admiralty statement as part of the effective force of the Navy should be made efficient in guns, boilers, and machinery.

Lord Henry Lennox, speaking on the condition of the British Navy at a meeting of the Constitutional Union, said he had received a letter from Sir R. Spencer Robinson, expressing his great regret at not being able to be present to take part in the proceedings. He had also seen, that day, Sir Edward Reed, who had told him that nothing but the most urgent business, and the circumstance of his having been unwell, would have prevented his being present, and impressing upon them the inefficiency of the Government proposals, or what were called the Government proposals, with regard to the Navy. Sir Donald Currie had, in the House, declared that there must be an addition made to the Royal Navy. Again, Mr. Broadhurst, who was supposed to represent the working-classes, said he was not a fighting man, but he was one of those who thought the English Navy must be strong to defend our floating wealth. But what was the extent of this floating wealth which stirred up Mr. Broadhurst? Even in 1879 it was a quarter of the whole commercial wealth of the world, and it had gone on increasing. Such a vast commercial interest stood in need of adequate protection. The programme he wanted them to adopt that night was that of Sir Edward Reed, which rivalled the programme of the Government. We wanted not only ships and guns, but men. Sir John Hay, M.P., also addressed the guests, and urged the necessity of a state of preparedness in face of the rapid advance of the French and the extreme development of the German and Italian Navies. The following resolution was passed:—"That the proposals of the Government with reference to our national defences are wholly inadequate; that in the opinion of this meeting the following measures are necessary, in order that the national defences, more especially the Navy, may be placed in a satisfactory condition:—The immediate construction of a certain number of first-class ironclads, fast armour-belted cruisers for the protection of commerce, torpedo-boats, torpedo-catchers, torpedoes, and guns; a complete reform in the modelling of our Naval Estimates, and a thorough reorganisation of the constructive department of the Admiralty, with a view to more effectually controlling the expenditure on ships and in the dockyards; the procuring of more perfect designs of ships; and securing an adequate return for the money spent on them; the prompt fortification of and armament of our coaling-stations, commercial harbours, and rivers at home and abroad upon a system of Imperial and Colonial Federation for purposes of common defence; and the erection of a new arsenal in the northern coal districts."

At an entertainment given to the Lord Mayor and Sheriffs on Wednesday by the Shipwrights' Company, Lord H. Lennox proposed the toast of "The Navy, the Army, and the Reserve Forces," and in doing so claimed credit for having forced the Government to make proposals to Parliament for strengthening the Navy, He insisted on the absolute necessity in the age in which they lived, which was one of restless and exaggerated excitement, of sticking up to their armaments by sea and land. Vice-Admiral Selwyn, responding for the Navy, said that the present ships of the Navy floated by the grace of God, and in the absence of enemies' shots. Lord John Manners remarked that he would recall to their recollection how, some 30 or 40 years ago, there were the most doleful prophecies as to what was going to happen in the Navy. All the traditional stories were to pass away when iron took the place of the wooden walls; but they found the poets and writers just as ready now to celebrate the triumphs of the Navy as formerly. Sir E. J. Reed, M.P., in giving the toast, "Prosperity to the Shipping Interest," said it was a relief at a time like the present, when the Royal Navy was receiving so much attention, to have the privilege of proposing the toast of the other navy, which was our floating Empire, of which the Royal Navy was but an accessory. With all deference to the Treaty of Paris or any other treaty, he hoped while this nation remained rich and strong within itself it would never become so degraded in spirit as to deny to its floating Empire whatever protection its guns and its money could provide. Admiral Selwyn had talked of protecting the ports, but we must first protect our Empire in whatever part of the earth it happened to be. He would never allow his patriotism to shrink to the miserable dimensions of protecting the home ports alone. This country was never richer than now, and he maintained that all the controversy came down to the simple question of money. If they wanted ships to steam faster or with better armour it was merely a matter of a few pounds, more or less, and he maintained that there was no desire to curtail the power of England.

Mr. C. M. Palmer, M.P., speaking on Thursday at Jarrow, referred to the position the local Engineer Volunteer Corps, of which he is colonel, had taken in submarine mining, and said a few years ago he had attempted to induce the Government to use the Engineer Volunteers for the defence of our great harbours. He was aware of the reluctance of the Government to take Volunteer Engineers into the work, but what were they for if they could not be utilised for the defence of our great harbours. The Government could not halt; they must either place their confidence in them for service, or else cease to recognise them. Regarding the state of the Navy, which he thought was alarming in the extreme, he approved of the report made by the committee which had Lord Ravensworth as chairman, and said if the Government would remodel their Ordnance Department, the Dockyards and private firms in the country could soon build sufficient ships. He approved, however, of the Government approaching the subject with caution, and not under the influence of panic.

The *Correspondencia de España* states that the result of the official inquiry into the boarding of a British merchant ship in Jamaica waters by the Spanish gunboat Almendares, shows that the gunboat acted in strict accordance with international law in boarding the vessel, which, from her suspicious behaviour, was suspected of acting in co-operation with the Cuban insurgents. On examination, however, her papers were found to be quite in order.

HOGE'S HOREHOUND HONEY.—What is known as the "Bee Belt" of Southern California is one continuous bed of honey-bloom, one sweet bee-garden throughout its entire length; but there is one part of it which the plough has not yet invaded, that is the region where the Horehound plant flourishes in one glorious blaze of purple and gold. The tropical luxuriance of these plants is so profuse that they brush against the feet at every step, and close over them as if you were wading in liquid gold. The air is sweet with its fragrance, and tuneful with the humming wings of the bees gathering this precious panacea: this honey-full horehound is a great favourite with the bees, and is one perpetual feast for them. They revel in its bloom long after the flowers of other countries have withered and gone to seed. A single plant will at times be visited by a whole hive of bees at once; the grand hum of such a multitude of wings impresses the listener with the fact that the winning of more than ordinary honey is going on. The product of a dozen or two of these plants is sufficient for the wants of a whole hive. In this perfect paradise for bees the petals of the continuous sheet of blooms drink in the vital sunbeams, and the bees hug this favourite flower with profound cordiality, and push their blunt polleny faces against them, like babies on their mother's bosom; and fondly, too, with eternal love, does Mother Nature clasp her small bee babies and suckle them, multitudes at once, on her warm Californian breast. The Horehound Honey so gathered by these little almoners of Nature is put up in bottles, and retailed by all Chemists, &c., at 1s 1½d each. W. L. Bright, Esq., son of the Right Hon. John Bright, M.P., says:—"Hoge's Horehound Honey cured his father of a bad cough."

THE COMMISSARIAT AND TRANSPORT STAFF.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The knowledge that the columns of your valuable paper are at all times open to letters on matters of interest to the service, has emboldened me to trouble you with this rather lengthy communication on a subject which is agitating the minds of a very large number of officers at the present time. It is a notorious fact that the present state of the Commissariat and Transport Department is anything but what it should be, as a very cursory inquiry would show to the satisfaction of any impartial individual. A very careful investigation is required to be made into the organisation and administration of the corps, and also into the questions of command and rank. In this letter I purpose dealing with the question of rank only, leaving the other matters to be dealt with on future occasions. It is well known that many of the older officers of the Commissariat and Transport Staff—the exceptions are few—on their first entry into the service occupied very subordinate positions, without either rank or status, and successive changes in organisation have elevated them to positions never contemplated by them in the fondest dreams of their earlier career. Every change seems to have benefited the individual, and to have wrought no good in the interests of the public service. Thus it has happened that purveyors' clerks have become commissary-generals—for so they erroneously term themselves, though they should properly be styled commissaries-general. In fact, the word "general" has got to be used in a different sense to what was originally intended, and since it is a useless and absurd addition to the word commissary, should be abolished. These would-be generals, having secured a certain official status and high-sounding and complicated designations, began after a time to agitate for something more, and, absurd though it may seem, this something more was nothing less than the putting forward of a claim for substantive Army rank; and so confident were they of having their claims allowed, that they declined to accept honorary rank. A vaulting ambition overleaps itself, and it is needless to say that their ambitious aims did not meet with success. Quite recently, however, the craving for Army rank has broken out afresh, and the reason for the outburst is not far to seek. All the officers who have joined the Commissariat and Transport Staff since July 1, 1880, are Line officers serving on their combatant commissions and retaining their Army rank. Some few are Majors, and the rest Captains, either substantive or temporary. The non-combatants, who are practically civilians in uniform, have still only the relative rank, and when referred to or addressed by name are simply styled "Mr."; and though they wear badges of Army rank, they may not assume or use the titles—though, nevertheless, some do. The principal grounds on which the non-combatants base their claim for Army rank may be briefly stated as follows:—1. That their juniors in the department have it. 2. That they frequently have command of men, and that the men will persist in addressing them by Army titles. 3. That the want of the rank often renders them liable to be spoken to by other officers of the Army in a manner that plainly shows that their exalted positions are not rightly appreciated or understood. 4. That it is very disagreeable for them to be addressed by titles to which they at present have no right, as they often are by other Army officers, who do so "in their well-meant endeavours to treat them as brother officers and gentlemen." Now, these four principal reasons for their claim may be easily disposed of. "None are so blind as those who won't see," and it may fairly be doubted that the non-combatant Commissariat officer is unaware of what every other officer in the service knows, viz., that the reason the Line officers retain their rank is in order that their very presence in the corps may operate as a cheap and additional lever for the more expeditious removal of the non-combatant from the service. It is scarcely fitting, therefore, to urge the fact of their presence in the department as a reason for the non-combatants to receive Army rank, more especially when it is considered that for the first two years or so the advent of Line officers evoked such an amount of animus and jealousy in their seniors in the department, that the latter tried by every means in their power to drive the new-comers out, in the hope that by so doing it might be made to appear that they had voluntarily left the department through not feeling themselves adapted to perform the various duties required of them. For the non-combatants to have anything to do with the men of the corps is a most grievous error, and in my next letter, which will be on this subject only, I will conclusively show how incompetent and unfitted they are, by the whole of their previous training, to carry out the various duties incidental to the command of men. As to the men addressing them by Army titles, surely that can only be quoted as an evidence of Tommy's astuteness and policy, as is well instanced in a case that actually occurred in which a man of the Commissariat and Transport Corps got off with a lenient punishment for a grave offence through addressing to his non-combatant commissioned officer the timely appeal, "Please, colonel, give me a chance." That the want of rank renders them liable to be treated with disrespect by other officers of the Army, is very much to be doubted; for surely it cannot be contended that any officer is so ignorant of the custom of the service as to treat with disrespect any one who wears a badge of rank equal or superior to his own—indeed, the fourth reason given in support of their claim seems to bear out this contention—and the occasions when Commissariat officers in mufti come into contact with Line officers are so rare, that they may be left out of the question. In concluding, it is sincerely to be hoped that the craving for rank may never be gratified; for though it is not a difficult matter to distinguish between the Line officer and the Commissariat official, yet the rank undoubtedly does serve a very good purpose by marking a distinction between the two classes; and rather than abolish that, it would seem more desirable to make some slight difference in the uniform, or give a badge whereby the distinction might be still further marked, and so get rid of one great objection which every Line officer has to serving in the Commissariat and Transport Staff.—I am, &c.,

Observer.

The Gazettes.

TUESDAY EVENING.

ARMY.

ST. JAMES'S PALACE, Dec. 4, 1884.

The Queen has been pleased to appoint Lieut.-Col. Francis Baring, one of the Exons, to be Adjt. and Clerk of the Cheque of her Majesty's Royal Body Guard of Yeomen of the Guard, in the room of Lieut.-Col. William Griffin Sutton, deceased; and also to appoint Major Richard George Ellison, one of her Majesty's Honourable Corps of Gentlemen-at-Arms, to be one of the Exons of her Majesty's Royal Body Guard of Yeomen of the Guard, in the room of Lieut.-Col. Francis Baring, promoted.

WHITEHALL, Dec. 15, 1884.

The Queen has been pleased to give and grant unto Major H. Hare, 1st Batn. Royal Munster Fusiliers, her Royal licence and permission that he may accept and wear the Insignia of the Fourth Class of the Order of the Medjidieh, which his Highness the Khedive of Egypt, authorised by his Imperial Majesty the Sultan, has been pleased to confer upon him, in recognition of his services whilst actually and entirely employed by his Highness beyond her Majesty's Dominions.

WAR OFFICE, PALL MALL, Dec. 16, 1884.

15th Hussars.—Lieut. R. C. Cokayne-Frith to be Adjt., vice Lieut. J. R. P. Gordon, who resigns that appointment.

Royal Engineers.

Lieut.-Col. and Col. E. C. Sim has retired upon retired pay, with an annuity (Nov. 3).

The under-mentioned Capts. to be Majors, under the provisions of Article 10 (b) of the Royal Warrant of June 10, 1884:—J. T. Wright, A. Awdry, W. B. Hurst, and Brevet Major S. Waller (all four dated Dec. 9).

The under-mentioned Gentlemen Cadets from the Royal Military Academy to be Lieuts. (dated Dec. 9):—Edward Arnold Edgell, Sidney Henry Powell, Oscar Henry Stoehr, Gilbert Harwood Harrison, William Ewbank, Hubert Armine Anson Livingstone, Charles Richard Stevens, Leonard Palmer Chapman, Henry Joseph Crofton, William Andrew Liddell, Acton Lemuel Schreiber, Alfred William Medley, John Arthur Stanford Tulloch, Usher Williamson Evans, Edward Humphry Bland, Henry Ofspring Blackall, Walter Coote Hedley, and Edward Rowland Bennett Stokes-Roberts.

Grenadier Guards.—Surg. H. R. O. Cross, from the Medical Staff, to be Surg., vice A. L. Fernandes, retired.

Regimental District.

Lieut.-Col. and Col. J. H. Hall, commanding the 22nd Regtl. District (the Cheshire Regt.), has been placed on half-pay, on appointment to Staff (Dec. 1).

Line Battalions.

The King's (Liverpool Regiment).—Lieut.-Col. and Col. G. H. Cochrane retires on half-pay.

The East Yorkshire Regiment.—Capt. G. H. Johnston to be Adjt., vice Lieut. L. L. Steele, who resigned that appointment prior to his promotion to the rank of Capt.

The Cameronians (Scottish Rifles).—Lieut.-Col. and Col. R. M. Rogers, V.C., having completed five years' service as a Regtl. Lieut.-Col., has been placed on half-pay (Dec. 15); Lieut. H. E. Wise has been seconded for service on the Staff of the Major-General commanding the Militia in the Dominion of Canada (Oct. 16).

The Royal Inniskilling Fusiliers.—Capt. A. H. Young resigns his commission.

The Royal Sussex Regiment.—Supernumerary Lieut. R. J. Doveton, who has ceased to be a probationer for the Indian S.C., to be Lieut., vice W. J. Mangles, transferred to the King's Own (Royal Lancaster Regt.).

The Hampshire Regiment.—Lieut. M. A. Taite has been appointed a probationer for the Indian S.C. (Oct. 4).

The Queen's Own (Royal West Kent Regiment).—Capt. E. H. Baines is placed on temporary half-pay on account of ill-health.

The Manchester Regiment.—Lieut. A. T. P. Hudson to be Adjt., vice Capt. H. S. Smith, who has vacated that appointment (Dec. 15).

The Queen's Own Cameron Highlanders.—Lieut. A. G. Blackburn is placed on retired pay, with the hon. rank of Capt., on account of wounds received in action.

The Connaught Rangers.—Lieut.-Col. and Col. E. Hopton to retire on half-pay (Dec. 18); Capt. F. H. Carroll resigns his commission.

The Royal Dublin Fusiliers.—Supernumerary Lieut. E. G. S. Warren, who has ceased to be a probationer for the Indian S.C., to be Lieut., vice G. A. Shadforth, promoted.

1st West India Regiment.—Capt. H. J. Thwaytes has been seconded for service with the Army Pay Department (Dec. 6).

Chaplains' Department.—The surname of the Chaplain to the Forces, 4th Class, promoted to be Chaplain to the Forces, 3rd Class, from Dec. 1, 1884, is "Malim," not "Maline," as stated in the *Gazette* of Dec. 2, 1884.

Medical Staff.—Apothecary H. L. Harvey is granted retired pay.

Army Pay Department.—Capt. M. R. Hyslop, the Leicestershire Regt., to be Pymr. (July 31).

Brevet.

Capt. E. Harrison, late retired pay, whose retirement from the service, receiving the value of his commission, was notified in the *Gazette* of Dec. 2, 1884, to be Major (Aug. 24, 1878).

Memorandum.

Lieut.-Col. and Col. W. W. Corban, half-pay, has been placed on retired pay, with the hon. rank of Major-Gen. (Nov. 26.)

The under-mentioned officers to be Colonels:—Lieut.-Cols. R. H. Phelips, Madras S.C. (Oct. 20); M. H. Hale, the Cameronians (Scottish Rifles) (Dec. 15); R. A. Manners, the Royal Scots (Lothian Regt.) (Dec. 19).

Capt. W. Watson, retired pay, to have the hon. rank of Major (Dec. 16).

Deputy-Assist.-Comy. G. Collyer, Bombay Establishment, to have the hon. rank of Lieut. (Feb. 18).

Indian Staff Corps.

To be transferred to the Unemployed Supernumerary List:—Major-Gen. Sir C. P. Keyes, K.C.B., Madras (Nov. 25).

To be Major-General:—Col. H. C. Anderson, Bengal (Nov. 25).

To be Major-Generals on the Unemployed Supernumerary List:—Cols. A. B. Marsack, Madras, and C. S. Elliot, Madras (both dated Nov. 25).

Reserve of Officers.

Capt. R. H. Milne-Redhead, 3rd Batn. the East Lancashire Regt., to be Lieut.

E. L. K. Talbot, Esq., late Lieut. the Durham Light Infantry, to be Lieut.

INDIA OFFICE, Dec. 16, 1884.

The Governor-General of India has made the following appointments on his Personal Staff:—Lieuts. C. R. Burn, 8th Hussars, Extra Aide-de-Camp, to be Aide-de-Camp, vice Capt. E. H. Clough-Taylor, who has resigned the appointment; L. Gordon, King's Own Borderers, to be an Extra Aide-de-Camp (both dated Sept. 1).

The following appointments to the Staff have been made by the Government of India:—Lieut.-Col. H. M. Evans, Bengal S.C., to be a Deputy-Assist.-Adjt.-Gen., Bengal Establishment, vice Lieut.-Col. G. A. Way, whose tenure of appointment has expired (Sept. 6); and Major J. A. Barlow, Manchester Regt., to be a Deputy-Assist.-Adjt.-Gen. for Musketry, Bengal Establishment, vice Capt. C. J. Whitaker, who has vacated the appointment (Sept. 30).

The appointment of Col. C. W. Robinson, Rifle Brigade, to be an Assist.-Adjt.-Gen., Bombay Establishment, notified in the *London Gazette* of Oct. 21, has been cancelled.

[Where not otherwise stated, the foregoing commissions and announcements bear date Dec. 17, and the current year must be understood.]

FRIDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, Dec. 19, 1884.

Royal Artillery.

Supernumerary Lieut.-Col. H. de G. Warter (late Bengal), to be Lieut.-Col., vice R. R. Franks (late Bengal), retired (June 7); Major F. J. Mortimer (late Bombay), to be Lieut.-Col., supernumerary to the Establishment, vice M. C. Newall (late Bombay), retired (Nov. 4).

Capt. R. W. O'Grady has retired on retired pay, with the hon. rank of Major (Dec. 5).

Tracey, promoted; George Francis White, vice A. E. Russell, promoted; Phillip Foster, vice W. A. Smith, promoted; Frederick De Budé Young, vice G. H. Bittleston, promoted; Philip Templer Cooper, vice W. J. Hicks, promoted; Thomas Birchall Wood, vice W. T. Savile, placed upon the Seconded List; Ernest Edward Norris, vice F. L. Nathan, placed upon the Seconded List; Francis Naunton Friend, vice D. F. Hoste, resigned; St. John Louis Hyde Du Plat Taylor, vice R. H. Mahon, placed upon the Seconded List; Edward Parry Lambert, vice F. T. Cole, placed upon the Seconded List; Charles Battiscombe, vice F. E. D. Acland, placed upon the Seconded List; James Frederick Browne, vice E. G. Nicolls, placed upon the Seconded List; Egerton Stewart Cleeve, vice W. H. S. Earle, placed upon the Seconded List; Montague Henry Burton Raby, vice H. O. Piers, promoted; Thomas Edward Wingfield Bidgood, vice H. A. K. Jennings, placed upon the Seconded List; Christopher Godfrey Watson, vice P. L. Williams, promoted; Edmund Huddleston, vice E. A. F. H. Day, deceased; Francis Henry Ernest Brouncker, vice H. Bruen, resigned; William Montague Grover, vice C. A. Howard, promoted; George Williams Haigh Iago, vice A. Chambers, promoted; Charles Lyon, vice S. G. D. Smith, placed upon the Seconded List; Ewan Cornwallis Cameron, vice R. Percy-Smith, placed upon the Seconded List; Edmund Arthur Campbell, vice E. A. Burrows, promoted; Henry Mompesson Birley, vice C. H. Crofton, promoted; Francis Edward Freeth, vice W. H. H. Waters, promoted; Ernest Frederic Hall, vice A. H. Carter, promoted; Arthur Estcourt Harrison, vice F. G. Stone, placed upon the Seconded List; Malcolm Peake, vice E. A. Lambart, promoted; Hugh Davie White-Thomson, vice C. E. Maturin, promoted; George Townshend Forestier-Walker, vice R. W. E. Carnegy, placed upon the Seconded List.

Capt. N. B. Inglefield to be Adjt., vice H. E. Preston, seconded for service as an Adjt. of Auxiliary Artillery (Nov. 16).

Royal Engineers.—Major and Col. Sir C. Warren, K.C.M.G., to be Lieut.-Col., vice Col. E. C. Sim, retired (Nov. 3).

Regimental District.

Lieut.-Col. and Col. J. P. C. Glyn, from half-pay, to be Lieut.-Col., to command the 22nd Regtl. District (the Cheshire Regt.), vice Col. J. H. Hall, who has vacated on appointment to the Staff (Dec. 16).

Staff.—Col. Sir H. Stewart, K.C.B., Major 3rd Dragoon Guards, A.D.C., has been appointed Brigdr.-Gen. on the Staff with the Force on the Nile (Nov. 24).

Half-Pay.—Major G. J. Gillies, from the Royal Artillery, to be Lieut.-Col. (Dec. 15).

Memorandum.

Assist.-Comy.-Gen. of Ordnance T. Pease to have the local rank of Lieut.-Col. while serving in Egypt (Dec. 1).

MILITIA.

WAR OFFICE, PALL MALL, Dec. 19, 1884.

Artillery.

2nd Brigade, Lancashire Division.—Lieut.-Col. J. C. Brown is granted the hon. rank of Col. (Nov. 15).

2nd Brigade, Cinque Ports Division.—William George Atkinson, gent. (Retired List, R.N.), to be Lieut.

3rd Brigade, Southern Division.—Lieut. C. P. Pedler resigns his commission.

Infantry.

3rd and 4th Battalions, the King's Own (Royal Lancaster Regiment).—Capt. J. H. A. Schneider is granted the hon. rank of Major.

4th Battalion, the Prince Albert's (Somersetshire Light Infantry).—Lieut. T. L. Walsh, from the 3rd Batn., to be Capt.; Lionel Nicholson Beatty, gent., to be Lieut.

3rd Battalion, the Leicestershire Regiment.—Thomas James Christian, gent., to be Lieut.

3rd Battalion, the Royal Irish Regiment.—Lieut. G. B. Pounden resigns his commission.

4th Battalion, the South Wales Borderers.—Lieut. A. H. Pryce to be Capt.

4th Battalion, the Gloucestershire Regiment.—Lieut.-Col. R. B. Hunte is granted the hon. rank of Col. (Oct. 22).

3rd and 4th Battalions, the South Staffordshire Regiment.—Charles Legge Eustace Eustace, gent., to be Lieut.

3rd Battalion, the Black Watch (Royal Highlanders).—John Lewis Macandrew, gent., to be Lieut.

3rd and 4th Battalions, the Loyal North Lancashire Regiment.—Henry Lawrence Fleming, gent., to be Lieut.

3rd Battalion, Seaforth Highlanders (Ross-shire Buffs, the Duke of Albany's).—Hugh Strathnairn Hamilton Rose, gent., to be Lieut.

6th Battalion, the Royal Irish Rifles.—Capt. C. E. McClintock to be Major.

6th Battalion, the Connaught Rangers.—Maurice Owen O'Conor, gent., to be Lieut.

3rd Battalion, the Prince of Wales's Leinster Regiment (Royal Canadians).—William Bernard Lauder, gent., to be Lieut.

5th Battalion, the Royal Munster Fusiliers.—Lieut.-Col. W. H. J. Charles, Earl of Limerick, is granted the hon. rank of Col. (Dec. 1); John Waddell, jun., gent., to be Lieut.

3rd Battalion, the Royal Dublin Fusiliers.—Cyril Henry Edward Lambert, gent., to be Lieut.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, Dec. 19, 1884.

Derbyshire.—Thomas Smith Radford, gent., to be Lieut. (supernumerary).

Leicestershire.—Capt. E. H. Warner resigns his commission.

VOLUNTEERS.

WAR OFFICE, PALL MALL, Dec. 19, 1884.

Artillery.

1st Argyll and Bute.—Lieut. H. Houston-Ross resigns his commission.

1st Cumberland.—Hugh Cecil, Earl of Lonsdale, to be Hon. Col of the corps.

1st Glamorganshire.—The under-mentioned Capts. resign their commissions:—B. Pratt and F. S. Trayes.

1st Hampshire.—Charles Levenax Haldane, gent., to be Lieut.

1st Inverness-shire.—Capt. C. G. Mackessack resigns his commission.

1st Kent.—Lieut. T. Wood to be Capt.

1st London (the City of London).—The under-mentioned Gentlemen to be Lieuts.:—William Edwin Griffiths and Alfred William Paul.

2nd Middlesex.—Charles Joseph Higgins, gent., to be Lieut. (supernumerary).

3rd Middlesex.—Lieut. E. I. Sydney resigns his commission.

The Tynemouth.—Surg. F. Rennie, M.D., resigns his commission. Acting Surg. W. P. Mears, M.D., to be Surg.

Engineer.

1st Gloucestershire.—The under-mentioned Lieuts. resign their commissions:—W. H. Patrick and J. W. Helps.

Rifle.

1st Volunteer Battalion, the Gordon Highlanders.—Surg. A. Fraser, M.D., is granted the hon. rank of Surg.-Major (Dec. 1).

3rd (the Buchan) Volunteer Battalion, the Gordon Highlanders.—Lieut. W. Barron to be Capt.

1st Ayrshire.—Capt. A. H. Abercrombie, 1st Batn. the Royal Scots Fusiliers, to be Adjt., in succession to Capt. J. W. Pearse-Hobbs, the Northumberland Fusiliers, whose period of service as Adjt. has expired (Jan. 1, 1885).

1st Berwickshire.—Lieut. J. T. S. Doughty to be Capt.

2nd Cambridgeshire (Cambridge University.)—Albert Samuel Manning, gent., to be Lieut. (supernumerary).

1st Volunteer Battalion, the Royal Welsh Fusiliers.—Capt. R. L. Roberts resigns his commission.

Cadet Corps (Felstead), attached to 2nd Volunteer Battalion, the Essex Regiment.—Lieut. C. H. Pearson to be hon. Capt.

1st Fifeshire.—Lieuts. A. Martin resigns his commission; J. Gillespie to be Capt.

1st Glamorgan.—Capts. J. Felton resigns his commission; also is granted the hon. rank of Major, and is permitted to continue to wear the uniform of the corps on his retirement. E. E. Foley, 1st Batn. the Duke of Cambridge's Own (Middlesex Regt.), to be Adjt., in succession to Major G. T. Whitaker, the King's Royal Rifle Corps, whose period of service as Adjt. expires (Jan. 1, 1885).

1st Isle of Wight.—The under-mentioned Capts. resign their commissions:—R. B. Wilkins and E. A. Redfern.

2nd Volunteer Battalion, the Queen's Own (Royal West Kent Regiment).—Capt. T. W. Lovibond resigns his commission; Lieut. M. W. Chubb to be Capt.

3rd Lanarkshire.—Capt. P. MacLellan resigns his commission.

5th Lanarkshire (Glasgow 2nd Northern).—The services of Lieut. C. Hope are dispensed with.

8th Lanarkshire (the Blythswood).—Capt. and Hon. Major J. G. Birrell resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement. Lieut. R. D. Linton to be Capt.

10th Lanarkshire (Glasgow Highland).—Capt. J. Menzies to be Major.

1st Volunteer Battalion, the Lancashire Fusiliers.—Capt. R. Hartley resigns his commission; Lieut. J. Baron to be Capt.; Acting Surg. J. E. Lees, M.B., to be Surg.

17th Lancashire.—Qrmr. A. C. Wood resigns his commission.

2nd (South) Middlesex.—Capt. F. E. Elton resigns his commission.

8th (S.W.) Middlesex.—Lieut. H. Bott to be Capt.

15th Middlesex (the Customs and the Docks).—Lieut. W. Wright resigns his commission.

17th (North) Middlesex.—Percy Wilmot Brooks, gent., to be Lieut.

18th Middlesex.—Lieut. T. H. J. Shadwell to be Capt.

1st Oxfordshire (Oxford University).—Lieut. P. H. Eliot resigns his commission; Arthur Glyndwr Foulkes, gent., to be Lieut.

2nd Renfrewshire.—The hon. rank of Col. granted to Lieut.-Col. W. Carlile in the *London Gazette* of Oct. 10 is antedated to Sept. 22.

1st Volunteer Battalion, the South Staffordshire Regiment.—Major W. Heneage, Viscount Lewisham, resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the battalion on his retirement; William Webb Boulton, gent., to be Lieut.

2nd Sussex.—George Frederick King, gent., to be Lieut.

1st Westmoreland.—Capt. P. E. Hughes, 2nd Batn. the Border Regt., to be Adjt., in succession to Major S. Cargill, the Border Regt., whose period of service as Adjt. has expired (Jan. 1, 1885).

2nd Wiltshire.—Capt. and hon. Major J. W. Awdry, resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st Volunteer Battalion, the King's Own Light Infantry (South Yorkshire Regiment).—Benjamin Kemp Gill, gent., to be Lieut.

2nd Volunteer Battalion, the Duke of Wellington's (West Riding Regiment).—Lieut. W. H. Butterworth resigns his commission.

[Where not otherwise stated, the foregoing commissions and announcements bear date Dec. 20, and the current year must be understood.]

London Amusements.

The Gaiety on Christmas Eve brings back Mr. Edward Terry with Mr. Pinero's comedy of "In Chancery," not yet presented to a London audience.

"The World's Fair" will be opened at the Royal Agricultural Hall this evening (Saturday). The Crystal Palace pantomime of "Jack and the Beanstalk," and a new ballet at the Alhambra, will be brought out on Monday next; and simultaneously, on Christmas Eve, will be produced pantomimes at the Surrey, Standard, Grand Theatre, Islington, Pavilion, and the Elephant and Castle Theatres.

A new comic opera, called "Pocahontas," by Mr. Sydney Grundy and Mr. Edward Solomon, will be brought out at the Empire Theatre on Christmas Eve. A new pantomimic sketch will also be produced, in which the Pinauds, musical grotesques, will appear.

On Boxing Day will open the Covent Garden Circus; and the first performance will take place of the pantomimes at Sanger's Amphitheatre and the Britannia. The traditional glories of "Boxing Night" will thus alone be represented at Drury Lane Theatre, where "Whittington," illustrated by a remarkably strong company and novel scenic effects, will be produced with unusual splendour by Mr. Augustus Harris.

At Toole's Theatre on Monday evening a revised edition of the popular extravaganza of "Babes, or Whines from the Wood," was presented to the audience with a kind of Christmas supplement. A laughing duet assigned to Mr. Edouin and Miss Alice Atherton is very merrily executed, and Mr. Lionel Brough is furnished with some new eccentricities. The piece of absurdity being largely pantomimic in its composition is well suited to the holiday period.

In a second edition of the "Hamlet" burlesque at the Gaiety, to be represented on Boxing Day, Mr. Edward Terry will appear as the Ghost; and a pantomimic troop will go through some fantastic performances.

Hengler's new Grand Cirque in Argyll Street, Oxford Circus, will be ready for the reception of the public in the first week of the new year.

The site lately occupied by the Military and Navy Stores, 121 Regent Street, is being cleared for the erection of a new theatre capable of holding about 800 persons. Mr. J. M. Bryden is the architect.

The Crystal Palace pantomime to be produced on Monday, is founded on the popular story of "Jack and the Beanstalk," and is essentially a children's pantomime. It is written by Horace Lennard, the music is by Mr. Oscar Barrett, and the dances arranged by John D'Auban. The scenery has been specially painted by such artists as Beverley, Telbin, Emden, Grieve, and F. Fenton, and the excellence of the whole production is vouched by the fact of Mr. Augustus Harris, of Drury Lane Theatre, being responsible for it. The principal characters will be sustained by Miss Emily Duncan, Miss Annie Poole, Miss Emma D'Auban, Miss Jennie Lee, and Miss Lottie Venn; Messrs. John D'Auban, Wm. Morgan, Russell Crawford, Charlie Ross, and E. S. Vincent, with Mdlle. Luna as the principal danseuse in the grand ballets.

For the purpose of advancing the iron shipbuilding in Portsmouth Dockyard, we understand the Admiralty have granted an additional £9,000 for the remaining portion of the current financial year.

Printed and Published for the Proprietors, at the Office, No. 6 Wellington Street, Strand, London.—Saturday, Dec. 20, 1884. Letters on Business and Remittances should be sent to Mr. Richard James Wood.

*** *NOTICE.—The* Editor *of the* Army and Navy Gazette *is*

MR. WILLIAM HOWARD RUSSELL.

All communications and correspondence not connected with the advertising, commercial, and financial business of the paper, should be addressed to the Editor *only.*

☞ *Advertisements, applications for copies of the paper, remittances, and communications on business, should be addressed to*

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* Editor *of the* Army and Navy Gazette.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer, 248 Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

IN the interesting collection of papers which has just been published in reference to the American Exhibition in London for 1886, there is an account of "An American Volunteer Regiment," which will be read with attention in this country. Mr. C. S. Clark, of the New York Bar, has written the document very pleasantly, and if there be a little tendency to what is called "blowing" in the style, the singers of "Rule, Britannia," "The British Grenadiers," &c., may recognise the influences of a common tendency in a common origin to indulge in a pleasant and exhilarating self-glorification. The Americans became a nation in virtue of military successes, which they did not achieve unaided, and which it is doubtful if they would have achieved at all at the time had France not given her Generals, fleets, and soldiers to help them. They met with indifferent fortune in their attempts to invade Canada. They had to set off the repulse of Pakenham at New Orleans against the capture and destruction of their capital in the war of 1814; and the military operations so ably executed by Winfield Scott against Mexico, very brilliant as they were, only found a brave but undisciplined and badly-generalled enemy to test their skill and valour. The Americans have been engaged in only one very great war,—the North against the South,—in fact, since they started on their own account. Now, it is admitted that the contest of 1861-2-3 was characterised by great waste of time, men, and money, owing to unscientific methods, inexperience, and other defects which baffled the fiery courage of the South, and frittered away the strength of the North in much impotent, if bloody, adventure. It was in officers trained at West Point, and with such practical knowledge as Mexico afforded, that the North and South discovered their military leaders. They both had large contingents of trained foreign soldiers, especially the North. It was Bunker who covered the retreat of the fugitives from Bull Run No. 1, and it was Germany which gave disciplined leaven to the levies of Ohio, Pennsylvania, Michigan, &c., as it was France which in some degree "martialised" the levies of the Atlantic States. But the Americans on both sides fought splendidly after a time. They worked out of the panic stage, and at the close of the war there were materials of the finest possible character for any enterprise a capable leader could undertake in war. It would be absurd if the United States maintained a Regular Army for the glory and honour of the thing. The Government keeps up not too much Army, but Army enough. Still, if in 1861 there had been 20,000 Regulars available to meet Beauregard at Manassas Junction, instead of the small detachment under FitzJohn Porter, the Southern rebellion would have been there and then stamped out. Richmond would have fallen, and hundreds of thousands of lives have been spared. But retrospective and hypothetical comment of this sort is not very valuable. The Militia Regiment, of which Mr. Clark gives us an account, is described on its banners as "The Gallant, Glorious Seventh" of New York, which was first known in 1826, and which, we are told, served against the mobs of New York in 1834, 1836, 1837, and 1840 to save the city from destruction:—

> "In 1849 it performed a service which should entitle it to the respect of all Englishmen. The great English actor, Macready, was besieged by thousands of fanatical supporters of the American actor, Forrest, at the Astor Place Opera House, and the 7th was summoned to protect him. Against overwhelming odds they bravely stood their ground, and out of the 211 who appeared for duty, 141 were killed or injured. But the mob was routed; and a New York mob, the most ferocious of all mobs, has never since dared to attack the 7th."

From that year till 1861 the regiment was not engaged:—

> "In 1861 came the attack on Sumter, and hardly had the call for volunteers been issued, when the regiment reported as being ready for active duty. No such readiness and coolness on the part of citizen soldiery had ever been seen. Within twenty-four hours after notice, a thousand business men had laid aside—as if permanently—all civil business, and had become soldiers, ready to act resolutely and promptly."

Mr. Clark does not tell us what the regiment did as a corps. He says:—

> "Within a month the regiment returned, and immediately was called upon to furnish officers for the entire army. 606 of its members received commissions, privates in many instances being made captains and colonels of other regiments. It is the pride and glory of the regiment that it became a 'regiment of officers,' and that, as the reward of conspicuous bravery, 19 of its men became brigadier-generals, 3 major-generals, 29 colonels, and 46 lieutenant-colonels, the majority of whom had in the parent regiment been privates."

For a full and interesting description of the Headquarters of this military club in New York, we must refer our readers to the memoria in the pamphlet entitled "Public Opinion in Europe and the United States," published by Hazell and Co., London and Aylesbury. Mr. Clark concludes his *éloge* as follows:—

> "Such is a brief description of a famous American Militia Regiment, and it may be urged that, after all, since its members joined the service more for the purpose of taking part in the pomp and circumstance of war than with any expectation of fighting, the perfection of its organisation and discipline is of small importance. But it must be remembered that regiments such as this, composed of citizen soldiers, have fought the battles of the nation, and may do so again, and such regiments therefore acquire importance in the United States. There has been a time in the national history when the moral influence of the Seventh Regiment's discipline and readiness was sufficient to arouse the nation and save it; and it is in recognition of this fact that the noble statue of the 'Seventh Regiment soldier' was erected in the finest of New York's parks. A description of its methods may not, therefore be unworthy of the attention of the soldiers of that kindred nation, the drum-beat of whose garrisons is heard all round the world; and they may, perhaps, read with interest of the skill of soldiers whose ancestors were the only men who could defeat a British Army, and who in the future may, should the grand dream of an Anglo-Saxon League be ever realised, march shoulder to shoulder with Englishmen."

It must be left to the chapter of accidents to determine whether the gallant and glorious Seventh New York are to come over to us, or we are to go over to them. But in all honesty we may declare that we would rather fight side by side with than against our American cousins, though they be at times "a little more than kin and less than kind." The coming exhibition will doubtless furnish another demonstration of the famous theme on which an American sea captain discussed so eloquently under fire, that "blood is thicker than water."—Amen!

NAVAL officers are proverbially long-suffering in matters affecting their personal comfort; and it behoves us, as a friend to the service, to call attention at times to regulations which, though galling, are borne with stoicism seldom betrayed into even a mess-room growl. Letters have, however, from time to time appeared in our columns urging the comfort it would be to officers employed in the Tropics were old-fashioned ideas so far modified as to admit of some "service rig" being approved for such climates. The whole question of uniform is one well deserving of attention, and much might be done were a Committee selected not entirely consisting of the higher ranks. The watchkeeper fresh from a strict ship where Admiralty regulations are adhered to, and who has felt the discomfort of a frock-coat while pacing the bridge at Aden, or his messmate who could tell of the wet and windy vigil kept in the chops of the Channel while clad in that wonderful garment, the new great-coat, are, perhaps, as deserving of a voice as the senior captain, who under such circumstances can, and does, please himself as to "rig." We will confine our present article to criticising the above cases, pointing out that nothing is more sure to bring about careless obedience than the habit of allowing customs to exist *sub rosa.* Either a tropical dress is necessary, and the sooner one is established the better; or the reverse, in which case such relaxations of the service uniform as are well known to have existed for many years past in India and China should be at once put a stop to. That these relaxations have been allowed to exist, and, in cases, actually regulated in the station orders by some of our best-known Admirals, argues much for the utility of such a dress. One of the most frequently urged objections against it is that the most popular form admits of a shirt being dispensed with; but who among us that has witnessed the spectacle of a cloth-coated Naval man, melting and sloppy as regards collar, cuffs, and shirt-front, but has drawn a comparison between him and his Military *confrère,* clad in spotless white, very favourable to the latter? A popular and efficient form of tropical clothing, universally adopted when permitted by an easy-going commanding officer, is a white tunic buttoning to the throat, the requisite marks of distinction being given by the usual stripes pinned or buttoned round the cuff. A white helmet with some distinctive puggaree completes a dress at once smart, comfortable, and cool. It is in small ships especially that such a dress would be a boon, as from the smallness of the cabins clothes must necessarily be immediately returned to the drawers, with the result of being spoilt long ere the commission is over. In these ships, too, officers are necessarily more exposed to the sun while watch-keeping, and the mess-places are far more confined than in the old corvette and frigate days. Should the Admiralty decide on this much longed-for boon, it is to be hoped that the dress will be conceived in a liberal spirit, and not be spoilt by an attempt at compromise. It should admit of a shirt being dispensed with if the temperature require it, in spite of old-fashioned ideas on the subject. The present great-coat is an example of a much-needed dress being spoilt for real use by a hankering after old-established ideas. We had hoped to have seen something in the shape of the popular "ulster," which would have been welcomed by all, and by none more than the before mentioned watchkeeper. The present dress is a miserable compromise with a frock-coat—in itself, perhaps, the most unsuitable of all garments for naval work. Hallowed by usage, it still thrives, and will probably exist to the end of our days; but the dress invariably adopted by the Navy itself, whenever it is allowed to choose, as also by the mercantile marine, is the sailor-like and convenient monkey-jacket. Now, when attention has been tardily drawn to the state of th

Navy, is the time for influential officers of liberal ideas—and there are many such—to urge the consideration of these and like-needed reforms; and it is to be hoped that ill-judged prejudice will not detract from what would be a most welcome concession to naval feelings.

IN a recently-issued General Order, it was laid down "that, after the examination of December, 1885, the study of mathematics will cease at the Staff College." The majority of those who take an interest in the institution will read the announcement with unqualified satisfaction, and it is only remarkable that this part of the course has not long since been abandoned. Hitherto officers at the Staff College have wasted many precious hours, to use the words of Colonel Hale in our columns on March 29, in "estimating the amount of friction called into play on the faces of a wedge," and in other equally useless problems in higher mathematics. Although, however, the study of mathematics at the Staff College is admittedly a "misemployment of time," yet this subject has been the ruin of many promising officers, as far as their career at the College was concerned. In fact, almost more officers have been obliged to withdraw from the Staff College on account of failure in mathematics than from any other cause. In 1880, two out of a class of about seventeen had to leave the College for this reason. In 1882, no less than three out of a class of eighteen shared the same fate; and other similar instances might be quoted. Yet in many of these cases the unsuccessful officers showed proficiency in all military subjects and languages, and were favourably reported on by the Commandant. Sir Charles Pearson, the celebrated defender of Ekowe, failed in mathematics, and hence lost the *p.s.c.* certificate; and Colonel Chenevix-Trench, Military Attaché at St. Petersburg, is an instance of similar failure. Yet it will hardly be contended that these two officers have not proved themselves to be efficient Staff officers. An officer who fails at the probationary or final examination at the Staff College has no means of retrieving himself. All hope of obtaining the *p.s.c.* certificate is denied him. He may only have failed by half-a-dozen marks in a non-military subject, he may have been favourably reported on by Commandant and professors, he may have shown proficiency in all military subjects, but none of these considerations are of any avail. Under no circumstances is he given another chance, or allowed to present himself for re-examination. We believe we are correct in saying that these are the only examinations where so severe a rule is enforced. For the Indian Civil Service or for Woolwich or Sandhurst, a candidate is allowed three trials, and a cadet who fails at the probationary examination at either of the latter is allowed to be re-examined. For *entrance* to the Staff College even, an officer may present himself for re-examination as often as he pleases; and instances are frequent of candidates passing into the College after two or even three attempts. But once they enter the College, not the slightest latitude is allowed. Now, it must be remembered that an officer on joining the Staff College must provide himself at considerable cost with numerous books, instruments, and last, but not least, a horse, with saddlery, &c. He must also pay entrance-subscriptions to the mess and library; and previously he has probably incurred a considerable outlay in preparing himself for examination. The outlay under these heads could scarcely be less than £200; and in the case of an officer failing at the probationary or final examinations, this expenditure is completely thrown away. This hardship presses most severely on those who have failed in mathematics, for these unfortunates have the additional annoyance of feeling that, if they had delayed going to the Staff College for a few years, they would in all probability have escaped failure.

THE announced intention of the Russian Government to expend £2,000,000 sterling in establishing a Naval station at Novorossisk, on the Black Sea, and connecting it with the Russian railway system by a branch line from the Rostoff-Vladikavkas line, cannot but excite uneasiness as to the growth of Russia's Naval power in the Euxine, and the difficulty we may experience in coping with it on the occasion of the next opening of the Eastern question. In describing the present condition of affairs in the Black Sea, our object is not one of an "alarmist" character, but simply to show the changes that have taken place since we last prepared to encounter Russia there, and the development that may be anticipated within the next year or two. When the last Turkish war broke out we occupied a position of overwhelming superiority with regard to Russia in the Black Sea. Our ally, the Turks, possessed a fleet, almost new, capable of closing every port in the Euxine; and had we gone to war in 1878, our Fleet, added to Hobart Pasha's, would, if nothing more, have established an absolute and unquestioned blockade, and might have crushed and seized more than one fortified point in the Black Sea. Our laurels, perhaps, might not have been of a very glorious character; but, at least, our work in the Black Sea would have been easy, and might have been accomplished by a very trifling squadron. Since 1878, these conditions have very much changed. Four ironclads of the most powerful type have been commenced, and in a couple of years will be ready for service in the Black Sea. Being real men-of-war in every sense of the word, and not mere dummies, as the *Popoffkas* were, these vessels will necessitate a very powerful squadron to confront and beat them, and, at the least, will render a blockade less easy than it was in 1876. Further, the Russian Admiralty has already added to the Black Sea Fleet nearly a dozen sea-going torpedo-boats of the improved *Batoum* type; not mere cutters (of which Russia has about a score at Nicolaeff and Sebastopol), but regular sea-going craft, which would prove an awkward enemy for an ironclad to meet, and would require the presence of at least 15 or 20 similar English vessels to keep in check. As regards gunboats, very little has yet been done by Russia in the Black Sea. Designs have been made of a powerful series, but the actual building of them has been deferred, and it is not yet known when they will be commenced. With respect to armed steamers and transports, which did most of the naval work during the last war, things have very much improved. When hostilities broke out in 1876 the fleet of the subsidised Black Sea steam navigation, which was to have achieved such wonders, completely collapsed. At the very utmost it was only able to furnish half a dozen very indifferent steamers for the use of the Government; and the exploits of Baranoff, Donbassoff, and others were achieved, not because of any qualities these vessels possessed, but in spite of their defects. The case is very different now. Russia controls to-day a dozen brand-new, or almost new, steamers, 300 feet long, and these would render very effectual aid, either as cruisers or transports. Four of them are properly-fitted cruisers, belonging to the Moscow Volunteer Fleet, and one is a regularly-built vessel for this purpose, and attached to the Black Sea Fleet. Until recently these vessels were managed by a private Committee, but are now under the complete control of the Minister of Marine. Regarding the remaining eight, these are the additions that have been made to the Black Sea Steam Navigation Fleet since 1880. We might also add to them three or four steamers, 250 to 300 feet long, built on the Tyne for the Odessa Rodokanaki Company to run to Batoum, and the flotilla which the State-aided Gagarin Company has placed on the Danube. Making a *résumé*, therefore, we find that should England be involved in war with Russia during the next two years she will have to send to the Black Sea, in excess of the force considered sufficient in 1878, vessels powerful enough to overcome four ironclads of the heaviest type, twelve sea-going torpedo-boats, and twelve or fifteen armed steamers. It is quite obvious that this will involve a strain very much more severe than we had to prepare for in 1878, more especially as Russia's Naval power has also proportionately increased in the Baltic.

THROUGHOUT the past year in India, Colonel Chapman has been sedulously drawing the attention of regimental officers to the necessity for some steps being taken to find employment for their men on transfer to the Army Reserve. The question is not a new one. It has been again and again urged that the abolition of pensions—and, indeed, of any provision for a soldier at the end of his career with the colours—has had a most marked effect on recruiting; and the subject has been brought before Parliament, with the result that a Committee sat, which made certain very sensible suggestions. Unfortunately, the form of employment which they urged most strongly, viz., the employment of soldiers as clerks in the Civil Service, was held in some way to interfere with Parliamentary patronage, and, as such, thought likely to influence small electioneering levers, which was very inconvenient. In addition, as the rest of the recommendations were held to be likely to require money, the proceedings were quickly pigeon-holed, and the evil left to correct itself. So things went on from bad to worse, till it occurred to Colonel Chapman, that if the regiments set to work to try and find employment for their men on leaving the colours, this sort of guarantee would go a good way towards making up for the loss of pensions. Of course, official sanction was at once forthcoming, and orders published, and everything done to assist. The officers of the Army accepted the proposals in the sense in which they were made, viz., merely as a means of assisting old soldiers, and not to assist recruiting. For, and herein lies the difficulty of the matter. The money for working the machinery will mostly come out of the pockets of the officers, who not so very long since had a sample of paternal care on the part of Government in regulations warning them not to be extravagant in the matter of money. Of course, if Government recognise their own responsibility in the matter, and handsomely increase the sum contributed by the officers, well and good; if not, so much the more credit to the officers for at once helping their old comrades and making the service popular at their own expense. The proposals are not very ambitious. They embrace two organisations. By the first, the officers provide for the maintenance of a registry at their regimental district head-quarters, in which is to be kept a list of men fit and anxious for various employments. By the second, the county employers of labour band together to take their "hands" from among the discharged soldiers of their county regiment, and to take them unconditionally, *i.e.*, without making their reserve pay count as part of their wages. At present, in many places a Reserve man has to keep his connection with the Army a secret, or most of the employers, who do not relish having what may be their best workmen called away at a few hours' notice, will look very coldly upon his application for employment. It is in breaking down this system, and in pointing out to civilian employers what their obligations—for they are obligations—to the discharged soldier are, that such an organisation is useful. And as, by all accounts, the regiments have entered heartily into the scheme, it is to be hoped that Parliament will not stint money. That it is high time that some steps were taken no one will deny, and as the scheme has got a good start, and been begun in the proper way, it deserves the best support of the Army, and still more of the civil community, without whose cordial co-operation it can never hope to succeed.

We regret to have to record the death of Admiral of the Fleet Sir Rodney Mundy, G.C.B., which occurred on Tuesday last at his residence in Chesterfield Street, Mayfair. He was in his 80th year.

By the decease of Admiral of the Fleet Sir Rodney Mundy, G.C.B., an admiral's good-service pension of £300 a year becomes at the disposal of the Admiralty.

We are glad to hear that the *Beacon* is ordered to be prepared at once for employment in the North Sea in protecting British fishing vessels, in place of the sailing cruisers, which are quite unfit for the service. The sooner we have steam gun-vessels all round on the coast, instead of revenue cutters, the better, and they should be made lieutenants' commands.

During the gale of Saturday last, which was almost universally felt over Western Europe, amongst other casualties a French torpedo-vessel at Toulon struck upon a sandbank, and foundered. Luckily, the crew were saved; and it is since reported that the vessel can be floated without much difficulty. The telegram stating the circumstance did not give any further particulars of the accident; but we understand that the boat was leaving the harbour at the time to join the squadron of instruction.

The *Leander*, lately built by contract, is ordered to be ready for sea early next year. She is a steel cruiser, 3,450 tons, 5,000 horse-power, and armed with 10 6-in. breech-loading guns, mounted on Vavasseur carriages, together with an equipment of machine-guns. Her speed will be 16 knots per hour.

We have constantly pointed out how totally inadequate are the present arrangements for coaling men-of-war at the Government ports, and how badly they compare with the means in use by the merchant service. We are glad, therefore, to be able to state that the Admiralty have instructed a committee—composed of Rear-Admiral Sir W. Hunt Grubbe, Captain R. E. Batt, R.N. (retired), Mr. E. A. Bernays, Superintending Civil Engineer at Chatham; Mr. W. G. P. Gilbert, storekeeper at the Portsmouth Dockyard; and Chief Engineer W. Macintyre, R.N.—to inquire into and report upon the best means of improving the facilities for coaling ships-of-war at Chatham, Sheerness, Portsmouth, Devonport, and Portland. They are also asked to suggest a method for the extension of such facilities in the event of war, and they are authorised to visit any commercial ports and private establishments where ships are coaled in large numbers. The committee are further empowered to examine witnesses.

Instructions have been received at Sheerness to have the *Pylades*, which was recently launched there, ready for sea by March 31. She will be equipped with 14 5-in. breech-loading guns, mounted on the Vavasseur system, machine-guns, and the electric apparatus for discharging the spar torpedo.

Sir Anthony Hiley Hoskins, K.C.B., Admiral Superintendent of Naval Reserves, at a banquet commemorating the six-hundredth anniversary of St. Peter's College, Cambridge, on Monday, in responding to the toast of the Navy, proved himself to be as wide-awake as ever, by urging that our immediate necessity is a large increase of torpedo craft. There can be no doubt that this is the very general feeling of naval men. It is true that since armour-plated vessels were first laid down, we have had little experience to enable us to form an idea of what the next great naval war will be like; but the strength of the belief that the ram and the torpedo will, in able hands, prove the more effective weapons, is amply shown, both at home and among Continental nations, by our talk and their action.

It is expected that the *Alacrity*, one of the new despatch-vessels building for the Government by the Palmer Shipbuilding Company at Jarrow-on-Tyne, will take the place of the *Enchantress* as Admiralty yacht, and that the latter will be attached to the Channel Squadron.

Commander Chichester, principal naval transport officer in Egypt, has returned to Alexandria on completion of his special duty at Suez.

Orders have been received at Sheerness to press forward the refit of the *Rifleman*, which was recently paid-off "all standing," on her return from the South-East Coast of America. At the present time there is rather a dearth of gun-vessels at the Eastern ports in readiness for foreign service. The *Kestrel*, *Beacon*, and *Foam* are also to be overhauled, with a view to their being got ready if advisable; but as they have all three lately returned from long commissions in China, and are miserably deficient in speed, armaments, and other matters, it is apprehended that the expense of rendering them fit for another commission will not make it worth while to let them undergo the necessary alterations.

Mr. William Le G. Pullen, Assistant-Paymaster, R.N., who has been acting as Clerk in the Admiral's office at Queenstown, is appointed Secretary to Rear-Admiral Lethbridge, vice Mr. James Cox.

It would appear, after all, that the intention of the Italian Government to annex the coast district in the Red Sea between Assab and Zola has not been abandoned. It is not due to mere chance that three Italian men-of-war are stationed there at present, and that we hear a small expeditionary corps is completing its preparations. The *Popolo Romano* states that the Government is only waiting for the protocol of the Berlin Conference regulating the navigation of the Congo and the conditions under which the European Powers will in future have the right to occupy colonial territory.

A puzzled correspondent wishes to know if any one can inform him why the *Paluma*, one of the gunboats built for the Queensland Government, is to be found in the *Navy List*, while the *Gayundah*, her sister-ship, owned by the same Government, and likewise commanded by a naval officer, is not so favoured. He also adds:—"I see the *Paluma* is to be convoyed to Gibraltar; but the *Gayundah* is reported to have arrived safely at Malta without any such attention. What is the reason for this?" We believe the explanation to be that the *Paluma*, by an arrangement entered into between the Admiralty and the Queensland Government, is for a certain period at the disposal of the Hydrographic Office for surveying purposes, and that, as a *quid pro quo*, the survey of the coast of Queensland is to be completed within a given time.

The Duchess of Albany and her two children arrived at Portsmouth from London on Tuesday at noon. Her Royal Highness was received on alighting from the train by Admiral Sir G. Hornby and the Flag Lieutenant, and left in her Majesty's yacht *Alberta* for Osborne, to spend Christmas with the Queen.

The French Minister of Marine has just ordered a commission, with Captain Armand Fournier as president, to proceed to the sea ports and examine the seamen and mechanic-pensioners who possess certificates of aptitude in the working of submarine defences, with a view to forming torpedo corps. Those men that are found competent will be formed into corps according to the requirements of the ports; they will continue to receive a supplementary pension for holding the certificate, and an additional amount of pay during the periodical drill. We cannot do better than take a leaf out of the French book in this matter. At the present time our Royal Engineers are charged with this work and are many too few in number, besides being unfitted in other ways for the entire duty of attending to torpedo defence, while there are scores of pensioners, officers and men, at the sea ports who would be only too glad to get the chance of working up the subject for the small extra pay.

A curious incident occurred at Port Said last week. Don Carlos, who is travelling to British India, arrived on board one of the Austrian Lloyds' steamers, and finding the Spanish frigate *Legazpi* in the harbour, seized the opportunity to pay her a visit. The officers, without knowing who their visitor was, courteously showed him round the vessel. He told his conductors the great pleasure it gave him to tread the deck of a Spanish man-of-war, but it was not until some time after he had left the ship that the identity of their distinguished guest became known to them.

The spectacle of a British Blue-jacket walking over the side of his ship, on being paid off, with from £50 to £100 in his pockets, and falling an easy prey to the harpies and sharks that haunt our seaports before he can get home to his friends, is rapidly becoming a rare occurrence, and every fresh departure in the Admiralty Regulations which enables the officers and men to transmit their money easily to their wives, families, or others dependent upon them, is admirable, and confers a benefit on the service. The recent instruction authorising Paymasters to issue postal notes without charging poundage to any one on board her Majesty's ships desiring them, is a case in point. These orders, which are to be stamped with the name of the ship and the date of issue, can be cashed at any post-office in the United Kingdom, and are therefore in the nature of a cheque, which can either be sent payable to some named person or to bearer.

According to a Sebastopol correspondent of the Cronstadt *Vestnik*, the Black Sea Steam Navigation Company is about to build there a sea-going torpedo-boat for the Black Sea Fleet. The new vessel is to be on the lines of the *Poti*, built a short time ago at Havre, which, he says, is "considered the crack sea-going torpedo-boat of the Southern Fleet of Russia."

The men-of-war on foreign stations which will have completed a three years' commission during 1885 comprise five armour-clads, seven corvettes, two sloops, and five gun-vessels and gunboats, viz:—*Euryalus* and *Monarch*, commissioned in January, 1882; the *Sylvia*. *Swiftsure*, *Amethyst*, *Bullfrog*, and *Invincible*, in March; the *Boadicea* in April; the *Starling* in August; the *Osprey*, *Audacious*, *Garnet*, *Heroine*, and *Linnet*, in September; the *Constance* and *Dart* in October; the *Dragon* in November; the *Northampton* and *Tenedos* in December. In addition, two sloops, the *Mutine* and *Sappho*, five gun-vessels and gunboats, the *Falcon*, *Grappler*, *Algerine*, *Decoy*, and *Bittern*, two paddle-wheel vessels, the *Cockatrice* and *Helicon*, have completed a three years' commission abroad without any reliefs having been as yet commissioned to take their place.

In view of the growth of the Marine in the Caspian and the importance which Baku has assumed, owing to the opening-up of communications through it from the Caucasus to Central Asia, the Russian Admiralty has decided upon establishing a floating dock there, as well as another at the mouth of the Volga, where the large steamers plying on the Caspian discharge their cargoes into smaller ones, or barges, for conveyance up the river.

It is stated that the Admiralty are negotiating with Messrs. Whitehead with a view to inducing that firm to establish their torpedo works in the neighbourhood of Portsmouth, and it is probable that the firm will consent. A few days ago Mr. Caine, M.P., Civil Lord of the Admiralty, accompanied by Colonel Percy Smith, R.E., Admiralty Director of Works, paid a visit to Portsmouth with a view to inquiring into the practicability of the scheme. They recommended Messrs. Whitehead to erect their works in one of the bays at the back of the Isle of Wight, we understand.

While intent on developing Sebastopol, the Russian Government is not unmindful of Nicolaeff and Otchakoff. A few days ago, the Russian Admiralty, we hear, made a contract with an engineer, named Boreish, to excavate a channel through the bar at the latter place at a cost of £60,000. The work is to commence immediately after the New Year.

The signature of "Admiral of the Fleet Thomas Symonds" must be tolerably familiar by this time to the readers of newspapers, service and general. The gallant veteran has taken to letting off broadsides in many-shotted rounds of figures and facts. Nevertheless, we read every word he writes with scrupulous attention, so that early in each week we are pretty well prepared for the statements which appear in the reproduction of his appalling statistics in the Saturday papers. Before he was aroused from his seclusion at Torquay, Sir Thomas Symonds was, doubtless, meditating much on the situation, we are vain enough to believe he must have studied his *Army and Navy Gazette* very sedulously, for many years past. Now, we pity the Admiralty. "As to comparisons of the two fleets," Sir Thomas writes, "I will content myself with stating that if war broke out with France to-morrow, dire disaster to Great Britain must follow." "Lord Northbrook follows a mode of reasoning that blinds him to the facts of the case." "He twice states that his Naval colleagues agree with him that, taking the more modern ships, there are 30 English to 19 French." "Including our emasculated one-third armoured ships, I make it 29 French to 25 English, and my experience is equal to the optimists." Bravo, Sir Thomas! The Admiral is a very worthy, brave gentleman, and so was his father before him. But the name of Sir Thomas Symonds, Admiral of the Fleet, is not associated with any Naval victory, nor is it recorded in our annals that the veteran contributed to the glory of the Flag throughout his long and useful but monotonous career. On the whole, the opinion of the Naval advisers of the Admiralty on the ships of to-day must be held to be of more weight than that of Sir T. Symonds by every one but a gentleman whom we shall not name.

The names of Rear-Admirals Sir Michael C. Seymour, Henry D. Hickley and the Honourable William J. Ward are now mentioned in connection with the commands at Queenstown and the Cape, which will fall vacant shortly; and, in addition to the probability that the Duke will relieve Sir John Hay in the Mediterranean, it is stated that the Earl of Clanwilliam will succeed Admiral de Horsey, in April, as Commander-in-Chief of the Channel Squadron.

The Russian Minister of Marine, having more officers at his disposal than he requires, has decided to limit the entrances into the Marine School and into the Navy. At present the Marine School contains 390 cadets, which is 75 above the regulation number.

From the West Coast of Africa we hear of increased activity on the part of the foreign war-vessels. The officers of the French aviso *Segond* and the Portuguese gunboat *Sado* have been settling the position of the parallel of 5° 12′ south latitude, claimed by the Portuguese as the boundary line of her territory; and, at the same time, visited Landana, on the Congo, with a view to arrange some dispute that has arisen between the natives and the French Catholic mission at St. Esprit.

Lieutenant Montgomerie, in the steam pinnace of the *Inflexible*, seems to be doing good work on the Nile. It is said that in these days everything is to be got by advertising, and that all our Military and Naval officers of notoriety—or, shall we say, eminence?—have attained their proud positions, to a great extent, by the way in which they have been puffed by the specials, Lieutenant Montgomerie has just saved two of these gentlemen from drowning—the correspondent of the *Daily Chronicle* and the artist of the *Graphic*—and if they have any gratitude at all, they will not forget to record with pen and pencil the doughty deeds which he may have the luck to perform. We expect to hear of him very soon mounting the difficult path of promotion by leaps and bounds.

Last week some interesting competitions took place between two of the principal brigades of Royal Naval Artillery Volunteers. The London corps having accepted a challenge from the Liverpool men to row, shoot, and drill against them, a selected detachment of 18 men, under Sub-Lieutenant Morris, arrived from the Northern city; and the first contest was a race in 10-oared cutters, pulled on the river between Charing Cross Bridge and Victoria Suspension Bridge, a distance of about three miles, in which the Londoners proved the better oarsmen. The contest at the rifle range, however, where two teams of eight men each represented the rivals, resulted in a victory to Liverpool by 60 points. The firing took place during a heavy storm of sleet, rain, and wind at Child's Hill range, the men firing seven shots each at 200 and 500 yards. As the annual inter-battery competition of the London corps for Sir Henry Peek's challenge cup had lately been held on board the *President*, the winning crew were then set to drill against the Liverpool men, and once more the Londoners were awarded the prize, Commander Roberts, R.N., of the Bristol Brigade, who acted as judge, considering them to have proved themselves smarter and more efficient, although the Liverpool crew worked exceedingly well.

The despatch received this week from Bermuda, dated November 25, gives very little more information about the accident on board the *Canada*, Captain Curtis, than we have already published; and our surmise that the catastrophe occurred in consequence of incomplete sponging appears to be correct. The name of the man who died from the injuries he received is stated to be Patrick Aspide, and it is understood that the other three men are doing well, but from the very serious and painful nature of their wounds some time must elapse before they are out of danger. It is noteworthy that nearly all the recent accidents in connection with guns and gunnery have arisen from simple and easily preventible causes.

We see by the *Army and Navy Register* (New York) that on the 10th inst. the Hon. H. W. Blair, in submitting to the United States Senate a resolution requiring the Naval Department to investigate and examine Ericsson's new submarine gun and projectile torpedo, with a view, if desirable, to purchasing these inventions, stated, at the same time, that he was informed and believed that the English Government were engaged in a negotiation for the appropriation of these inventions; and he read a letter in which Captain Ericsson offered to build a steel vessel of the *Destroyer* type, 132 ft. long, 20 ft. beam, and 11½ ft. deep, for the sum of 160,000 dols., including submarine gun, projectiles, and all appurtenances fit for actual service. With all respect to Mr. Blair, we are inclined to doubt the accuracy of his information. Captain Ericsson is well and widely known as the originator of the monitor, an invention which may be said to have revolutionised Naval warfare; and his new invention is said, by the United States Naval officers who reported upon its trials last year, to be superior to any known form of torpedo within a limited range; but the same reason—a financial one—which has prevented its appreciation hitherto by his own Government, also operates on this side of the water.

The Prince of Wales, the Duke of Edinburgh, the Duke of Cambridge, and Prince George of Wales attended on Monday night the smoking-concert given by the Royal Amateur Orchestral Society, at Prince's Hall.

The statement of the annexations by Germany in the Pacific which was made last week and then contradicted is now reported to be officially confirmed, and it is explained that this step has been taken in accordance with the wish of some German merchants interested in the matter. The annexed territories are stated to include all that part of New Guinea unappropriated by ourselves and the Dutch, the Admiralty Islands, New Britain, New Ireland, New Hanover, the Duke of York, Marshall and Anderson's Islands. While, without doubt, it is better that the Germans should possess these places than the French, it is equally certain that the Australian colonists will view with disgust and indignation their being in any but British hands, and the immediate result of the move must be, unless we are prepared to further endanger our interests in the Pacific, a large increase in the Australian Squadron.

We learn from St. Petersburg that the number of Russian men-of-war at present on foreign service is 15, on which are serving 292 staff and superior officers and 3,342 seamen. The 15 vessels comprise three vessels of the first rank, the frigates *Minin*, *General Admiral*, and *Vladimir Monomarchus*; nine vessels of the second category, the corvette *Skobeleff* and the clippers *Naezdnik*, *Opritchnik*, *Razboinik*, *Cruiser*, *Djigit*, *Abrek*, *Strelok*, and *Plastoun*; and three vessels of the third category, the despatch-boat *Taman* and the gunboats *Tuabse* and *Keliasuri*. All these vessels belong either to the Pacific or to the Mediterranean Squadrons, which are commanded respectively by Rear-Admiral Crown and Rear-Admiral Kaznakoff. The *Minin* is at Vladivostock, the *General Admiral* is in the Mediterranean, the *Vladimir Monomarchus* is in Greek waters, and is leaving in a few days for the Pacific; the *Skobeleff* and *Naezdnik* were last reported at Batavia, on their way home from the Pacific, where the *Opritchnik* and *Razboinik* had already replaced them. The *Djigit* and *Abrek* are at Vladivostock, and the *Strelok* and *Plastoun* cruising towards the East. The *Taman* is at Constantinople, and the *Tuabse* and *Keliasuri* at the Piræus. Next year the Russian Government will maintain a larger number of vessels on foreign service, and for this purpose has assigned the sum of 5,688,554 roubles, or £568,855, being an increase of £21,783 upon the expenditure of the current year.

A "Rear-Admiral," writing to a contemporary, considers that it may be taken as proved:—"1. That we are short of ships of all classes. 2. That if we had the requisite number of ships, we have not the men to man them. 3. That if we had the ships and the men, we have no guns. 4. That if we had the ships, the men, and the guns, they would all be useless, because our coaling depôts are undefended. And, in answer to the quesions, Who is responsible for all these shortcomings and deficiencies? Can any one be made to answer for this?—he says the fault is undoubtedly that of the Admiralty, or rather the system of non-responsibility which has been carried on within the Admiralty buildings. Therefore, if the Navy is to be reformed, the Admiralty system must first be dealt with, otherwise, should the power be given to this Board to spend an additional five millions, it will go where numerous other millions have gone, and the country will not be in any way the better for the sacrifice it has made.

Admiral Sir George Elliot contributes a long letter to the *Pall Mall Gazette* of Tuesday, pointing out that the proposals of Government with regard to the navy display a lamentable ignorance of the strategic requirements of naval warfare, for that five times the contemplated increase would not more than suffice to provide adequate security to our Empire. He considers that it would be an insult to the intelligence of the naval officers on the Board to suppose that the proposed measures are the outcome of their mature deliberations, and that it is important that the country should be fully informed of the fact that the landsman (Lord Northbrook) who is at the helm of naval affairs has turned a deaf ear to his colleagues' advice. He says:—"The naval service will, I feel sure, give the Naval Lords credit for having fully recognised and made known to their chief the requirements of the Navy, but they will not be satisfied that their duty to their country has thus been fulfilled, if they retain their seats at the Board under such grave circumstances of national peril. For by so doing the Naval Lords give countenance to the dangerous policy which is being pursued, and must share the reproach which will be attached to it, as it is well known that if the Cabinet were informed of the intention of the Naval Lords to retire from a false position, such a protest would not be disregarded, since no naval officers would be found willing to replace them under such circumstances, and it is not well possible to conceive a stronger case for manly and patriotic action." The misgovernment of the Navy, he declares, can be traced back to the date when the professional authority of the Board was swept away by the order in Council of 1871, as evidenced by the gradual impoverishment of the Navy both in *personnel* and *matériel* from that time, and he believes that until the personal responsibility of the Naval Lords to the nation in Parliament assembled is re-established, the real wants of the Navy will be sacrifiecd at the altar of political expediency. He recommends the formation of an association for the promotion of Imperial defence to bring the question prominently before the new electorate as an appeal to their patriotism, and to expose the false economy which has brought our Empire to the verge of ruin.

It appears the Navy is 3,700 stokers short; yet nothing is done to remedy this, and no steps whatever have been taken to establish a reserve of this necessary force for war-time. It is quite useless to rely on the Mercantile Marine for these men; stoking in a man-of-war and a merchant vessel are two very different matters. Stokers want almost as much training as gunners, and it would certainly seem, unless something is done quickly, ships we may have, but they will be unable to move.

L'Avenir Militaire deplores that the Naval Estimates should have drawn a very small House. It was a sad spectacle, says the writer, to see the Chamber attaching so much importance to the suppression of ten exhibitions attached to the seminaries, and so little to the Navy. Referring to the debate, the *Avenir* remarks that Admiral Peyron had to reply to two questions:—"(1), What Naval Power has, in its strongest and only squadron, wooden armour-clads of such small fighting value as the *Colbert*, the *Trident*, and *Suffren?*" In a note, we are informed that the *Amiral Duperré* and the *Tonnerre* are the serious war-vessels of the squadron, and that the armour-clads which have frightened England are yet building. We then come to the next question,—"(2), What are the names of the French cruisers now in commission, or which could be put in commission, comparable to the English types, the *Iris*, *Mercury*, *Leander*, and *Arethusa*; to the *Americo-Vespucci*, *Giovanni*, and *Bauran*, of Italy; to the Chilian *Esmeralda;* or to the two Chinese vessels which have just left Shanghai, like new *Alabamas*, to try and insult our flag?" After treating us to the above questions, the *Avenir* remarks, somewhat despondingly, that the chief force of the French Navy lies in its *personnel*. Our opinion is that the *Avenir* takes altogether too doleful a view of ships and guns. The Admiral Peyron promised the Chamber to build as many torpedo-boats and fast cruisers as possible with the funds at his disposal.

When the *Gazette* sees the light at the end of the month, it is devoutly to be wished that the list of promotions will be found the result of a judicious and impartial selection of the seniors, tempered by merit and unfavoured by influence. Is it too much to hope for this? There will be at least some six Commanders and nearly a dozen Lieutenants to get advancement; and, if only the Treasury would not stop the way, it is well known that "My Lords" would gladly see the senior lists increased, or an addition made to the pay of those Lieutenants over ten years' standing. But if this cannot be, in common fairness, and for the good of the service, we hope there will be no more overhead transplanting, to the discontent and disgust of those who are passed over without cause.

We believe that the forthcoming number of the *Edinburgh Review* will contain an article on the state of the Army. It will be interesting to see what defence the *Edinburgh* can put forward in favour of our present system.

The appointment of Garrison Instructor at Aldershot becomes vacant by the promotion of Major Harvey, Highland L.I.

It is questionable whether an eye, the sight of which has been destroyed, should be removed as soon as possible. The practice is generally followed abroad. The attempt to what is called "save the eye" rarely succeeds. Lieutenant-Colonel O. Montagu must now be added to the long list of sportsmen who have lost an eye by accident in shooting, including five Peers at least and many Commoners of various degree.

There are not two officers in the service more generally popular than Major-General Fraser and Major-General Elliot, and they are not the men, one would suppose, whom it would be difficult for their Staff officers to get on with. But from Aldershot and the Curragh there have come reports which would lead us to believe that the Inspectors-General of Cavalry here and in Ireland have somehow or other failed to hit it off with certain members of the Staff. There have been changes and transfers—possibly "wiggings"—in consequence. But enough, for the present.

A telegram has been received from Cyprus to the effect that the long-pending action of Captain Croker, formerly 93rd Highlanders, *versus* Colonel Gordon, for libel, was tried last week, resulting in a verdict with costs for the plaintiff.

The prosecutions arising from the Intendance frauds perpetrated during the last Russo-Turkish war seem to be never coming to an end. For five years now they have engaged the attention of the Russian judicial authorities, and the trials still continue. This week one of the leading officials of the Caucasus Intendance, Privy Councillor Tsaturoff, has been sentenced by the Judges at Tiflis to lose all his decorations, and to be exiled to Siberia for life.

General Charles Foster has succeeded Mr. R. A. Dalyell as vice-president of the India Council.

There is unfriendliness in readiness to receive and propagate as true, without inquiry, reports calculated to excite dislike and ill-feeling between nations and individuals; and the *Times* is certainly open to the charge of unfriendliness to the French Alliance (which may be quite justifiable, but which ought not to be based on erroneous information) in the remarks it made on the report that the Government of Saigon had addressed threatening letters to the Government of Siam—flatly contradicted by the English Secretary of the Siamese Legation. It is a pity our contemporary should swallow so readily all "shaves" sent to it by its correspondents without making inquiry. Certainly some of these gentlemen deserve a wigging, to say the least of it.

The mimimum height of recruits for medium cavalry (Lancer regiments excepted) has been reduced from 5 ft. 7 in. to 5 ft. 6 in.

In the coming year the much-exercised British Army will undergo a change, of which no other army in time past or present—well, to be prophetic, we will add, or to come—witnessed, or will witness, the parallel. A number of efficient officers in all departments having, after five years' experience of the working of their respective charges, obtained the most thorough mastery of the details, will be sent about their business, in order that there may be put in their places other officers who must begin their apprenticeship under difficulties. It is inevitable that these changes should be made under our system, but it is unwise to make them to the public loss. The State has insisted on the principle that individual interests must not stand in the way of national necessities. It would be easy to indicate the special instances in which the removal of officers in specific ports must be attended with disadvantage to the services.

A circular has been sent to commanding officers of Yeomanry regiments asking for the names of officers willing to do duty temporarily with Regular Cavalry regiments which are now under-officered, in consequence of the number of officers absent on the Nile and in Bechuanaland. Where is the Reserve of Officers? Surely under such circumstances it might be turned to.

"Peace on earth! Good-will towards men." More than eighteen centuries ago the words were spoken. They never were so out of tune with the music of the time as they are now. Over Europe "sounds the dreadful notes of preparation." The most civilised and Christian nations are armed, and are arming. As yet it is "the heathen Chinee," the Malagassy, the son of Ishmael, and the barbarian generally who has to acknowledge that the millennium has not yet come,—that the sword of the Christian is keen of edge, that his cannon is loud-voiced and far-reaching, and that his cupidity is as irresistible as his prowess. The forces which sent out the hardy Norseman, the Saxon, Dane, and Norman in times gone by are still strong in Europe, and the Continental Powers have for the hour turned their eyes from their borders and frontiers to the great continents which are yet dark, and to the islands of the sea which are yet unappropriated. It is obvious that in a general scramble for the land of the coloured races, the swiftest and strongest must get the greatest share at first; but that the possession of what they have depends on their remaining the strongest. Honestly speaking, we think England has so much that she may spare some of the earth's heritage to others, and devote herself to making the most of what she has. However, if the English race at home and in the Colonies is not of that opinion, it only remains for it to prepare to fight all comers, and to meet any possible combination of its rivals for the ownership of the lands which are as yet held by natural occupants, whose rights Christianity and civilisation ignore in the interests of the natives and of mankind. "When Greek joined Greek, then was the tug-of-war." From the marshes on the western shores of the German Ocean came the Jutes and Angles who formed the great Saxon stratum on which this nation was founded, and it is the descendants of our common ancestors who, from the Elbe and from the seaboard which saw the fleets of the early invaders depart to descend on England, now are setting forth to contest with us the possession of outlying regions of the world. There is room for both, and let the best win.

The following Staff appointments may be expected to become vacant during the ensuing year, the present incumbents completing their period of Staff service on the dates specified :—

HOME AND COLONIES.

Inspector-General of Recruiting (Major-Gen. E. G. Bulwer, C.B.), Jan. 1.

Inspector-General of Cavalry and Command of Cavalry, Aldershot (Major-Gen. C. C. Fraser, V.C., C.B.), Jan. 1.

Inspector-General of Musketry (Colonel H. W. J. Trent, h.p.), Jan. 1.

Brigade-Major, Singapore (Major A. M. Paterson, 16th Foot), Jan. 13.

Inspector of Gymnasia (Lieut.-Col. W. B. G. Cleather, 47th Foot), Feb. 12.

Assistant-Adjutant and Quartermaster-General, Woolwich (Col. W. Stirling, C.B., h.p., R.A.), Feb. 16.

Brigade-Major, Jamaica (Major E. R. P. Woodgate, 4th Foot), Feb. 21.

Military Secretary, Head-quarters (Lieut.-Gen. Sir E. A. Whitmore, K.C.B.), April 1.

Command, Dover (Major-Gen. E. Newdigate, C.B.), April 1.

Garrison Instructor, Aldershot (Major C. L. Harvey, 71st Foot), April 17.

Deputy-Adjutant-General (Auxiliary Forces) (Major-Gen. J. H. F. Elkington, C.B.), April 28.

Deputy-Assistant-Adjutant and Quartermaster-General (for Musketry), Manchester (Major T. S. Gildea, 72nd Foot), May 1.

Inspector of Army Signalling (Major M. F. Thrupp, h.p.), May 15.

Assistant-Quartermaster-General, Head-quarters (Col. W. L. Pemberton), July 1.

Assistant-Adjutant and Quartermaster-General, Dublin (Col. A. G. Montgomery Moore, h.p.), Aug. 2.

Assistant-Adjutant and Quartermaster-General, London (Recruiting) (Col. G. P. Prevost, h.p.), Aug. 7.

Garrison Instructor, London (Major F. T. C. Du Vernet, 56th Foot), Aug. 29.

Command of Troops, Ireland (Lieut.-Gen. Sir T. M. Steele, K.C.B.), Oct. 1.

Assistant-Adjutant and Quartermaster-General, Colchester (Col. G. H. Waller, h.p.), Oct. 1.

Garrison Instructor, Devonport (Major F. Stringer, 23rd Foot), Oct. 1.

Brigade-Major, Malta (Major H. T. Hughes-Hallett, 57th Foot), Oct. 2.

Command of Troops, South Africa (Lieut.-Gen. Hon. Sir L. Smyth, K.C.M.G.), Nov. 10.

Assistant-Adjutant and Quartermaster-General, Edinburgh (Col. R. Preston, C.B., h.p.), Dec. 15.

Deputy-Adjutant and Quartermaster-General, Cape of Good Hope (Col. A. H. Wavell, h.p.), Dec. 16.

Assistant-Adjutant-General, Head-quarters (Col. H. R. Hollinshead-Blundell, h.p.), Dec. 28.

SUNDRY APPOINTMENTS AT HOME.

Professor of Tactics, &c., Royal Military College (Major C. C. King, R.M.A.), March 1.

Instructor of Tactics, Royal Military College (Major T. J. Courtenay, 35th Foot), March 25.

Instructor of School of Gunnery, Shoeburyness (Major A. A. Saunders, R.A.), March 25.

Superintendent, Royal Laboratory, Woolwich (Col. F. Lyon, R.A.), April 1.

Superintendent, Royal Small Arms Factory (Col. H. T. Arbuthnot, h.p., R.A.), April 1.

Superintendent, Royal Gun Factory, Woolwich (Col. E. Maitland, R.A.), May 1.

Chief Instructor, School of Gunnery (Lieut.-Col. J. F. Betty, h.p., R.A.), May 1.

Commandant, Staff College (Major-Gen. C. O. Creagh-Osborne, C.B.), May 11.

Assistant Superintendent, Royal Small Arms Factory (Major W. M'Clintock, R.A.), July 1.

Superintendent, Royal Gunpowder Factory (Col. C. B. Brackenbury, R.A.), July 1.

Professor, Military Topography, Staff College (Col. W. H. Richards, h.p.), Oct. 16.

Professor, Military Art and History, Staff College (Col. T. E. Hale, h.p.), Dec. 24.

INDIA.

Quartermaster-General, Bombay (Col. A. G. F. Hogg, Bombay S.C.), Feb. 1.

Assistant-Adjutant-General of a Division, Bengal (Lieut.-Col. A. G. Henderson, Bengal S.C.), March 12.

Assistant-Quartermaster-General, Bengal (Lieut.-Col. H. B. Hanna, Bengal S.C.), June 22.

Director of Garrison Instruction (Lieut.-Col. A. S. Hunter, R.A.), July 1.

Assistant-Adjutant-General of Division, Bombay (Lieut.-Col. R. M. Lloyd, Bombay S.C.), July 1.

Assistant-Quartermaster-General, Bengal (Major R. M'G. Stewart, R.A.), July 24.

Adjutant-General, Madras (Col. G. Clerk, h.p.), Aug. 29.

Garrison Instructor, Bengal (Major H. Gunter, 73rd Foot), Sept. 5.

Deputy-Assistant-Quartermaster-General, Bengal (Major W. Hailes, H.M.'s I.F.), Oct. 13.

Major-General, Cavalry Division, Bengal (Major-Gen. Sir H. T. Macpherson, K.C.B., K.C.S.I.), Oct. 26.

Inspector-General of Artillery (Major-Gen. G. Leslie, R.A.), Oct. 26.

Deputy-Assistant-Adjutant-General, Madras (Major W. Wood, 44th Foot), Oct. 28.

Quartermaster-General, Bengal (Col. Sir C. MacGregor, K.C.B., Bengal S.C.), Nov. 19.

Brigade-Major, Bombay (Capt. F. G. Welch, Bombay S.C.), Nov. 20.

Assistant-Adjutant-General of Division, Bombay (Lieut.-Col. C. J. Burnett, 15th Foot), Nov. 26.

Major-General commanding Division, Bengal (Lieut.-Gen Sir M. A. S. Biddulph, K.C.B., R.A.), Dec. 1.

Brigade-Major, Bengal (Major W. C. Farwell, Bengal S.C.), Dec. 5.

Assistant-Adjutant-General of Division, Bengal (Col. A. P. Palmer, Bengal S.C.), Dec. 6.

Deputy-Assistant-Adjutant-General, Bombay (Capt. H. I. Nares, 17th Foot), Dec. 20.

The following regimental commands fall vacant next year :—

1st Batn. 8th Foot	Col.	E. Tanner	Jan. 30.
76th Foot	„	J. M'D. Allardice	Feb. 25.
104th Foot	„	J. G. Campbell	„
98th Foot	„	T. T. Simpson	Mar. 6.
63rd Foot	„	W. F. Auchinleck	„ 18.
51st Foot	„	C. Ball-Acton, C.B.	„ 20.
1st Batn. 23rd Foot	„	C. Elgee	April 10.
2nd Batn. 5th Foot	„	T. Rowland	May 4.
1st Batn. 13th Foot	„	E. L. England	„ 8.
57th Foot	„	J. R. K. Tredennick	„
1st Batn. 11th Foot	„	E. Birch	May 19.
2nd Batn. 60th Foot	„	K. G. Henderson	June 5.
4th Batn. Rifle Brig.	„	H. Wood	„ 14.
1st Batn. 1st Foot	„	H. G. White	„ 21.
2nd Batn. 23rd Foot	„	L. O'Connor, V.C.	„
1st Batn. 25th Foot	„	J. R. Harvey	„
70th Foot	„	W. H. Ralston	„
85th Foot	„	E. M. Beaden	„
2nd Batn. 4th Foot	„	C. P. Stokes	June 23.
95th Foot	„	J. N. Crealock, C.B.	July 21.
45th Foot	„	H. B. Hayward	Aug. 4.
3rd Batn. Rifle Brig.	„	C. R. H. Nicoll	„ 7.
72nd Foot	„	C. M. Stockwell, C.B.	Sept. 2.
28th Foot	„	F. Brodigan	„ 22.
13th Hussars	„	Sir B. C. Russell, K.C.B., K.C.M.G.	„ 29.
4th Batn. 60th Rifles	„	J. S. H. Algar	Oct. 9.
30th Foot	„	C. J. Moorsom	Nov. 10.
109th Foot	„	C. P. Forbes	Dec. 1.
1st Batn. Rifle Brig.	„	F. H. A. Seymour	„
75th Foot	„	D. Hammill, C.B.	„ 18.
94th Foot	„	J. Browne	„ 27.

The questions put at the examination for Surgeons-Major, held on the 27th and 28th of last month, have been published in the *Lancet*, and with them a leader that bears evident marks of inspiration. Our attention has been drawn to the fact that these questions, as published in the *Lancet*, do not entirely correspond with the printed papers set before the examinees, and what was a serious blunder in the questions as they stood originally has now been corrected. By whose hand was this done? We shall be happy to see an explanation from the editor of the *Lancet* on this point.

In the report of the proceedings at the Leeds Police Court on Tuesday, it is stated that the prisoner, Corporal Clements, 3rd Hussars, does not bear a very good character, having, when the regiment was stationed at Aldershot, attempted to attack some of his comrades with a sword, for which offence he underwent a term of imprisonment. Surely the service must be in great straits for the want of non-commissioned officers, when such men as Corporal Clements are vested with that authority which they prove themselves by their acts utterly unfit to exercise.

The *Débats*, which is not wholly satisfied with the state of the French Army, is bold enough to raise its voice against mere masses, and to say that during the Franco-German War its countrymen were not always beaten by numbers; in some cases the French outnumbered the enemy, and had the worst of it. The writer then proceeds to make some remarks which we would do well to treasure up in our minds, for they ought to teach us a lesson. He says that the Army, in spite of its imperfections, is strong enough to defend the Eastern frontier, but is not in a position to answer all requirements. He adds, "We have had complications in distant parts, and we have been obliged to recognise that our Army cannot furnish sufficient means to meet such emergencies. It was this which made us lose Egypt, and which has caused the war in Tonquin, which ought to have been finished in three months, to drag on for two years. To remedy this state of affairs a Colonial army is necessary. This is the general cry to-day, but unfortunately it comes rather late. We resemble those Athenians of Demosthenes who did not feel the necessity of defending themselves until they received a wound. We foresee nothing, and allow our policy to be governed by events. We were obliged to launch out into colonial expeditions before we could recognise the necessity of having a Colonial Army." M. Francis Charmes is by no means the only military writer who entertains scruples with regard to the value of the present organisation of the French Army, with its half-trained masses. As for a Colonial Army, the formation of such a force has been commenced, but the Government is afraid to ask Parliament for such a sum as would enable it to constitute an effective instrument.

The *Morning Post* of Wednesday contained a letter on Naval and Military administration from the trenchant pen of Sir Edward Sullivan. In it the incontrovertible charges of neglect and mismanagement are presented in a new form. Sir Edward shows how the Government, while proclaiming peace, retrenchment, and reform, have been deluding the country, and possibly themselves also. Instead of peace, we have a needless war, little in everything except its cost; instead of retrenchment, we have increased expenditure, while the Navy is utterly inadequate for the duties it may be suddenly called on to perform; and, under the pretext for reform, we have got an Army deplorably inefficient, and manifestly unfit for the exigencies of European war. We will give only one extract from this ably-written and caustic letter :—

> "Every regimental officer, every non-commissioned officer, every drummer-boy in the British Army, knows that the rank and file is mainly composed of immature boys without experience, without discipline, without drill, without knowledge of their weapons, unfit for active warfare; that if we were called upon to put 50,000, or 30,000, or 20,000 men into the field to face a European army, we could not do it. Every one knows that the British Army, as remodelled by clerks and theorists, is a paper army, combining the maximum of expense with the minimum of efficiency. Every one knows this; but still we are assured that the Army was never in such an efficient state—never so fit to go anywhere or do anything. Is this only another instance of self-illusion, or must it bear a harder name? One or the other, I suppose, it must be."

A return of the married soldiers in India, on May 1, 1884, lately issued by the Adjutant-General in India, gives the following numbers, from which it will be observed that the number of married serjeants almost equals all the other married grades put together. The return does not show the number of children :—

	Serjts.	All others.

Though it is well understood that in throwing open our columns to correspondents we do not thereby adopt their opinions, it is necessary at times to express our dissent to a writer's views. And this is the case with a letter from "Observer," which appeared in our issue of last week. This communication is headed, "The Commissariat and Transport Staff," and whilst it professed to deal with the question of titular rank, it was really an attack upon the status, both military and social, of the officers who joined the present Staff from the Commissariat Department. It is needless to say that we have no sympathy whatever with opinions which, if generally held, would be entirely subversive of discipline, and would make it impossible for the old Departmental officers to command those lately joined from regiments, or for the latter to serve under men considered so unfitted for their positions. The worth of the officers of the Commissariat is well known; that they have for many years commanded with credit a large and highly-disciplined body of men is a complete answer to the charge of unfitness; whilst the fact that there is scarcely one of them who has not near relations amongst the combatant officers of the Army disposes of the suggestion that they belong to a different class of society. But "Observer," no doubt unintentionally, has illustrated most forcibly the argument used in favour of military titles, by pointing his scornful remarks with an allusion to the rise of purveyors' clerks to be Commissaries-General. The writer must be well aware that "clerk" was the designation of the first grade in the Purveyors, the Commissariat, and the Ordnance Store Departments. The gentlemen who held those appointments had the relative rank of Ensign, wore the uniform of officers, and were entitled to the same respect. To say that one of these so-named Clerks had no right to expect to be a Commissary-General, and, after 30 years' service in all the grades, is now out of place in the higher ranks because he was once called Clerk, is either equal to saying that an Ensign should never rise to be a Field-Marshal, a Midshipman to be an Admiral; or it proves how bad an influence upon "Observer," and those who think with him, the want of proper titles has had. Because the officers have been so long denied the titles which should denote their relative position in the Army, are they unfit for that position? We assert they are not; and the titles should, in our opinion, be given to define that position, and to prevent once and for ever the invidious distinction which "Observer" would draw between brother-officers of the same service working together for the common weal of the Army and the nation. As several correspondents have addressed us on the subject of "Observer's" letter, we may inform them that we intentionally suppress their letters, as we fail to see that any useful purpose would be served by the publication of an angry correspondence. "Observer" simply condemned himself by the want of good taste he exhibited. His letter was, as we have said, the strongest possible argument in favour of titular rank being given, and it was on these grounds that we allowed it space in our columns.

The success of the National Tir on the Polygon of Vincennes has induced the French to take a further step for extending the movement. A general congress of the various Rifle Associations of the Department of the Seine was held on November 19, with a view of founding a "Union des Sociétés de Tir," having the following programme:—"(1). The extension and elevation of the general interest in rifle-shooting and musketry practice by establishing at Paris a common centre of meeting for all active and honorary members of rifle associations, either in existence or to be formed, as well as by giving the utmost support to the foundation of rifle associations and musketry schools for arms of short and long ranges in the department of the Seine, and by establishing communications between old and new associations. (2.) The organisation of prize-firing and matches between the associations belonging to the 'Union'; as well as of national and even international prize-firing. (3.) The organisation of conferences and theoretical courses on shooting, and the principles of military firing." The French Press has hitherto been silent as to the success of the congress. But a demand put forward by *L'Armée Française* has some connection with the tendency prevailing in France respecting these associations. The private manufacture of, and the right to carry arms of long range—that is to say, of modern infantry arms—are forbidden in France. The repeal of the laws of 1834 and 1860 is now insisted upon. The object of the prohibition was to prevent possible rebels to be armed as well as the troops. *L'Armée Française* quotes the words of the poet, who says, "The rebels of to-day are the heroes of to-morrow," and demands, in the interests of the members of the French Rifle Association, the removal of the prohibition.

Regarding the vexed question of five years' compulsory service in the upper ranks of the Royal (late Indian) Ordnance Corps, in our issue of October 6, 1883, we showed that, in its so-called beneficial aspect, the order would result only in persuading Lieutenant-Colonels of 35 years' service to retire without awaiting promotion to Colonel. The practical result, after six years' trial, is given for the Engineers; the rule has, of course, acted, and is still acting, just in the same way as regards the Artillery. On issue of the Warrant in September, 1878, the compulsory rule was brought to bear on about 160 officers of the Engineers, but subsequent alterations and relaxations left it to bear on 39 only. On these the result has been as follows:—Ten officers have been forced through this compulsory service, during which they have been deprived of the pensions and annuities they had earned by service, viz.:—Stewart, Peile, Tennant, Sankey, Fischer, Mullins, Merriman, Goodfellow, Hancock, and Medley. These officers are now Generals, or have retired as such. Ten more, now Colonels, are undergoing five years' compulsory service, and for this period are barred pension and annuity due to them, viz.:—Williams, Innes, Chesney, Craster, Mayne, Rogers, Prendergast, Greig, Maunsell, and Le Mesurier. Eleven more—Lieutenant-Colonels—have the five years' compulsory service in prospect before them, viz.:—Brownlow, Trevor, Limond, De Bourbel, Stanton, Stewart, Edgecome, Falconet, White, Brown, and Haig. There have been two casualties, viz., Taylor and Tucker. Three Lieutenant-Colonels retired, but under 35 years' service, and in no way acted on by the rule to induce retirement, viz., Hichens, Hunter, and Baker. Three Lieutenant-Colonels appear to have retired at 35 years' service, viz., Davidson, Russell, and Warrand; and this is all that the beneficial aspect of this rule can show us! When an officer has reached the rank and years of a Regimental Colonel, to bind him for five years' compulsory service, and to withhold from him, for this period, the pension and annuity he has fairly gained by service, would not bear examination in Parliament a day. The practical result shows, therefore, that the rule is all but useless, and frustrates the objects of the pension scheme, which are intended, to quote the Secretary of State for War's despatch:—"To place the pensions on a perfectly satisfactory footing; to encourage retirement and hasten promotion; to permit every officer to arrange retirement so as to obtain the benefits of the pension and annuity given." Why have these liberal terms been offered to some 120 officers of Engineers, and withheld from 39? who, being at the top of the tree, should have additional inducements to retire, and not be deprived of all these, with the obvious practical result of forcing them to stay and block promotion.

The enthusiastic demonstrations of the natives of India on the departure of Lord Ripon afford some measure of the difficulties prepared in the way of Lord Dufferin. Never was there greater need on the part of a Viceroy of caution, foresight, firmness, and conciliation. The Press in this country has added to the dangers which beset his path. The great journals, every word of which is read by intelligent natives and translated in native courts, have been expatiating on the necessity of abolishing Native Armies, and on the risks to which our rule in India is exposed by the advances of Russia in Central Asia; and at the same time, they bewail the weakness of our Fleet, the inadequacy of our Army to meet the demands upon it, the snubs to which England has been exposed by Germany, and denounce the rivalry of France. Such disadvantages are part of the price for which the country enjoys the blessings of freedom of speech and printing; but they are not less thorns in the side of Consuls and Proconsuls abroad.

The complaints in our excellent contemporary, the *Morning Post*, that the Russian Government is guilty of wilful delay and neglect in regard to Sir P. Lumsden's commission, appear to us to be founded on the erroneous notion that the work of the Commission was to be commenced in the winter. In fact, it could not be carried on at all in winter time. The cold is severe, and the country is covered with snow. Colonel Stewart, an important member of the Commission, who left England to join head-quarters near the frontier a month ago, did not expect the labours of the Commission to begin till March. It was necessary for Sir P. Lumsden, his officers, and escort to start before the snow closed up the passes, so as to be on the spot when the weather opened; but the Russians, being almost *chez eux*, were under no necessity to move so soon, and they are probably right in preferring winter quarters to "camping out" before they can set to work on the common task. As to the general appreciations of the gravity of the situation enunciated by our contemporary, we must express our complete concurrence.

What course ought to be taken when one party to a Treaty insists upon its vitality and present efficacy, and the other high contracting Power not only holds the document to be invalid, but makes a Treaty with another State in defiance of the provisions of the contract, and in that new Treaty engages to do the very things which the repudiated Treaty stipulated should not be done, depends very much on circumstances. The Clayton-Bulwer Treaty is for Great Britain, as represented by Lord Granville, a living instrument in full force. For the State Department at Washington the Treaty is a piece of waste-paper, about as binding on America as the Treaty of Utrecht. But abstractedly, the violent fracture of Treaty obligations constitutes a *casus belli* for the Power against which the violation of the compact will operate. When Russia denounced the Black Sea Clauses of the Treaty of Paris, Lord Granville sent Mr. Odo Russell to the German Court at Versailles to obtain the support of Prince Bismarck to the protest of England, which was "ready to go to war with or without allies;" but finding himself deserted by the Powers co-signatary, Lord Granville went into a Conference, where Russia carried the day. In the case of the Clayton-Bulwer Treaty, Great Britain and the United States stand face to face, alone and without allies; but the Great Powers have never recognised the pretensions of what is called the "Monroe doctrine." The Treaty concluded between the United States and the State of Nicaragua is apparently framed in direct violation of the Clayton-Bulwer Treaty between the United States and Great Britain. The Clayton-Bulwer Treaty agreed that neither Great Britain nor the United States was to make a ship canal through Nicaragua, nor monopolise such canal if made by others, nor erect fortifications to command the approaches and course of the canal, nor colonise nor annex Nicaragua or the States of Central America. The United States agrees to make a ship-canal between the Pacific and the Atlantic through Nicaragua. The Government of the latter State cedes land on each side of this canal, which the Americans may fortify if they please. It will be something more than curious to read the diplomatic correspondence to which this incident must give rise. We don't want to fight, and by Jingo if we do, we haven't got the ships yet, but we have got the men, and the money too. And presently we shall have the guns for ships and men, we hope.

It is reported that the Marquis de Gallifet, on being asked if he would take the command of the forces in the Far East, consented on the condition of having 50,000 men and being allowed *carte blanche* and to go to Pekin. After some humming and hawing, M. Jules Ferry asked the General if he would be satisfied supposing 25,000 men were sent out first and another 25,000 a little later. The Marquis raised no objection to this, but, being asked when he himself would be prepared to start, he replied, "With the second 25,000 men," and the matter fell through. General Brière de l'Isle has sent home despatches giving an account of a brilliant and successful attack on some fortified positions at a place called Chu, where the Celestials appear, as usual, to have been unable to withstand the natural impetuosity of the Gaul, and his artillery. The slaughter is said to have been nearly all on the other side. It is difficult to know what to believe about affairs in Tonquin. The Government organs say that General Brière de l'Isle has not asked for reinforcements. On the other hand, a French correspondent, writing from Hanoi, draws a most deplorable picture of the situation. He says that several Europeans who ventured a short distance from the citadel were massacred, that there are 60,000 armed Chinese in the mountains at one day's march from Hai-Phong, that the place swarms with spies, that the number of French troops is totally insufficient, that the result of engagements, not all favourable to the French arms, is kept secret, and that the army is outnumbered and decimated by disease. A very sad account is then given of the state of the sick and wounded. The correspondent much fears that M. Jules Ferry is intent upon undertaking Military operations in Cambodia, and says that when the late King Si Vota was driven from the Throne and replaced by Nowdom, a column of 500 men was sent in pursuit of the ex-monarch. After a weary chase and many a wasted hour, the column returned to Saigon, without having fired a shot, only 125 strong. No less than 375 men had perished, owing to the insalubrity of the country. In France it is feared that this Cambodia business may give rise to complications with Siam and eventually with England.

THE ADMIRALTY.

The Admiralty is administered by a Board consisting of a Member of Parliament, three admirals (non-political, five-year appointments), and a Member of Parliament (Junior Lord), with another M.P., as Political or Financial Secretary, who is appointed by the Board; also Mr. Rendel, specially appointed for professional advice; and by a permanent staff, consisting of a Secretary, who attends Board meetings, sees to execution of their minutes, and to the general routine of the office; and of the following principal officers or heads of Departments:—Controller of the Navy—an admiral with a seat at the Board to enable him to take part in discussions on the construction and repair of ships or dockyard management, for which he is responsible; the Director of Works; Medical Director-General; Accountant-General; Director of Transports; Director of Ordnance; Director of Contracts; and Director of Victualling. Associated with the Controller are—(*a*) the Director of Naval Construction for Shipbuilding; (*b*) the Engineer-in-Chief for Machinery; and (*c*) Director of Stores for Supplies. Each of these Departments is absolutely independent of the other, but is attached to one or other members of the Board, to whom its work is referred when necessary. The spending officers—that is, Controller, Director of Works, Director of Stores and Victualling, Director of Transports, and Medical Director-General—are each responsible for his own expenditure and for the preparation of his Estimates to the Board. The Director of Contracts is responsible for procuring for these officers the goods they want at the most economical rates. The Accountant-General is responsible for editing the Estimates generally and recording expenditure, and preparing the Appropriation account; also for the examination and preparation of all classes of accounts, cash and store; but he has no executive functions or financial control over his colleagues, except in a general way, his duties being those rather of book-keeper than financial adviser. Referring to the administration of the Navy, a correspondent of the *Pall Mall Gazette* says:—"In organisation the Admiralty is divided—both as regards its executive, that is, Board control, and its administration, or permanent official control—into several independent sections; and that the only central or final authority is vested in the First Lord, whose knowledge is limited, tenure of office uncertain, and responsibilities too varied to admit of effective interference with his Department. The War Office presents a fair model of organisation, having at the head of military and civil matters a Secretary of State, the control of military matters being vested in a Commander-in-Chief, with a professional staff, and of civil matters in an Under-Secretary of State, both being responsible to him, while he has also a Financial Secretary to advise on all matters of expenditure, and exercise financial control (an important want at the Admiralty). The Departments under these two, or rather three, officials are similarly constituted to those at the Admiralty. No good of a permanent character can be expected which does not strike at administration, not only centrally, but at the dockyards. (See Capt. Codrington's and Mr. Palmer's Additions to Report of Committee on Building, &c., Ships by Contract, October, 1884.)"

The Admiralty have decided that on stations where there is no difficulty in obtaining the requisite number of paymasters, the signature of an assistant-paymaster-in-charge or of an assistant paymaster who has held an appointment in charge, will be accepted on the passing certificate of a clerk, in lieu of the signature of a third paymaster; but that every such case is to be reported for their Lordships' information and sanction.

The *London and China Telegraph* says that the Chinese are still large buyers of various munitions of war of all classes—guns, rifles, cartridges, &c. Of the powder being shipped there is little for rifle use, the majority being pebble powder for heavy artillery. Several hundred tons of this description have recently been shipped.

Half the men at the Sheerness Naval Barracks and of the Hydra, Duncan, Trent, and other war vessels in the Nore district, were granted ten days' special leave on Wednesday. The Blue jackets remaining behind will have the same period of leave on the return of their shipmates.

Despatches received at the Foreign Office and Admiralty at Berlin state that the German flag has been hoisted at different points in New Guinea and in the New Britain Archipelago, and the German trading stations placed under the protection of the Empire. The annexations were carried out by the gunboat Hyena and corvette Elizabeth, which sailed from Sydney on Sept. 23 and Oct. 16 respectively with sealed orders.

Lloyd's agent at Shanghai states that although masters of vessels may strictly observe the recommendations of the harbourmaster in passing or approaching another vessel at Woosung inner bar, a very grave danger exists in cases where one or more native craft may be met about the same spot. With the strong tides prevalent in the river the prevention of accident will, it is feared, become a very difficult matter.

The Army.

Royal Horse Guards (Blue). Brevet Lieut.-Col. Hon. O. Montagu has just undergone an operation for the removal of an eye at his residence in Grosvenor Street. He is, we are informed, making satisfactory progress under the treatment of Sir Oscar Clayton and Mr. Critchett, who enjoin absolute rest and quiet for the present.

3rd Dragoon Guards. The correspondent of the *Standard* at Cairo telegraphs :—"Major Wardroper, one of Lord Wolseley's Aides-de-Camp, has been appointed Deputy-Assist.-Adjt.-Gen. and Qrmr.-Gen. to Sir H. Stewart. As Major Wardroper is regarded as a great favourite with Lord Wolseley, this appointment is generally considered to be a sign that there will very shortly be a forward move of the Camel Corps and the Mounted Infantry."

3rd Hussars. At the Leeds Police-court, on Tuesday, Corpl. Clements, aged 23, was charged with shooting Corpl. Warner with a revolver. The evidence showed that Clements was conversing with Pte. Shepherd in their room, when the former renewed a quarrel which took place on the previous evening in reference to a girl, and threatened to shoot his comrade. The latter reported the matter in the orderly-room, when Corpl. Ling was instructed to take an armed escort of two men and arrest Corpl. Clements. When they arrived, the accused said he would shoot down the first man who entered the room. Corpl. Ling reported the matter to Serjt. Warren, who ordered the escort to enter the room, arrest, and disarm Clements at all hazards. In the meantime, Corpl. Warner and Pte. Norris entered the room and endeavoured to pacify the man, but he deliberately drew a cavalry revolver and fired at Norris. Fortunately, the charge did not take effect. Clements fired a second time, and the bullet passed through the fleshy part of Warner's thigh, bringing him to the ground. Clements fired two other shots, but neither of them took effect, one lodging in the ceiling and the other penetrating a board. He then ran out of the room, and was making across the barracks square with the intention of escaping. The guard had now assembled, and Serjt. Warren called out to him to stop. As he paid no attention to the command, Serjt. Warren fired a blank cartridge at him, and he then surrendered. The regimental surgeon-major stated that he was attending the injured man, and it was impossible at present to tell the full extent of the injuries sustained, or whether the wound would prove fatal or not. Prisoner was remanded until Jan. 1. He has been connected with the 3rd Hussars for three years. He does not bear a very good character, having, when the regiment was stationed at Aldershot, attempted to attack some of his comrades with a sword, for which offence he underwent a term of imprisonment.

11th Hussars. The Queen has been pleased to convey to Mrs. Stewart, the mother of the late Col. Stewart, C.M.G., the expression of her Majesty's sense of the loss that her Majesty and the country have sustained in the untimely death of that gallant officer in the defence of Khartoum, and of the Queen's deep sympathy with Mrs. Stewart in her bereavement. Capt. Taylor, who completes 60 years of age to-day, will be retired on vacating his appointment as A.D.C. to Major-Gen. Fraser at Aldershot. The Cork correspondent of the *Daily Telegraph* writes :—"While the 11th Hussar hounds were hunting in county Cork, the officers were violently stoned by National Leaguers. A captain was struck on the head and hurled from his horse. Regaining his feet, he threw down his whip, and engaged in a stand-up fight with his assailant, a farmer, and severely punished him. The friends of the farmer stood by, but did not interfere, as the captain, taking off his coat, told them he would fight the whole lot."

12th Lancers. Capt. E. A. Pole, formerly of the regt., eldest son of the late Gen. E. Pole, died on the 16th inst., aged 41 years.

13th Hussars. Col. Sir Baker Russell, according to a Durban telegram, now commands the forces in Natal. Capt. Braithwaite has accepted the adjutancy of the Leicestershire Yeomanry Cavalry. Lieuts. Dimond and MacDougall obtain their troops.

17th Lancers. Lieut. the Hon. L. D. Fortescue, now *en route* from India, will take up the appointment of A.D.C. to Major-Gen. Sir Drury Lowe at Aldershot.

ROYAL ARTILLERY.

Capt. H. M. Jackson has been appointed A.D.C. to Sir A. E. Havelock, Governor of Trinidad. Capt. Jackson has been for some time on civil employ on the West Coast of Africa.

Scots Guards. In consequence of one of the officers of the Guards Camel Corps having been placed on the sick list, his duties have been assumed by Lieut. Romilly, A.D.C. to Gen. Stephenson.

Royal Fusiliers (7th). The 1st Batn. arrived at Gibraltar on Saturday, and disembarked and took over quarters.

Devonshire Regiment (11th). About half-past 7 on Wednesday evening, one of the servants attached to the Charing Cross Hotel entered the room of Major Ballantyne, and to his horror found that the major was lying on the bed with his throat cut. He gave an alarm, and the major was conveyed to Charing Cross Hospital, where the house-surgeon pronounced life extinct. Major Ballantyne, who entered the Army in 1858, served in the Zulu war of 1879 (medal with clasp).

Bedfordshire Regiment (16th). Major Paterson completes his period of Staff service as Brigade-Major at Singapore on the 13th prox.

Royal Scots Fusiliers (21st). Capt. Pollock has been appointed Brigade-Major at Belfast.

South Wales Borderers (24th). Col. Tongue retires from command of the 1st Batn. on appointment as Inspector-Gen. of Musketry. Lieut.-Col. Paton, C.M.G., succeeds him in command, Major Bromhead becoming Lieut.-Col.

Royal Inniskilling Fusiliers (27th). Major Buxton has been appointed Brigade-Major at the Straits Settlements.

South Staffordshire Regiment (38th). Within the last few days one of the windows of the north aisle of the nave of Lichfield Cathedral has been filled with stained glass, in memory of the officers and men of the regiment who fell in action or who died of their wounds or disease while on active service in various campaigns, including those of the Peninsula, first Burmah, Crimea, Indian Mutiny, and Egypt (1882). A commemorative tablet is placed in the arcading beneath this window, with the following inscription :—"38th (1st Staffordshire) Regiment, now 1st Battalion South Staffordshire Regiment. To the glory of God, and in memory of the officers, non-commissioned officers, and men of the above regiment who fell in action, or who died of their wounds or disease, in the following campaigns, Peninsula, first Burmah, Crimea, Indian Mutiny, and Egypt, 1882; this window is dedicated by the officers, past and present, of the above regiment, 1884." The colours, which were borne through the Peninsula Campaign, and replaced Feb. 13, 1839, by those now borne by the regiment, have been recently restored by the Earl of Dartmouth. Those now borne by this battalion will also be shortly replaced. And then these two sets of old colours will, with the kind permission of the Dean and Chapter, be placed in the cathedral, on either side of this memorial window.

East Lancashire Regiment (59th). A correspondent writes from Dover :—"An assault-of-arms was held in the Town Hall at Dover on Wednesday, Dec. 17, under the superintendence of the Superintendent of Gymnasia, South-Eastern District, Capt. Quill, York and Lancaster Regt., and was a great pecuniary success, the proceeds being given to the Society for the Prevention of Cruelty to Animals. At the afternoon performance, the string band of the battalion played a select programme, and was much appreciated. The most noticeable features in the performances were the sword exercise (cavalry), by troop Serjt.-Major, of the 10th Hussars; sword feats, by Lieut. Rolt, York and Lancaster Regt., and his brother; and the exercises on the horse and parallel and horizontal bars, in which Serjt.-Major Dunbar and Lance-Serjt. Collins, and Corpl. Cook, East Lancashire Regt., were conspicuous. On Friday, the 19th, the troops in garrison executed the second of a series of tactical route marches, under the superintendence of Major-Gen. Newdigate, C.B., commanding the S.E. District. Lieut.-Col. Lawson was in command, Gen. and Mrs. Newdigate and the Staff of the District followed the movements on horseback. The troops were under arms from 9.30 a.m. to 1.30 p.m. A squad of well set-up and smartly turned-out men of the battalion, nearly all wearing Afghan medals, performed the manual and firing exercise, the small part allotted to them, with smartness and precision, and together with the squad of band and drummer-boys of the battalion, who performed the bar-bell exercise, were received with well-earned applause."

King's Royal Rifle Corps (60th). Capt. Hon. A. F. Greville has been appointed extra A.D.C. to the Lord Lieutenant of Ireland.

York and Lancaster Regiment (65th). *The Irish Times* says :—"Who can say, after Lord Wolseley's care for his younger brother George, that elder brothers do not do anything for those junior to them? Did not Col. George Wolseley obtain leave from India to Egypt *en amateur* in the days of 'Arabi,' obtaining as his reward the appointment of Aide-de-Camp to the Queen? Once more he has joined his brother in Egypt, and once more will participate in the honours attending the relief of Khartoum."

Highland Light Infantry (71st). Lieut.-Col. Allen succeeds Col. Lambton in command.

Highland Light Infantry (74th). By permission of tge Board of Works a monument has been erected in Glashow Cathedral in memory of the officers, non-commissioned officers, and men of the regiment who were killed in action during the late Egyptian Campaign. The ceremony of unveiling was performed on Saturday by Lieut.-Gen. Bruce, who was for many years connected with the regiment, and was for some time in command. At the same time the old colours, presented to the regiment in India in 1855, were placed over the monument, and handed over to the custody of the Town Council. The colours were carried by Capts. Toler and Boughey and Qrmr. Mackinnon. Under the command of Major Wilson, a guard of honour, consisting of two officers and 50 men, all of whom were present at the battle of Tel-el-Kebir, accompanied the colours from Hamilton. They were received on their arrival in Glasgow by a detachment of the Cameronians, at present stationed at Maryhill. At the cathedral, a short religious service was conducted by the Rev. Dr. G. S Burns, the parish minister, after which Gen. Bruce presented the colours to the Lord Provost, who made a brief reply. A limited number of visitors were admitted to witness the ceremony. Space was specially reserved for old soldiers of the 74th, among whom were two veterans who were with the regiment during the Peninsular Campaign, and one of whom was wounded at the storming and capture of Badajoz in 1813.

South Staffordshire Regiment (80th). The following messages have passed between the regiment at Manchester and the 1st Batn. with Lord Wolseley's expedition, now at Korti :—"From Lieut.-Col. Creagh, 2nd Batn. South Staffordshire Regt., Manchester—All ranks wish their comrades of the 1st Batn. a happy Christmas and a brilliant campaign." The answer received says :—"The kind wishes of the 2nd Batn. are highly gratifying to your comrades of the 1st Batn., who wish you all a happy Christmas. Your telegram published in orders.—Lieut.-Col. Eyre, 1st Batn. South Staffordshire Regt., at Korti."

Medical Department. "Miles" writes from India :—"The fiat has gone abroad, and the A.M.D. is once again reorganised. Truly it is a department of great vitality and tenacity of life, to have not been reorganised off the face of the earth ere this. The present reorganisation, though not accompanied by the usual panacea of 2s. 6d. a day pay all round, judging from the troubled waters of discontent that rage amongst the members of the Department, that oil will very soon have to be applied to restore peace. For what with subjecting officers in the sear and yellow leaf to examinations, and another contemplated change in uniform, on the same principle, no doubt, as when unification was introduced, a practice applicable apparently alone to officers of the Medical Department of the Army—viz., minus compensation, the Department is at present not a happy family. The last change is little more than one in name—a return to titles not so long discarded: in Tommy Atkins's phraseology, simply 'As you was.' When it was determined a new name was desirable for the Department, and on the Secretary for War deciding the Department was not worthy of the prefix of 'Royal,' a more appropriate, or, rather, more expressive, title than 'Medical Staff' might have been devised; even the prefix 'Army' would convey which of the many medical staffs was referred to. Hospitals, lunatic asylums, poor-houses, and a host of other institutions have their medical staff, and a more marked definition would have been desirable. Uniform has not been alluded to in the Royal Warrant,—purposely avoided by the authorities, I presume, fearing it would act as the last straw, coming so soon on the other causes of discontent; but you, Mr. Editor, inform us it is contemplated, and we are prepared what to expect. Why was dissension and discontent again aroused in the Department, when it was quiet and fairly contented?"

The Auxiliary Forces.

THE VOLUNTEERS.

2nd City of London Rifles. The annual distribution of prizes took place in the Guildhall on Saturday, when the winners received the rewards of their skill from the hands of the Lady Mayoress. The Lord Mayor, who attended in state, presided and was accompanied by Mr. Alderman and Sheriff Whitehead and other officials. Lieut.-Col. Cantlon, in his opening remarks, detailed the work which the regiment had performed during the present year. They did not return quite so many on the roll as in 1883, but there was a better per-centage of efficiency. Col. Cantlon asked the Lord Mayor to use his influence with the Corporation to induce them to do something for the Volunteers of the City of London. While nearly every town of 100,000 inhabitants throughout the length and breadth of the land had built drill halls for its Volunteers London was certainly behind in that respect. Subsequently the Lord Mayor said,—"If the commanding officers found a suitable site for a drill-hall and ground, obtained an estimate of the probable cost in a business-like way, and memorialised the Corporation in Common Council assembled, he believed that Court would be prepared to subscribe an amount which would readily be increased by the City Guilds to a figure which would enable them to obtain all they desired."

SOLDIERS' MONEY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—During the year now closing, the following sums have been notified in the *London Gazette* as being due to the next-of-kin of deceased soldiers. By reproducing them in your valuable paper, some of your readers may unexpectedly come in for a very handsome Christmas-box :—

Corpl. Burrell, 3rd Brig., R.A.	£156	7	5
Pte. Thomas Holland, 2nd Batn. 1st Regt.	164	10	5
Serjt. Martin Clowry, 2nd Batn. Gloucester Regt.	261	4	4
Serjt. Edward Jacobs, 4th King's Royal Rifles	192	4	10
Pte. M. O'Neil, 89th Regt.	109	2	1
Pte. Frederick Poole, 85th Regt.	112	16	11
W. Randall, R.A.	181	12	3
Pte. Patrick Casey, 66th Regt.	106	11	11

It is worthy of notice that a sum of £44,500 (arising from accumulated "Soldiers' Unclaimed Balances" since the passing of the Regimental Debts Act, 1863) was recently handed over to the Patriotic Fund Commissioners for distribution. This fact would seem to show the urgent need of greater publicity. Why should not the lists be published in newspapers likely to be read by soldiers' kin?—I am, &c.,

Sidney H. Preston,

1 Great College Street, Westminster, S.W., Dec. 23.

Mr. Dodds, chief inspector of the Admiralty, will visit a number of the shipbuilding yards of Glasgow, Greenock, Leith, and Dundee, within the next few days. Application has been received from shipbuilders in these towns to be placed on the Government list for Admiralty work. The object of Mr. Dodds' visit is to report as to the capacity of the yards and shipbuilding plant for turning out such orders as the Admiralty may have to distribute.

Mr. Thomas Smithson, who died at Bromley on Saturday at the age of 96, had served in the Peninsular War and fought at Waterloo. He entered the Army at the age of 18, and in 1819 received his discharge and a small pension. Two of his grandsons served in the Crimean War, one being killed during the siege of Sebastopol; and a great-grandson is now serving in India.

The Royal Humane Society's testimonial on vellum has been awarded to Qrmr.-Serjt. A. Perry, military staff clerk in the Q.M.G.'s Department at Portsmouth, for his gallant rescue from drowning of Mr. Crane off Southsea Beach in August last. The testimonial was presented at a full-dress parade of the troops in garrison on Sunday by Lieut.-Gen. Sir G. Willis, who at the same time presented Private Kenealy, North Lancashire Regt., with a like testimonial for gallantry in saving life.

The Minister of War at St. Petersburg has proposed, and the Emperor has sanctioned, the construction of new and strong fortifications next year at Batoum, Poti, Kars, and Michaelovski.

Throat Irritation and Cough.—Soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use Epps's Glycerine Jujubes. In contact with the glands at the moment they are excited by the act of sucking, the Glycerine in these agreeable confections becomes actively healing. Sold only in boxes, 7½d, tins, 1s 1½d, labelled "James Epps and Co., Homœopathic Chemists, London." Dr. George Moore, in his work on "Nose and Throat Diseases," says :—"The Glycerine Jujubes prepared by James Epps and Co. are of undoubted service as a curative or palliative agent." While Dr. Gordon Holmes, Senior Physician to the Municipal Throat and Ear Infirmary, writes :—"After an extended trial, I have found your Glycerine Jujubes of considerable benefit (with or without medical treatment) in almost all forms of throat disease."

IMPORTANT to NAVAL and MILITARY MEN.

THE MUTUAL LIFE ASSURANCE SOCIETY.
(Established 1834.)

No **EXTRA PREMIUM** for Climate or War Risk is Charged after the Policy has been Five Years in force, and the Life Assured is aged Thirty.

For Prospectus, Form of Proposal, Accounts, &c., apply to
THE ACTUARY,
39 KING STREET, CHEAPSIDE, LONDON.

NORDENFELT PUNT GUN,

FIRING FOUR CARTRIDGES RAPIDLY FROM ITS MAGAZINE WITHOUT RELOADING.

OLD PUNT GUNS CONVERTED.

Army & Navy Gazette.
LONDON, SATURDAY, DECEMBER 27, 1884.

THE Civil Administration of the Services in this country cannot be said to have been successful. That administration is an incident of Parliamentary Government, and as Parliamentary institutions have been working very badly of late, it is not wonderful that their failure should have been infectious, and that the evil should have extended to the operations of the Navy Department and the War Department. But is it likely that the "country" will try service administrations of the services? We fear not. It is much more likely that the "country," being dissatisfied, will try to obtain efficiency by a change of administration rather than by a change of system. It will put Lord B in the place of Lord C at the Admiralty, and

Lord D in the place of Lord E at the War Office, and then expect marvels. The "country" quite forgets, or does not know, that Lord B will have to march very much in the course of his predecessors, and that, having only ideas and no service knowledge, he must take the counsels of permanent officials; that Lord D will have to follow the dictates of some able militant Vicar of Bray; and that in all the mutations of politics and vicissitudes of party conflict, the only permanent guiding hands at the helm in Whitehall and in Pall Mall are those of the unchanging and unchangeable heads of departments, who placidly roll on for ever till pension-time comes amid the wreck of reputations and the crash of Ministries. And, under the British system, it is lucky for the State that there are at their desks in the public Departments men of experience, sagacity, and ability to guide the incoming neophyte. At the present moment, however, four great departments of State are under a cloud, which naturally overshadow the Government. These are the Foreign Office, which has certainly not secured the greatest measure of success in Egypt, in Africa, or in Asia; the Colonial Office, which is encountering a fierce gust of popular and Press displeasure, seems to be met by an anti-cyclone from the Colonies on account of the German annexations; the Admiralty, which has been forced to cry "peccavi," by the demonstrations of its shortcomings in the administration of the service on which the greatness of power—nay, the existence of this Empire—depends; the War Office, which has followed the fads of reformers who have led them to the margin of a veritable Slough of Despond, in which Militia, Yeomanry, Volunteers, Regulars, Horse, Foot, Dragoons, Artillery, Transport, and Commissariat are all floundering together in one harmonious hole. Suppose that the Government were to pay the penalty of all this at a general election, and that the Opposition were to take the reins of power, would the "country" be placed in a much better position? It is difficult to answer the question. We see that Mr. Gladstone attributes all the troubles he is encountering to the policy of his predecessors, and if Lord Salisbury were in Downing Street he would certainly be entitled to retort with a vengeance on those who had left him such a *damnosa hereditas* all over the world. But the Foreign Office would probably be paralysed by the knowledge that the Fleet was not quite ready yet to support a policy of masterly activity, and that the Army had quite enough to do in India and in Egypt without adding to its obligations. The Colonial Office could scarcely undo for good what has been done for evil. The War Office would probably receive some enlightened Minister who would accept Mr. Knox as his guide—about the best thing he could do, perhaps, just at present—and seek immortality in more "reforms." The Admiralty would put on extra sail and more steam for a while, and with fresh hands at the bellows make more way for a time, but in the end would give way to the pressure of the Exchequer and the Treasury, unless the public insisted on having a fighting fleet, a protecting fleet, a cruising fleet, perfect harbour and coaling-station defences, and a non-aggressive mastery at sea. It is possible, indeed, that the other departments of State might feel sufficiently strong in national support to make efforts to retrieve the position which has been damaged, if not lost; but that can only be done by bold, sagacious, and courageous men, who will not hesitate to encounter great risks if they are convinced it is needful to do so for the sake of peace, honour, liberty, and empire. In the Navy and in the Army, however, efficiency can only be gained and maintained by giving to Naval and Military opinion and experience full weight in council and administration.

Two retirements will take place during the year 1885 among the officers on the Generals' list, viz., General W. C. Napier, on March 19, 67 years of age, and Sir E. Selby Smyth, on June 22, five years unemployed. There will be six retirements of Lieutenant-Generals, viz., Generals W. H. Seymour, C.B., on January 1, five years unemployed; J. Conolly, C.B., on February 19, 67 years of age; C. J. Foster, C.B., on March 13, 67 years of age; the Hon. D. M. Fraser, C.B., R.A., on July 1, five years unemployed; Sir J. Hills-Johnes, on September 1, five years unemployed; and F. Peyton, on September 29, five years unemployed. Among the Major-Generals' the following retirements may be anticipated Generals G. B. Milman, January 1, 62 years of age; W. K. M'Leod, April 19, five years unemployed; E. Howard-Vyse, April 25, five years unemployed; H. P. Yates, C.B., R.A., May 1, five years unemployed; E. A. Williams, C.B., R.A., May 1, five years unemployed; W. Rickman, May 19, five years unemployed; G. N. Boldero, July 1, five years unemployed; J. Peel, July 11, five years unemployed; D. J. Gamble, C.B., August 15, 62 years of age; H. A. Sarel, November 1, 62 years of age; J. F. Pennycuick, C.B., R.A., November 8, five years unemployed; P. G. Pipon, C.B., R.A., November 13, five years unemployed; G. E. Baynes, December 10, 62 years of age; G. T. Field, R.A., December 15, five years unemployed; C. O. Creagh-Osborne, December 20, 62 years of age; S. Hennings, C.B., December 26, five years unemployed; G. H. Page, December 29, 62 years of age.

The retirements from the fixed Establishment of General Officers which will take place next year under the age clause will leave vacant the following appointments, viz.:—Major of the Tower of London, vice Major-General Milman, on January 1; Lieutenant-Governorship of Guernsey, vice Major-General Sarel, November 1; and Commandantship of Staff College, vice Major-General Creagh-Osborne, on December 20.

The following retirements may be anticipated from among the General Officers of the Indian Staff Corps during the ensuing year, viz.:—Major-Generals J. Loudon, Madras S.C., on March 14, 62 years of age; A. Ritherdon, Madras S.C., on May 31, 62 years of age; Sir C. C. G. Ross, K.C.B., Bengal S.C., on July 8, 62 years of age; Abdy, Madras S.C., on September 19, 62 years of age; and Lieutenant-General H. K. Burne, C.B., Bengal S.C., on November 30, five years unemployed.

The following retirements may be expected to take place from the Colonels' List during the year 1885, viz.:—Colonels T. A. L. Murray, R.E., March 1, 60 years of age; E. M. Beresford, half-pay, Scots Guards, March 20, five years unemployed; J. Jago, half-pay, 74th Highland L.I., May 13, 59 years of age; Sir J. Stokes, K.C.B., R.E., June 17, 60 years of age; A. Nugent, half-pay, Scots Greys, June 21, five years unemployed; J. A. Ruddell, half-pay, 25th Foot, June 21, five years unemployed; J. Jordan, C.B., half-pay, Regimental District, June 24, 59 years of age; W. T. Goldsworthy, half-pay, 56th Foot, June 30, five years unemployed; F. D. Middleton, C.B., J. P. Battersby, A. C. K. Lock, and P. Preston, C.B., all half-pay; C. E. Grogan, Regimental District; G. F. Walker, half-pay; R. Wadeson, V.C., Chelsea Hospital; J. W. Barnes, Regimental District, July 1, 58 years of age, *vide* Clause 102 I, of Royal Warrant; C. N. Sturt, half-pay, Grenadier Guards, August 7, five years unemployed; Sir C. B. Nugent, K.C.B., R.E., September 25, 60 years of age; S. W. F. W. Wilson, half-pay, November 5, five years unemployed; F. Eteson, half-pay, Assistant-Adjutant and Quartermaster-General, Dover, November 17, 55 years of age; W. Paterson, half-pay, December 30, 55 years of age.

Only three regimental district commands fall vacant during the ensuing year under the limitation rule, viz., those of the 23rd, at Wrexham, vice Colonel the Hon. S. Mostyn, on April 10; the 87th, at Armagh, vice Colonel E. T. St. L. MccGwire, on May 10; and the 11th (Exeter), vice Colonel F. F. Hamilton, C.B., on July 10.

The commands of two regiments of Foot Guards, the Grenadiers and Coldstreams, become vacant during the next twelve months. The former on August 7, when Colonel E. H. Clive's period of service in the appointment will expire, the latter on November 10, when Colonel G. R. FitzRoy completes his term. Colonel Clive will, in all probability, be succeeded by Colonel W. F. Davies, now commanding the 1st Battalion, Colonel FitzRoy's place being taken possibly by Colonel G. J. Wigram, C.B., commanding the 2nd Battalion.

There will be no compulsory retirements from age from the Chaplains' Department during the ensuing year.

In the Commissariat and Transport Staff, Deputy-Commissary-General H. J. Brownrigg, C.B., will be retired on April 16 next, on the completion of seven years' service in the rank. In the lower rank, the only retirement will be that of Assistant-Commissary-General J. H. Randall, C.B., who will be 55 years of age on June 29, and will have to go, unless previously promoted.

There will be no compulsory retirements next year in the two senior ranks of the Army Medical Department. In the rank of Brigade-Surgeon, Mr. F. W. Moore will be retired, from age, on November 14; Mr. S. B. Roe, C.B., on September 11; Dr. S. S. Skipton, on October 25. Surgeon-Major H. J. H. Lawrence, Grenadier Guards, will be retired on June 21; Surgeon-Major T. J. Orton, on December 4; Surgeon-Major F. Pennington, on September 10; Surgeon-Major J. Martin, on September 17.

Deputy-Commissary-General of Ordnance W. C. Nagle will be retired on July 9 next, on completing seven years' service in the rank. The other retirements from the Ordnance Store Department which may be looked forward to during the year are those of Assistant-Commissaries-General of Ordnance S. O. Rogers, on July 13, and G. E. March, on July 25, both from age.

The following retirements take place during the year 1885 from the Army Pay Department, viz.:—Among Chief Paymasters, Lieutenant-Colonel W. Dring, in November; among Staff Paymasters, Major R. S. Rouse, on March 25; also Major W. F. Wheble, on June 21.

Four retirements will take place from the Army Veterinary Department during the ensuing year, viz.:—First-class Veterinary-Surgeons M. J. Harpley, Royal Horse Guards, on January 30, and H. Dawson, on April 30; and Inspecting Veterinary-Surgeons C. Steel, on June 1, and T. P. Gudgin, on July 27.

Experiments are now being carried out at various stations with a new pattern boot-sole, so constructed as to require but little skill to attach to the upper, and which can easily be replaced by the soldier himself on service, thus obviating the necessity of skilled labour for this purpose. Various proposals and inventions have from time to time been under consideration by the Permanent Infantry Equipment Committee, having for their object the doing away with the necessity of the soldier carrying a second pair of boots in his valise when in the field. It has been suggested that a pair of light, waterproof canvas shoes should be substituted for the second pair of boots; but something more than this is required. In the field the soldier can dispense for a considerable time with a second pair of boots. These would be close enough in the first line of transport. The pair the soldier has on, if of good material and properly nailed and tipped, will last for six weeks or two months, and if this invention for replacing soles on service should prove successful and be adopted in the service, it will be only necessary to carry a small supply of spare boots with each regiment to replace the few which, from defective make, may wear out prematurely; there would then be no need to load every soldier with an extra pair of boots (a weight of at least four pounds) because a few men require to have their boots replaced.

Major-General Downes, R.A., will, we hear, retain his appointment as Commandant of the Local Forces in South Australia until July 1 next, when he will leave the colony on the resignation of his appointment.

The experiments which have been carried out for many months at the principal military stations with a number of Infantry valises made of a material used for this purpose in the French Army, have been brought to a conclusion. During the past twelvemonth these valises have been worn constantly on guard, at field-days and route-marching, and by defaulters at drill, and have borne the ordeal well, showing no signs of wear. They will, in this respect, bear favourable comparison to the present valise of the British Army.

Major-General E. G. Bulwer, C.B., has accepted the offer of an extension of his appointment as Inspector-General of Recruiting until the end of the financial year.

Colonel Robinson, A.Q.M.G., at Aldershot, has been appointed President of the Permanent Committee on Dress and Equipment, which has been reconstructed, and is now composed of the following officers:—Lieutenant-Colonels Hanning Lee, 2nd Dragoon Guards; Mangles, 20th Hussars; Farrington, 73rd Highlanders; Slade, Rifle Brigade; Scott, R.H.A.; and Helsham Jones, R.E.; Assistant-Commissary-General Parkyn, Commissariat and Transport Staff; Assistant-Commissary-General of Ordnance P. Moors; and Surgeon-Major Stafford, Medical Staff. Of these officers, Colonel Jones is the only one who served on the original committee, formed in March, 1883.

The appointment of Colonel J. M. G. Tongue, 24th South Wales Borderers, to the Inspector-Generalship of Musketry is due to his special qualifications, he having served on the musketry staff as a Deputy-Assistant-Adjutant-General, and displayed a lively interest in the work of this department. Colonel Tongue takes up the duties of the appointment from the 1st prox.

According to latest returns, 40 Infantry battalions of the Volunteer Force are now clothed in grey of various hues, 58 in green, and 111 in scarlet. The "convict uniform" chiefly finds favour in the Metropolis, Bucks, Herts, Northampton, Somerset, and Perth; the green in Kent, Surrey, Worcester, Wilts, Essex, Gloucester, Dorset, and London,—in the last-named with good reason, as these regiments are attached to the 60th Rifles and Rifle Brigade.

It seems out of 24 service batteries of Horse Artillery, 17 are armed with the 9-pounder and seven with the 13-pounder. Of 90 service batteries of Field Artillery, 52 have the 9-pounder, five the 13-pounder, and 23 the 16-pounder. The new 22-pounder, which we were told was the best field-gun possessed by any European nation, has not, it appears, been issued to any battery.

No progress appears to have been made in the amalgamation of the North and South Mayo regiments of Militia, as recommended by the War Office Committee some years ago. The combined regiments muster ten companies, with at the present time but eight subalterns between them. There are, however, two Adjutants and staffs. Yet the War Office makes no effort to give even one Militia battalion to the King's Own Borderers, and refuses its sanction to any of the new Militia battalions which have been on paper for the last five years being raised by any separate organisation.

The Navy.

ADMIRALTY, Dec. 19, 1884.

Gunner G. J. Metters has been promoted to the rank of Chief Gunner in her Majesty's Fleet (Dec. 19).

Royal Naval Artillery Volunteers (Liverpool Brigade).—James Gordon Alison, Esq., to be Sub-Lieut. (Dec. 19).

ADMIRALTY, Dec. 24, 1884.

Navigating Lieut. J. Stocker has been promoted to the rank of Staff Com. in her Majesty's Fleet (Dec. 2); the Rev. A. Baker, M.A., has been appointed a Chaplain in her Majesty's Fleet (Dec. 13); Alfred Robert Johnson, Esq., B.A., has been appointed Naval Instructor in her Majesty's Fleet (Dec. 15).

ADMIRALTY, Dec. 26, 1884.

Lieut. H. D. Barry has been promoted to the rank of Com. in her Majesty's Fleet (Dec. 1).

APPOINTMENTS.

Staff Commander—G. A. Broad, to the Triumph.

Lieutenants—Frederick Hutchinson, John Gibbings, A. H. Anson, S. W. A. H. Gray, F. A. Fisher, R. L. Kidd, and M. W. Portman, to the Triumph; H. F. G. Berkeley, to the Duke of Wellington; E. B. Fletcher, to the Hercules, additional, for the Coastguard at Swanage; A. B. Mansell, to the Lord Warden, additional, for the Coastguard at Burntisland; F. A. A. G. Tait and E. H. Davenport, to the President, additional, for study at the Royal Naval College.

Sub-Lieutenants—C. W. Sutton and E. H. Grafton, to the Triumph; E. S. Fitzherbert, to the Repulse; J. D. Daintree (a.), to the Excellent, additional.

Midshipmen—F. W. Melville, A. C. Sykes, William Driffield, and H. W. Armstrong, to the Triumph; B. St. L. Bellairs, to the Constance; Lord Percy S. Douglas, to the Triumph; J. S. W. Talbot S. Ponsonby, to the Northampton; H. S. Grenfell and A. B. F. Dawson, to the Minotaur.

Naval Cadets--Edward Reeves, A. A. Gordon, E. R. Hamilton, H. N. Grant, W. S. Lambert, R. D. Jeffreys, Arthur Halsey, E. N. K. Fair, E. A. Baird, F. G. St. John, and M. S. Pasley, to the Triumph; J. C. Ley and P. S. Watson, to the Minotaur; W. R. Hall, to the Northampton; John Luce and Arnold Kirke, to the Minotaur; H. L. P. Heard, to the Agincourt; H. L. Mawley, to the Temeraire; A. P. McEwan, to the Minotaur; T. L. Shelford, to the Northampton; A. C. M. Watling, to the Agincourt; W. R. Willis, to the Sultan; J. L. C. Taylor, to the Superb; W. H. D. Margeson, to the Northampton; W. A. Barkley, to the Agincourt; V. G. Gurner and C. J. Collins, to the Achilles; Hon. R. C. Craven, to the Temeraire; G. de L. O. Johnson, to the Achilles; A. D. Katinakis, to the Superb; E. K. Loring, to the Achilles.

Staff Surgeons—W. H. Calahan, to the Assistance; G. B. Murray, to Plymouth Hospital; Thomas Bolster, to the Triumph.

Surgeons—F. N. Trevan and R. I. Lawson, to the Triumph.

Paymaster—H. G. Ray, to the Triumph.

Assistant - Paymasters — George Whitcroft, to the Triumph; W. Le G. Pullen, to be Secretary to Rear-Admiral Lethbridge; Montague Stephens, to the Revenge.

Engineers—George Brewer, to the Asia, additional, for the Devastation; W. W. Hole, to the Indus, additional.

Assistant-Engineers—W. J. Anderson, to the Wye; J. L. Fleetwood, to the Minotaur.

Clerks—H. J. Britten, to the Minotaur; L. A. Bebb, to the Revenge; Frederick Freglothan, to the Northumberland.

Gunners—G. H. Matthews, to the Triumph; Richard Skuse, to the Indus, additional, for the Inconstant; William Barrett (a.), to the Duke of Wellington, for recruiting office; George Darby (a.), to the Agamemnon, part complement.

Boatswains—William Marchant, to the Triumph; Elias Lake, to the Triumph, additional, for Esquimault Yard; Thomas R. Axon and James Smith (a.), to the Triumph.

Carpenters—G. T. Berry, to the Triumph; E. A. Kelynack, to the Triumph, additional, for Esquimault Yard.

COASTGUARD.

Chief Boatman—George Dennis, West Mersea, to be chief boatman-in-charge, St. Augustine's, vice G. Langridge, pensioned.

Commissioned Boatman—George Bellew, Ross, to be chief boatman, Dingle, vice P. Kinsley, promoted.

Achilles, Capt. Buller, is at Devonport; she is to be ready for sea on Jan. 7.

Agamemnon, Capt. Long, is at Malta, undergoing repair.

Agincourt, Capt. Meade, is at Devonport; she is to be ready for sea on Jan. 7.

Albacore, Lieut.-Com. Smythies, was at Port Said by last advices.

Albatross, Com. Hicks, on Nov. 5 was on passage to Shanghai, calling at Yangtse ports. She will be sent to Ningpo to relieve the Daring shortly.

Alberta, tender to Victoria and Albert, Capt. Fullerton, conveyed the Duchess of Albany and her two children from Gosport to Osborne on Tuesday.

Alecto, Lieut.-Com. Harston, was due at Fernando Po on Dec. 7.

Alexandra, Capt. Rawson. On the 9th inst. an entertainment was given on board this ship, under the superintendence of Lieut. Grimston. The programme consisted of songs, recitations, and dances, and a farce by the gun-room officers. A very pleasant evening's amusement terminated with an impromptu dance. The Alexandra was at Malta on Dec. 15.

Amethyst, Capt. Brent, was off Fernando Noronha on Dec. 9.

Arab, Com. Stopford, was at Aden on Dec. 11, and would visit Berberah Dec. 18.

Audacious, Capt. Pearson, was at Amoy on Oct. 27, and would remain until relieved by the Champion, and then proceed to Hong Kong.

Bittern, Com. Mann, was at Suez on Dec. 3.

Boadicea, Capt. Church, was at Simon's Bay on Tuesday last.

Briton, Capt. Lloyd, is in the Persian Gulf.

Bullfrog, Lieut.-Com. Papillon, was at Jamaica on Dec. 4.

Calliope, iron screw corvette, went out of Portsmouth Harbour on Tuesday for a six hours' contractors' trial of her engines. Altogether, the trial was very satisfactory. The indicated horse-power realised was 3,150, or 150 more than the contract, and the mean speed was nearly 14¾ knots. The ship was ballasted so as to afford the engines full scope, and on her return to harbour she was formally taken over by the dockyard authorities. On Wednesday she was placed in the steam basin for completion. A further trial of the engines under forced draught is to be made by the Admiralty officials, when a much greater speed is expected. It will probably take place in about three or four months' time.

Canada, Capt. Curtis. A despatch, dated Bermuda, 25th ult., says that on the previous Tuesday the men of the Canada were engaged in prize-firing exercise off the east end, when one of the cartridges with which one of the guns was loaded exploded. Four of the men who were near were seriously injured, one so much so that he died the same evening. His name was Patrick Aspide. When the information left the island it was understood that the other three men were doing well. The cause of the accident did not transpire, but it was presumed that some of the fire must have remained in the chamber of the gun, and when the cartridge was inserted it exploded. She was at Bermuda on Dec. 4.

Carysfort, Capt. Stewart, was at Alexandria on Dec. 3.

Champion, Capt. Powlett, was at Amoy by last advices.

Cleopatra, Capt. Hippisley, was at Shanghai on Nov. 5.

Cockatrice, Com. Hayes, was at Canstantinople on Dec. 3.

Condor, Com. Domville, was at Agik on Dec. 12.

Constance, Capt. Doughty, would leave Rarotonga on Dec. 23 for Coquimbo.

Coquette, Lieut.-Com. Crowe, was at Massowah on Dec. 12.

Crocodile, Capt. Carr, has called at Gibraltar on her way to Bombay.

Cruiser, Com. Hughes-Hallett, was to cruise off Malta from Dec. 15 to 19.

Curacoa, Capt. Hanmer, was at Woosung on Nov. 5. She would proceed shortly to Hong Kong to refit and make good defects, preparatory to relieving the Pegasus as senior officer's ship in the Straits of Malacca.

Cygnet, Lieut.-Com. Gardiner, was at Suakim on Dec. 12.

Daring, Com. Ching, was at Ningpo on Oct. 31, expecting to be relieved by the Albatross and come to Shanghai.

Dart, Lieut.-Com. Moore, was at Sydney by last advices.

Decoy, Lieut.-Com. Hay, was to leave Berberah for Aden, when last heard from.

Diamond, Capt. Dale, was at Sydney on Oct. 22.

Dido, Capt. Vander-Meulen, was at Barbadoes on Oct. 30.

Dolphin, Com. Wilmot, was at Suakim on Dec. 12.

Dragon, Com. Anson, was at Bushire on Nov. 22.

Dreadnought, Capt. Fremantle, was at Malta on Dec. 15.

Esk, Lieut.-Com. Cochrane, was at Swatow on Oct. 31. (Commissioned temporarily as tender to Victor Emanuel.)

Espoir, Lieut.-Com. Gamble, was at Chemulpo, Corea, on Dec. 13.

Espiegle, Capt. Bridge, will return to England to be paid off on the arrival of the Opal.

Euryalus, Capt. Hastings, would leave Bombay for Colombo on Dec. 20.

Express, Lieut.-Com. Knox, was at Jamaica on Nov. 27.

Falcon, Com. Pringle, was at Massowah on Dec. 12.

Fantôme, Com. Osborne, was at Bermuda on Dec. 4.

Firebrand, Lieut.-Com. Dickson, was at Singapore on Oct. 16; ordered to proceed to Hong Kong on return of the Pegasus from cruise.

Flirt, Com. Craigie, is ordered to Simon's Bay.

Fly, Com. Hope, was at Takao, Formosa, on Oct. 31; ordered to proceed to Hong Kong when relieved by the Wanderer, and prepare for passage to England.

Flying Fish, Capt. Maclear, is surveying on the coast of Corea.

Forester, Lieut.-Com. Hodgkinson, is still at Skye.

Forward, Lieut.-Com. Furlonger, is ordered to St. Helena.

Foxhound, Lieut.-Com. McQuhae, was at Hoihow on Oct. 26, and will probably be relieved by the Zephyr, when refitted, and proceed to England.

Frolic, Com. Parr, when last heard from was starting for the Oil Rivers with her Majesty's Consul, and would then return to Cape Coast Castle.

Garnet, Capt. Hand, is on her way to Bermuda.

Goshawk, Lieut.-Com. Moore. A telegram from Natal, dated Dec. 23, states that this ship has planted the British flag at Port Durnford, under orders from home, in order to prevent any mistake by foreign Powers as to that territory being under British protection. She has since returned to Durban. (Mails to Cape Coast Castle.)

Grappler, Lieut.-Com. Cochrane, is at Gibraltar.

Harrier, Lieut.-Com. Pike, was at New Guinea by last advices.

Hector, Capt. Arthur, is at Cowes. She will remain as guardship during the Queen's stay at Osborne.

Heroine, Capt. Blackburne, is ordered to meet the flagship at Payta on Jan. 15.

Humber, Com. Errington, is to remain at Suez for the present.

Imogene, Lieut.-Com. Gough, was at Constantinople on Dec. 3.

Inflexible, Capt. Seymour, left Malta for home on Dec. 22.

Invincible, Capt. Buckle, was at Malta on Dec. 15.

Iris, Capt. Rice, was at Malta by last advices.

Jumna, Capt. Singleton, will leave Portsmouth for Bombay to-morrow. She takes out to Malta the 2nd South Yorkshire Regt., and will receive at Malta for India the 2nd Royal Irish Regt. In addition to the regiment she will embark at Portsmouth for Bombay sundry drafts and details belonging mainly to the Artillery. A few officers will also join the ship at Suez.

Kingfisher, Com. Rainier, will probably leave for the East Indies to-day.

Linnet, Com. Hill, was at Hankow on Nov. 5.

Mallard, Lieut.-Com. Brown, is at Bermuda refitting. She will not be ready for sea until the end of January.

Merlin, Lieut. Brenton, left Shanghai on Dec. 19 for Port Hamilton.

Midge, Com. Hotham, was at Foochow on Oct. 25.

Minotaur, Capt. Britten, is at Portsmouth. She is ordered to be ready for sea on Feb. 20.

Miranda, Com. Acland, was at Sydney by last advices.

Monarch, Capt. Bedford, is at Alexandria.

Mutine, Com. Edwards, is ordered to join the flagship at Panama.

Myrmidon, Com. Hoskyn, is still surveying in the southern part of the Red Sea.

Nelson, Comdre. Erskine, was at Sydney on Dec. 23, awaiting the arrival of Admiral Tryon.

Neptune, Capt. Maxwell, is at Portsmouth; she is to be ready for sea on Jan. 7.

Northampton, Capt. Digby, was at Bermuda on Dec. 4.

Northumberland, Capt. Robinson, is at Devonport. She is to be ready for sea on Jan. 7.

Opal, Capt. Brooke, left Cape Coast Castle on Nov. 22 for Anno Bom, St. Paul de Loanda, St. Helena, Tristan d'Acunha, Simon's Bay, and Sydney, where she would relieve the composite sloop Espiegle, Capt. Bridge, which vessel would then return to England. The Forward was ordered to meet the Opal at St. Paul de Loanda, with Sub-Lieut. Allen, of the latter ship, who has for some time past been acting-lieutenant of the Flirt.

Orontes, Capt. Andoe, left Simon's Town on Dec. 18 for England.

Osprey, Com. Dowding, was at Zanzibar on Nov. 21.

Paluma, Lieut.-Com. Richards, arrived at Devonport on Dec. 23, *en route* to Australia.

Pelican, Com. Hope, left Panama for Callao on Dec. 23, and is ordered to meet the flagship at Payta on Jan. 15.

Philomel, Com. Lang, was at Berberah on Dec. 11.

Rambler, Com. Vereker, arrived at Devonport on Dec. 23, *en route* to the East Indies.

Rapid, Capt. Campbell, arrived at Cape Coast Castle on Nov. 21, 38 days from Plymouth. The following morning Capt. Campbell took over the duties of senior officer on the West Coast of Africa from Capt. Brooke, of the Opal. The Rapid was at Cape Coast Castle on Nov. 25.

Raven, Lieut.-Com. Ross, was at New Guinea by last advices.

Sapphire, Capt. Kinahan, was at Foochow on Oct. 25.

Sappho, Com. Castle, is ordered to meet the flagship at Payta on Jan. 15.

Satellite, Capt. Theobald, remains at Esquimalt until the arrival of Capt. Alington.

Seahorse, Staff Com. Hoskin, is at Portree, Skye.

Serapis, Capt. Douglas, arrived at St. Vincent on Tuesday, on her way home.

Sphinx, Comdre. Molyneux, was at Suakim on Dec. 23.

Starling, Lieut.-Com. Sanders, left Alexandria for Suakim on Dec. 18.

Sultan, Capt. Tracey, is at Portsmouth; she is to be ready for sea on Jan. 7.

Superb, Capt. Cleveland, is at the Piræus.

Swift, Com. Bromley, was at Canton on Nov. 11.

Swiftsure, Capt. Brand, is ordered to return to England when relieved by the Triumph; she is at present on her way to Panama.

Swinger, Lieut.-Com. Marx. Judgment has been given in the case of the Forest King, a labour vessel, seized by the Swinger for alleged contravention of the Acts relating to the engagement and shipment of South-Sea Islanders for work in Queensland. The vessel is ordered to be restored, together with her goods and effects, and with costs. It may be stated that Lieuts. Bruce and Torlesse, who boarded the Forest King, reported that her papers were correct, and that it was after an informal inquiry held by Mr. Milman, police magistrate at Cooktown, that the seizure took place.

Tamar, Capt. Warren, left Simon's Town on Dec. 13 for Australia.

Temeraire, Capt. Domville, is ordered to Malta.

Tenedos, Capt. Drummond, is in dock at St. John's, Newfoundland.

Triton, Staff Com. Tizard, having completed her duties for the season, was laid up at Chatham on Tuesday; those of the officers and crew who are not required for employment in the ordinary duties of the vessel being turned over to the Royal Naval Barracks at Sheerness.

Turquoise, Capt. Woodward, was on her way to Mauritius from Zanzibar by last advices.

Tyne, Com. Cochrane, arrived at Portsmouth on Tuesday from Egypt and the Mediterranean ports. She brings a large number of military and other invalids, as well as a few details from Malta; from Gibraltar, Capt. Smith, R.A., Surg.-Major Collier, and a draft of 66 men belonging to the East Surrey Regt., not available for service in India; also a number of naval supernumeraries.

Undine, Lieut.-Com. Cross, is expected shortly at Sydney.

Vigilant, Lieut.-Com. Maxwell, was at Shanghai on Nov. 5, bearing the flag of the Commander-in-Chief, and would leave Shanghai for Hong Kong on Nov. 12, calling at intermediate ports.

Wanderer, Com. Churchill, left Hong Kong on Nov. 10 for Amoy, Tamsui, and then to relieve the Fly at Takao (Formosa)

Watchful, Lieut.-Com. Goodrich, arrived at Cape Coast Castle on Nov. 22 from Accra, Jellah Coffee, and Winnebah, and remained there on Nov. 25. This vessel would be employed in the Bights of Benin for the present. She was sent to Accra to convey the Governor of the Gold Coast Colony to Lagos on an official visit, but was unable to carry out this programme, owing to her drawing too much water to cross with safety the bar of the Lagos river.

Woodlark, Com. Clutterbuck, was on her way from Bombay to Zanzibar by last advices.

Zephyr, Lieut.-Com. Hope, has arrived at Hong Kong from Wenchow, and reports that all was quiet at that port when she left, and that the rebuilding of the houses destroyed in the recent riot would probably be commenced shortly.

Reviews.

Paris and the Parisians: the Year after Waterloo. By the Rev. Burroughes Norgate. (London Literary Society.)

If any reader should feel curious to learn something about Paris and its environs as they were immediately after Waterloo, he had better make an investment in this little book, which is no doubt a faithful record of observations made during a visit to Paris in 1816. The writer seems to have entered into his work *con amore.* On May 7, 1816, at half-past 9 (how particular the editor is), Miss Knight (Reader and Lady-in-Waiting to Queen Charlotte), the author, and his brother, with their servants, left London in her carriage-and-four for Dover. Here a sea captain was engaged to convey the entire party to Calais, in his well-found craft, the *Flora*, for fifteen guineas. Nothing particular intervened until the arrival in Paris, where the travellers seem to have done very well. Here is their contract note:—"Numero 13, Rue Genelle, Faubourg St. Germain.—For a month; accommodation to consist of an ante-room, dining-room, drawing-room, and three excellent bed-rooms, forming six rooms *en suite;* a servants' sitting-room, and two bed-rooms; also another bed-room, and divers little 'glory-holes,' on a pinch available as bed-rooms. The furniture splendid, the season just commenced, and the situation all that was wished for; price sixteen guineas; no extras. An equally advantageous arrangement was concluded as to meals." On June 29 the travellers returned to England by Rouen. The reader, however, had better read the book, as very much of it can scarcely fail to interest, even though it treats of times so long gone by.

Mr. Murray has issued a new edition of Mr. James's *Wild Tribes of the Soudan*, which we noticed, when it first appeared, as an interesting book of sporting travel in the Basé country, and the present volume is made additionally attractive and useful by a chapter on the political aspect of the Soudan, by Sir S. Baker, and by an account of the routes from Berber to Wady Halfa (or *vice versâ*), which are by this time likely to be better known than liked by many officers. Sir Samuel Baker's contribution is a repetition of what he has on former occasions written and said, truly and forcibly, on the retention of the Soudan, in every word of which we agree. Before Baker and Gordon ever set their foot in Khartoum, there were Europeans established along the Nile from Gondokoro to Khartoum, living and trading in peace and security, under the protection of the flag of the Viceroy. There were telegraphs, steamers, post offices, regular government—in a word, civilisation making head against savagery and slavery; and because we muddled all the influence of the Khedive away, we are proposing to punish Egypt for our own fault by surrendering her territory. The reader will find much in this reprint to interest and instruct him on these points.

Comic Sketches from English History, &c. By Lieut.-Col. Seccombe. (Allen and Co.)—The history of England has been "comically" treated more than once ere Col. Seccombe took it in hand, but we are bound to say that we never got beyond a faint smile over the results till now. We must give to the pleasant writer and limner of this handsome volume the credit of treating with pen and pencil a very serious subject in such a fashion that it is impossible to resist many a hearty laugh over his verse and his illustrations, even if one were disposed to reject such agreeable auxiliaries in the severe combat with "Christmas joys" imposed by the season and its adjuncts. There is wit in the rhyme and there is wit in the sketches, which are full of pretty contrasts and fanciful suggestions, such as the landing of William "Cœur de Lion in Palestine." The introduction is exceedingly droll, as are many of the vignettes and woodcuts. It is a very pretty gift-book, but we admit we would rather keep it than give it away.

Cheap and Choice. By Mrs. Whitcombe. (Dean and Son.)—A highly useful sixpennyworth for small families which are affected by small incomes. This will prove a smart competitor when entering the lists with more elaborate dissertations on the culinary art.

The Golden Centre. (Cassell and Co., Limited.)—The "extra part of the *Quiver*" may almost claim to rank as an *édition de luxe.* The type and paper are beyond praise, and the "contents" present stories for the most part fraught with interest. This literary effort affords another bright specimen of what can be done in "cheap literature."

One Hundred and Sixty Culinary Dainties. By Samuel Hobbs. (Dean and Son.)—This very elaborate treatise, on a highly important scientific question, seems really to be exhaustive of the subject. It has been prepared by a skilled specialist for the use of the epicure, the invalid, and the dyspeptic; while abundance of testimonials are forthcoming as to the ability of the author to perform what he undertakes. His object is a laudable one, namely, that of submitting to the public a book written by a real, *bonâ fide* cook, and not a mere collection made up by persons who are quite uninitiated in the art of cookery. Mr. Hobbs also prefers, and shows good reason for doing so, a small book to a large one.

The Kennel Review.—The Christmas number of the *Kennel Review* takes a new lease of its existence, and evidently intends to do something startling during the current year, commencing Jan. 1, 1885. The success of the present number has suddenly made it necessary to prepare a third edition. To meet this demand the size of the *Kennel Review* is to be doubled, and will still leave in the "waiting shelves" ample copy to keep up the merry-go-round Much is promised in the next number, chiefly relating to the reports of the Crystal Palace, Aberdeen, and Bristol shows; also one on the instinct of dogs. The *Kennel Review* offers to its subscribers some special advantages. It gives a complete list of prize-winners at all shows held in Great Britain and Ireland, and nearly all held abroad. Moreover, each volume has a carefully-compiled index. As to the specimens of the dogs now printed, we can only say that they are quite deserving of a volume to themselves in which might be given interesting traits of the disposition of dogs and the peculiar points which they may possess, and which so much enhances their value.

The *Theatrical Programme*, which has just entered upon the second year of its existence, is certainly a most useful publication. It contains the complete programmes of the London theatres, particulars of all public entertainments, picture galleries, &c., list of cab fares, and much other useful information. It is also prefaced by several pages of smart original gossip, reviews of new plays, &c., and is altogether one of the brightest little journals ever issued at the low price of one penny.

ROYAL MILITARY ACADEMY.

The following are declared by the Civil Service Commissioners to have obtained the first 45 places at the examination held in November and December, 1884, for admission to the Royal Military College, Woolwich:—

Name.	Total No. of Marks.	Name.	Total No. of Marks.

Obituary.

Admiral Sir George Rodney Mundy, G.C.B., D.C.L., died on Tuesday, at his residence in Chesterfield Street, aged 79 years. He was the second son of Gen. Godfrey Basil Mundy, by the Hon. Sarah Brydges Rodney, youngest daughter of the celebrated Admiral Lord Rodney, and was born April 19, 1805. He was educated at the Royal Naval College, Portsmouth, and in 1819 embarked as a volunteer on board the Phaeton, 46, on the North American station, and afterwards served on the Mediterranean and South American stations; obtained his first commission as lieut. in 1826, and was promoted to the rank of commander in Feb. 1828. He obtained the command of the Favourite in 1833, with which he served in the Mediterranean, and served in that vessel in the Turkish commotions in 1836, when he became senior officer on the coast of Tripoli. He obtained his post rank in Jan., 1837, when he was appointed to the Iris, and subsequently served on the African, Irish, East Indian, and Chinese stations. In 1846, during an expedition up the River Bruné, under Rear-Admiral Sir Thomas Cochrane, against the Sultan of Borneo, he was actively employed, and captured the forts in the river. He was afterwards sent with 19 boats and a body of 472 men under his orders, accompanied by Mr. Brooke, up several branches of the Borneo River, marching into the interior of the country with the view, if possible, of capturing the Sultan's person, but, unfortunately, he was unable to carry out his instructions, owing to difficulties of no ordinary description. As a mark of the confidence with which his conduct throughout such arduous service had impressed the com.-in-chief. he was left in charge of the whole Borneo station from Aug., 1846, to Feb., 1847, during which period he carried out the extensive operations against the pirates, and twice received the thanks of the Admiralty. During the Russian War of 1854-6, he was capt. of the Nile, and took part in the siege and capture of Bomarsund. He was second in command of the Mediterranean from 1859 to 1862, and commanded the British squadron at Palermo and Naples during the Italian revolution of 1859-60, and on the coast of Syria during the French occupation in 1861. The deceased admiral was com.-in-chief of the North American and West Indian Station from 1867 to 1869, and was com.-in-chief at Portsmouth from 1872 to 1875, when he was placed on the retired list. The late admiral was made a Companion of the Order of the Bath in 1859, a Knight Commander in 1862, and a Grand Cross of the Order in 1877. His commission as rear-admiral bore date July 30, 1857, vice-admiral December 15, 1863, admiral May 26, 1869, and admiral of the fleet (on the retired list) December 27, 1877. He had enjoyed the good-service pension of £300 a year since February, 1870. O'Byrne states that "in 1832 Captain Mundy served on board the Donegal, 78, as confidential agent under Vice-Admiral Sir Pulteney Malcolm on the coast of Holland, and was officially present at the siege of Antwerp. In 1833 he was employed by the First Lord of the Admiralty, Sir James Graham, on a special mission to Holland and Belgium. On the suspension of hostilities he returned to England." The deceased Admiral was author of "H.M.S. Hannibal at Palermo and Naples, 1859-61." He was also one of the oldest members of the Navy Club, and of the Royal Naval Club of 1765.

The Portuguese gunboat Zaire left Lisbon on Monday to join the squadron in West African waters, which is composed, as heretofore, of seven vessels.

DELIGHTFUL ODOUR OF VIOLETS—VERY LASTING.—JOHN R. Many interesting communications, reviews and letters, &c., are unavoidably omitted, owing to want of space, this week.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira;* in addition to all the home and colonial professional periodicals and journals.

OUR TORPEDO FLEET.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—While we are tinkering with our Navy, and, to quiet the public mind, arranging to build some 30 torpedo-boats in a period of five years, I should like to draw your attention to what has been done by other countries in this respect. Take Germany, as an instance, in the days of the "Battle of Dorking," we used to be far more afraid of her than of France: the Germans are long-headed people, and I think, perhaps, we should still do well to fear them more than our nearer neighbour. Well, Germany is said to have actually building 150 torpedo boats, all, no doubt, to be armed with the Whitehead torpedo. Now, I ask any sane man what chance a fleet in the Channel or North Sea could have against, say only half this number of boats, able to choose their own night and time, and dash out under the most favourable circumstances to the attack. I do not think we half apprehend the revolution that torpedoes and fast torpedo craft will make in all future wars, though the Germans evidently have done so. It seems to me that in time of war, our Fleet will simply be chased from the Channel out to sea, or forced to take refuge in port, behind an efficient torpedo defence. Let us have ironclads by all means of a small size, and in sufficient numbers, plated as thickly and completely as possible, but in addition we ought to order at least 100 first-class torpedo-boats at once, which, whether they can protect our fleet against attack from craft of their own sort or not, at any rate would give us the satisfaction of feeling that when our own fleet was blown up and destroyed, we should be able to pay the enemy back in their own coin should their vessels attempt to leave port. In conclusion, I should like to draw the attention of your readers to an article in the current number of the *Revue des Deux Mondes*, entitled "Torpilleurs et Canonnières," which is well worth reading.—I am, &c.,

C.

The *Standard* says:—"Considerable speculation is being indulged with reference to the approaching changes that may be expected in the composition of the India Council. By the Act of 1869 members appointed after that date retain their seats on the Council only for a period of ten years, unless specially reappointed for a further space of five years by right of a privilege vested in the Secretary of State. It so happens that although this Act has come into operation for six years, only one case has arisen under its provisions —viz., that of Mr. A. Cassels, in the spring of the present year. Those members of Council whose term of service would have expired in the interim, have either died or have received other appointments, as, for instance, Sir William Merewether, Sir Henry Norman, and Lord Wolseley. Two of the present members of Council reach their allotted term next year, viz., Sir Barrow Ellis and the Hon. Edward Drummond; and it remains to be seen whether they will make way for new-comers, or whether in one or other of these two cases the Secretary of State will carry into effect the power vested in him by the Act of 1869."

Com. the Hon. F. R. Sandilands, of the Asia, who has already been awarded the Albert Medal of the 2nd Class and the bronze medal of the Royal Humane Society, has just been presented, on the recommendation of the Admiralty, with the society's bronze clasp in recognition of a gallant act performed by him in Portsmouth Harbour on the night of the 19th ult., whereby he saved the life of a seaman named N. Smith. It appears that on the night in question Smith accidentally fell overboard, a height of 25 ft. Capt. Sandilands, who was in his cabin in the after part of the ship, hearing the man's cries for help, rushed to the upper deck gangway, and jumped over to the rescue. With great exertion he got hold of the drowning man and swam with him to the gangway, where they were both eventually hauled in. The night was very dark and cold.

A letter from Sydney says that it is understood that communication between New Guinea and Australia will be kept up by the Dart, which, in conjunction with the Swinger and Raven, will ply occasionally as a mail-boat between Port Moresby and Cooktown.

Orders have been received at Portsmouth Dockyard to proceed immediately with the estimates for completing at once the work on all ships on hand, and those awaiting refit, so that the Admiralty may commence next year's programme without delay.

The effective armoured fleets of the leading naval powers of Europe are summarised as follows:—England, 329,520 tons; France, 201,789; Germany, 74,007; Austria, 60,110; Russia, 84,621; Italy, 50,905.

STIMULANTS and insufficient amount of exercise frequently derange the liver. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT.—"All our customers for ENO'S FRUIT SALT would not be without it upon any consideration, they having received so much benefit from it.—WOOD BROTHERS, Chemists, Jersey, 1878." CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists. Directions in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S FRUIT SALT WORKS, Hatcham, London, S.E., by C. J. ENO'S Patent.

HOLLOWAY'S PILLS.—Invalids distracted by indigestion, and discouraged in their search for its remedy, should make trial of this never-failing medicine. A lady, long a martyr to dyspeptic tortures, writes that Holloway's Pills made her feel as if a burden had been taken off her. Her spirits, formerly low, have greatly improved; her capricious appetite has given place to healthy hunger; her dull, sick headache has departed, and gradually so marked a change has been effected that she is altogether a new creature, and again fit for her duties. These Pills may be administered with safety to the most delicate. They never act harshly, nor do they ever induce weakness; they rightly direct deranged, and control excessive action.

ARMY EXAMINATIONS.—PREPARATION in GERMANY.—Mr. R. H. ALLPRESS, M.A. (Cambridge Mathematical Tripos, 1878), has a few Vacancies.—Address, Mönchhof, Neuenheim, Heidelberg.

MEMORY and SUCCESS. —What contributes to success? A good memory.—What causes failure in life? A poor memory.—What can all obtain from Prof. Loisette's Discoveries? A good memory—the PHYSIOLOGICAL ART of NEVER FORGETTING—using none of the "Links," "Pegs," "Localities," or "Associations" of Mnemonics. Lost memories restored —the worst made good, and the best better. *Any book learned in one reading.* Prospectus post-free, giving opinions of Mr. RICHARD A. PROCTOR, Dr. ANDREW WILSON, and others who have studied the System. A Day Class in Never Forgetting and for Cure of Mind-Wandering commences every Monday at 3 p.m. An Evening Class every Tuesday at 8 p.m. Lectures in Families of the Nobility; also taught thoroughly by POST. —Prof. LOISETTE, 37 New Oxford Street (opposite Mudie's), W.C.

AUSTRALIA.—PERSONS intending to SETTLE in the COLONY of TASMANIA should apply for FREE GRANTS of LAND and full information, either personally or by letter, to the SECRETARY, Tasmanian Government Emigration Office, 79½ Gracechurch Street, London, E.C.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.

Store Warehouses, Baker-Street Bazaar, W.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3 ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

CIVIL SERVICE and ARMY EXAMINATIONS.

Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and Major E. J. LYNCH, late Garrison-Instructor, London, 19 Lexham Gardens, Cromwell Road, W., PREPARE Gentlemen for all CIVIL SERVICE Examinations, and for the Army, *via* WOOLWICH, SANDHURST, and the MILITIA; special Classes for the STAFF COLLEGE and Promotion Examinations. EIGHTY-THREE successes in 1882. ONE HUNDRED and FIFTY-ONE in 1883. ONE HUNDRED and FIFTY-EIGHT in 1884, viz.:—

MILITIA COMPETITIVE, March.— THIRTY-SIX, viz: —3rd, 5th, 6th, 9th, 10th, 15th, 16th, 18th, 19th, 22nd, 27th, 28th, 34th, 35th, 36th, 39th, 41st, 42nd, 43rd, 45th, 47th, 48th, 52nd, 55th, 57th, 58th, 59th, 60th, 61st, 65th, 66th, 69th, 71st; and Cavalry, 2nd, 4th, and 9th.

September.—THIRTY-ONE, viz.:—First, 7th, 9th, 13th, 14th, 15th, 16th, 19th (two), 23rd, 24th, 25th, 26th, 28th, 29th, 35th, 37th, 38th, 44th, 46th, 48th, 51st, 53rd, 59th, 62nd, 64th; and Cavalry, 3rd, 6th, 7th, 8th, 9th.

One other failed by only 4 marks, and three more were within 39 marks of success.

95 out of 117 Candidates have passed at the last Three Examinations.

At the Eight Examinations held under the present regulations, the FIRST PLACE has been taken FIVE TIMES.

MILITIA LITERARY, April:—FIRST, 3rd, 4th, 22nd, 29th, 32nd. October:—FIRST, 3rd, 6th, 7th. Being all sent up on both occasions. There has been no failure in the last SEVEN Examinations.

SANDHURST, July, TEN, viz.:—5th, 13th, 15th, 32nd, 43rd, 53rd, 79th, 83rd, one Hon. Cadet, one R.M.L.I.

WOOLWICH, July, TWO:—20th, 53rd. December, all passed, viz.:—

Place.	Name.	Marks.
		7250
2nd.	Nathan	7235
3rd.	Warburton............................	5495
7th.	Kemp	3979
33rd.	MacCarthy...........................	

making six successful out of eight sent up this year.

STAFF COLLEGE, TWELVE, viz.:—2nd, 4th, 9th, 16th, 19th, 21st, 22nd, 23rd, 24th, 25th, 33rd, 35th, and four others qualified.

PROMOTION.—Twenty-five Officers have passed this year.

PRELIMINARY.—Twenty-eight have passed this year.

INDIAN CIVIL SERVICE.—A Special Class, limited to eight.

FOREIGN OFFICE and DIPLOMATIC. — A Special Class, limited to six.

Courses for all Examinations now proceeding.

NEXT TERM COMMENCES JANUARY 13.

The Preliminary Examination work will be under Mr. J. A. GRATTAN, late Royal Artillery, whose success in this line during the past ten years has been very great.

ARMY EXAMINATIONS. — LIEUTENANTS of MILITIA PREPARING for the MILITARY COMPETITIVE EXAMINATION can be RECEIVED by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath, whose pupils for some years past have continuously maintained a steady average of success, second to none. This year fifteen have been sent up, seven of whom have passed; four in March (one taking first place on the list), and three at the recent Examination. Very few pupils are taken, and there are two resident Military Instructors of high qualifications constantly at work, with a third in reserve in case of pressure. Thus very great individual attention is guaranteed, and the system of lecturing classes entirely avoided. Batcombe is a country village, near no town, but affording opportunity for shooting and other healthy amusements in moderation. References are permitted to the Earl of Harewood, Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of successful pupils.

JERSEY HIGH SCHOOL for GIRLS
(Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.

His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

SANDHURST and WOOLWICH.

GROSVENOR HOUSE, TUNBRIDGE WELLS.
(Established more than 25 years.)

A limited number of resident and day Pupils rapidly prepared for these Examinations by the Principal and a large Staff.

Individual attention guaranteed.

Six out of seven sent up during past year successful, including 13th, 26th, &c., places for Sandhurst, and a 1st B.A. Lond. Univ.

A long list of past successes.

The highest references given, including Sir Richard Temple, Bart., Major-General Sir Thomas Pears, and the Head Masters of Clifton, Rossall, and Malvern Colleges, &c.

NEXT TERM BEGINS JANUARY 19.

PRINCIPAL—E. DOUGLAS ARCHIBALD, M.A. (Oxon), F.R. Met. Soc., late of H.M.'s Bengal Educational Service.

MILITIA MILITARY COMPETITIVE. MAJOR de THOREN'S very remarkable success with Classes of Militia Officers, strictly limited in number, and to whom he gives his individual and sole attention, continues as usual. The fees at this establishment are extremely low.—For particulars, address Bellefield, St. Helier's.

MILITARY EDUCATION, GERMANY and ENGLAND.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the seven MILITIA COMPETITIONS which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils SIXTY COMMISSIONS, although they have only prepared and sent up from Darmstadt an extremely limited number of Candidates on each occasion. For example, out of 32 sent up in 1884, 21 have gained commissions. The names have been repeatedly published, and a complete list will be furnished on application, whereby it may be seen that 42 out of 60 passed first trial, and that very high places have been taken at each Examination.

A number of Students have also, during the same period, passed the MILITIA LITERARY Examination.

At the recent WOOLWICH and SANDHURST Examinations NINE PUPILS competed, and EIGHT CADETSHIPS were obtained (one Woolwich, seven Sandhurst); Mr. H. D. Radcliffe taking SIXTH PLACE on the Infantry list for Sandhurst, with 7,308 marks, and making the highest score of any candidate in German—1,855 marks out of 2,000.

For the Staff College, Captains G. F. C. Mackenzie and C. E. de la P. Beresford have been successful; no other candidates sent up.

The general score now amounts to ONE HUNDRED AND SIXTEEN SUCCESSES, obtained by Pupils since September 1, 1881.

SPECIAL NOTICE.

Colonels WILKINSON and SHAW, having determined to move their Establishment to England (retaining a branch for junior students at Darmstadt), beg to announce that they will form classes at ALDERSHOT on April 1 next for Militia Competitive, Line Promotions, and Staff College. The Head-quarters of the Establishment will be transferred during the summer vacation to HEATH END, near FARNHAM, and Resident Students for Sandhurst and Woolwich will be received as heretofore. Students at the Darmstadt branch will be limited to those studying Preliminary subjects, and no objection will be made to their being young. Good grounding in German colloquial will be secured by special arrangements.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.— C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

WOOLWICH, SANDHURST, and the MILITIA.—(*Candidates for the Further Examinations preferred.*)—Resident and Visiting Pupils prepared by a FRENCH and ENGLISH UNIVERSITY MAN, formerly on the French Staff, and late Modern Language Master in Haileybury, Wellington, and Winchester Colleges. *FRENCH and GERMAN MASTERS reside in the House.* Local references to Colonel H. P. Montgomery, late commanding Rifle Depôt; or to Lieutenant-Colonel C. T. Bunbury, late Rifle Brigade. Passed:—Lieut. C. C. Daniel (the Royal Scots); Lieut. E. P. Webber (the Royal Sussex); Mr. E. H. Somerset (passed his Preliminary in March, and qualified for Queen's Cadetship in July, 1884).

NEXT TERM COMMENCES JANUARY, 1885.

WELLINGTON HOUSE, Winchester.

SPECIAL CLASSES FOR ENTRANCE TO THE STAFF COLLEGE AND MILITIA COMPETITIVE EXAMINATION.

SANDHURST, WOOLWICH, and MILITIA EXAMINATIONS.—Preparation by JOHN GIBSON, M.A., and large Resident Staff, at Bromley, Kent, and Coblenz-on-Rhine.

N.B.—GIBSON'S SANDHURST "FURTHER" GUIDE (No. 3), containing Papers set in November and December, 1884, and Solutions, will be published on Wednesday after the Examination.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Under the patronage of her most Gracious Majesty the QUEEN.

CHAIRMAN—Major-General J. T. BOILEAU, R.E., F.R.S.

Applications from Candidates for admission to this School, either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

The Daughters of all Officers on the Active and Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible; but the Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

Office, 20 Charing Cross, corner of Craig's Court, London.

By Order,
G. W. FORSTER, Secretary.

SANDHURST, WOOLWICH, CIVIL SERVICE, UNIVERSITIES, &c.—Hill Lands, Wargrave, Berks.—The NEXT TERM commences January 3, 1885. 37 Successes during past 12 months, with an average of 40 Pupils. For printed lists giving names, positions in order of merit, total marks, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges' (graciously recognised by the Queen and H.R.H the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, 16 Nevern Square, Earl's Court, S.W.

MILITARY EXAMINATIONS.

Lieutenant-Colonel G. M. CARDEW (passed second from Staff College) PREPARES SIX PUPILS for MILITARY COMPETITIVE EXAMINATION. Also Officers for Promotion, &c. —14 Observatory Avenue, Kensington. In July, five passed out of six; in September, three passed out of four.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES. —A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c. — Address, HEAD MASTER.

MILITIA CANDIDATES for the LINE. —TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above. Careful individual attention. A Class now at work for the March Examination. References permitted to Colonel Aylmer, S. Cameron V.C., Assist.-Qrmr.-Gen. (Intelligence Branch), War Office; and Colonel C. W. Robinson, Rifle Brigade, Assist.-Qrmr.-Gen., Aldershot.

For prospectus, containing terms, testimonials, and references, address, East Bergholt, Colchester.

ARMY (PRELIMINARY, FURTHER, and COMPETITIVE) LITERARY EXAMINATIONS.—The Rev. WALTER BAKER, M.A. (Cantab.), late Scholar of his College, &c., offers an unusual combination of advantages. A few Pupils only received. All work is done by individual teaching. No lectures to Classes, but a resident Tutor to every three Pupils, and each Tutor first-rate in his own subjects. For fourteen years, up to and including the last Sandhurst Competition, a steady average of successes, second to none, has been maintained. No town is near, but there are plenty of country amusements, and a liberal establishment is kept. The highest references can be given to noblemen, officers high in the service, and other parents of successful Pupils.— Address, Batcombe Rectory, Evercreech, Bath.

ARMY and UNIVERSITY EXAMINATIONS.—J. WEST, Edinburgh University (two First Classes), F.R.Hist.S., F.A.S., and F. G. BRABANT, M.A. Oxford (three First Classes), RECEIVE a LIMITED NUMBER of RESIDENT PUPILS, to whom they offer special individual attention and a pleasant country home. Long and varied experience, especially in Sandhurst Preliminary and Sandhurst and Woolwich Competitive. Highest references. List and terms on application. —Address, Heathview, Storrington, Sussex.

MILITIA, ARMY COMPETITIVE, and PROMOTION EXAMINATIONS.— Private Tuition for above by Captain HAYES (late R.A.). Has had marked success during past five years.—Address, Junior Army and Navy Club, St. James's Street, S.W.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Officers prepared for Examinations. Correct Idiom guaranteed.—PUNDIT, 7 Beechholme Road, Clapton.

CONNAUGHT MILITARY COLLEGE,
WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

A. J. Windebank, Esq., Chanda House, Fratton Street, Portsmouth, December 22, 1883:—"Watch, chain, and ring to hand. I am very much pleased with their appearance, the watch especially looking a very strong, handsome one, and equal to many I have seen at double the money."

Mr. H. A. Illingworth, 82 Queen Street, Batley, March 7, 1884:—"After four years' trial of one of your 25s. watches, I now desire to express my thanks for the same. During all the time I have had it I have not paid one halfpenny for repairs. It is as good to-day as ever. When I have shown it to my friends, they have valued it at double and frequently at treble the money. To those who wish to possess a cheap, good, everyday watch, I especially recommend the above."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

THE KHARTOUM EXPEDITION.

[Extract from a Private Letter.]

River Nile (about 100 *miles south of Assouan in a sailing dahabeeah, flying Cook's flag), November* 15.

Last Tuesday we got a sudden order to send off three more companies of this regiment at 6.30 a.m. the day following. My company was one of them, the whole being under command of one of our majors. We left Shellal, which is the other side of the First Cataract, at 4.30 p.m. on the 12th, in three dahabeeahs, each containing a company. The one containing the major was taken in tow by a steamer. The scant notice we got was due to the fact that Lord Wolseley was not at all satisfied with the way things had been going on at Shellal in the way of transport, and had sent General Buller down from Wady Halfa to stir them up a bit. This he effectually did by despatching in about 12 hours some 300 men of the 42nd and 56th Regiments. This native boat is rather a large one, about 60 or 70 feet in length, and has at its stern a small deck-house containing eight small cabins—of these I and my subaltern have two, one as an anteroom, the other as a "boudoir." Another we use as a pantry, and two others as kitchens for our servants. Between this suite and the remainder are a pair of doors, and this effectually shuts us out from the men. When we first came on board we thought we should be very comfortable, but the first night dispelled this illusion. We found the whole place simply swarming with bugs, &c. The misery they inflicted on us that night makes me shudder to recall. The swarmed over our bodies and left hardly a square inch without a bite. At 12 o'clock, after killing over a hundred of them, we could stand it no longer, but sallied out on a small ledge which projects from the end of the ship. Here suspended, like Mahomet's coffin, 'twixt sky and earth, we slept till morning, keeping up continuously a desperate, though ineffectual, warfare against the vermin which swarmed in myriads, only less in number than those in the cabin. The next day, we had the whole ship thoroughly scrubbed and soaked with lye and water, which has made it much cleaner, and in some degree diminished the vermin. Luckily, now we are, owing to a happy thought, quite comfortable. We happen to be towing at the stern a small gig, one of twelve allowed for the Staff. This has all its paraphernalia inside it, so we rigged up a bed with some planks along the seats, put up the awning, and are now as luxurious as possible. The only objection against it is that the boat is towed at some distance from the stern, and it requires a rather difficult gymnastic performance to reach it. A sad accident occurred on the 14th. Orders had been given to the corporal of the guard the previous evening to call us the next morning at daylight, so as to get the ship under weigh at once. We were lying at the stern of the gig when, just before daybreak, we were awakened by a heavy splash in the water at the head of the boat. We both rushed up to the bow to see what it was, but could only see the water in commotion. As a nigger was standing on the ledge which I previously mentioned, we thought that he had dropped something into the water, and we turned in again. Later on I sent for the corporal of the guard to ask him why we had not been called. I found him missing. One of the men said he had seen him going towards our end of the ship about daybreak, and it is evident that in coming to call us he had missed his footing, stunned himself against the rudder, and was drowned. As that night we were just below a cataract, where the stream ran about five miles an hour, his body was probably carried some hundred yards before it came to the surface. This is a most awful river for accidents. It is full of under-currents, eddies, and whirlpools; and if once a man tumbles overboard he has but little chance of ever getting out again. This is the third man we have lost in it. We have three officers and fifteen men left at Assouan in charge of our depôt. Just as it was getting dark we saw a young native running along the bank and offering for sale what appeared to be a large lizard. We told him we would give him five piastres for it, so he swam on board with it. What was our astonishment to find that it was a live young crocodile. We have him now tethered to the centre seat of our boat, where he lies in a most listless attitude at the bottom. We are thinking of sending him home to the Zoo.

The Staffordshire Regt. was brought up to its full fighting strength by the arrival, on Monday, at Korti of Lieut.-Col. Eye and the right wing. The heavy division of the Camel Corps have made pretty good marching. Four sections have arrived at Korti; two arrived to-day, and the remaining three sections are due on Thursday next. Of the light division of the Camel Corps three sections have arrived, and the remainder will arrive to-day. The Marines, the Camel Battery, the Field Hospital, and the Bearer Company all are timed to reach Korti to-day. The Essex Regt. is considerably scattered, but the first detachment should arrive by New Year's Day, and the last by the 8th prox. The Cornwall Regt. are racing with their Essex rivals, and will probably arrive about the same time. The Black Watch are due from Jan. 5 to 12, and the Gordon Highlanders from the 12th to the 20th. The West Kent Regt. should arrive on Feb. 1, and the Royal Irish two days later. It will thus be seen that although Lord Wolseley will make a formidable show at Korti by the end of the year, the expeditionary force will not be assembled in full strength for another six weeks. The prospect is not a pleasant one, but it is unavoidable; and it would be absurd to commence the final advance before the entire force has been collected, and the whole of the reserve stores and provisions, ammunition, &c., fairly well forward. Meanwhile, the force at Korti has nothing to complain of in regard to the rations, which are excellent in quality, and of even more than the regulation quantity. The natives continue to bring in supplies regularly, and the general health of the troops is said to be good. All the whaleboats will be thoroughly overhauled and repaired where necessary previous to the advance. The Head-quarter Staff are working hard at digesting the numerous reports received from native chiefs and others upon the position and strength of the enemy, and the peculiarities of the various routes to Khartoum. Until this work is completed, and it will take some time, Lord Wolseley will not complete his plans. It is expected that the Sussex Regt. will be entrusted with the important duty of guarding the base. Major-Gen. Sir Redvers Buller, chief of the Staff, has reached Korti.

One of the Nile boats on its way to Korti was capsized 17 miles below Korti. Among those on board were two newspaper correspondents. All the occupants were saved by the pinnace of her Majesty's ship Inflexible; but the baggage was lost. The navigation of the river is daily becoming more difficult, owing to the shifting of the sand.

The field telegraph is now in working order. The Engineers, under the personal supervision of Lord Wolseley, have been making experiments in felling trees with gun-cotton, the object being to ascertain the quickest method of obtaining timber for fuel for the steamers. The experiments were very successful. The natives came in on Dec. 21 in large numbers, bringing produce and cattle, and a regular market was held. The chief products of the country are dates, salt, wheat, cotton, and cattle.

So far, the anticipations of those who believed that the tribesmen about Korti would come in with offers of assistance as soon as the appearance of our troops offered them a sufficient protection against the Mahdi's adherents, have proved altogether unfounded. Only one small local chief has come into our camp, and no communications whatever have been received from the tribes on the road between Korti and Metamneh. The Camel Corps went through some exercises on Saturday last, which have proved that their efficiency is much greater than was supposed, and that, even if unsupported by infantry, they can be trusted to resist an attack by the enemy. In the space of one minute and a half the whole corps changed from the formation of a column on the line of march into a square prepared to receive the enemy, the camels lying down and the men at their stations. Half of our cavalry then charged down at full speed, endeavouring to frighten the camels, but the animals remained quietly kneeling, and there was no confusion whatever in the square. This experiment was considered as most satisfactory, and its success will not improbably exercise a considerable influence in determining the future course of the campaign.

Sir Evelyn Wood, who has been for some months past acting in the dual capacity of Sirdar of the Egyptian Army and Inspector-Gen. of the line of communications to the Nile expedition, leaves Wady Halfa for Dongola. His presence at the latter place will add materially to the progress of the expeditionary force.

Lord Wolseley, on Saturday, decorated the Vakeel of Merawi with the star of the Third Class of the Medjidie Order.

Gen. Stephenson, with Col. Maitland and Capt. Campbell, left Cairo for Suakim yesterday.

The *Standard* correspondent telegraphs from Korti:—"Every day the camp assumes more imposing dimensions. The Camel Corps alone occupies a large extent of ground, and the Infantry camp is being continually augmented, as not a day passes without the arrival of fresh boatloads of troops. Along the banks are moored quite a fleet of whalers, the naval steam launches hurry up and down the usually deserted reaches of the Nile, and the scene is at once busy and singular. The natives come in and gaze wonderingly at the camp, with its life and animation, and the constant flow of fresh troops up the river greatly impresses them. It is a pity that this gathering could not have taken place at Dongola, instead of the boats passing by almost out of sight of the town. However, a most useful effect is being produced upon the populations of Abu Goushie and Ambukol by the continual passage upwards of our troops. They see now that we are thoroughly in earnest, and that the expedition is a formidable one. Their reports of the coming of an English army will speedily cross the Desert, encouraging the garrison of Khartoum, and, we hope, discouraging the besiegers. The great topic of conversation in camp is the probability of a Desert march to Shendy. All acknowledge the great risks and uncertainties of such a step, but the adventurous and inexperienced long to exchange the steady, monotonous toil of the boat journey for a dash across the desert, while old campaigners are well content, if possible, to adhere to the Nile route. The boat journey may be slow, but it is sure. The work is severe, but there are no other hardships, and food and drink will be plentiful. The march across the Desert cannot but be terribly trying; the wells are far apart; the issue is uncertain, and may be disastrous. Everything will depend upon the news from Gordon, and in the meantime preparations are steadily proceeding in readiness for a dash across the Desert should that step be imperatively necessary. Gen. Buller and Col. Brackenbury have arrived here, after making an inspection of the whole of the moving force above Wady Halfa. They estimate that, so far, the total loss from drowning does not exceed 18 men, and that the average loss of boats is not more than three per regiment. This is an astonishingly low figure to us who have seen the terrible cataracts and rapids which the boats have to surmount, and is most creditable indeed to all concerned. Gen. Buller reports that the boats are coming up steadily and well, and that their rate of progress is most satisfactory."

The special correspondent of the *Morning Post*, at Shabadood, writing on the 3rd inst., says:—"The troops of the Nile Expedition are now beginning to gather at the front in effective numbers. The arrival of the remaining sections of the Guards Camel Corps, due here at daybreak to-morrow morning, will complete the force of mounted men under Sir Herbert Stewart to 700. The 19th Hussars, expected in a few days, will add nearly 300 to these numbers, and there will then be at Shabadood, ready at any moment to advance, a force of 1,000 mounted men. The Heavy Cavalry and Light Cavalry Regiments, and the Camel Regiment of 100 Marines, belonging to this command, are some 10 days behind. The health of this camp is extremely good, even the Guards, after their long march from Wady Halfa, contributed no cases to the hospital, except three cases of light diarrhœa, one of debility, which it is feared will unfit the man for the campaign, and one of rupture. One man with a slight sunstroke was sent back from Akheir, the half-way post from Dongola here. The 600 men here have a sick-list of only six in all, or just 1 per cent. The Nassif-kheir and the steam launches are able to convey any bad cases of sickness back to Dongola. A second steam launch, belonging to her Majesty's ship Invincible, which is now at Dongola, makes up the number of launches on this reach to three—two of the Invincible and one of the Monarch. Lord Charles Beresford has formed and will command a Naval Brigade of 100 men and about six officers, with the object of taking charge of Gen. Gordon's steamers when we reach them. Should the route from Ambukol to Metammeb, opposite Shendy, be the one selected for the advance, this brigade will be of especial service, for Gen. Gordon will bring his steamers down to Metammeb to meet us, and they will be an invaluable support to the land force as it marches along the 100 miles of river bank from Metammeb to Khartoum. Two separate patrols of Mounted Infantry, under Lieuts. Miles and Campbell (60th Rifles), have traversed the desert west and south-west of here for two days each. The district appears to be completely quiet, and the patrols, except close to the river, meet nothing but small parties of men with herds of camels passing from one desert pasturage to another. The officers of Mounted Infantry have been ordered to send back their ponies from here, ponies being allowed to none but staff officers. Some clever people imagine that the Mounted Infantry managed badly in this small matter of their ponies. In marching-out from Dongola the ponies were paraded with the rest of the column, and thereupon attracted Lord Wolseley's attention. Had the ponies been sent forward separately with the native grooms they might have eluded observation and reached Khartoum, though it is probable that the difficulty of carrying water for horses across the desert will prove a final obstacle to any but the most limited number most urgently required. The general commanding the mounted troops and his staff must, of course, be mounted on horses, and it is thought by some that similar provision should be made for officers commanding the camel regiments and their adjutants. The weather lately has been unusually hot, far hotter than it was last month at Dongola, and there are all sorts of terrible predictions flying about to the effect that the cool season is at an end, and the heat beginning again. But this is luckily not so. The people say that December and January are their coldest months."

Sir Evelyn Wood and Col. Fraser started southwards from Wady Halfa on Tuesday.

Sixty-four whalers have arrived at Korti up to the present. Three sections of the Light Camel Corps arrived at Korti on Wednesday. This force is composed of men from the 3rd, 4th, and 7th Hussars, under the command of Col. M'Calmont. Four sections of the Heavies—1st and 2nd Life Guards, Blues, and Queen's Bays—arrived on Tuesday. The corps has accomplished the journey from Wady Halfa to this place, a distance of 400 miles, including the crossing of the Nile at Handek, in 20 days.

The Nile route will probably be adhered to when a fresh advance is made. The steamers are actively engaged towing up the nuggurs. The naval officers have afforded great assistance to the expedition generally.

INSTRUCTION IN FOREIGN LANGUAGES FOR NAVAL OFFICERS.

My Lords Commissioners of the Admiralty, having regard to the desirability of encouraging officers to acquire a colloquial knowledge of foreign languages, are pleased to lay down the following regulations, viz.:—1. The marks assigned for French at the examination of acting sub-lieutenants at the Royal Naval College, Greenwich, will be raised from 100 to 200; the total qualifying number for each class, and the minimum number required to be obtained at the College to qualify for a lieutenant's commission under Circular No. 1 N., of Feb. 1, 1884, being increased. This rule is to take effect at the first examination in 1885, and will therefore apply to the acting sub-lieutenants who joined the College in June, 1884. 2. Commissioned officers of the military branch, and other officers now eligible for examination for Interpreter in European languages, will be allowed, if the requirements of the service admit, to proceed to the Continent for three months for the purpose of improving their colloquial knowledge of the French, German, Spanish, or Italian languages. 3. Before being allowed to avail himself of this privilege, an officer will be required either to satisfy the Civil Service Commissioners that he possesses an adequate grammatical knowledge of the language which he has selected, or, if he has studied the language at the Royal Naval College, to obtain a certificate to the same effect from the College examiner. 4. On return to England, the officer will be examined by the Civil Service Commissioners as to his colloquial knowledge, both as regards speaking and readiness in interpreting the language which he has studied. 5. If able to pass a satisfactory examination, he will be allowed full pay and harbour time for the three months of study abroad; but he will not receive any allowance for victuals, nor any other allowance in addition to full pay. 6. The privilege of study abroad will not be granted to any officer more than once for the same language. 7. The regulations contained in paragraphs 2 to 6 are provisional only, and the question of their continuance will be considered after 12 months' experience of their working.

OUR FUTURE SHIPS.

The *Morning Post*, in a leading article on Tuesday, protests strongly against building more ironclads. It enumerates the palpable disadvantages entailed on our Navy by the application of armour-plates to the sides or batteries of line-of-battle (or fighting) ships as follows:—"1. The expense of iron or steel armour adequate to resist the ever-increasing power of artillery is simply monstrous. 2. All fire from shipboard is known to be more or less inaccurate, and the chances of a ship being struck in a vital part are very small indeed. 3. But if the armour-plating of a ship's battery or turret be struck, and if it be not wholly impervious to the shell striking it, the effect of the blow is enhanced, and the shield actually becomes an instrument for rendering the blow more deadly to the gunners behind it. 4. A ship has a certain tonnage displacement, according to which her weights have to be arranged. Hence, every ounce of armour weight decreases the gun weight or coal weight that she can carry. 5. Ironclad fighting ships are necessarily of such a prodigious size that to possess a numerous Navy and to conduct a great Naval war on the principles that must be followed if we are to maintain a dominant position on the seas—*i.e.*, as a war of aggression—is a financial impossibility. 6. It is almost certain that the bulk of the educated Naval opinion of the present day favours the view that the skilful use of the ram will be the guiding object in future Naval engagements. Now, a modern ironclad is about as handy an instrument for use in ramming manœuvres as—well, let us say an old cow at a pump. 7. Next to the ram, the torpedo, or torpedo-vessel, is probably the most efficient Naval fighting weapon. But an enormous ironclad is singularly open to attacks from torpedoes, and its size gives it no particular advantage in directing such attacks. 8. The great size, draught, and cost of ironclads inevitably tend to reduce the feeling which should be uppermost in any captain's mind, that he 'can go anywhere and do anything' with his ship. In fact, it renders him cautious—a deadly quality for Naval minds." It concludes by giving the following as the type of first-class fighting-ship which most nearly meets the requirements of the day:—"An unarmoured corvette, without sails, of 2,000 to 4,000 tons displacement, possessing good sea qualities, an armament of maximum weight and power, an underwater steel protecting deck, great capacity of coal stowage, handiness, facilities for ramming and torpedoing, and as much speed as can be given her. Such vessels would cost comparatively small sums, and we could maintain many squadrons of them."

THE MILITIA.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In the various letters which have appeared on the present state of the Militia, little has been said on a very important point, viz., "The deficiency in the Subaltern Ranks, and how to remedy it." Having commanded a Militia regiment for a considerable time, I venture to offer a few remarks on the subject. Fifteen years ago, the same state of things existed, the probabilities of embodiment had died out, and there was no sufficient inducement to bring young gentlemen in. The plan was then adopted of giving commissions in the Line to a certain number of Militia subalterns, who, having passed the Civil Service preliminary and further examinations, and served two trainings, were to be nominated by their commanding officer in proportion to the strength of their respective regiments. A reference to *Army Lists*, first of 1870, and then to later years, will show that this plan was successful, and it was so for these reasons:—1. The prize held out was sufficient to induce many youths to join. 2. Some others then joined to remain in the Militia, because, under this system, they met with comrades of their own age. 3. It also came about that some of these, who had joined to pass into the Line, but failed to qualify, remained in the Militia, and became useful and efficient officers. All these were good recruits, and brought more. Speaking from my own experience, whilst this system lasted, I had always my establishment of subalterns full, and a number of applicants ready to come in. It is true, however, that there was a possibility of superannuation before the turn for nomination came, on account of the limits of age; and, I presume, it was to avoid this that the competitive military examination, after serving two trainings, was established; but the result has been most disastrous, because both parents and youngsters very soon found that greatly increased expenses of tuition had to be incurred, and some most valuable years might be wasted, with worse than no result after all. When this state of things came to be understood by those interested, most of them gave it up as a bad job, and (speaking again from my own experience) I have now several vacancies, and no applications. Those who would have come, and a very good sort, too, have been scared away by the "fad" of examination, and I believe that this has happened generally. I, therefore, say deliberately that I firmly believe that the competitive military examination, after two trainings, is the chief cause of the deficiency in the subaltern ranks of the Militia. As a remedy, I simply suggest its abolition, and a liberal return to the system of nomination by commanding officers, say, giving three commissions, where two were given before, and extending the limits of age to avoid superannuation; officers from the Militia to go through a garrison class, after joining the Line, as, be it observed, they do now, although they have passed the competitive military examination. New regulations, dated Nov. 1, have just been issued, by which the competitive military examination is still to be required, and I beg most emphatically to state my belief that until that part of them is cancelled, the present deficiency in the subaltern ranks of the Militia will continue.—I am, &c., RED ROSE.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Your correspondent "Monitor" having replied to the letter which appeared in your issue of the 18th ult., it seems to me that he would have acted with more wisdom, and saved himself a great deal of unpleasantness, had he simply remained in the shade, and accepted his position,—that of one who, with a little knowledge, has overstepped the bounds of prudence. He is like the bird flitting from tree to tree,—so erratic. In one breath he lauds the Militia to the skies, and in the next reduces it, not to the level of the earth, but to the mud. The force, happily, can do without the aid of his fulsome laudation. It is not my intention to reiterate word for word that his statements regarding the status of Militia officers are totally without foundation. Every man of intelligence who knows anything of the subject, and has read the correspondence, is aware of this fact. He says that I have been wanting in courtesy in one of my contradictions. Let me assure him that I have never been willingly discourteous to any one, and that my remark regarding his statements being totally without foundation is not meant offensively, but that his references have no application to the Militia as it is now constituted. It would be a waste of time and of your space to continue this correspondence further. However, I may inform "Monitor" that upon the occasion when "the Militia colonel," as he is pleased to say, was allowed to drill a Brigade of Regulars, &c., he was also, in right of his military position (on that particular day in the absence of the senior Line officer), actually in command of the garrison. "Lieutenant-Colonel" hits "Monitor" severely when he tells him "that he has made for himself a well-fitting fool's-cap, and that he may be left to his obscure corner." I regret that he has opened himself to such severe rebuke. His position is fully exposed in the expression in his last letter, when he says,—"If I am wrong, things must have changed very much since I left the Militia." So they have, "Monitor." Go to sleep again for another quarter of a century. Wake up then, and give the future *Army and Navy Gazette* and the public at large your "worn-out" views upon Militia subjects. Perhaps some other veteran, who has also followed Rip Van Winkle's example, may wake up, and, in a fit of *cacoëthes scribendi*, tell us that, "If our soldiers do not now force down the bullets into their muskets with ramrods, and fire off with percussion-caps or flint, things must have changed very much since he left the service." Good-bye, "Monitor;" good-bye. I wish you every happiness, and I trust you will excuse me for giving you a bit of advice—never take up your pen in future to write upon a subject, unless you know something about it.—I am, &c., A FUSILIER.

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. LAURANCE, F.S.S., Oculist Optician, 1A Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

FRANCE AND CHINA.

The *Times* correspondent at Foochow, in a despatch dated December 2, received *viâ* Colombo, says:—"The French are using every means to float in the coast ports stories of gigantic defeats of the Chinese forces in Formosa. designed to make an impression on the Chinese. These false reports generally emanate from pilots serving with the French fleet. All French pilots are now regarded here as being untrustworthy. The native reports are but a tissue of falsehoods; but both accounts being untrue, the natives prefer to believe the rosier. They are greatly elated at the recent undoubted disasters of the French in Formosa, and place an unfavourable construction on the continued French inaction. The officials advocate the policy of keeping the French worried, and of not attempting any great blows, and clamour for a continuance of the war. The pecuniary pressure here is somewhat reduced, and is not very severe. Now that the blockade seriously interferes with the trade between China and the ports on the island, it is carried on in sailing ships, and thus great irritation is caused among the people dependent on this commerce for a living. The English and American gunboats remain here to protect the foreign settlement, for the trouble is regarded as not yet over. Tso-Tsung-Tang is reported to have arrived in the neighbourhood of the city. Trouble between foreigners and the natives, caused by his foreigner-hating soldiery, is regarded as inevitable. The Franco-Chinese difficulty, however, is, upon the whole, greatly strengthening the position and influence of foreigners in China. Foreign advice is eagerly sought and attended to, and a great change of policy may be looked for on the cessation of hostilities."

THE DEFENCES OF HONG KONG AND SINGAPORE.

A Hong Kong correspondent of the *Times*, under date Dec. 9, writes:—"The question of the defences of Hong Kong, to which, with those concerning Aden and Singapore, public attention has been drawn repeatedly during the past 18 months, is now the subject of earnest consideration here. On the opening of the Legislative Council, the Hon. P. Ryrie said:—'With regard to the defences, I would impress upon members of Council that no exertions shall be spared to make it certain that an armament be supplied of proper modern type and of sufficient metal. The sum allowed shows an intention not to give such guns as we should have. It looks as if it were intended to send out obsolete guns. Regarding this matter we should be most careful. The colony will cheerfully contribute the amount; but provided that proper armament, not useless howitzers, be sent. Lastly, the Council should urge that there should be no delay in pushing forward and completing the work as soon as possible.' This speech fairly represents public opinion here. An impression obtains that the forts now being erected do not form part of a complete scheme of defence. At a public meeting it was proposed to press the Government urgently to place the colony in security as soon as possible, and especially to provide a proper armament. If the argument be not satisfactory the unofficial members of Council will probably refuse to vote. The colony is determined to have the work thoroughly executed. Hong Kong pays £20,000 yearly as a military contribution. Indignation is expressed at the Government not recognising the imperial value of Hong Kong. Its importance to commerce is known. Its value in war has been illustrated ever since the Tonquin difficulty began. It has throughout formed the French base for supplies, coaling, and repairing. Without the use of Hong Kong the war would have been impossible. The news of the intended addition to the Navy has been received with profound satisfaction. The complacency of our Government towards France is shown here. While the authorities of Saigon and Haiphong enforce quarantine against vessels coming from Formosa, especially Kelung, at Hong Kong there is none. There are generally from two to four French men-of-war here coaling and provisioning."

A correspondent of the *London and China Telegraph* writes:—"From the news brought by the last mail, and the despatch of the Secretary of State to the local Government, on the subject of the defences of the Straits Settlements, it does not appear that those proposed are sufficient for an important mercantile centre like Singapore. The home Government appears to hold to the views of Sir William Jervois, who was formerly Director of Works and Fortifications, and while Governor here was deputed by the War Office to devise a plan for defending the coaling-stations at New Harbour. He gave us the forts at Mount Siloso and Blakan Mati, the renovation of Fort Palmer and the useless unworkable battery on the sands at Tajong Katong, while we only have a battery of artillery at Fort Canning and a few gun-lascars from Hong Kong to man them. It would seem as though the home Government were disposed to send out to the colony their own useless armaments, especially the muzzle-loading guns, which require large bodies of men to work them; and as to the 64-pounders, it is hard to conceive of what use they are likely to be in the event of attack by a modern man-of-war with rifled breech-loading guns."

Summary of Events.

DECEMBER 23.—Four sections of Heavy Camel Corps arrived at Korti.

DECEMBER 24.—Three sections of Light Camel Corps arrived at Korti.

DECEMBER 26.—Gen. Sir F. Stephenson and Staff left Cairo for Suakim.

POISONS ON THE TOILET TABLE.—The Chemical Lecturer to the London Hospital, in his amusing discourse on "Fast Colours," pointed out the evils arising from the use of some of the so-called hair restorers and dyes; certain of which contain metallic poisons highly injurious to the system of the consumers. The use of such obnoxious articles is really unnecessary, since a thoroughly efficient, and at the same time harmless preparation, viz., ROWLAND'S MACASSAR OIL, has been extensively used for upwards of 84 years.

INDIAN ARMY NOTES.

[FROM OUR CORRESPONDENT.]

The coming Viceroy's Aides-de-Camp, viz., Lieutenants Lord Heibrand Russell, Grenadier Guards, Hon. C. Harbord, Scots Guards, and A. Balfour, 1st Highland Light Infantry, have been gazetted.

Captain Cave, 1st Suffolk Regiment, has been appointed to the Staff as D.A.A.G. for Musketry at Rawul Pindee.

Captain W. A. Gale, A.Q.M.G., British Burmah Division, has been transferred to the Hyderabad Subsidiary Force, vice Lieutenant-Colonel Norie, who has completed his term of Staff service.

Lieutenant-Colonel G. A. Lee, Durham Light Infantry (68th), and Major F. A. Currie, Norfolk Regiment, proceed home to join the home battalions of their regiments on promotion.

The Public Works Minister has been to Ferozepore to consult about the bridging of the Sutlej at Gunda Ling Wallah, which will connect Lahore with Ferozepore. At present the railway stops short on the Northern bank of the Sutlej, while Ferozepore is directly connected by rail with the Delhi and Ahmedabad line. There is also some talk of a tramway. At present, during the rains, the river often takes six hours to cross.

The Serapis, conveying the 13th Hussars to Natal, left Bombay on November 14.

The Zhob Valley Force are on their way home, having accomplished their object, and it is expected that within a few weeks the troops will all be on our side of the frontier.

The canteens have been coming to the front lately. First of all, there is a difficulty about expenses. In the open canteens the Government allow so small a profit on the beer sold that it hardly pays, and then, as the consumption of rum is very small, canteens hardly pay their way. So now some one comes forward with the suggestion that European spirits, &c., should be provided. How this would pay is doubtful. Some three years ago canteens were ordered to experiment with light claret; but Tommy Atkins unanimously rejected the innovation, both on account of the expense and the want of "body" in the liquor.

Meanwhile, the temperance people have had their say, and declare drunkenness to be on the decrease in India. This provoked somebody to reply that temperance societies' returns were not reliable, an imputation which Mr. Gelson Gregson, the apostle of temperance, indignantly denies. There is a side of the temperance question in the Army which people often lose sight of, viz., that the non-abstainers, particularly where there is a fixed issue of liquor, drink the abstainers' share as well as their own. Hence it becomes within the bounds of possibility that while the abstainers are very much benefited, the drunkards likewise get some good (from their own peculiar point of view). The fact, however, remains that nothing in this world will stop men from getting drunk, and it is probable that the average of "drinks" remains the same.

As was mentioned some time since, the Peshawur border police system is to be manned in future by a force of its own, and all soldiers are to be withdrawn. As a first step, Forts Michin and Shabkadar are to be made over to the civil authorities.

The Soldiers' Industrial Exhibition has been opened at Calcutta (where it is this year held for the first time) by the Lieutenant-Governor of Bengal. The number of exhibits is good, and the quality rather above the average.

Lieutenant-General Robert Hume, C.B., handed over the command of the Lahore Division to Major-General J. I. Murray, C.B., on November 29. Major-General Martin Dillon has also arrived in India to take over command at Lucknow.

Lieutenant-General Hume's tour of service has surely entitled him to some reward. He was made a C.B. over 20 years ago, and after many years in India in command of the old 55th, he became a Brigadier-General, vacating in November, 1877. He returned to India on the Divisional Staff in November, 1879, being posted to Allahabad. In November, 1880, he went up to Candahar to replace Sir Robert Phayre, and a year or so later he conducted, in a manner to call forth the praise of everybody, the difficult operation of withdrawing the last of our troops from Afghanistan. It was generally expected then that he would have got his well-earned promotion to a K.C.B.-ship; but the war was over, and people just then wanted to keep Afghanistan in the background, and he had to be content with the thanks of Government. It is to be hoped that now, after nearly 25 years in India in various important commands, he will receive some mark of the Sovereign's approbation.

Another fatal polo accident is reported, this time from Rawul Pindee. On November 17, Captain Rich, R.E., and Captain McCausland, Paymaster of the King's Dragoon Guards, during a game were racing for the ball, the former leading. So far as can be ascertained, Captain Rich missed the ball, but instead of getting out of the way, he "turned on the ball," and exposed himself broadside on to Captain McCausland, who had not space to avoid him. The result of the collision was that both fell, Captain Rich fracturing his skull. No blame of any sort attaches to Captain McCausland.

The Commander-in-Chief and his Staff have returned to Calcutta, after completing the various inspections laid down for the autumn tour. At every station which his Excellency has visited, large meetings in favour of Colonel Chapman's scheme for getting employment for Reserve men have been held, and the proposals may now be said to have been accepted all over the North of India.

The Madras Army are to have a camp for siege operations at Krishnarajpurani early in January.

Colonel Chapman, as announced, goes home in March. He will probably be succeeded as Military Secretary by Colonel Bogee Combe, of the 10th Hussars.

The last mail brought news to India that Mr. Cross had definitely announced to the House of Commons that in future the unemployed pay of Surgeons of the Indian service was to become a name only, and they were to receive the same pay as British Army doctors. This great concession benefits them to the extent of 31 rupees per mensem, and brings their pay up to the sum which for several years past the Surgeons of the Army Medical Department have been objecting to on the ground that it is neither suitable to their relative rank nor their English rate of pay.

The *Pioneer* of November 29 devotes a whole column to a paragraph which appeared some time since in the *Army and Navy Gazette* referring to its own persistent abuse of the Duke of Cambridge and Lord Wolseley. Ignoring the reference to the latter, it takes advantage of the use of the word "loyalty" to repeat some of its former arguments. But the article in question misses the point of the paragraph, viz., that it is not always pleasant for the officers of the Army to read abuse of their superiors; and the *Pioneer*, in addition, does not recognise the fact that loyalty may mean many other things besides its more restricted sense of devotion to the Throne. There are two sides to every question, and if all of the service papers belong, as the *Pioneer* deplores, to the reactionary school,—*i.e.*, the school of officers who do not hold with many recent changes,—it surely goes some way to prove that their views are, at least, worth hearing, and not necessarily (to quote the article itself) "to be screamed at" as if by a "susceptible woman."

THE RESERVE COLUMN IN NATAL.

[FROM AN OCCASIONAL CORRESPONDENT.]

Etshowe, Zululand, November, 1884.

Since writing in August last the force in the Reserve has been augmented by the arrival of the 82nd or 2nd Battalion, South Lancashire, from England. After a short time spent at Durban and Pinetown, the head-quarters and four companies, under command of Lieutenant-Colonel Lock, arrived at Etshowe in August. In the middle of that month the force at Fort Yolland, the most advanced of the two outposts from Etshowe, was largely increased by two squadrons Inniskilling Dragoons, under Major Martin, and the mounted company of the Welsh Regiment, and a few days later by two Gatlings, Royal Artillery, under Captain Fletcher, thus bringing up the force there to nearly 600 men, temporarily under the command of Major Chater, (91st) Argyll and Sutherland Highlanders. Lieutenant-General Sir Leicester Smyth and Staff arrived at Etshowe about the end of August. On September 5, the head-quarters of the Argyll and Sutherland Highlanders, under Lieutenant-Colonel Robley, and 100 of the Welsh Regiment, under Major Anley, left Etshowe for Fort Yolland; and a week later, two companies of the 82nd, under Major MacDougal, marched to Fort Chater, Entumene, in relief of the detachment of Highlanders there, who went forward to join head-quarters at Fort Yolland, and at last (after many unavoidable delays caused by the attitude of the Usutu party, who, it was rumoured, intended again to attack Usibepu), a general forward movement was made from Fort Yolland on September 13. The force was commanded by Colonel Curtis, 6th Inniskilling Dragoons, with Major McKean as Deputy-Assistant-Adjutant-General, and consisted of two squadrons of that regiment, the mounted companies of the Welsh and Highlanders, two Gatlings and rockets, Royal Artillery, a few Royal Engineers, and the head-quarters and seven companies of the 91st Highlanders, together with the Natal Native Carbineers, and a large number of loyal natives. A position was taken up at a place called Mkondo, on the (so-called) road to Middle Drift, and the spot where Mr. Osborn's force was attacked by the Usutus in May last. The camp was formed on a narrow neck, and intrenched, 100 infantry under Major Mills taking up an intrenched position on a high hill, about half a mile to the north, and close to Komo, the native stronghold. Lieutenant-General Sir Leicester Smyth and head-quarter staff joined that evening. On the 14th, a reconnaissance was made by the whole of the Mounted Force, together with natives, the infantry being left in charge of the camp. The troops, riding over most inaccessible-looking country, marched across Komo, and on the other side penetrated the Inkandhla Bush, while the General and staff and a small escort rode to the top of "Isibuda," a conical hill commanding a view of the whole country. But few natives were seen, and these kept a respectable distance. On the 16th inst., a similar demonstration was made in the direction of the place where Cetewayo is buried. The Force reached the hills overlooking the valley in which lies the grave, and were there met by some chiefs and head-men of the Usutu party, and a long parley ensued between the chief, the General, and Mr. Osborn. The troops reached camp again very late. The country ridden over was very rough and precipitous, but the presence of such a large body of horsemen must have shown the natives that their country is by no means inaccessible to our soldiers should it be necessary to act. The parley with the natives seemed to have been satisfactory, for two days after the camp at Mkondo began to break up, and the welcome news came that the majority of the force would return to Etshowe, the numbers at the outposts being very much reduced. Accordingly, on September 18 the General left with the Dragoons, Royal Artillery, and Mounted Welshmen. The last to go were the Highlanders, who marched on the 19th, and leaving their mounted and two other companies at Fort Yolland under Major Mills, and two more at Fort Chater under Captain Macdonald, reached Etshowe next day. Since then times have been peaceful, not to say dull and monotonous to a degree. A good many officers and married non-commissioned officers have managed to get a little leave to Maritzburg. The last excitement is the news from Bechuanaland; but so many different rumours fly about that no one knows what to believe. The Etshowe Column, however, which has existed so long, is beginning to diminish. The Dragoons left on November 9 for Pinetown, and possibly for Cape Town and Bechuanaland. The Argyll and Sutherland Highlanders are under orders to leave, but it is uncertain when they will do so; but on their departure, the 82nd and two guns, R.A., will be in sole possession. It is to be hoped that in a short time the whole of the troops may be withdrawn, and return to such civilisation as Natal can afford. The time-expired men cannot yet be spared, and, with this new difficulty to face, it is hard to say when they will get off; but we all hope that some day a good time is coming, and endeavour, in spite of the hideous discomforts of life here (in the rainy season especially), to make the best of a bad business.

MEMORIALS AT THE ROYAL MILITARY COLLEGE.

In June, 1883, a Royal Military College Memorial Fund was originated with the object of placing in the College Church memorials in remembrance of all officers who had passed through the College, and who had been killed, or died of wounds or sickness, on active service in recent wars, commencing with the Crimea. The new church of the Royal Military College is, from its size and style of architecture, particularly suitable for the reception of decorative memorials; the walls, morever, are lined with a series of panels, each measuring 6 ft. by 4½ ft., and specially designed for such a purpose. The last published account of the fund shows that about £290 has been received, of which about £140 has been subscribed by officers now, or lately, at the College and by the Gentlemen Cadets. This sum has enabled the Committee of the Fund, at a cost of about £231, to fill four of the panels with memorials of those former Cadets who have fallen in the Crimea, the Indian Mutiny, and the recent campaigns in South Africa and Afghanistan. The memorial tablets are the work of Messrs. Bayne and Co., and are exceedingly effective; they consist of slabs of veined and clouded alabaster, mounted with rich coloured marbles partly in relief, and the upper portion is carved and highly decorated. The names are carved on the alabaster in gilt letters. The Crimean tablet contains forty-five names, amongst which may be noticed those of Major-General Sir J. Campbell, Bart., Brigadier-General H. W. Adams, and Lieutenant-Colonels Mackinnon, Coldstream Guards, Shearman, 62nd, Champion, 95th, and Esman, 41st. The Indian Mutiny record shows thirteen names, including those of Colonel FitzHardinge Berkeley, 32nd; and Majors Haliburton, 78th, and Barnston, 90th. Very noticeable on the Afghan tablet are the names of six officers of the 66th Regiment who fell on the occasion of the disaster at Maiwand; amongst them are three officers who had only just left the College, 2nd Lieutenants Honywood, Olivey, and Outram-Barr. The South African tablet contains 18 names; prominent amongst them is that of Major-General Sir G. P. Colley, who was known and respected by all at Sandhurst. The names of Lieutenant-Colonel Pulleine, 24th Regiment, and seven other officers of the same corps, remind us of Isandula; and we find the names of Colonel Anstruther, 94th Regiment, and Lieutenant Cokayne Frith, the promising young Adjutant of the 17th Lancers, also recorded. A fifth tablet has been ordered in memory of those who fell in China and in New Zealand, and it is intended also to erect a memorial to those who have fallen in Egypt. If the fund receives liberal support from regiments, it is hoped that there may be a sufficiency of money to place on the walls of the church the names of all former cadets who have fallen on active service since the foundation of the College; the church will then, as regards decoration, be not far behind the garrison church at Woolwich or the church in the Wellington Barracks. The committee of the fund are ready at any time to entertain proposals for regimental or personal memorials, the style and character of which must, however, be in accordance with the general plan for the decoration of the church.

The Gazette.

◆

TUESDAY EVENING.

ARMY.

WAR OFFICE, Pall Mall, Dec. 23, 1884.

4th Hussars.—Capt. F. H. Blacker has been seconded for service as an Adjt. of Auxiliary Forces (Dec. 1).

8th Hussars.—Lieut. F. J. Carandini, Adjt., to be Capt., to complete establishment (April 1).

16th Lancers.—Lieut. J. D. Calley to be Adjt., vice Capt. J. E. Leveson, Viscount St. Vincent, who resigns that appointment.

19th Hussars.—Capt. and Brevet Major C. B. H. Jenkins to be Major, vice C. Smith, seconded; Lieut. M. Wright to be Capt., vice Brevet Major C. B. H. Jenkins (both dated Nov. 11).

Royal Artillery.

Capt. G. Bourke, from the Seconded List, retires from the service, receiving a gratuity.

To be Lieutenant-Colonels:—Major W. R. C. Brough (late Madras), supernumerary to the establishment (Dec. 21); Lieut.-Col. J. A. Tillard (late Bengal), from the Seconded List, supernumerary to the establishment, and Majors H. I. E. Ford (late Bengal), upon the Seconded List, and J. H. Annand (late Bengal), supernumerary to the establishment (all three dated Dec. 8).

To be Majors:—Major and Brevet Col. E. F. Chapman, C.B. (late Bengal), from the Seconded List, vice J. H. Annand (late Bengal), promoted (Dec. 8); Capts. S. P. F. Freeth, vice W. R. C. Brough (late Madras), promoted (Nov. 24), and A. S. Griffiths, vice G. J. Gillies, promoted Lieut.-Col. on half-pay (Dec. 15).

To be Captains:—Lieuts. W. Hanna, vice S. P. F. Freeth, promoted (Nov. 24); A. J. Abdy, vice R. W. O'Grady, retired (Dec. 5); F. J. Fox, vice R. A. Rigg, seconded for service at the Royal Military College, Kingston, Canada (Dec. 11); C. M. Barlow, vice A. S. Griffiths, promoted (Dec. 15).

Grenadier Guards.—The promotions to the rank of Capt. of Lieuts. H. J. Craufurd and H. P. St. J. Mildmay to be antedated to July 9 and July 16, vice the Hon. F. W. Stopford, seconded, and E. Antrobus, promoted, respectively; Lieut. J. H. Reynolds to be Capt., vice J. Foster, retired (July 23).

Coldstream Guards.—Capt. and Lieut.-Col. the Hon. E. E. T. Boscawen to be Major, vice Col. F. W. Fremantle, retired on half-pay (Dec. 8).

Line Battalions.

The Royal Scots (Lothian Regiment).—Lieut. E. F. Wade to be Adjt., vice Lieut. C. H. Stisted, who has resigned that appointment.

The Queen's (Royal West Surrey Regiment).—Lieut. A. Elias to be Capt., vice G. D. King-Harman, promoted (Sept. 19).

The Northumberland Fusiliers.—Capts. J. W. Pearse-Hobbs to be Major; E. Le M. Trafford to be Major, vice J. W. Pearse-Hobbs, seconded for service as an Adjt. of Auxiliary Forces (both dated Dec. 12, 1883).

The Royal Warwickshire Regiment.—Lieut. A. W. S. Wingate has been appointed a probationer for the Indian S.C. (Sept. 30).

The Royal Fusiliers (City of London Regiment).—Major P. St. Maur retires from the service, receiving a gratuity; Lieuts. R. D. Garnons-Williams to be Capt., vice H. A. Anderson, retired (Nov. 26); C. H. C. Du Cane, from the Coldstream Guards, to be Lieut., vice G. C. Herbert, promoted.

The King's (Liverpool Regiment).—Lieut. W. A. Cuppage has been appointed a probationer for the Indian S.C. (Oct. 15).

The Norfolk Regiment.—Capt. H. J. Shuckburgh to be Major, vice D. Dickinson, deceased (Nov. 3).

The Devonshire Regiment.—Lieut. T. A. H. Davies to be Capt., vice W. Yorke, deceased (Nov. 22).

The Bedfordshire Regiment.—Capt. F. J. Harden to be Major, vice R. L. H. Curteis, promoted; Lieut. F. G. Mawer to be Capt., vice F. J. Harden (both dated Oct. 10).

The Leicestershire Regiment.—Lieut.-Col. J. Creagh retires on full pay, with the hon. rank of Col.; Capts. C. W. Vulliamy to be Major, vice H. I. Nares, seconded for service on the Staff; and T. F. H. De Burgh to be Major, vice C. W. Vulliamy, seconded for service as an Instructor at the Royal Military College; Lieut. W. S. Stewart-Savile to be Capt., vice T. F. H. De Burgh (all three dated Nov. 15).

[Where not otherwise stated, the foregoing commissions and announcements bear date Dec. 24, and the current year must be understood.]

London Amusements.

◆

The titles of the various pantomimes produced this week are indicative of a managerial belief that familiar subjects are likely to prove most attractive. At Drury Lane, "Whittington" is brought out by Mr. Augustus Harris, at an enormous outlay. "Puss in Boots" is produced at the Grand Theatre, Islington; "Aladdin" at the Surrey; "Cinderella" at the Standard; "St. George and the Dragon" at Sanger's Amphitheatre; "Little Red Riding Hood" at the Pavilion; and "King Kookoo" at the Britannia.

The Crystal Palace pantomime of "Jack and the Beanstalk," written by Mr. Horace Lennard and produced by Mr. Augustus Harris, obtained on Monday a very enthusiastic reception. It is admirably adapted to please the younger folk, and the hero, Jack, is very vivaciously acted by Miss Emily Duncan. Miss Emma D'Auban and Mr. John D'Auban, with Miss Annie Poole, are prominent among the dancers and singers, and the brilliant transformation scene, by Mr. Frederick Fenton, called "The Giant's Treasury," is exceedingly effective.

A slight comedietta, by Miss May Holt, entitled "Sweetheart, Good-Bye," was added on Monday evening to the programme at the Strand. An elder brother resigns to a younger one his claim to the hand of a farmer's pretty daughter, and the story is told. Mr. David James, recovered from his recent indisposition, received a warm welcome from the audience on his reappearance as Perkyn Middlewick, in "Our Boys," which as yet shows no sign of exhausted popularity.

The new fantastic ballet, called "Melusine," is an important addition to the attractions of the Alhambra. With the descriptive music by M. Jacobi, the strikingly picturesque scene painted by Mr. Brooke, and the fanciful dresses of the weird attendants on the powerful enchantress, all gold and crimson or silver and black, the ballet proves a decided triumph for the management, and seems destined for a long run. Mdlle. Sampietro is the principal danseuse, and her style of dancing, at once vigorous and elegant, gained enthusiastic applause from the delighted spectators.

At the Oxford have appeared, for the first time in this country, the Boisset troupe of acrobats and pantomimists, who cleverly perform some daring feats in a novel and grotesque fashion. A new Spanish ballet, decorated with pretty scenery and displaying some tasteful dresses, is now a prominent feature of the reconstituted programme.

The World's Fair, at Islington, is a combination, in the spacious area of the Royal Agricultural Hall, of all the characteristics of those old fairs regarded at one time as the acknowledged pleasure-places of the people.

Admiral Lethbridge received a telegram at Queenstown on Monday from the Coastguard officer at Rathmullen, stating that another body from the wreck of her Majesty's gunboat Wasp had been recovered, and that it was interred on Sunday in Killult Cemetery. This makes a total of 41 bodies recovered out of the 50 men who went down in the vessel.

Capt. Field, R.N., who at one time was a candidate for Parliament at Brighton, has received from his friends a testimonial of their regard and esteem, in the shape of a written address to himself and a diamond pendant to Mrs. Field.

Information from Madagascar just arrived at Paris indicates that the blockade is absolutely useless, as English and American vessels are able to disembark without difficulty at most of the ports of the eastern coast, and also at several points on the western coast. Preparations were being made at Tamatave for an expedition on the north-west coast, Vohemar and the Bay of Diego Suarez being named as the principal objects of the intended operations.

HOGE'S HOREHOUND HONEY.—What is known as the "Bee Belt" of Southern California is one continuous bed of honey-bloom, one sweet bee-garden throughout its entire length; but there is one part of it which the plough has not yet invaded, that is the region where the Horehound plant flourishes in one glorious blaze of purple and gold. The tropical luxuriance of these plants is so profuse that they brush against the feet at every step, and close over them as if you were wading in liquid gold. The air is sweet with its fragrance, and tuneful with the humming wings of the bees gathering this precious panacea: this honey-full horehound is a great favourite with the bees, and is one perpetual feast for them. They revel in its bloom long after the flowers of other countries have withered and gone to seed. A single plant will at times be visited by a whole hive of bees at once; the grand hum of such a multitude of wings impresses the listener with the fact that the winning of more than ordinary honey is going on. The product of a dozen or two of these plants is sufficient for the wants of a whole hive. In this perfect paradise for bees the petals of the continuous sheet of blooms drink in the vital sunbeams, and the bees hug this favourite flower with profound cordiality, and push their blunt polleny faces against them, like babies on their mother's bosom; and fondly, too, with eternal love, does Mother Nature clasp her small bee babies and suckle them, multitudes at once, on her warm Californian breast. The Horehound Honey so gathered by these little almoners of Nature is put up in bottles, and retailed by all Chemists, &c., at 1s 1½d each. W. L. Bright, Esq., son of the Right Hon. John Bright, M.P., says:—"Hoge's Horehound Honey cured his father of a bad cough."

Printed and Published for the Proprietors, at the Office, No. 6 Wellington Street, Strand, London.—Saturday, Dec. 27, 1884. Letters on Business and Remittances should be sent to Mr. Richard James Wood.
